

Day 1 Live Session

05:58 - 05:59

Audio shared by Sumedha: Not in the other...

13:26 - 13:26

Audio shared by Sumedha: Mmm.

14:50 - 14:53

Uthappa Outskill: Hey everyone, a very good evening.

14:53 - 14:57

Uthappa Outskill: Good morning and good afternoon for everyone joining us outside India. How are you doing?

15:08 - 15:16

Uthappa Outskill: Awesome, crazy. I'm sure a couple of you, or at least most of you, we have met the last Friday as part of our official kickoff call.

15:16 - 15:25

Uthappa Outskill: And, I'm of course, not going to go discuss everything that we did in that particular session today again, because that would take a little more time, but first of all.

15:25 - 15:35

Uthappa Outskill: Welcome back for everyone, and also very warm welcome to your day one of your 14-day sprint. It's a long journey of 2 weeks that we're going to get started today.

15:35 - 15:54

Uthappa Outskill: Now, there's... if there's something that I could request all of us to have in these 14 days, that would be patience, that would be cooperation, so that we can all see it

through these 14 days, these intense 14 days, I mean, without any hiccups, if we can complete it, then that, as I told you.

15:54 - 15:59

Uthappa Outskill: We should have to see this as a partnership more than a one-sided delivery, right?

16:00 - 16:05

Uthappa Outskill: I'm gonna switch the chat to host and panelists from this time on, so that you're not distracted.

16:06 - 16:15

Uthappa Outskill: So we can see your messages. Throughout the session, we can see your messages, but you might not be able to see others' messages, just to make sure that you are not distracted while the teaching is ongoing.

16:16 - 16:26

Uthappa Outskill: If you've... I mean, if there's any echo in the voice, then I would assume that is because your Zoom has been logged into both your web version as well as the app version. Just try logging out from one of them.

16:27 - 16:35

Uthappa Outskill: I mean, you can be here on the Zoom app, and you can log out the Zoom web version if you've already been logged in, because that happens sometimes.

16:36 - 16:39

Uthappa Outskill: Cool, just give me a second to set up my screen.

16:40 - 16:45

Uthappa Outskill: And, in the meantime, I just want to know how many of you have missed our previous kickoff call, just put it in the chat.

16:46 - 16:53

Uthappa Outskill: If you have missed, if you have attended, don't put it. Only if you've missed our previous kickoff call, or has not gone through the recording, you can just put it in the chat.

16:57 - 17:07

Uthappa Outskill: Okay, quite a few of you, right? There are certain important things that we discussed in the kickoff, which I cannot cover again today, because that was a 3-hour long session, which we'll not be able to cover today.

17:07 - 17:18

Uthappa Outskill: So for that, I would have to tell you to depend on the recording that has been provided to you, or the handoff document that has been provided to you in your LMS. Later on, during the break.

17:18 - 17:23

Uthappa Outskill: The team is going to brief you on how to find these recordings, resources, and all those... all the stuff.

17:23 - 17:30

Uthappa Outskill: Okay? For those of you who missed kickoff call, I'm sure you'll be wondering who's the people

17:30 - 17:39

Uthappa Outskill: that you're seeing on the screen. So, my name is Uthappa, and I will be your host, along with Sumedha and Shasti, for the remainder of the 14 days.

17:39 - 17:57

Uthappa Outskill: I'll be on and off, but Shasti and Sumedha will be seeing through this entire 14 days of the cohort, coordinating with you and helping you get through these 14 days during your sessions. So, this is the team that you will be interacting with. We'll also have Sharshvat helping us in the back-end operations as well, so you will be interacting with him also in different capacities.

17:59 - 18:06

Uthappa Outskill: Good so far. A final check on my audio-video, because I see a couple of them still talking about voice is breaking up, video is not good.

18:09 - 18:24

Uthappa Outskill: Okay, I'm going with the majority folks. Most of you are saying all good. So anybody else who's having trouble with the voice, either you will have to check your network, or please check if you have been logged into two different interfaces. The Zoom has a web version, and Zoom has a...

18:24 - 18:30

Uthappa Outskill: desktop version as well, sometimes it gets logged into both. It has happened to me, so I'm asking you to just quickly check that part.

18:32 - 18:35

Uthappa Outskill: Yeah, I am feeling better, thank you. Thank you so much.

18:35 - 18:37

Uthappa Outskill: Alright, so...

18:38 - 18:53

Uthappa Outskill: Before I hand off to the mentor for the day, I will take about 5 to 10 minutes at max, revisit a couple of pointers, and also give you a little more information on today's session, and how the structure of the session is going to be, and then we'll get started. Okay? First of all.

18:55 - 18:59

Uthappa Outskill: Give yourself enough room to get comfortable in the first 3 days.

18:59 - 19:13

Uthappa Outskill: This is a pattern. I've seen... I mean, I'm telling you, this is the 14th cohort that we are running, so there is a particular trend or the particular way the cohort flows, and what we have seen is, generally, the first 3 days is where

19:13 - 19:24

Uthappa Outskill: you will find a bit of discomfort with the structure that we are following, with the... it's more of, like, your settling in period. I'm telling you, Afran, so that you can prepare in that similar manner, because you're getting to...

19:24 - 19:34

Uthappa Outskill: One, you're getting introduced to a lot of complex stuff which you have not done with the help of AI in the past. So that kind of makes it, by default, uncomfortable for you, or uncomfortable for you, sorry.

19:34 - 19:40

Uthappa Outskill: Second thing, The structure is going to put you into test.

19:40 - 19:50

Uthappa Outskill: Right? The sessions that we run for these 14 days is going to be easily, run up to 4 to 4.5 hours, as I mentioned in our previous kickoff call.

19:50 - 19:56

Uthappa Outskill: Of that, the first 2.5 hours is going to be a mentor coming in and teaching you all those workflows and how to do stuff.

19:56 - 20:13

Uthappa Outskill: And then you go get a break, and once we are done with the break for 5 to 10 minutes, we're going to get started with the breakout room activity, which is going to be more of hands-on session. We will give you a workbook, put you into smaller breakout rooms, and ask you to solve it while the mentor in that breakout room is going to help you out.

20:13 - 20:20

Uthappa Outskill: We will talk about breakout room, what the workbook is for day one, etc, all of that information later on after the main session is done.

20:21 - 20:29

Uthappa Outskill: The purpose I'm highlighting this is be prepared, and try not to ask us to close the session in 2 hours or 3 hours, because that is not going to happen.

20:29 - 20:44

Uthappa Outskill: these 14 days, take it as an opportunity that you're putting yourself into to get through and learn everything about AI, so that you don't have to do it after 14 days. Whatever you do after 14 days should be more of implementation, not learning AI as such.

20:45 - 20:46

Uthappa Outskill: Okay?

20:46 - 20:49

Uthappa Outskill: Is this expectation clear? First 3 days?

20:49 - 21:03

Uthappa Outskill: go easy on yourself. Whenever you feel uncomfortable or you feel intense, just sit back, relax. You will anyways have recordings to go back to later and reinforce your learning, but just absorb as much as possible. Don't expect everything to

21:03 - 21:13

Uthappa Outskill: to kind of magically, fall in... fall in place for you, or you'll remember everything that we teach in those two to three years might not happen, a lot of practice is required.

21:14 - 21:15

Uthappa Outskill: Okay, this is first thing.

21:16 - 21:17

Uthappa Outskill: Then.

21:17 - 21:33

Uthappa Outskill: I've told you already the structure of the 14 days as well. We will explain it on a day-on-day basis, how each session flows, but this is a structure, main session, and then you'll have a breakout room activity. While in the main session, I want you all to find a Q&A box that is available at the bottom of your screen. Do you see that?

21:36 - 21:38

Uthappa Outskill: Do you see a Q&A box?

21:39 - 21:58

Uthappa Outskill: So, while in the session, if you have any questions, you will have to put it into that box, so that we have a wonderful set of co-mentors who's going to help out in the breakout rooms, as well as this Q&A box. They will answer all those questions, you're putting it in the Q&A box. Anything that you put in the chat might not be taken up or answered, because that is more for an interaction

21:58 - 22:03

Uthappa Outskill: For the mentor. So, all your questions will have to go into the Q&A box. So the Q&A box

22:03 - 22:06

Uthappa Outskill: The mentors who are resigned will be giving you an answer.

22:06 - 22:12

Uthappa Outskill: As of now, Q&A is not open, yes, because we are yet to start the session. As soon as we open, you will have

22:12 - 22:15

Uthappa Outskill: the Q&A box to ask your questions.

22:20 - 22:26

Uthappa Outskill: I just have 3 slides to give you... reinforce couple of informations that we have covered, and then we get started.

22:34 - 22:36

Uthappa Outskill: Yeah, so...

22:36 - 22:54

Uthappa Outskill: we covered the entire scope of LMS. We'll again cover a couple of important spaces that you should be aware of later. After the break is done, we'll get to that. The schedule, the agenda, and everything is available there. We have also discussed the Q&A box, that is available for you to ask questions.

22:54 - 23:08

Uthappa Outskill: Just make sure you're all part of the WhatsApp group link that is attached in your LMS under welcome steps, so that we keep sharing all the session communications through that. You can also be part of the group so that you don't miss out on any of the comms.

23:08 - 23:14

Uthappa Outskill: For whoever is wondering where to find it, we will explain that later. During the break, we'll get to that part as well.

23:15 - 23:22

Uthappa Outskill: There's one important thing I want to highlight before we proceed forward, and that is something that we discussed and aligned ourselves

23:22 - 23:27

Uthappa Outskill: During a kickoff call. Any guesses on what that was, apart from what you're seeing in the screen?

23:30 - 23:32

Uthappa Outskill: We discussed something very important.

23:34 - 23:35

Uthappa Outskill: on Friday.

23:35 - 23:38

Uthappa Outskill: So that you absorb information.

23:43 - 23:51

Uthappa Outskill: Yes. Of course, the goal is to become a native AI problem solver, or an AI generalist, but there's one thing that you need to do for that to happen.

23:53 - 24:07

Uthappa Outskill: learn with an open mind, yes. Keep your experienced hat aside for these 14 days. However right or wrong those could be, try to keep it out so that you absorb information, because it's a very short span. We cannot...

24:08 - 24:21

Uthappa Outskill: consume a lot of our sessions and explaining why it is being taught in a certain manner, or why that topic is important for you. So, absorb those 14 days. You anyways have channels where you can ask your questions, and after that, you figure it out what is the right approach for you.

24:22 - 24:28

Uthappa Outskill: Okay? So that is one important thing. Keep that experienced hat aside.

24:29 - 24:31

Uthappa Outskill: So, what is today's session all about?

24:33 - 24:48

Uthappa Outskill: every cohort, we keep trying out new things, keep trying new narratives in terms of these sessions, so that it kind of, connects with the learners better. And as one thing that we have observed in the last couple of cohorts, at least the last 10 cohorts is,

24:49 - 24:57

Uthappa Outskill: What learners don't know at this point of time is how to personalize the responses of your LLMs and AI tools to suit your needs.

24:57 - 25:08

Uthappa Outskill: Right? While we give you a generalist approach, it is your job to convert it into the respective use cases, respective domain knowledge, or whatever you do.

25:08 - 25:12

Uthappa Outskill: Personalize all of that generalist approach to your respective work.

25:12 - 25:15

Uthappa Outskill: So today's session is going to be one in that direction.

25:16 - 25:22

Uthappa Outskill: There are a lot of things we're going to cover today, but specifically, it is going to help you out. How do you kind of get the best

25:22 - 25:25

Uthappa Outskill: output, best,

25:25 - 25:38

Uthappa Outskill: conversations out of your LLMs, like ChatGPT Cloud, or whatever you can... whatever you use. So, in this regard, we will be discussing about context engineering, we will be discussing about custom instructions.

25:38 - 25:40

Uthappa Outskill: And we'll also understand

25:40 - 25:54

Uthappa Outskill: Now, every time you might have absorbed, let's say you want to create a deck for your reviews, right? Weekly reviews. Every time you want to do that, you give a prompt, or you give your context to your Chat JPT or Claude.

25:54 - 26:12

Uthappa Outskill: And every time, the output keeps on changing. It's going to be different, it's not going to be uniform. Have you observed this? If you have been a very active user with all of these platforms, every time you try to ask it for something which should be a standard format or standard approach, it keeps changing.

26:12 - 26:24

Uthappa Outskill: Right? You might have already heard of your skills in bootcamps and mastermind, so we're going to build on top of that, build some workflows around it, and show you how you can create that uniformity across your work

26:24 - 26:26

Uthappa Outskill: with the help of these AI tools.

26:27 - 26:40

Uthappa Outskill: Right? And then finally, how do you connect different applications? Overall, it is going to be about taking an LLM which just sits there without any context about yourself, feeding it enough amount of information about yourself.

26:40 - 26:49

Uthappa Outskill: Create some skills, and connect the tools that you use on a regular basis, and create workflows which can immediately start helping you out

26:49 - 27:02

Uthappa Outskill: ease up your, let's say, the time, or also the productivity and the outcomes that you get from these LLMs. That is what we're going to cover today. You'll also have a workbook later in the day, but is it clear so far?

27:07 - 27:09

Uthappa Outskill: Is the day one context clear?

27:09 - 27:19

Uthappa Outskill: By the end of the day, all I'm expecting you is to know how to personalize responses from AI, and also build workflows around it, so that you can start immediately putting it to effect on your

27:19 - 27:21

Uthappa Outskill: In your workplaces.

27:24 - 27:25

Uthappa Outskill: Cool. Great.

27:26 - 27:31

Uthappa Outskill: I'm just leaving it out here so that before the breakout rooms, you make sure this is done.

27:31 - 27:33

Uthappa Outskill: If you have joined from Zoom's

27:34 - 27:48

Uthappa Outskill: browser, so when you click on a Zoom link that would have sent you, there are two options that you see. One, you will see Join from Zoom Workplace app. Second, you will see Join from browser. If you have joined from the browser, you will not be able to join our breakout rooms.

27:48 - 27:58

Uthappa Outskill: So you have about next 2 to 2.5 hours to make sure you have a Zoom Workplace app installed in your system, specifically for Windows and Mac.

27:59 - 28:18

Uthappa Outskill: If you're on Chromebook, it'll not work on Chromebook. Whether you install the app or not, it'll not work on Chromebook. If you're on Windows or Mac, make sure you download this application. You see that download highlighted button when you click on these Zoom links, or you just do a Google search or perplexity search to download Zoom Workplace app, and it'll help you download.

28:18 - 28:20

Uthappa Outskill: It'll give you links to download.

28:20 - 28:25

Uthappa Outskill: Okay? So do that before your breakout room activity, so that we don't have to...

28:25 - 28:34

Uthappa Outskill: a firefight later on, have to join the breakout rooms, and lose precious amount of time as part of the breakout room activities.

28:35 - 28:40

Uthappa Outskill: Cool, with that... Are we all set to get started with this journey?

28:40 - 28:46

Uthappa Outskill: I wanted 10 minutes, I think you've given me 10 minutes, I'm done, but are we all good to get started with this journey?

28:47 - 28:52

Uthappa Outskill: drop a... Boom in the chat, as loud as possible.

28:57 - 29:04

Uthappa Outskill: Awesome. Crazy. So, what we're going to start today is going to run like a marathon for the next 14 days. So, do not ask me for...

29:05 - 29:22

Uthappa Outskill: in between the sprint breaks, not... will not happen. We'll try as much as possible to give you two breaks during the sessions, but sometimes, depending on the length of the session and the complexity, we might restrict to one break of 5 minutes, somewhere between 5 to 10 minutes, but it is going to be a marathon, so mentally be prepared for that.

29:22 - 29:27

Uthappa Outskill: Make sure you attend every session live to get the best outcome of it.

29:27 - 29:37

Uthappa Outskill: If you're assuming you learn everything from recordings, it is not going to happen, folks. You need to come live, ask your questions, and then get reinforced with the recordings, not directly go to recordings.

29:38 - 29:42

Uthappa Outskill: Okay, so with that, let's invite you... invite the mentor for the day.

29:42 - 30:01

Uthappa Outskill: somebody whom you've all met in your previous masterminds or bootcamps, if you've attended it. So, it is Dileep. He's the head of AI Initiatives at, Outskill, also the key role person in basically designing all of these courses, curriculum, and also,

30:01 - 30:07

Uthappa Outskill: he has been an AI researcher for a very long time, so let's all welcome Dileep to the session here.

30:08 - 30:12

Uthappa Outskill: With the loudest cheer as possible, and let's get started with this journey.

30:17 - 30:19

Uthappa Outskill: Hi, Dirip, welcome back again.

30:19 - 30:21

Dileep Karri: Hello, welcome, welcome, everyone.

30:22 - 30:27

Uthappa Outskill: Wonderful. So, folks, I leave it to you and Dileep. So, Dileep, over to you.

30:28 - 30:32

Dileep Karri: Yeah, thank you, thank you, Udupa. We'll get started, right away.

30:37 - 30:47

Dileep Karri: All right. So, hi everyone. Anybody who doesn't know me on the chat, you can just say me. If you have not seen me before, you have not heard me before.

30:47 - 30:49

Dileep Karri: etc.

30:51 - 31:04

Dileep Karri: All right. For all of you, a quick introduction before we get into the meet. My name is Dileep. I'm the head of generative AI Education at Outskill. I have been for around 8 plus

31:04 - 31:15

Dileep Karri: years in, education. My experience has been, I have done AI research at, IIT Madras, kind of,

31:15 - 31:28

Dileep Karri: You know, for others who don't know what IIT is, think of it like an equivalent to MITs of the United States, etc, a prestigious institution. I was doing AI research. Due to some reasons, I had dropped

31:28 - 31:30

Dileep Karri: After doing around 7 years of

31:31 - 31:50

Dileep Karri: AI research, and then we have, you know, kind of moved, ahead, and I've worked with multiple education companies, and right now, I'm at Outskill. So, one thing for all of you to know, I'm not a trainer by profession, okay? What that means is.

31:51 - 32:08

Dileep Karri: I am not somebody who is, like, a trainer-trainer, per se. I have been implementing AI, I have been leading AI initiators, both in my company, as well as helping enterprises, and those learnings, I kind of put it together and bring it forward to you. So whatever I tell you is more...

32:08 - 32:14

Dileep Karri: practical, less theoretical, etc, all that. Alright, so let's get started.

32:21 - 32:24

Dileep Karri: Adjust... Setting up...

32:30 - 32:31

Dileep Karri: Boo.

32:35 - 32:42

Dileep Karri: All right, so I will keep turning the chat on and off. For the questions part, you can use the Q&A block so that

32:43 - 32:49

Dileep Karri: There is focus, and we are on topic always. Alright, so let's get started.

32:52 - 33:03

Dileep Karri: Okay, first of all, don't treat this entire thing as a sprint, it's a marathon. Today is the pace setter. What it means is, initially, I will go slow.

33:03 - 33:20

Dileep Karri: there are some topics you would have heard before, right? I will be revising some of the topics and then go into slightly new topics. So it's a mix of the old and new, so that we get started and we bring everyone to the same level.

33:20 - 33:43

Dileep Karri: Okay? So today's session, some of you might find it a repetition, some of you might find it slow, some of you might think, okay, this is something I know before, but I promise you, there are some pieces which are new, which I know for definitely that you might not know, but still, I want to make it clear that there is some things here and there that you should, you know, I will kind of revisit that.

33:43 - 33:47

Dileep Karri: Okay? This is something I want all of you to understand.

33:47 - 33:52

Dileep Karri: Right? When you are small, right, you know that the sun rises in the east.

33:52 - 33:59

Dileep Karri: Then, after a few years, you are being taught that the Earth moves. Now, neither is rock.

34:00 - 34:05

Dileep Karri: Right? Neither of that is wrong. Earlier, you were... you have been taught

34:05 - 34:10

Dileep Karri: You know, the sun rises in the east in your elementary school, then when you

34:10 - 34:28

Dileep Karri: came later, you had taught the Earth News. You will kind of find a similar shift in learning right now, where you will think, okay, in the earlier sessions, like Mastermind, Boot Camp, or whichever place you came from, this was told, but now they are saying this.

34:28 - 34:44

Dileep Karri: Okay? I want you to understand that that time, at that level, sun rises in the east, then you were taught the Earth moves, then you were taught the sun moves, then you were taught the entire systems move around each other.

34:45 - 34:52

Dileep Karri: Now, if you were taught the entire systems move around each other in your elementary class itself, your brains will break.

34:53 - 35:04

Dileep Karri: Okay? So trust us that, you know, whatever we have told there, whatever told here, the slight changes we make are for a reason. Right now, we are upgrading you and bringing you to a level.

35:05 - 35:20

Dileep Karri: Okay? So therefore, I want all of you to understand that, you know, what we are going to do right now in terms of different things, it will change, okay? The same things that you are told in the other sessions before this.

35:20 - 35:33

Dileep Karri: we might change slightly. It doesn't mean that, you know, we are contracting ourselves, we are reframing, we are, you know, kind of re... you know, reframing that so that you understand in the right manner.

35:33 - 35:35

Dileep Karri: Okay? Clear?

35:36 - 35:42

Dileep Karri: Everybody good? Different stages of learning, different ways of, packaging.

35:42 - 35:50

Dileep Karri: Okay, the most important part people ask us during this, and I want to say it right away, is, you know.

35:50 - 36:03

Dileep Karri: Is ChatGPT better? Is Claude better? Is Grok better? Is this better? Is that better? Etc? What I want you to frame is, ChatGPT Claude is the car, the models are the engine.

36:03 - 36:21

Dileep Karri: Right? Ture, we drive and we take it forward, so whatever principles you're going to learn, irrespective of it is ChatGPT or Claude, irrespective of whether it is a BMW, whether it's a Tesla, whether it's a Mercedes, whether it is, you know, a Morris garage.

36:21 - 36:24

Dileep Karri: Right? These principles would work.

36:24 - 36:42

Dileep Karri: Okay, wherever there is a slight difference, I will guide you, but more or less, whatever I teach, the principles work. So if I'm showing some examples on Claude, don't think that, you know, because I'm showing it on Claude, you will not be able to see it on ChatGPT, or we are not teaching ChatGPT. We will come to those

36:42 - 36:52

Dileep Karri: things also, but understand that what we are teaching is, in a way, driving AI, but not driving Claude, driving ChatGPT, driving Groc, etc.

36:52 - 36:53

Dileep Karri: Clear? Good.

36:55 - 36:57

Dileep Karri: Right? Initially, we'll go slow.

36:57 - 37:01

Dileep Karri: I'll take you all along, and I'll tell you when I'm pressing the accelerator.

37:01 - 37:02

Dileep Karri: Okay?

37:03 - 37:03

Dileep Karri: Right.

37:04 - 37:17

Dileep Karri: So, by the end of today, my thing is very simple. AI knows who you are, you can connect apps, and you can run things on a small schedule. That's all. Today, you'll not be ambitious.

37:17 - 37:25

Dileep Karri: We will just try to understand if AI knows who you are, reaches your apps, and kind of set up a small schedule of something.

37:26 - 37:29

Dileep Karri: Okay, so let me know the chat, and tell me

37:29 - 37:33

Dileep Karri: When has AI ever felt average for?

37:34 - 37:37

Dileep Karri: When has AI felt average? If you can let me know.

37:42 - 37:56

Dileep Karri: Okay? Some people are saying all the time, Chad GPT, 3, 5 years ago, basic questions, writing, when wrong result, inadequate context. So you asked AI to do a work, it gave you average output.

37:57 - 38:02

Dileep Karri: Great, awesome. I'm turning off the chat so that I can... you can all

38:02 - 38:11

Dileep Karri: you know, kind of focus, okay? There are multiple times you would have felt that the work of AI felt slightly average.

38:11 - 38:24

Dileep Karri: And you will now try to understand how it can become better. One small line to kind of convey that understanding very clearly, and this is in the words of Ben Affleck.

38:24 - 38:43

Dileep Karri: Okay? I hope everybody knows Ben Affleck. He's a great Hollywood actor come director come writer, has done some excellent work over the years, and for those who don't know, he has built and sold a \$600 million AI company to Netflix, okay?

38:43 - 38:51

Dileep Karri: So, I like to pick... analogies and understanding from people who are not core AI.

38:52 - 38:59

Dileep Karri: Why? My own personal experience. I learned statistics in my undergrad, I learned statistics in my post-grad.

39:00 - 39:12

Dileep Karri: I did not get it very well. I still had a lot of doubts. Then when I went to my professor, my professor suggested that I should do the statistics course this time with the humanities department.

39:12 - 39:24

Dileep Karri: So when I did it with the humanities department, I learned under a psychology professor, that's when the intuition, the knowledge actually clicked, and now I can explain statistics concepts easily.

39:24 - 39:35

Dileep Karri: So in the same way, instead of quoting the AI scientists or the AI CEOs, I will quote a non-AI person. And this is a line he said, which stayed in my mind, which I'll share with all of you.

39:36 - 39:55

Dileep Karri: AI is a master craftsman, but an average artist. Once again, AI is a master craftsman, but an average artist. What it means is, craftsman is somebody who can replicate patterns very well, whereas artist is someone who can synthesize patterns.

39:55 - 40:01

Dileep Karri: So, when AI works, it's a great master craftsman in the way that if you teach it a craft.

40:01 - 40:20

Dileep Karri: And you show how it is done. It can replicate that beautifully, and it can show you everything clearly, but out of multiple things, if you ask it to create something new, it does. It is not that it does not do. Models are getting better, they are reaching there.

40:21 - 40:32

Dileep Karri: But that creativity, when I complete... when I kind of compare with the rest of the folks, it is kind of average. And that linchpin, if you get in your head, you will know how to use AI very well.

40:33 - 40:36

Dileep Karri: Do you understand this part clearly, everyone?

40:36 - 40:44

Dileep Karri: The difference between craftsman and the artist, craftsman looks and replicates, artist creates from scratch.

40:46 - 40:48

Dileep Karri: Good? Awesome.

40:52 - 41:06

Dileep Karri: So now, what you need to understand is, when a surgical knife... surgeon uses a surgical knife, right, the surgical knife does not make the surgeon, the surgeon makes the knife. Again, a common analogy I use.

41:06 - 41:15

Dileep Karri: You cannot say that, you know, the operation got complicated or failed because of the sjan knife, not me.

41:15 - 41:33

Dileep Karri: So, people who blame AI for, you know, mistakes they make, they are trying to fall in the same trap. AI is a tool. No hospital or no system would ever acquit the surgeon when they blame the surgeon's life.

41:33 - 41:40

Dileep Karri: Okay, similarly, you have to own up to the work you are doing. It is your job to learn how to use the tool properly.

41:41 - 41:57

Dileep Karri: Okay? So, real quickly, let us understand prompt. A prompt is, like, the order you place at the counter. Like, for Indians, it is, like, two dosas, one filter coffee. For others, it could be, like, one Americano with two croissants.

41:57 - 42:15

Dileep Karri: And I have... I remember this experience in Ireland I had when I was standing in a line in one Starbucks, and a gentleman, four people ahead of me, was explaining, I need a mocha with a shot of condensed milk, Basis, you know, decaf.

42:15 - 42:17

Dileep Karri: Then he was talking some...

42:17 - 42:36

Dileep Karri: tons of terms I did not understand, and, you know, the barrister at the counter was making furious notes on what coffee needs to be made. That was the very first time I understood that you, you know, I'm usually used to ordering one coffee, then I understood that you should say a lot of things

42:36 - 42:37

Dileep Karri: to the barista, to kind of

42:37 - 42:53

Dileep Karri: convey what the coffee is. So, in a way, when you are prompting, you are conveying, you know, what you want as a coffee, and then you wait for the answer, but we will now take a switch from prompt to context engineering.

42:53 - 42:59

Dileep Karri: Where context is like the case file the doctor reads before prescribing.

42:59 - 43:15

Dileep Karri: Okay? Your history, your allergies, what you tried already, okay? Note a good doctor, you know, will kind of just take what you have and present it. They will ask you a lot of diagnosis-based questions.

43:16 - 43:25

Dileep Karri: So, in a way, think about this, right? You know, what you should understand is, you are trying to move away from prompting to briefing.

43:25 - 43:36

Dileep Karri: Okay? What we are trying to do is move away from prompt towards a brief, where, in a brief, we give AI what it needs to succeed.

43:36 - 43:45

Dileep Karri: Okay? We are still revising quite a bit of things. In half an hour, or, you know, 20 minutes, you will start seeing something new.

43:45 - 44:03

Dileep Karri: For people who are like, this is something we already saw, you know, I'm trying to, you know, kind of revise and bring me... bring you all up to speed. Okay, reactions on the chat, if you're okay, expectation is set, you are not like, okay, you know what, I thought it is going to be different. Dilipi saying the same, right? Okay.

44:04 - 44:13

Dileep Karri: So, what we're trying to do is, we are trying to move away from prompt to a brief. Forget prompting, okay? Sun rises in the east is dark.

44:13 - 44:21

Dileep Karri: Now, we are going to understand the laws of copper Nekus as to how systems of solar universes move.

44:21 - 44:32

Dileep Karri: In that, one key thing to understand is you are never prompting AI, but you are providing context to AI. You are providing a brief so that AI knows what it needs to succeed.

44:32 - 44:34

Dileep Karri: Think of AI as this.

44:34 - 44:47

Dileep Karri: You hired the smartest person ever available on the planet for the job that you're hiring for. You cannot find any person more smarter, any person more knowledgeable for this job.

44:47 - 44:58

Dileep Karri: Tell me, you just hired this person, and you gave a job to do. Will the person be able to do the job well in your current company? Yes or no on the chat?

44:59 - 45:03

Dileep Karri: In your current company, can this person do the job well, yes or no?

45:04 - 45:05

Dileep Karri: Okay?

45:06 - 45:14

Dileep Karri: Awesome, great. I see 95% saying no, a few 5% saying yes, great.

45:14 - 45:37

Dileep Karri: Because without context, they cannot succeed. Like, some people have given the accurate answer, no if without context. You have to provide the context of the company, you have to provide the context of the job, you have to provide a context of what they are trying to understand and do. Only with that context will they be able to do the job properly. So, providing context becomes absolutely important.

45:38 - 45:44

Dileep Karri: So now we will try to, you know, kind of provide some context as we kind of do some task.

45:44 - 45:51

Dileep Karri: Okay? You get the most skilled person, they know nothing about your work, they are bound to fail.

45:51 - 46:09

Dileep Karri: And that's why, even if you hire the smartest people, without proper induction or onboarding, they will fail. You get the smartest AI, your Fables, your Astra, and you don't specify what you want properly, they are bound to fail. And that is why you feel the AI to be average.

46:10 - 46:29

Dileep Karri: Okay? So, every brief you provide AI has got three sections which are compulsory, okay? These three sections are compulsory for that, and the sections are goal. What should AI typically do? Okay? The what should AI typically do? That is the goal.

46:29 - 46:39

Dileep Karri: Then, audience who reads the result, context, what does AI need to know? What is known? What is unknown, which assumptions actually

46:39 - 46:59

Dileep Karri: you know, kind of matter, okay? What is the goal? What is the, you know, the part behind this? And what are the things that really matter? All right? So, for those of you who are curious about why am I kind of moving my focus, I have a second screen where I have put in some notes and pointers, which I am referring, alright?

47:00 - 47:16

Dileep Karri: So, the brief needs to have what should AI accomplish, who is the audience for which this goal is accomplished, and what is the context. If you have these three, you are able to brief AI much better. Some of the optional things that are required in this case.

47:16 - 47:32

Dileep Karri: could be, like, you know, what are the constraints under which AI operates? You know, what are the things that you might not know, okay? So those are the kind of things. This is an optional thing, right? Recently, people have observed

47:32 - 47:40

Dileep Karri: Right? So now what has happened with AI is, right now, they have put in a lot of guardrails.

47:40 - 47:47

Dileep Karri: Okay, how many of you have been following the news around the Fable models, the Astra models, right?

47:48 - 47:56

Dileep Karri: Where people were saying we ran a lot of alignment tests, we kind of put in a lot and lot of guardlets.

47:56 - 47:58

Dileep Karri: How many of you have seen that news?

47:59 - 48:08

Dileep Karri: Okay? The guardrails of, you know, what people said when we kind of released the model. So, those of you who missed the brief, what happened is.

48:08 - 48:23

Dileep Karri: When the organization like Anthropic released Fable, they first released Fable, then the US government kind of put in objections saying it was too powerful, then they removed, then they put more card rails, and they landed it. Similarly, Astra.

48:23 - 48:44

Dileep Karri: They went through a government approval process, and with the guardrails they have put in back, the Hugging Face incident or other incidents we have seen, that is the later model after this. The later models after Astra or other places, that is where this Hugging Face incident happened, where the model hacked the entire site.

48:44 - 48:59

Dileep Karri: Okay? So, what now people are saying is, let us get onto a table, let us slow down the work on AI, and make it very safe before we release it. I'm not going to go into that, but that has a practical implication to all of you.

48:59 - 49:06

Dileep Karri: So, what it means is, AI is sort of playing it very, very safe nowadays.

49:06 - 49:13

Dileep Karri: AI is playing very safe nowadays. Due to that, there is a slight degradation in the performance of AI.

49:13 - 49:21

Dileep Karri: Because... because it is playing safe, it is not giving its best, it is giving the safe way to kind of do that.

49:22 - 49:32

Dileep Karri: So that's why you should now give it, like, one finished example that you like of a particular work you are trying to do, and say why you liked it.

49:33 - 49:40

Dileep Karri: That will teach AI to do a better work, rather than asking it to simply write from scratch.

49:40 - 49:56

Dileep Karri: Okay? Today, I'll show you a process where I'll write from scratch, but I'll do a lot of improvements on the fly. But this is one important thing that I've observed, some important practical tips for all of you. Try to ensure that you are, you know, kind of working with, in a way.

49:56 - 50:04

Dileep Karri: that you are giving it a finished example, what you liked and why you liked it. So this brings back the focus to the humor.

50:04 - 50:23

Dileep Karri: So, as a human, you need to produce an example of a best work with the partnership of AI, then teach AI what best actually means, so that it kind of, you know, sheds its inhibitions that the guardrails provides, or the safety provides, and move towards quality.

50:24 - 50:26

Dileep Karri: Do you understand this part?

50:26 - 50:29

Dileep Karri: Is this, tip clear?

50:30 - 50:47

Dileep Karri: Show examples, and I'll show you one example a little later on, but this is how you can make AI much better. Give it examples of work, so humans know what is good, right? Try to provide the best possible work overall.

50:49 - 50:50

Dileep Karri: Good.

50:51 - 50:55

Dileep Karri: A few more things, right? For...

50:55 - 51:14

Dileep Karri: A lot of the prompts that I'm going to use, I'm going to use Whisper Flow to dictate, right, so that I can use the voice-to-text to tell things in a very clarified manner, so don't get confused if you see me talking and suddenly text appearing. I am using Whisper Flow on the packet.

51:15 - 51:24

Dileep Karri: Okay, so here is the first demo. I will use this demo to kind of keep improving this work, and I'll use Claude for this.

51:24 - 51:37

Dileep Karri: Now, nowadays, what has happened is, in Cloud or ChatGPT, they have given you two options. There is chat, and there is co-work, okay? So, most of the times, I...

51:37 - 51:47

Dileep Karri: recommend you to work on co-work, because nowadays, you are giving only brief to AI to work properly, you are not chatting question and answers with the AI.

51:47 - 51:58

Dileep Karri: So, therefore, I will move it to Kowwork, and because I'm doing, like, a demo of a brief, for me, Sonnet 5 is more than sufficient over here.

51:59 - 52:17

Dileep Karri: Okay? So, that is how I have taken this, and now I will kind of give you a situation. So, earlier, Outskill had partnered with OpenAI to run a closed hackathon for them. Now, let us assume that we are running that experiment again.

52:17 - 52:39

Dileep Karri: And I am trying to kind of set this up for co-work, so that it will give me a proper, you know, hackathon brief, the plan as to how to do that, okay? So that is the task that we are trying to do, and that is how I'm going to set this up, okay? Now, the bad way to do it is like this.

52:40 - 52:53

Dileep Karri: I am from Outskill, planning to partner with OpenAI, planning a big hackathon in India so that people can experience OpenAI products and drive adoption. How do we go about it?

52:55 - 52:59

Dileep Karri: Okay? Now, this is a very, very bad brief.

52:59 - 53:01

Dileep Karri: Lot of things are missing.

53:02 - 53:20

Dileep Karri: Okay? So we are not going to get into this route. Now, what we are going to do is, we will actually try to build a proper brief to AI from scratch. Observe here, I'm not using the word prompt, I'm using the word brief, and I'm saying I'll build that brief from scratch.

53:21 - 53:24

Dileep Karri: Okay, so there you go. First thing is goal.

53:25 - 53:27

Dileep Karri: I'll say it.

53:27 - 53:40

Dileep Karri: Design an OpenAI hackathon in India that drives registrations, creates buzz, and improves OpenAI standing among the serious AI builders in India.

53:41 - 53:48

Dileep Karri: So currently, I'm doing it for India. If I had to do it for the world, globally, I'll have to provide that goal overall.

53:49 - 53:52

Dileep Karri: So that's the goal, and the audience.

53:53 - 54:01

Dileep Karri: to whom I am providing this is, say, the head of OpenAI growth, so this will be the audience for whom I'm preparing this.

54:02 - 54:08

Dileep Karri: Head of Growth at OpenAI, along with the core India leadership team.

54:09 - 54:17

Dileep Karri: I want to work... the audience for this plan is a head of growth at OpenAI, along with the core India leadership team.

54:19 - 54:30

Dileep Karri: Okay? So far, so good. This is the part you'll put it in, even in the bad prompts. Now is the place where you have to put in the important part called context.

54:33 - 54:41

Dileep Karri: I am from Outskill, which is an education company, and we are partnering with OpenAI to do this initiative.

54:42 - 55:04

Dileep Karri: OpenAI has made some decent strides in India, but maybe among the serious AI builders, the competitors have a slightly bigger footprint, so that is what we are trying to change. So we want to... right now, the hobby audience is loyal to OpenAI. We want to take it more to the serious

55:04 - 55:08

Dileep Karri: Builder audience, and show that the product has improved a lot.

55:08 - 55:17

Dileep Karri: So, therefore, this is the underlying business problem. Position open AI for serious builders where it currently, lags.

55:18 - 55:34

Dileep Karri: We have done this before. We were able to get in 1,000 serious builders, made quite some buzz and noise. Now, OpenAI has come back and asked us to scale it to 10,000 people and make it a big, grand event.

55:38 - 56:02

Dileep Karri: You see, that is the power of having a speech-to-text tool, where you can dictate and provide the context in the right manner. So I have given the goal, I have given the audience, I have given the context. Now, if I want, I can provide some specific things overall. So, one of

the optional things you can think of is whether... if there's any constraints that you are working with, right? You can provide those constraints.

56:04 - 56:11

Dileep Karri: The budget is medium, not little, not large. Last time, they had given us a limited cash

56:11 - 56:27

Dileep Karri: budget, but what they have said is they're happy to give a lot of OpenAI credits, to give away. So, therefore, in the second experiment, OpenAI credits plus a chance to meet with the OpenAI leadership

56:27 - 56:35

Dileep Karri: team. So, that is the constraint that we have. Don't draft anything yet.

56:35 - 56:46

Dileep Karri: Tell me what you understood as the goal, and how would you position it for the audience? Let us have a discussion. Tell me the assumptions you're making, so that I can correct the gaps.

56:49 - 56:55

Dileep Karri: Okay? So this is, like, the proper brief we are giving to AI.

56:55 - 57:02

Dileep Karri: Okay? I have given the goal, the audience, the context, and I have given everything right now, and I will allow it to work.

57:03 - 57:10

Dileep Karri: So here, what we are doing, to be, you know, very clear, is I am actually, you know, trying to

57:14 - 57:31

Dileep Karri: you know, ensure that whatever we are trying to build, we are putting it in the right manner, so that there is no, you know, gaps in the context, that's what we are trying to do, and we are providing the right brief, okay?

57:32 - 57:39

Dileep Karri: So right now, it is looking at memory, so I will say ignore memory for now.

57:41 - 57:57

Dileep Karri: Okay? So, anytime I feel that the existing memory could kind of complicate, so memory is like multiple chats you do with Claude or ChatGPT, it will keep storing and reference the previous ones. So that is what the memory means.

58:00 - 58:18

Dileep Karri: So now what I'll do is, I will run multiple loops, okay? I will run multiple loops to kind of correct the output, provide some feedback, and I'll tell you, this entire process that we are going to do, that is how we are going to get a better output out of AI.

58:20 - 58:22

Dileep Karri: Thumbs up if you are following so far.

58:22 - 58:25

Dileep Karri: This is something we have already read, kind of.

58:26 - 58:39

Dileep Karri: you know, elementary, we will now start to see how we can, you know, look at what we are seeing right now, and then try to put in the loop and take it forward.

58:45 - 58:50

Dileep Karri: So here are some assumptions that, you know, it is, trying to make.

58:51 - 58:57

Dileep Karri: Serious builders means people, shipping, production apps, agents, technical founders, engineers.

58:57 - 59:08

Dileep Karri: The competitor gap is on the technical builder's toolchain. Last time, 1,000 were gated somehow, okay? So, I'll have to make this correction to the assumption. OpenAI crates means

59:08 - 59:18

Dileep Karri: compute credits, etc. OpenAI leadership is scarce to allocate, not a keynote table once, scarcity is valuable, no fixed date, nobody, etc, all that.

59:18 - 59:26

Dileep Karri: Okay? It has given me a bunch of things I will need to kind of go through properly, but here is the first loop. So.

59:26 - 59:45

Dileep Karri: Always understand that whenever you give a brief to AI, run at least 2 to 3 feedback loops. That means you look at the output, and you try to provide feedback to AI on what is good, what is not good, and try to improve, okay? So I'll give you the first feedback loop.

59:45 - 59:53

Dileep Karri: Right? In the first feedback loop, what I kind of do is, you know, I ask the AI to repeat the order back. So, imagine the scenario.

59:53 - [01:00:01]

Dileep Karri: I have 6 people in the restaurant, each person gave their own order. The waiter could get terribly confused.

[01:00:01] - [01:00:21]

Dileep Karri: Okay, so I want to kind of understand that the waiter does not get confused. So, I will first make some corrections, and I'll ask AI to repeat it back. So that's the first look. Make AI repeat back its understanding so that it has... its understanding and my understanding are aligned.

[01:00:21] - [01:00:24]

Dileep Karri: Okay? So for that, what I'll do is...

[01:00:24] - [01:00:29]

Dileep Karri: Here are, one correction to your assumption.

[01:00:29] - [01:00:45]

Dileep Karri: what we are doing as Outskill is partnering with OpenAI, and the other part is, earlier, the credits were kind of capped, and there was a friction. Now, OpenAI is happy to give quite some credits to the participants.

[01:00:45] - [01:00:53]

Dileep Karri: and also more credits to the, winners, overall. So you can assume that they will give participants around,

[01:00:53] - [01:01:11]

Dileep Karri: \$200 of credits each, and for the winners, they could give easily, like, credits of \$10,000 for the first prize winner, you know, \$5,000 for second, then \$2,500 for the third prize winner, and \$1,500 for the top

[01:01:12] - [01:01:14]

Dileep Karri: 10 overall. And...

[01:01:14] - [01:01:37]

Dileep Karri: In addition, the top winner gets a trip to San Francisco to meet with the OpenAI leadership, especially the people who built the latest models of OpenAI and understand. Now, in terms of serious builders, I would say if there are people who have built agents and prototypes and regularly shipping, those are also fine.

[01:01:37] - [01:01:43]

Dileep Karri: they may not have shipped everything to production yet. This is the kind of audience I am planning to tab.

[01:01:43] - [01:01:53]

Dileep Karri: Now, repeat all the assumptions, as well as what you... is your task in a detailed manner, so that I know that you and I are on the same page.

[01:01:58] - [01:02:00]

Dileep Karri: Okay? So, loop one is...

[01:02:00] - [01:02:18]

Dileep Karri: I have corrected the assumptions it has made, and then I am saying things like, you know, this is what I want you to do, these are the corrections to your assumptions, and this is what I'm doing. Thumbs up if you are okay with it right now, and you have understood this part.

[01:02:18] - [01:02:23]

Dileep Karri: Loop 1 is correct the assumptions, make it repeat the order.

[01:02:29] - [01:02:37]

Dileep Karri: By the way, you'll get all the transcripts for the session, so don't worry about it. We'll get the transcripts so that you have proper notes to kind of go through everything.

[01:02:38] - [01:02:40]

Dileep Karri: So, confirmed, it has said.

[01:02:54] - [01:03:06]

Dileep Karri: So if you see here, it is saying, that, 10,000 registrations get \$200, that is, \$2 million in credits, right? So, that is the thing, where it is saying.

[01:03:07] - [01:03:11]

Dileep Karri: So, I will go provide that correction, and

[01:03:11] - [01:03:29]

Dileep Karri: Other places, I will ask it to make some, reasonable assumptions, okay? That is loop two, where I will do minor corrections, and I'm kind of, kind of tell it what hard facts will support what hard caps do not.

[01:03:31] - [01:03:39]

Dileep Karri: So, one thing to understand, in the first set, only \$20 will be given to all the participants who are participating.

[01:03:40] - [01:03:57]

Dileep Karri: people who have made decent intermediate progress, and they are going in the right direction, they will get more top-up credits. Not every person gets the credits, that is the assumption. For the other open questions that you have, make reasonable assumptions.

[01:03:57] - [01:04:05]

Dileep Karri: And for the design you are contemplating, right? Give me two tables where you have hard facts that

[01:04:05] - [01:04:14]

Dileep Karri: support this initiative or the direction that you're taking, and the hard facts that do not support it. Give me options, not the final plan.

[01:04:17] - [01:04:27]

Dileep Karri: Okay, so loop one is repeat the order, correct the assumptions. Loop 2, minor corrections, you should not do major corrections overall.

[01:04:27] - [01:04:40]

Dileep Karri: Do the minor corrections, and then say, when you're building the plan, tell me hard facts supporting FER, hard facts supporting against, in terms of the different design, different decisions you are trying to make.

[01:04:48] - [01:04:58]

Dileep Karri: So, I'm kind of doing this. Then we'll run another loop, the third loop, where you will be able to, you know, kind of

[01:04:58] - [01:05:07]

Dileep Karri: make it better. After that, I'll talk to you some optional things you can do. I will not show you those, but these three are compulsory things you need to do.

[01:05:07] - [01:05:20]

Dileep Karri: Every time, don't take the first output as the best output. Loop 1, correct the assumptions, make it repeat the assumptions. Loop 2, final correction to the assumptions, and get information on

[01:05:20] - [01:05:32]

Dileep Karri: Hard facts which support one particular direction, hard facts which support the other direction, and compare and contrast so that you can take the right judgment required.

[01:05:33] - [01:05:42]

Dileep Karri: Okay, so it'll search the web a little bit. We will come to connectors later on, but you are doing a quick search of the web to kind of figure this part out.

[01:05:48] - [01:05:57]

Dileep Karri: Then in loop 3, the final loop in this, what we will do is, we will actually, you know, give AI the permission

[01:05:57] - [01:06:13]

Dileep Karri: to, you know, not know things. A lot of times, AI thinks that unless I tell the answer, even if it is made up, it is important. The third part, you will say things like, do not hallucinate, and you try to overcome those hallucinations. That is what you do in the third loop.

[01:06:34] - [01:06:48]

Dileep Karri: See, in this session, right, I'm kind of staring at the screen as it is giving the response, but typically what I do is I would give it the task, switch to another task, give it the task, switch to another task.

[01:06:48] - [01:06:55]

Dileep Karri: So, usually when you work with AI, you work it parallel, but right now, you know, we are trying to

[01:06:55] - [01:06:57]

Dileep Karri: You don't do it in this particular manner.

[01:07:18] - [01:07:21]

Dileep Karri: Alright, so what it has done, you see. Beautiful.

[01:07:22] - [01:07:37]

Dileep Karri: facts that support scaling this initiative, okay? So, if I want to scale this initiative, because I'm saying I want to scale the initiative, it is giving the fact why it matters, fact, why it matters, fact, why it matters, so you have got some evidence.

[01:07:37] - [01:07:49]

Dileep Karri: Fact that works against this direction, fact why it's a problem, fact why it's a problem, fact why it's a problem, etc. So it is giving you the bull case on the bear case.

[01:07:49] - [01:07:57]

Dileep Karri: Okay? So, you know, deep-seq and open weight models, they have a small India footprint. These are the options.

[01:07:57] - [01:08:11]

Dileep Karri: Proof of capability track design, tiered funnel to solve the screening problem, don't default to the old 10,000, run, open this, get a smaller track, and then the real activity go for the larger track.

[01:08:11] - [01:08:19]

Dileep Karri: convert the event into named case studies, right? So structure the hackathon so that the strongest builds get

[01:08:19] - [01:08:32]

Dileep Karri: fast-tracked into real pilots or OpenAI published case studies within weeks of the event, attract the right people who can make a dent and make... give them support to publish, so that they become your case studies.

[01:08:32] - [01:08:52]

Dileep Karri: Right? So Gemini's edge distribution habit, not a direct reputation. So therefore, you need a starter kit, agent, framework, etc. layered to the event, rather than expecting the event itself to solve it, okay? So try to tackle Gemini also separately. So it is giving us a bunch of options.

[01:08:52] - [01:08:58]

Dileep Karri: Final loop, then I'll summarize everything we have done and show you some other tips also.

[01:09:00] - [01:09:18]

Dileep Karri: Now that you have given me, all of this, right, here is what I want you to do. Go through all the facts, assumptions, and the design so far. Label every material claim as one of, confirmed by a source, inferred from something that you were given, or unknown.

[01:09:18] - [01:09:27]

Dileep Karri: When a fact is not properly supported, write unknown and leave it. Do not fill in missing information. Do not interpret. Unknown is a fine answer.

[01:09:30] - [01:09:50]

Dileep Karri: So all I'm saying is, whatever you are giving, right, label every claim as confirmed by the source, inferred from something that you're given, or it is unknown, so that you avoid hallucinations, and you are taking decisions based on knowing very well what is actual hard truth and what is the inferred truth.

[01:09:50] - [01:09:59]

Dileep Karri: Okay? Now, if you take decisions based on inferred truth, it is fine, but you should know if it's an inferred truth or a hard truth. That is very, very important.

[01:10:01] - [01:10:07]

Dileep Karri: So, what we are doing, 3 loops for everything. First, give the brief, as I mentioned, goal.

[01:10:07] - [01:10:24]

Dileep Karri: audience, context, plus some constraints if you require. Loop 1 is, like, correct the assumptions, and then, you know, ask it to repeat what it has understood. Loop 2, final corrections, and also, you know, kind of ensure that

[01:10:25] - [01:10:30]

Dileep Karri: It gives you pros and cons. Loop 3, for...

[01:10:30] - [01:10:34]

Dileep Karri: every fact your AI has given you in the previous step.

[01:10:34] - [01:10:45]

Dileep Karri: Ensure that it tells you what is the hard fact, what is inferred from sources, and what is unknown, okay? So that you know exactly what you are working with.

[01:10:45] - [01:11:03]

Dileep Karri: Okay? So, if you are working with AI like this, you don't require a fancy prompting framework, you don't require any prompting framework whatsoever, whatever required. This process will help you how to give briefs to AI.

[01:11:03] - [01:11:19]

Dileep Karri: Okay? Now, you might have wondered, you know what, we... you taught us X prompting method, you taught us that prompting method earlier. As I said, at that stage, that was required. For this stage, this is how you need to proceed.

[01:11:20] - [01:11:34]

Dileep Karri: In fact, calculus is taught in middle school, high school, as well as university. But the way you interpret calculus is different. We are doing something similar in the first session, and also sessions following this.

[01:11:36] - [01:11:40]

Dileep Karri: Okay, so now, it is giving you the label.

[01:11:42] - [01:11:51]

Dileep Karri: Yeah, it is giving you the label, the claim, label, basis, etc. It is giving you all of the information.

[01:11:51] - [01:12:03]

Dileep Karri: It is giving you the different things, so now you can see the incentive price structure, what is confirmed, what is unknown, etc, all that completely.

[01:12:03] - [01:12:19]

Dileep Karri: Okay? So, in your entire plan, what is confirmed, what is unknown is very, very, very clear. So now, you know that it is saying my own analytical references. So it is putting a separate section where it is saying what all facts it has inferred.

[01:12:21] - [01:12:34]

Dileep Karri: Okay, this is the full audit, etc. So now you can say, based on the above, whatever you have done with respect to this, now give me the version 1 of the plan.

[01:12:35] - [01:12:45]

Dileep Karri: Okay? So, you can say, based on the above, Give me V1 of the... plan.

[01:12:45] - [01:12:56]

Dileep Karri: A bit... And... So, I like the markdown format, structured format overall, so I'll say keep it in Markdown.

[01:12:56] - [01:13:12]

Dileep Karri: Alright, so by the time this gets generated, let us quickly, you know, kind of go through the different things we have covered so far. So what we have done is, we tried to design a hackathon for India with a basic brief.

[01:13:12] - [01:13:26]

Dileep Karri: Then, the first loop is make it repeat the order back, where we corrected the assumptions and tell... made it tell what it understood every assumption you're making, and corrected the wrong ones. Then, what we also did later on is.

[01:13:26] - [01:13:26]

Audio shared by Dileep Karri: B.

[01:13:26] - [01:13:51]

Dileep Karri: made few more corrections, and then asked it to ask for the facts that support the plan, and facts that don't support the plan overall. So we have, you know, set that also up. And then, there is a problem of hallucinations, and why hallucinations occur in AIS? When it does not know, hallucinations don't occur. When it knows everything.

[01:13:51] - [01:13:55]

Dileep Karri: Hallucinations don't occur. Hallucinations occur on half-knowledge.

[01:13:55] - [01:14:14]

Dileep Karri: Okay? The most dangerous person is somebody who has got half-knowledge. Similar thing with AI also. It has been trained on everything in the world, so it has... knows something of everything, and that is where it is a problem statement. So therefore, what you do is, you give AI permission to say unknown.

[01:14:14] - [01:14:26]

Dileep Karri: So that then you know, okay, what is it that I... it knows, what is it it does not know, so that when you actually do that, right, it will give a good output overall.

[01:14:27] - [01:14:51]

Dileep Karri: Okay? So, a quick habits, you know, all that you can tell it is, in some cases where you know it needs fresh context and should not look at the memory, right? You can tell it things

like, don't search the memory, but, you know, search on the internet, etc, and all that. So, it is like saying, for any item price, if you are asking.

[01:14:51] - [01:15:02]

Dileep Karri: price comparison, you will not want it to check its memory, you want it to check the internet. So, as a habit, wherever you're looking for some facts or some analysis.

[01:15:02] - [01:15:12]

Dileep Karri: ask it always not to check the memory, but to check the internet. You just have to say, check on the net, it will check its own internet. It has got the capability.

[01:15:13] - [01:15:31]

Dileep Karri: The other habit is, you know, don't ask for a fresh draft. Once it creates a draft, right, you know, give it either something that you have, or ask it to give it 3 options. If you don't have a reference, ask it to give it 3 options, and judge each option.

[01:15:32] - [01:15:33]

Dileep Karri: Because...

[01:15:33] - [01:15:50]

Dileep Karri: In creation, there is guardrails, then in judgment, there is not much guardrails. So when you ask it to provide judgment, it is more free, but when you ask it to do work, it is a little fearful, like a fearful subordinate under a boss, right?

[01:15:51] - [01:16:09]

Dileep Karri: The other habit is do not ask it to, you know, kind of fix everything in the document. Be very razor-specific of where you want to edit. For example, if your collar is off, fix the collar, okay? Do not re-stitch the shirt.

[01:16:09] - [01:16:24]

Dileep Karri: So, ensure that when you read the plan given by AI, you kind of make a note on, okay, only change this line in this paragraph, this line in this paragraph. If you don't specify, AI has the habit of changing everything.

[01:16:25] - [01:16:29]

Dileep Karri: Okay? Especially slides, it keeps changing it again and again and again.

[01:16:30] - [01:16:51]

Dileep Karri: One more problem you will see is AI. The conversation keeps slowly drifting away. Ensure that you are not... you are putting a tight control over AI so that it's not drifting in the conversation. So, you know, at the point you feel it is drifting, you tell it that, hey, till here it was good, but here you are drifting away from the context.

[01:16:51] - [01:16:52]

Dileep Karri: come back.

[01:16:53] - [01:16:59]

Dileep Karri: Okay? So you need to understand that you are trying to do the drift.

[01:17:00] - [01:17:12]

Dileep Karri: Right? Sometimes it is good to keep the brief and everything as a file, not in the chat's memory. Try to keep it as marked on files inside a folder.

[01:17:12] - [01:17:28]

Dileep Karri: Okay? With that, things are much better. You don't have to really worry about using it for other things, etc. Things are much better in this way, if you are able to store things in files. And for that, you don't have to do anything. All you have to do is

[01:17:28] - [01:17:39]

Dileep Karri: both works for Claude and ChatGPT, right? When you create a task, okay, so here you have gotten the first version, etc, all that. For now, it is fine.

[01:17:39] - [01:17:45]

Dileep Karri: But whenever you are creating the first version, or you are, you know, doing a particular task.

[01:17:45] - [01:17:59]

Dileep Karri: you can always add a folder. How do you add a folder? When you start a new task on the project, you can say things like new project, or if you want to do a new project, or you can also

[01:18:01] - [01:18:07]

Dileep Karri: You know, whatever folders you want, you can attach that particular folder also.

[01:18:07] - [01:18:10]

Dileep Karri: Okay? So, in the co-work.

[01:18:10] - [01:18:28]

Dileep Karri: I can skip this, I can, you know, attach a particular folder wherever it is required. In ChatGPT also, if you see here, I can say files, I can attach a particular file, or in the project, I can create the project also.

[01:18:28] - [01:18:42]

Dileep Karri: Now, since I am on the, you know, online, version of it, I'm not able to see the local folders, but if I'm on Plot Desktop or ChatGPT desktop, I can attach local folders also.

[01:18:42] - [01:18:48]

Dileep Karri: Okay? I can attach local folders and work and store all my files in the brief.

[01:18:48] - [01:18:59]

Dileep Karri: Okay? So, as I practice, work on desktop apps, but here, because I want to show you basic things, I'm not going there. In future sessions, you will be able to see that also.

[01:18:59] - [01:19:06]

Dileep Karri: Again, it will be heavy for all of you. If you understand the basic parts of what I'm showing, that is fine.

[01:19:08] - [01:19:21]

Dileep Karri: Okay? So, one important thing to remember, expect that 80-90% of this process is what AI will do. The last 10% refinement, you will have to do it.

[01:19:22] - [01:19:31]

Dileep Karri: Okay, do not expect AI to do everything. The last 10% is kind of yours. AI can only take you till 80-90% of the work.

[01:19:34] - [01:19:35]

Dileep Karri: Okay?

[01:19:35] - [01:19:49]

Dileep Karri: All right, folks, quick pulse check. How are we doing? Did we understand everything so far? Are we doing good? Basics, but I took it slightly advanced, so that you know how to give brief to AI in the best possible manner.

[01:19:52] - [01:19:53]

Dileep Karri: Okay?

[01:19:54] - [01:19:55]

Dileep Karri: Good.

[01:19:55] - [01:19:59]

Dileep Karri: Awesome. So for those of you who want to see the plan.

[01:19:59] - [01:20:02]

Dileep Karri: Okay? This is the plan that we have got.

[01:20:03] - [01:20:16]

Dileep Karri: Right? So this is the output, where you got the objective, what the version assumes, assumptions are top, the core mechanic, you have the format and geography, the challenge tracks it is giving, the

[01:20:16] - [01:20:22]

Dileep Karri: Credibility and judging, the incentive plan, the durability, the success metrics.

[01:20:23] - [01:20:28]

Dileep Karri: The timeline, the budget allocation, the recommendation, it has given the confidence

[01:20:29] - [01:20:38]

Dileep Karri: Why this could have failed, what to avoid, the strongest counter phase, what would flip this? Open items before version 2.

[01:20:39] - [01:20:53]

Dileep Karri: Okay? A very good plan it has built. Now, you might be wondering, how did it know to give you inversion? How did it know to give premoem? How did it know to give the confidence for the particular output?

[01:20:53] - [01:21:06]

Dileep Karri: Okay? So all of that is possible because of a simple change that I have done, and this is something I would recommend everybody to do, and that is setting up custom instructions.

[01:21:06] - [01:21:16]

Dileep Karri: Okay? Custom instructions are available both in Cloud as well as ChatGPT. In Cloud, custom instructions are available under Settings.

[01:21:16] - [01:21:28]

Dileep Karri: You can go to General, and you have got instructions for Claude, and these are the instructions. You can see here, September 2026 means recently I made some edits. Who I am.

[01:21:28] - [01:21:31]

Dileep Karri: What are the modes I worked with?

[01:21:31] - [01:21:33]

Dileep Karri: What is the response style?

[01:21:33] - [01:21:35]

Dileep Karri: What is the pushback?

[01:21:35] - [01:21:48]

Dileep Karri: What are the decisions I want to take? So whenever you give me a decision, give me a recommendation, give me confidence, high, medium, low, pre-mortem, 10 months out, this failed. Why would it fail? Inversion, what to avoid?

[01:21:48] - [01:21:56]

Dileep Karri: Strongest countercase, the best real argument against you. What would flip it? Second-order effects, where they matter.

[01:21:56] - [01:22:01]

Dileep Karri: Okay? Then I'd say scale this down for small decisions. Facts and sources.

[01:22:01] - [01:22:11]

Dileep Karri: What is the hard rule? Never fabricate statistics, etc. Then sourced training data, estimate, inference, unknown, and I'm telling this.

[01:22:11] - [01:22:25]

Dileep Karri: Right? Then I have given some context of the work, tools and actions, curriculum training deliverables, because I'm doing a lot of curriculum design for enterprises, what to do, how to do, all of that, how to write in my own voice.

[01:22:25] - [01:22:39]

Dileep Karri: what, I have done some no AI slog paths. I will talk about it later on. Maybe in, day 5, I'll talk back about this. For now, ignore. Never open with praise. How many of you?

[01:22:39] - [01:22:46]

Dileep Karri: Thumbs up if you are irritated by AI praising you a lot, okay? There is a lot of psychopancy in AI you see.

[01:22:46] - [01:22:51]

Dileep Karri: I don't... I have zero of that, because I have set these custom instructions for myself.

[01:22:52] - [01:22:59]

Dileep Karri: Okay? So now you might be wondering, Dilip, if we have to build these custom instructions, how do we do that?

[01:23:00] - [01:23:07]

Dileep Karri: Okay? How many of you have this question right now? How can we build solid custom instructions for ourselves?

[01:23:08] - [01:23:09]

Dileep Karri: Okay?

[01:23:10] - [01:23:13]

Dileep Karri: Don't worry, I'll give you a very, very simple recipe.

[01:23:14] - [01:23:31]

Dileep Karri: Okay? I had done... I had taken almost 9 months to come to this point, 9 months of iteration, 9 months of experimentation. What I have done is super simple. I will... my team will share later, as part of your resources, this operating instructions template.

[01:23:31] - [01:23:38]

Dileep Karri: Okay? So, for this template, you will have to spend a good 10 to 40 minutes

[01:23:38] - [01:23:41]

Dileep Karri: To let the AI interview you.

[01:23:41] - [01:23:47]

Dileep Karri: Okay? So, for this, how you should work is simple. You can say.

[01:23:48] - [01:23:59]

Dileep Karri: Below is a template, so I'm giving you the prompt also, so that you know how to do the prompt, and this is the template that I'm giving below. So what you should do is...

[01:24:00] - [01:24:07]

Dileep Karri: Copy this prompt, which you are, you know, kind of giving. So, Pillow is the template.

[01:24:08] - [01:24:11]

Dileep Karri: So... I'll go to this one.

[01:24:13] - [01:24:15]

Dileep Karri: For now, I'm kind of sorry.

[01:24:18] - [01:24:20]

Dileep Karri: Okay, I open new.

[01:24:20] - [01:24:26]

Dileep Karri: I opened chat, For now, I'm going incognito, because I have already the instructions.

[01:24:26] - [01:24:45]

Dileep Karri: When you are building this, try to use the best model available to you, okay? And for that, what I'll do is, I will copy-paste the prompt, where I say, below is the template for my custom instructions, and then I copy this entire template.

[01:24:54] - [01:25:00]

Dileep Karri: I take this entire template, I can take the template, or I can attach this file, anything will work.

[01:25:00] - [01:25:23]

Dileep Karri: I have copy-pasted the entire template. So I'm saying below is a template for my custom instructions. I want you to interview me and write my final version. How to run the interview? Ask me three to four questions at a time. And in the order of the template, after each round, update your picture of me in 2 or 3 lines and ask the next round. Skip a section if I say it does not apply to me.

[01:25:23] - [01:25:35]

Dileep Karri: Do not write the final instructions until I say stop, or you have covered every section, and so on and so forth. Start with section 1, and I'll use Opus, because I need a good model to kind of do this.

[01:25:37] - [01:25:48]

Dileep Karri: Okay? And I'll use the high default available. By the way, on the effort side, right, if you're looking at the effort and you're always confused about what is the delta of

[01:25:48] - [01:26:02]

Dileep Karri: low effort to max effort, people have found that the delta is 9% on benchmarks. That means if I got 50% on the low of the same model, I will get 59% on the max

[01:26:02] - [01:26:06]

Dileep Karri: of the same model, okay? So that's a 9% delta only.

[01:26:06] - [01:26:12]

Dileep Karri: Okay, so on a high, on an average, we can use high also available. Now see how it works.

[01:26:15] - [01:26:17]

Dileep Karri: So it is, checking.

[01:26:18] - [01:26:25]

Dileep Karri: So it is going to plan an interview to gather the person's preferences. So, all you have to do is pull the template.

[01:26:25] - [01:26:30]

Dileep Karri: interview with AI, so that AI can build you that proper plan.

[01:26:36] - [01:26:52]

Dileep Karri: Okay? So it is asking... it has kind of, you know, stopped asking me some questions because it has picked some custom instructions from before. So now it is saying company, team and scope, audience, background. Okay? So I can answer.

[01:26:52] - [01:26:59]

Dileep Karri: Yes, I am in the same company right now. Team and scope, I think, small... slightly larger team, 15.

[01:27:00] - [01:27:07]

Dileep Karri: B2b vertical is definitely growing. Audience default is me, myself.

[01:27:07] - [01:27:16]

Dileep Karri: background, I think nothing much changes, but in terms of the background right now, I am following Socratic thinking quite a bit.

[01:27:17] - [01:27:24]

Dileep Karri: So, when you're doing this, right, expect yourself to have some crisis in the terms of, like, it'll ask you, how do you think?

[01:27:24] - [01:27:37]

Dileep Karri: Do you really know how you think and take decisions? Okay? Do you have that thing? So you'll have to dig very deep into yourself and be honest, okay? You should be honest with your spouse, you should be honest with AI.

[01:27:37] - [01:27:55]

Dileep Karri: Okay? So, be brutally honest when you do this. If you think you don't know how to think, tell you don't know how to think, and say that, coach me on thinking as I move along, so that later, when I improve my thinking, I will do much better. So I'm giving this.

[01:27:59] - [01:28:00]

Dileep Karri: Okay?

[01:28:03] - [01:28:24]

Dileep Karri: So, it has updated the picture. Now, how I use you, company, Outskill or growth skill? I'll say Outskill. Top tasks, what actually you bring to AI most weeks now? What is the weak spot of what AI still does badly for you? Socratic mode. You said you're using Socratic thinking a lot. Do you want that as a named mode?

[01:28:25] - [01:28:41]

Dileep Karri: I am working mostly for Outskill. My top tasks right now, the slight change is I am trying to build solutions for B2B clients. So, I am trying to take their use cases and design co-building workshops where I am

[01:28:41] - [01:28:50]

Dileep Karri: enabling them to solve their own problems and guiding them through AI. I'm now also deeply involved into design thinking with AI.

[01:28:50] - [01:29:01]

Dileep Karri: So, what AI does still badly for me is the first draft is always subpar, so I always struggle to take it from 90% to 100%.

[01:29:01] - [01:29:13]

Dileep Karri: It does well till 70%, but that 100% part is a pain, so it... when I give it a feedback, it changes the entire document, not just the portion I ask it to.

[01:29:13] - [01:29:23]

Dileep Karri: Definitely add Socratic mode. In some cases where there's a lot of back and forth, prompt me if I would like to switch to Socratic mode of AI.

[01:29:30] - [01:29:35]

Dileep Karri: So now, updated... Thing is this, etc.

[01:29:35] - [01:29:50]

Dileep Karri: how I like answers, etc. So, based on this thing, it'll keep asking, expect this interview to take, like, a good 45 minutes. 45 minutes spent to do this interview, so that you are able to do it in the right manner.

[01:29:50] - [01:29:58]

Dileep Karri: Alright, so let's, you know, kind of, do this. So now, I won't do this process again and again. What I'll do is...

[01:29:59] - [01:30:02]

Dileep Karri: make suitable... Assumptions?

[01:30:03] - [01:30:10]

Dileep Karri: and give me... the customer... instructions... Graz.

[01:30:11] - [01:30:14]

Dileep Karri: In a copy and paste.

[01:30:14] - [01:30:15]

Dileep Karri: format.

[01:30:17] - [01:30:23]

Dileep Karri: Give me the custom instructions in a copy and paste format, and I'm kind of giving these custom instructions in this

[01:30:23] - [01:30:26]

Dileep Karri: Copy and paste BURN format overall.

[01:30:29] - [01:30:34]

Dileep Karri: So, it is this, who I am, you are helping Dilip, how I use you.

[01:30:35] - [01:30:37]

Dileep Karri: Okay? How I like answers?

[01:30:39] - [01:30:40]

Dileep Karri: Push back.

[01:30:40] - [01:30:42]

Dileep Karri: Decisions?

[01:30:42] - [01:30:44]

Dileep Karri: Facts and sources.

[01:30:44] - [01:30:48]

Dileep Karri: Actions and tools might work the specific parts.

[01:30:48] - [01:30:50]

Dileep Karri: Writing in my voice.

[01:30:50] - [01:30:55]

Dileep Karri: Quality check before delivery, current priorities? Never.

[01:30:55] - [01:31:00]

Dileep Karri: Okay? If I want to make a few changes, I can give that feedback, but now...

[01:31:01] - [01:31:02]

Dileep Karri: I can copy this.

[01:31:02] - [01:31:04]

Dileep Karri: Close it.

[01:31:04] - [01:31:11]

Dileep Karri: go to... settings, instructions for Claude, I can paste these instructions.

[01:31:11] - [01:31:14]

Dileep Karri: For ChatGPT, very similar, go to...

[01:31:14] - [01:31:25]

Dileep Karri: Personalization, there is a separate section called Personalization. In Personalization, go into custom instructions.

[01:31:26] - [01:31:38]

Dileep Karri: Okay? For some reason, it has, okay, enable customization. When I say enable customization, the custom instructions should be available, right? I can do that.

[01:31:41] - [01:31:50]

Dileep Karri: Okay? For some reason, it is not showing me for a very strange reason, but on the desktop app, I can see custom instructions. Let me see if I can paste, yeah.

[01:31:51] - [01:31:52]

Dileep Karri: It is available.

[01:31:52] - [01:31:59]

Dileep Karri: On the desktop app, it is much better, but you have got the custom instructions thing available on ChatGPT also.

[01:32:01] - [01:32:11]

Dileep Karri: Okay? So, I can do it on ChatGPT, I can do it on Cloud also, do it on the desktop versions, I found that it is much better than doing it on the web versions overall.

[01:32:12] - [01:32:25]

Dileep Karri: Thumbs up if you understood the process, take the custom instructions template, use the prompt I have given in the template, this will be shared as part of your resources. Spend a good 45 minutes to 1 hour on this task.

[01:32:26] - [01:32:41]

Dileep Karri: Okay? Build your custom instructions in a solid manner, okay? I will check back with you on day 5, when I come back, to see if all of you have built these custom instructions, and what is your experience when you're using AI on that level.

[01:32:41] - [01:32:49]

Dileep Karri: Okay? So, we will come back, I'll ask you that you have till that time, time to kind of implement and, you know, take this forward.

[01:32:51] - [01:32:54]

Dileep Karri: Alright, so we'll, move ahead.

[01:33:00] - [01:33:08]

Dileep Karri: All good? Are we good? Solid? I'll do a quick explanation of a few concepts, and then I'll give you a 5-minute break.

[01:33:08] - [01:33:14]

Dileep Karri: Okay, all good, everybody understanding, enjoying, learning something new, or feeling very basic.

[01:33:14] - [01:33:15]

Dileep Karri: Okay?

[01:33:16] - [01:33:27]

Dileep Karri: So, for people who are asking me things like word count, okay? For people who are, you know, kind of asking me things like word count, I think

[01:33:27] - [01:33:31]

Dileep Karri: Claude doesn't have any restriction. ChatGPT...

[01:33:31] - [01:33:51]

Dileep Karri: On the desktop app, I have not seen any restrictions, number one. Second, if you are sometimes personalization, you might not be able to see. If maybe you are on the free plan, just check if you can download the desktop app and see that. It should be... you should be able to see it. It's not easy, it's not...

[01:33:51] - [01:34:01]

Dileep Karri: difficult to figure out. In any time you find it difficult to figure out where it is present, etc, use ChatGPT or Claude itself, and ask it to

[01:34:01] - [01:34:08]

Dileep Karri: You know, things like, I want to set the... custom instructions.

[01:34:09] - [01:34:17]

Dileep Karri: Okay, I am on DASH plan, fill in what plan of ChatGPT you are on, and then say, I am non-technical.

[01:34:20] - [01:34:23]

Dileep Karri: Give me, step by... tab.

[01:34:23] - [01:34:25]

Dileep Karri: instructions.

[01:34:27] - [01:34:45]

Dileep Karri: Okay? I want to set the custom instructions, I am on so-and-so plan, I'm non-technical, give me step-by-step instructions. Then, ChatGPT itself will tell you where to find the setting, etc. It will search the net for you and give you those step-by-step instructions. You don't have to worry about that.

[01:34:47] - [01:34:48]

Dileep Karri: All right.

[01:34:48] - [01:34:56]

Dileep Karri: So now, switching gears. So what we have done so far, I have looked at AI, and I said, how to...

[01:34:57] - [01:34:59]

Dileep Karri: Brief AI.

[01:35:01] - [01:35:03]

Dileep Karri: How to brief AI well?

[01:35:04] - [01:35:13]

Dileep Karri: How can... Here, how to make... AI... Know you well.

[01:35:17] - [01:35:22]

Dileep Karri: which is custom... instructions.

[01:35:28] - [01:35:39]

Dileep Karri: how to brief AI well, how to make AI know you well, that is the custom instructions we have done. Now, shifting gears to actually give AI tools.

[01:35:40] - [01:35:43]

Dileep Karri: To get things done.

[01:35:48] - [01:35:50]

Dileep Karri: Alright? So think about this.

[01:35:51] - [01:35:54]

Dileep Karri: I am in a restaurant. I have a chef.

[01:35:55] - [01:36:03]

Dileep Karri: So, what the chef needs for a restaurant is this. The chef needs tools.

[01:36:04] - [01:36:05]

Dileep Karri: like, oven.

[01:36:06] - [01:36:20]

Dileep Karri: tools like oven, you need an oven, you need wok, you need stove, you need multiple instruments to kind of cook anything, and then...

[01:36:21] - [01:36:28]

Dileep Karri: The chef would require something called recipes, overall.

[01:36:29] - [01:36:32]

Dileep Karri: Okay? Which is, like, instructions...

[01:36:36] - [01:36:38]

Dileep Karri: To prepare a dish.

[01:36:40] - [01:36:48]

Dileep Karri: Instructions to prepare a dish, that would be a recipe. Tools are, you know, the oven, the woke, and the stove.

[01:36:48] - [01:36:55]

Dileep Karri: Now, let us imagine scenarios. The chef is given the tools, the oven, the woke, and the stow. No recipes.

[01:36:56] - [01:36:58]

Dileep Karri: What would happen?

[01:36:58] - [01:37:03]

Dileep Karri: Can somebody tell? I have asked the chef to prepare a dish, okay?

[01:37:03] - [01:37:14]

Dileep Karri: Everybody in India, you can imagine your favorite dish, like the paneer butter masala, or you can imagine, like, dal makhi, or

[01:37:14] - [01:37:29]

Dileep Karri: smoked aubergang, or you can call it bag and capurta. For international folks, imagine your favorite croissant, you can imagine your favorite pizza, you can imagine, you know, the washed

[01:37:29] - [01:37:32]

Dileep Karri: Best fine dining dish you can think of.

[01:37:34] - [01:37:39]

Dileep Karri: I have given the tools, every tool required to the chef, but no recipe.

[01:37:39] - [01:37:42]

Dileep Karri: what would happen? Can you let me know on the chat?

[01:37:43] - [01:37:46]

Dileep Karri: What would happen if I give only tools, but not the recipes?

[01:37:50] - [01:37:57]

Dileep Karri: I have given the tools. I have given the tools. People are saying nothing. I have the tools. I have the ingredients.

[01:37:59] - [01:38:01]

Dileep Karri: What will change?

[01:38:02] - [01:38:04]

Dileep Karri: Somebody gotten it right.

[01:38:04] - [01:38:08]

Dileep Karri: What you will have is no uniform results.

[01:38:08] - [01:38:10]

Dileep Karri: Okay? So what happens?

[01:38:10] - [01:38:14]

Dileep Karri: tool, no recipe?

[01:38:15] - [01:38:34]

Dileep Karri: So you cook in a random manner, so every time you produce the dish, the dish will have a slightly different taste, the consistency won't be there. How many of you, thumbs up. If you have visited your favorite restaurants overall, and you find that some day, some bad day.

[01:38:35] - [01:38:38]

Dileep Karri: You order your favorite dish, something doesn't taste right.

[01:38:39] - [01:38:41]

Dileep Karri: Thumbs up if you have faced the situation.

[01:38:41] - [01:38:44]

Dileep Karri: Right? That you can think in terms of...

[01:38:45] - [01:38:49]

Dileep Karri: Tool is present, but recipe is not present.

[01:38:50] - [01:38:53]

Dileep Karri: Now, let us assume the reverse.

[01:38:53] - [01:38:55]

Dileep Karri: I have the recipe.

[01:38:57] - [01:38:58]

Dileep Karri: But no tool.

[01:39:00] - [01:39:05]

Dileep Karri: I had the recipe given, but absolutely no tools at all.

[01:39:05] - [01:39:15]

Dileep Karri: then what happens? I have the tools, no recipe you saw, but I have the recipe. I have the 45-step instructions.

[01:39:15] - [01:39:31]

Dileep Karri: of building out this extremely great layered biryani, or this extremely good baked Alaska, this extremely very, very good paella, this extremely very, very, very, very sophisticated

[01:39:32] - [01:39:36]

Dileep Karri: PISA, which has got this multiple, multiple layers.

[01:39:36] - [01:39:41]

Dileep Karri: Okay? I hope I have at least told one dish that somebody recognizes, okay? If not.

[01:39:41] - [01:39:57]

Dileep Karri: I am at fault, right? But some dish that somebody recognizes. And by this time, you'd have understood that I'm a great foodie. Though I don't eat a lot of these things, at least I understand this. Two reasons. One thing, I like this. Second thing, I use this as analogies to teach AI.

[01:39:59] - [01:40:03]

Dileep Karri: Alright, so recipe, but no tools. What do you think happens?

[01:40:06] - [01:40:11]

Dileep Karri: Let me know in the chat, what do you think happens when there is a recipe but no tool?

[01:40:12] - [01:40:20]

Dileep Karri: no foot, no output will be provided. Excellent. No output at all will be provided. It is like...

[01:40:20] - [01:40:36]

Dileep Karri: You know, AI saying, I don't have the tools, the chef will come to you and say, I don't have the tools available, but if you want to make pizza, here is step one, here is step 2, here is step 3, here is step four, and tries to build everything on

[01:40:36] - [01:40:37]

Dileep Karri: paper.

[01:40:39] - [01:40:54]

Dileep Karri: Right? They will, you know, sometimes AI has done this, thumbs up if you have seen this, AI will say, I cannot do this task right now, but if you were to do the task, do step 1, step 2, step 3, step 4, step 5, that is where it has got recipe, but no tools.

[01:40:55] - [01:41:08]

Dileep Karri: Okay? So the analogy over here for chef and tool, the tool, chef to have the tools along with the recipes, right? So I have my AI,

[01:41:09] - [01:41:12]

Dileep Karri: I give it... connectors...

[01:41:16] - [01:41:19]

Dileep Karri: For Claude, it is called connectors. For...

[01:41:19] - [01:41:22]

Dileep Karri: ChatGPT, it has... it is called plugins.

[01:41:22] - [01:41:25]

Dileep Karri: Those are the tools I give.

[01:41:26] - [01:41:35]

Dileep Karri: And I give, like, skills... Which are, like... recipes.

[01:41:38] - [01:41:46]

Dileep Karri: for my AI. So I build the tools for my AI, I give the recipes for my AI.

[01:41:47] - [01:41:58]

Dileep Karri: Okay? Now, to understand these tools and recipes, etc, some quick fundamentals of how these tools a little bit, work.

[01:41:58] - [01:42:14]

Dileep Karri: Okay? And, we will see it in more detail on day 5. I'll explain another simple analogy to kind of take it forward. Right now, I'll give you a very small analogy right now. We will expand on it on day 5. So, you can think of connector

[01:42:16] - [01:42:22]

Dileep Karri: as your AI, Talking to your applications.

[01:42:24] - [01:42:42]

Dileep Karri: What are your applications? Your applications can be Gmail, your application can be Slack, your application can be a project management Asana. These are the different applications that AI is talking to.

[01:42:43] - [01:42:48]

Dileep Karri: Okay? So the connector enables AI to talk to your applications.

[01:42:48] - [01:43:05]

Dileep Karri: Okay? So, that is what a connector does, and on ChatGPT, you can see plugins. Those are the connectors available for ChatGPT to work with, so you can connect different plugins. Those are the exact same connectors.

[01:43:05] - [01:43:10]

Dileep Karri: And on plot, you can see the connectors on

[01:43:10] - [01:43:17]

Dileep Karri: Go to KWork, click on plus, you see the connectors over here. So you can add a connector.

[01:43:17] - [01:43:31]

Dileep Karri: by, you know, browsing the connectors, or you can see how you can manage the connectors and add. So, for here, the way to add connectors is browse connectors. Search for the connector you want. You search for Gmail.

[01:43:31] - [01:43:39]

Dileep Karri: You have Gmail, and you can click on the plus, you just have to log in, it will get connected.

[01:43:39] - [01:43:43]

Dileep Karri: Okay? Similar to Gmail, I go with Asana.

[01:43:44] - [01:43:54]

Dileep Karri: So, again, I click on the plus, I can connect. Now, if I want to look at other connectors which are available, like, suppose I want to connect with some

[01:43:54] - [01:44:05]

Dileep Karri: tool which is available. See, some of the tools where you need to connect, you will need to have a login, okay? So, if I have the login, I can connect that very easily.

[01:44:05] - [01:44:10]

Dileep Karri: Okay, for example, I want to connect to Dropbox. I click on plus.

[01:44:14] - [01:44:18]

Dileep Karri: Here, I'll have to log in and give it the authentication.

[01:44:18] - [01:44:27]

Dileep Karri: If I don't log in and give in the authentication, my connector will not be able to do, and it depends on what

[01:44:27] - [01:44:47]

Dileep Karri: you know, type of tool I am connecting with. Okay, so here I kind of came back, right? But if I'm thinking about what kind of tool I'm connecting with, see, if I'm on the paid plan of a tool, I can use more of the tool. If I'm on the free plan of the tool, I would use less of the tool.

[01:44:48] - [01:44:59]

Dileep Karri: Okay? So this is, like, a quick fundamentals right now, where you have the AI, you have connectors and plugins which are, like, the tools, and skills which are like recipes.

[01:44:59] - [01:45:15]

Dileep Karri: Okay? And then we will come back, and we will see some small applications of how I can connect a few things to run a small workflow. Then I will show you how to build a very simple skill.

[01:45:15] - [01:45:20]

Dileep Karri: Okay, today we'll kind of come till this portion on

[01:45:20] - [01:45:29]

Dileep Karri: The Day 5, we will go deeper into the tools and skills, and see how we can build some more crazy workflows.

[01:45:30] - [01:45:35]

Dileep Karri: All right? So, at this point, let's take a quick 5-minute break.

[01:45:35] - [01:45:42]

Dileep Karri: Okay? Saveda, if we can set up a quick 5-minute break right now. After that, we'll come back, we will see some

[01:45:42] - [01:46:01]

Dileep Karri: good, small, you know, things, hands-on on how to build a skill, how to use these things together, right? And then, on day 5, we will go deeper into this. But these are the fundamentals that are sufficient for you to get started, and we will go deeper as the days go by.

[01:46:02] - [01:46:04]

Dileep Karri: Alright, a quick 5-minute break.

[01:51:21] - [01:51:23]

Dileep Karri: All right, are we back, everyone?

[01:51:33] - [01:51:34]

Dileep Karri: Okay...

[01:51:35] - [01:51:44]

Dileep Karri: back on the chat, if you're back, so that I know you're paying attention, you're back at your seat, you have taken a sip of water, you have motor on, and you are good to go.

[01:51:46] - [01:51:47]

Dileep Karri: Okay?

[01:51:47] - [01:51:56]

Dileep Karri: Awesome. So we have got around 45 minutes more of instruction, okay? And then you will have your worksheet.

[01:51:56] - [01:52:14]

Dileep Karri: Right? So here is, picking up from this. So, you saw AI needs connectors, or plugins, or tools, or skills, recipes. You can do both on ChatGPT as well as Claude. I will focus on Claude to show you all of that, and

[01:52:14] - [01:52:18]

Dileep Karri: Later in future sessions, we will see how you can do it on ChatGPT also.

[01:52:20] - [01:52:23]

Dileep Karri: So here I am, always choose the...

[01:52:25] - [01:52:35]

Dileep Karri: co-work kind of thing, especially when you're using tools. And let us say, you know, I have my team chats happening on this

[01:52:36] - [01:52:50]

Dileep Karri: app called Chat, and sometimes you might have this app called, for Microsoft Teams, where which you can connect with Microsoft 365. So let me show you this when you say, browse connectors.

[01:52:51] - [01:52:55]

Dileep Karri: There is Microsoft 365, through which you can connect your teams.

[01:52:55] - [01:53:15]

Dileep Karri: Over here, and we have got multiple tools, like Google Drive, Calendar, Notion, all of that I have connected, with which, and the connection is straightforward, I just click on the plus, I log in, authenticate my credentials, and I am logged in to that particular app, like Gmail, etc, all that.

[01:53:15] - [01:53:22]

Dileep Karri: So let us take this for a spin to see how it works, and then you will see me bringing all of it together.

[01:53:23] - [01:53:30]

Dileep Karri: Okay? And now is the place where I will switch from one task after another to parallel work.

[01:53:30] - [01:53:42]

Dileep Karri: Okay? So I'll do some parallel work, wherein I will do one task, allow it to run, and then I will switch to another task that'll be running, so we'll have multiple tasks happening in parallel.

[01:53:42] - [01:53:48]

Dileep Karri: Okay, so let's get started. So the first thing that I will do over here is this.

[01:53:51] - [01:53:57]

Dileep Karri: go to my Slack, and there is this channel called Daily AI Updates.

[01:53:57] - [01:54:13]

Dileep Karri: In that, can you pick up the, you know, the messages that have been put in today in the channel, and put it in the... as an output on the chat? And from what you can see, if you can quickly summarize what those messages have been about.

[01:54:15] - [01:54:24]

Dileep Karri: Okay, so basically what is happening is, you know, my team, kind of puts daily AI updates on Slack.

[01:54:24] - [01:54:37]

Dileep Karri: Okay, so it puts the daily AI updates on Slack, and I want to kind of check what are the messages that have been posted, and what are the output. Can you quickly summarize what those messages have been about?

[01:54:37] - [01:54:43]

Dileep Karri: Okay? So, I will ask you to do it. So, for this, one thing is, you are

[01:54:43] - [01:54:49]

Dileep Karri: In your connectors, your Slack has to be connected. So let us check.

[01:54:49] - [01:54:54]

Dileep Karri: My Slack is connected and ready. Without this, it will not work.

[01:54:54] - [01:54:56]

Dileep Karri: And, I'll allow it to...

[01:54:59] - [01:55:13]

Dileep Karri: So I'm saying, go to my Slack, there is a daily AI updates channel, pick up the messages that have been posted today, and then give me the summary overall. So this is running, let it run. We will start a new task.

[01:55:14] - [01:55:20]

Dileep Karri: Okay? The new task I want to run is... let us assume, how many of you read newsletters?

[01:55:21] - [01:55:26]

Dileep Karri: Thumbs up on the... this thing, reactions. How many of you read newsletters?

[01:55:27] - [01:55:34]

Dileep Karri: Great. How many of you Have subscribed to newsletters, but keep missing some issues.

[01:55:36] - [01:55:45]

Dileep Karri: Subscribe to newsletters, keep missing some issues, right? Now, I too have a similar problem, and I want to...

[01:55:46] - [01:55:54]

Dileep Karri: build a recipe so that my AI can take some new inputs, which are newsletter issues.

[01:55:54] - [01:56:03]

Dileep Karri: and then convert it into a small PPT PowerPoint presentation, which can summarize the key takeaways for me.

[01:56:04] - [01:56:17]

Dileep Karri: Okay? That's what I want to do. So I will say I want to build a skill. Okay, so here is how I'll do it, okay? For building this skill, which is newsletter to PPT, newsletter to PowerPoint, this is how I will do.

[01:56:18] - [01:56:35]

Dileep Karri: I want to build a new skill, which is newsletter to PowerPoint, where the input will be 3 or 4 latest issues of a newsletter, and then it should convert that into a PPT that I can consume.

[01:56:36] - [01:56:44]

Dileep Karri: Now, for this, interview me, get context so that you can build the skill in the manner that it is most useful to me.

[01:56:46] - [01:56:53]

Dileep Karri: I will not specify anything. I will ask AI to kind of interview me and build this skill.

[01:56:56] - [01:57:00]

Dileep Karri: Okay, if you see here, when it is blinking, that means they are working.

[01:57:03] - [01:57:15]

Dileep Karri: So, I want to build a new skill. So, when I say I want to build a skill, there is a skill present in Claude, I'll show you that, in the skill. When I say Manage Skills.

[01:57:16] - [01:57:21]

Dileep Karri: Okay? So there is a skill, if you see here at the bottom.

[01:57:22] - [01:57:30]

Dileep Karri: called Skill Creator. So, this Skill Creator is a skill which can create other skills for you. This will get invoked.

[01:57:31] - [01:57:48]

Dileep Karri: How does a skill get invoked? When you use some particular terminology, the skill gets invoked. So, when you say create a skill, the skill creator gets invoked. Similarly, when you say convert the newsletter to PPT, that particular skill gets invoked.

[01:57:48] - [01:57:54]

Dileep Karri: So, to just show you one skill which is available with me.

[01:57:57] - [01:58:03]

Dileep Karri: Right? So there is one draft business requirement. If you see this overview, right.

[01:58:03] - [01:58:23]

Dileep Karri: This overview is always loaded inside your AI. So, for all the skills, whatever overviews are there, those are loaded inside AI, and when you say, draft a BRD, write this request, turn this into a BRD, structure this as a PRD, then this skill gets invoked.

[01:58:24] - [01:58:28]

Dileep Karri: So it's like a trigger word. You use the trigger word, it will get invoked.

[01:58:29] - [01:58:35]

Dileep Karri: Now, you might be wondering, how do I know the trigger words, etc. You use it multiple times, you will get it. For example.

[01:58:36] - [01:58:48]

Dileep Karri: For skill creator, if you see, create new skills, modify and improve existing skills, measure skill performance. So, when you say something like, create a skill, it will automatically understand that

[01:58:49] - [01:58:58]

Dileep Karri: It is not the exact phrase, it is the intent you are showing as a user. Based on the intent, the overview, the skill gets invoked.

[01:58:58] - [01:59:15]

Dileep Karri: Okay? So, what I'm doing is, I'm using the skill creator skill to do that. It is asking me the question, the Outskill newsletter deck skill already does newsletter PBTX. I will say, build a distinct new skill. Okay? So, I want to build a distinct new skill.

[01:59:15] - [01:59:26]

Dileep Karri: Okay, I will say, whatever, which newsletter, whatever newsletter that I name at runtime, or I'll say, I will specify

[01:59:27] - [01:59:29]

Dileep Karri: the newsletter.

[01:59:31] - [01:59:38]

Dileep Karri: but typically, you know, they would be...

[01:59:40] - [01:59:49]

Dileep Karri: AI newsletters, because I read AI, so I will specify the newsletter, but typically there would be AI newsletters operate in this assumption.

[01:59:54] - [02:00:00]

Dileep Karri: Okay? So, is this deck for your own reading, or it could go to others too? Just me, personal skip?

[02:00:01] - [02:00:06]

Dileep Karri: Okay? Is it one slide per newsletter issue? I will say.

[02:00:07] - [02:00:15]

Dileep Karri: Based on the information that is useful for me, at that... based on that, the slides will improve, because

[02:00:15] - [02:00:28]

Dileep Karri: If there are some lot of updates, lot of important teaching materials for me, as an AI generalist, there is a lot of tips to share with me, then you can put more, so basis that, you need to create the slides.

[02:00:32] - [02:00:50]

Dileep Karri: Okay? So, in that way, you will specify what it is for. So, this one gets coming because you say, you know, for me, help me get context so that you can build a skill that is the way most useful. So it'll ask you questions to kind of understand this entire thing.

[02:00:53] - [02:00:57]

Dileep Karri: So, when it is blue, it means it is done. We go back over here, so there you go.

[02:00:58] - [02:01:14]

Dileep Karri: So there are these multiple things which have come in. Sam Altman says the world deserves confidence that Frontier Labs will act responsibly, given how much the pace of progress has deepened, and no lab should keep operating if it can't deliver on that.

[02:01:14] - [02:01:22]

Dileep Karri: Then, Microsoft AI Mustafa announced a code of conduct for humanized AI. The code line is, people matter more than AI.

[02:01:22] - [02:01:27]

Dileep Karri: Elon Musk replying to a dev says 4.8 Grok.

[02:01:27] - [02:01:44]

Dileep Karri: finishes training this week and moves into reinforcement learning, so something is cooking with Elon Musk. Then Alex Karp says, makes the geopolitical case against pausing AI. If we didn't have adversaries, I would be very in favor of pausing this technology completely.

[02:01:44] - [02:01:55]

Dileep Karri: But it would... we do. So, Alex is saying, this person is saying that they have enemies or adversaries. Because of that, they should not pause AI.

[02:01:55] - [02:02:02]

Dileep Karri: China, Arjun, etc. So you see, all the posts that have been shared in the Slack are now over here.

[02:02:07] - [02:02:08]

Dileep Karri: Okay?

[02:02:08] - [02:02:11]

Dileep Karri: Now, let us see, there is a skill that is getting built.

[02:02:13] - [02:02:22]

Dileep Karri: So it has drafted the skill and put it up for review, so now I can open the content of the skill. So look at this, it's a skill proposal right now, okay?

[02:02:22] - [02:02:23]

Dileep Karri: So, here it is.

[02:02:24] - [02:02:28]

Dileep Karri: Let me view it properly, view formatted.

[02:02:28] - [02:02:36]

Dileep Karri: Personal newsletter digest skill, a fast, private way, it's a distinct skill. Step 1, confirm scope, don't stall.

[02:02:36] - [02:02:54]

Dileep Karri: Right? Search Gmail by sender, so it's already picked up Gmail, okay? So, it'll look at my Gmail, and how to correct my Gmail? Go to Gmail, authenticate by this. So, it has given some technical things, you don't require to do that. For now, this can be useful for you overall.

[02:02:54] - [02:02:56]

Dileep Karri: So, my skill is ready.

[02:02:57] - [02:02:58]

Dileep Karri: I can save it.

[02:02:59] - [02:03:01]

Dileep Karri: My scale is saved.

[02:03:01] - [02:03:08]

Dileep Karri: go to Skills. In Skills, I go to Manage Skills, and if I look at...

[02:03:09] - [02:03:12]

Dileep Karri: The skills which are available.

[02:03:15] - [02:03:16]

Dileep Karri: Okay, not yet.

[02:03:17] - [02:03:20]

Dileep Karri: So, sometimes it'll... it'll... you'll need to load it once again.

[02:03:21] - [02:03:24]

Dileep Karri: Okay, so then I'll go to the skills.

[02:03:24] - [02:03:26]

Dileep Karri: Manage skills... there you go.

[02:03:27] - [02:03:33]

Dileep Karri: Sometimes when you kind of do this, it will come, and look at this Personal Newsletter digest.

[02:03:33] - [02:03:49]

Dileep Karri: When it will get invoked, turn the latest 3-4 yufus of any newsletter, usually AI or industry ones, into a quick, unbranded, personal PBTX digest, size to how much substance is actually in them.

[02:03:50] - [02:03:55]

Dileep Karri: Contents, it is the skill. If you look at this, it is telling you step one.

[02:03:55] - [02:04:03]

Dileep Karri: step 2, step 3, step 4, and it has given you all of this, okay? So this kill.md.

[02:04:04] - [02:04:17]

Dileep Karri: is the important portion of your skill, okay? And this will tell you the recipe. So this is like AI, the steps of the recipe, step 1, step 2, step 3 of a recipe that you are

[02:04:18] - [02:04:19]

Dileep Karri: Trying to build.

[02:04:19] - [02:04:25]

Dileep Karri: Okay? So now what I'll do is, I will kind of combine these into a single thing.

[02:04:25] - [02:04:42]

Dileep Karri: Okay? I will combine this into a single thing. What I'm going to combine? I'm going to combine the newsletter thing, I'm going to take the Slack thing that I have given, right, the Slack, the newsletter, and try to bring it all together.

[02:04:43] - [02:04:46]

Dileep Karri: Okay? Now see how I will orchestrate it.

[02:04:47] - [02:04:53]

Dileep Karri: First, I will put the prompt, and then I'll give you the demo of how I got through this, and how I'm orchestrating this.

[02:04:54] - [02:04:57]

Dileep Karri: Open new chat, co-work, and here we go.

[02:05:00] - [02:05:16]

Dileep Karri: look at my Slack, the daily AI updates channel, and you know my profile as an AI generalist, it is there in the custom instructions. From that, can you pick the right 3-4 things that I should know

[02:05:16] - [02:05:26]

Dileep Karri: and do a quick research on those, and give me the summary so that I can learn those. Plus, go to my Gmail.

[02:05:26] - [02:05:44]

Dileep Karri: I am subscribed to the Staying Ahead AI newsletter by Vibhos Ascenti. Get me the latest three issues, and invoke the Personal Newsletter digest, and then combine this and that, and create the PPT for me.

[02:05:46] - [02:06:06]

Dileep Karri: So I said, look at my Slack, the daily AI updates channel, go to my Gmail, I'm subscribed to the Staying Ahead AI newsletter by Bob S&T, get me the latest three issues, and create the personal newsletter, get me the three issues, and create the personal newsletter digest.

[02:06:09] - [02:06:13]

Dileep Karri: In the form of a... PPT.

[02:06:15] - [02:06:18]

Dileep Karri: ask me... clarifying questions?

[02:06:21] - [02:06:31]

Dileep Karri: If any. So whenever I'm giving such brief, where... so here, what is happening? I'm using something like a Slack or my connectors along with

[02:06:32] - [02:06:35]

Dileep Karri: skil, the Personal Newsletter Digest.

[02:06:35] - [02:06:45]

Dileep Karri: Okay? So because I have something called Outskill User Digest and a Personal User Digest, I'm particularly using the term so that that skill would get invoked.

[02:06:46] - [02:06:49]

Dileep Karri: And there you go, I will share this thing.

[02:06:50] - [02:06:58]

Dileep Karri: So, as... first, let me see if it is going to ask me clarifying questions, and then I will show you the flow of information.

[02:07:05] - [02:07:17]

Dileep Karri: So it is going to look at the Slack, the daily AI updates channel, and everything. I'm just pausing to kind of check if it can give me those things, and then I'll explain this entire workflow.

[02:07:20] - [02:07:26]

Dileep Karri: See, whenever there's a mistake, right, it is... 3, 2... for the payments...

[02:07:29] - [02:07:44]

Dileep Karri: So, the advantage of in co-work mode is I can provide corrections if I see something on the fly. For the chat, I have to do this, okay? How far back, you know, to select? I say it is only...

[02:07:46] - [02:07:48]

Dileep Karri: 3, 2, 4 things?

[02:07:49] - [02:07:52]

Dileep Karri: And, check.

[02:07:52] - [02:07:53]

Dileep Karri: Lost.

[02:07:54] - [02:07:55]

Dileep Karri: 3 days.

[02:07:55] - [02:07:58]

Dileep Karri: Only 3 to 4 things? Check the last 3 days.

[02:08:00] - [02:08:03]

Dileep Karri: Okay? Personal, unbranded is fine.

[02:08:03] - [02:08:09]

Dileep Karri: I would like to go for personal unbranded. How do you want the three to four things summarized?

[02:08:10] - [02:08:18]

Dileep Karri: There should be... In form of a... PowerPoint presentation.

[02:08:31] - [02:08:40]

Dileep Karri: So, I have given a task, go to this, get this, and everything. So, AI is very good at this thing, retrieve information from multiple sources.

[02:08:41] - [02:08:47]

Dileep Karri: So this is the part where connectors become very important, and you can see here, it is...

[02:08:50] - [02:08:55]

Dileep Karri: Right now, it is delivering both the PPTs for now, it is okay, I'll allow it.

[02:08:55] - [02:09:06]

Dileep Karri: Right? But usually, I would like to, you know, kind of merge it together, and what I'll do after this is I will even update the skill slightly, okay? So we'll do that also.

[02:09:06] - [02:09:29]

Dileep Karri: So, what it is doing, you can see the steps, it is doing the AI updates skill, it is finding the staying ahead AI newsletter issues in the Gmail, right? So, in some cases, it is not able to read the... this thing, so it will read the last 3 days of the Slack channel, and it is going to do this. So, it will run through this, but I'll show you the workflow.

[02:09:29] - [02:09:30]

Dileep Karri: of how I think through this.

[02:09:31] - [02:09:34]

Dileep Karri: Okay? See, whenever you're doing your work, right.

[02:09:35] - [02:09:42]

Dileep Karri: Especially if you're doing official work, some part of it is on your Gmail slash Outlook.

[02:09:44] - [02:09:47]

Dileep Karri: Some part of it is on your Slack.

[02:09:48] - [02:09:50]

Dileep Karri: slash teams.

[02:09:51] - [02:10:07]

Dileep Karri: Microsoft Teams, depending upon what tool stack that you are using inside your organization, or if you are having some documents, it is there as part of your Google documents.

[02:10:08] - [02:10:09]

Dileep Karri: OneDrive.

[02:10:12] - [02:10:15]

Dileep Karri: Sometimes it could be no-show.

[02:10:16] - [02:10:23]

Dileep Karri: Sometimes, if you are on a project management tool, like GIRA, notion.

[02:10:25] - [02:10:26]

Dileep Karri: or linear.

[02:10:28] - [02:10:30]

Dileep Karri: Everything, there is a connector available.

[02:10:30] - [02:10:48]

Dileep Karri: So, when you are giving a brief to AI of a job, you need to understand that some context is in Gmail or Outlook, some context is in Slack or Teams, some context is in Google Docs or OneDrive, some context is here, some context is here.

[02:10:48] - [02:11:00]

Dileep Karri: You know the context is fragmented, your job is to ensure that this fragmented context flows into your AI to synthesize the thing or do the job for you.

[02:11:01] - [02:11:25]

Dileep Karri: Okay? For example, your approvals might be in Outlook, and you want to go ahead and prepare a draft, and, you know, prepare the contract present in Google Docs, which is in the template form, to a particular client where the approval exists in Gmail or Outlook, and you want to check that you have sent it to your manager.

[02:11:25] - [02:11:31]

Dileep Karri: and whether they have given approval in your Slack or Teams channel or not.

[02:11:31] - [02:11:40]

Dileep Karri: So you are kind of slicing through multiple things. You just have to verbally kind of capture the flow of information, and

[02:11:40] - [02:11:44]

Dileep Karri: dictate that, okay? So, like, this way.

[02:11:44] - [02:11:49]

Dileep Karri: Of how you manually will do your process.

[02:11:51] - [02:11:54]

Dileep Karri: Manually, map the process.

[02:11:57] - [02:12:03]

Dileep Karri: When you manually map the process, the process, you can become the brief.

[02:12:04] - [02:12:08]

Dileep Karri: Where the context is present in tools.

[02:12:08] - [02:12:13]

Dileep Karri: Now, you have to ensure and ensure that these tools are connected to AI.

[02:12:14] - [02:12:20]

Dileep Karri: Okay, now comes the part of security. Are these tools safe to connect with AI? Back of your mind.

[02:12:21] - [02:12:29]

Dileep Karri: So what I can say is, if these are connectors endorsed by Anthropic or endorsed by ChatGBT, okay to connect.

[02:12:29] - [02:12:33]

Dileep Karri: Right? And think of it like getting connection to a library.

[02:12:33] - [02:12:42]

Dileep Karri: So, when you get access to a library, it doesn't mean that you are... read all the thousands of books available.

[02:12:42] - [02:12:50]

Dileep Karri: Now, in the library, the librarian will check. You go to the library and say, I want to read this particular book.

[02:12:50] - [02:13:10]

Dileep Karri: Librarian will check you have access to it or not. Can you check out the book, or can you read only the book? Okay? Are you allowed to check out the book? Because sometimes some books are only for the lecturers, not for the students. So, if you have touched some book where your access is locked, the librarian will stop you right there.

[02:13:10] - [02:13:16]

Dileep Karri: Okay? So therefore, in the similar manner, if you look at your connectors, Okay?

[02:13:18] - [02:13:25]

Dileep Karri: I have my connectors, let me go to Manage Connectors. Click any connector you're working with. For example, my Gmail.

[02:13:25] - [02:13:44]

Dileep Karri: Okay? In my Gmail, read-only tools I have given allowed, so that anything it wants to read, it can read. But write or delete, it always needs my approval. So I can... if I suppose some kind of time I would not even want it to do that, I can block it if I want.

[02:13:45] - [02:13:54]

Dileep Karri: So, like a librarian access control, you can control how your connectors will work with you. So, when you connect the connector.

[02:13:55] - [02:14:12]

Dileep Karri: check over here what are the various accesses that you want to provide. Give it the... where you want it to always allow, give it that. Where you want to give it approval, give it that. Where you want to outright block it, you will never want your AI to do that.

[02:14:13] - [02:14:18]

Dileep Karri: Say block. For example, reply to email, I will block it.

[02:14:19] - [02:14:28]

Dileep Karri: Okay? I will never want my AI to reply to an email. At the best, I want it to create a draft. I will review the draft and manually press send.

[02:14:29] - [02:14:31]

Dileep Karri: Because I'm talking with my learners.

[02:14:32] - [02:14:41]

Dileep Karri: I'm talking with my clients. I want to be 1000% sure that every communication going is endorsed by me.

[02:14:41] - [02:14:45]

Dileep Karri: That's why I will be paranoid, and I can set up however I want.

[02:14:45] - [02:14:51]

Dileep Karri: When you are in the starting stages of your journey, try to be more careful.

[02:14:51] - [02:14:56]

Dileep Karri: Okay? Try to avoid always allow, give it approval more and more.

[02:14:56] - [02:15:08]

Dileep Karri: Use it once, use it twice, use it thrice, get confidence, slowly start giving the read access, but the right access, keep it always in your control.

[02:15:10] - [02:15:13]

Dileep Karri: Okay? Now, coming to the skill part.

[02:15:14] - [02:15:19]

Dileep Karri: Okay? Now, coming to the skill part, see, here I have built this skill.

[02:15:20] - [02:15:28]

Dileep Karri: Okay? Skill is a repeatable process. Now, when do you build a skill, first of all? Okay? So, here are some tips and tricks.

[02:15:29] - [02:15:33]

Dileep Karri: When you are doing a one-time task.

[02:15:38] - [02:15:40]

Dileep Karri: It is a brief.

[02:15:42] - [02:15:55]

Dileep Karri: Okay, one-time task. Somebody, like, somebody has come to your restaurant, for some reason they cannot eat anything in your restaurant, they request you to create a special dish for you.

[02:15:55] - [02:16:07]

Dileep Karri: For that, you don't have to, you know, set up everything, etc, and all that. You don't have to write a recipe. You just try to oblige the customer, and you give a small dish so that you are ready to help them.

[02:16:08] - [02:16:10]

Dileep Karri: So, one-time task, there is a brief.

[02:16:10] - [02:16:15]

Dileep Karri: Now, 3 to 4 times you are using the same task.

[02:16:16] - [02:16:23]

Dileep Karri: You are putting in the same brief, you are doing the same task, but now the process is clear.

[02:16:25] - [02:16:37]

Dileep Karri: You know the process is clear. Basically, you know how does the information flow. Does the information come from Gmail? Does the information come from Slack?

[02:16:37] - [02:16:54]

Dileep Karri: Where does this information come? So, for you to build any kind of skill, or when you want to do anything, you should ensure that you know the flow of information. What is coming where? Then what is happening, what is the synthesis? What is output?

[02:16:56] - [02:17:06]

Dileep Karri: So, you should not build a skill in the first try. You should do the one-time task and the brief multiple times, three to four times.

[02:17:06] - [02:17:09]

Dileep Karri: So that you can give the feedback.

[02:17:11] - [02:17:18]

Dileep Karri: So, sometimes the power... the presentation is not prepared well. The presentation's formatting is off.

[02:17:19] - [02:17:22]

Dileep Karri: You don't, like... Things are repetitive.

[02:17:23] - [02:17:27]

Dileep Karri: Some things are too easy for you, some things are too difficult for you.

[02:17:28] - [02:17:40]

Dileep Karri: So, you calibrate. You do it 3-4 times, and you calibrate how you want the output to be. Once you are satisfied, and you are getting repeatable output with your briefs.

[02:17:40] - [02:17:47]

Dileep Karri: Then, you map the flow, you give the brief, and then you say, Build me the skill.

[02:17:52] - [02:17:56]

Dileep Karri: Okay? Thumbs up if you know when you should build a skill.

[02:17:57] - [02:18:08]

Dileep Karri: Okay? First 3 to 4 times, run it yourself, see the output, see that it is consistent, then you can build out the skill. Don't try to build the skill in the first

[02:18:08] - [02:18:10]

Dileep Karri: thing itself.

[02:18:12] - [02:18:28]

Dileep Karri: So it is available, so I have got the personal digest, so it has got me one issue on 5.6 Kim K3 robots, what happened, right? Then it said tools worth trying, markets not. Then it picked some August issues.

[02:18:30] - [02:18:31]

Dileep Karri: etc.

[02:18:32] - [02:18:40]

Dileep Karri: Okay, so it has picked up some older issues. I would have to give it feedback that's saying that you picked some old issues. I would like you to pick the

[02:18:41] - [02:18:47]

Dileep Karri: newer issues of staying ahead AI, but this is good, in a way. If I've got any feedback.

[02:18:48] - [02:18:52]

Dileep Karri: I would offer that feedback. So, we will set that up.

[02:18:52] - [02:18:56]

Dileep Karri: Okay? Then, it has given me this.

[02:18:57] - [02:19:01]

Dileep Karri: Then, I'll share... check the daily AI updates.

[02:19:05] - [02:19:12]

Dileep Karri: Alright, so it's... I have 3 things worth knowing. AI labs, this thing. 1, 2, 3...

[02:19:12] - [02:19:19]

Dileep Karri: It has... it is decent, I like it. But these are two different PPTs. I want it in a single PPT overall.

[02:19:20] - [02:19:21]

Dileep Karri: So, I will give this feedback.

[02:19:24] - [02:19:33]

Dileep Karri: few feedback points. Number one, I want the Staying Ahead Digest to be the latest,

[02:19:33] - [02:19:47]

Dileep Karri: you know, the editions, I think you have kind of pulled old editions all through, so I would like to check if it is the latest editions, or is it the old editions, number one.

[02:19:48] - [02:19:52]

Dileep Karri: Number two, you have given me two PPTs. Can you,

[02:19:52] - [02:20:08]

Dileep Karri: you know, update the personal newsletter digest skill, so that it does this daily and AI update stuff, along with staying AI ahead digest, and gives me a comprehensive presentation based on the timeline that I provide.

[02:20:13] - [02:20:19]

Dileep Karri: Ask me further... Questions?

[02:20:19] - [02:20:21]

Dileep Karri: If needed.

[02:20:23] - [02:20:35]

Dileep Karri: So, I'm giving the feedback right now. I want the Staying Ahead Digest to be the latest editions. I think it has pulled older editions. Now, if I've got anything on the content, I can check the content also.

[02:20:38] - [02:20:47]

Dileep Karri: Let us see if it has picked the older editions, or for some reason my subscription got paused. It should be able to tell me that very clearly.

[02:20:48] - [02:20:51]

Dileep Karri: Or I can manually check and verify that also.

[02:20:54] - [02:21:02]

Dileep Karri: So, what I'm teaching you right now is, suppose you want to upgrade your skill, right? You should be able to upgrade that.

[02:21:04] - [02:21:09]

Dileep Karri: And upgrading a skill is, like, simply saying, I want to upgrade this particular skill.

[02:21:14] - [02:21:34]

Dileep Karri: Right, I think some reason it got missed, so it is fine. Should this run automatically or a schedule? Okay, so now, it is saying schedule overall, so I set up a referring schedule task that pulls Slack, checks for newsletter issues, and delivers a DEC every day without you asking.

[02:21:34] - [02:21:41]

Dileep Karri: Right? So I want to set up an automatic run, but I'll say I want to set up

[02:21:42] - [02:21:44]

Dileep Karri: Be clear.

[02:21:46] - [02:21:51]

Dileep Karri: Or, writer later now, I'll say, Skip for now.

[02:21:54] - [02:21:57]

Dileep Karri: I will set it later, because I want to show you how to set this up.

[02:21:59] - [02:22:03]

Dileep Karri: Okay, one combined deck. One combined deck is fine.

[02:22:03] - [02:22:13]

Dileep Karri: If the... if a run finds zero new newsletters issues, or zero worthwhile Slack items, note what is missing and say this thing.

[02:22:15] - [02:22:16]

Dileep Karri: Check with me.

[02:22:19] - [02:22:21]

Dileep Karri: On what needs to be done.

[02:22:23] - [02:22:25]

Dileep Karri: Okay, don't take independent decisions.

[02:22:32] - [02:22:36]

Dileep Karri: So now, it will run through this and actually update my skill also.

[02:22:38] - [02:22:47]

Dileep Karri: Everybody understood? Thumbs up if you have understood this part, that if I see a part... if I see the output, I can offer feedback and correct the output.

[02:22:48] - [02:22:53]

Dileep Karri: Also, if I want to change the skill or do any modifications, I just have to tell.

[02:22:53] - [02:22:58]

Dileep Karri: So the skill of working with AI is clarity.

[02:22:58] - [02:23:03]

Dileep Karri: Okay? The more clarity we have, you can do this. Now, some things...

[02:23:03] - [02:23:18]

Dileep Karri: How do I check my skills? You say Manage Skills, you will see all your skills here. And you can turn off your skills if you want. For example, if there is this newsletter deck, this is more powerful, I will turn this off.

[02:23:19] - [02:23:23]

Dileep Karri: So I have turned off this skill, so that only this skill will work.

[02:23:23] - [02:23:30]

Dileep Karri: If I want to delete a skill, I can open this, I can turn on, I can remove the skill also.

[02:23:31] - [02:23:35]

Dileep Karri: Okay? If I want to remove the skill, I can remove the skill also.

[02:23:36] - [02:23:47]

Dileep Karri: There is something called Discover, right? There are a few skills which are available. You can check through here, but there are better places to check for skills. We will talk more of that on

[02:23:48] - [02:23:54]

Dileep Karri: Day 5, wherein I will show you a way to find skills, mix.

[02:23:55] - [02:23:59]

Dileep Karri: Multiple skills, and synthesize your own skill.

[02:23:59] - [02:24:02]

Dileep Karri: But for now, you can check the skills over here.

[02:24:03] - [02:24:18]

Dileep Karri: Similarly, connectors, you can see, you have all the connectors over here. For now, work with only these connectors which are present. How to get other connectors? We will check that on Day 5. I don't want to overload you with information.

[02:24:19] - [02:24:29]

Dileep Karri: And what I have done is, it has done this, so both points handled. It has said daily AI brief, so it has kind of built me a new skill proposal.

[02:24:29] - [02:24:30]

Dileep Karri: I would say...

[02:24:31] - [02:24:40]

Dileep Karri: Instead of building this daily AI brief, can you update my personal newsletter digest and just rename it overall?

[02:24:46] - [02:24:54]

Dileep Karri: See, I can... usually, if you see a lot of grammatical mistakes are there, but I'm okay with it because I'm just giving the context to it right now.

[02:25:04] - [02:25:10]

Dileep Karri: So it is thinking it will tell me whether it will do that, or it'll build a new skill, etc, all that.

[02:25:15] - [02:25:19]

Dileep Karri: So, the key to create a good skill is your clarity.

[02:25:23] - [02:25:37]

Dileep Karri: So, it is proposing the full replacement, incorporating everything worth keeping from the original, plus the Slack side. So now it is figuring out that, okay, because that earlier thing was there, let me edit it overall.

[02:25:38] - [02:25:49]

Dileep Karri: So the good part about this entire skills thing is, if you have got clarity in your head, you can work it. You can create a skill, you can update a skill, etc, all that.

[02:25:51] - [02:25:59]

Dileep Karri: Okay, updated the proposal, this replaces the personal digest outright overall, so I will say update.

[02:25:59] - [02:26:03]

Dileep Karri: Based on personal newsletter text. I'll update this.

[02:26:06] - [02:26:07]

Dileep Karri: It has updated.

[02:26:09] - [02:26:11]

Dileep Karri: I'll just refresh it so that it gets refreshed.

[02:26:12] - [02:26:18]

Dileep Karri: I will... Go to Skills, Manage skills...

[02:26:23] - [02:26:24]

Dileep Karri: Okay?

[02:26:24] - [02:26:33]

Dileep Karri: It has kind of updated it, builds Dilib's combined AI digest deck, curated pics, etc, so it has updated this overall.

[02:26:33] - [02:26:52]

Dileep Karri: Okay, it's a personal newsletter digested, this thing. So, if you see, there is the versions. It is version 1 ahead, now it is version 2, which is current. Now, if you want to share a skill with somebody, you can download the skill, and they can upload the skill also. So, you can go to skills.

[02:26:52] - [02:27:05]

Dileep Karri: Right? I can say Manage Skills, I can say add, and I can upload a skill. How to download a skill? I can go to the particular one. Here, I can click, and I'll say download.

[02:27:05] - [02:27:09]

Dileep Karri: Or I can even replace the skill I bought. So I can download the skill.

[02:27:09] - [02:27:17]

Dileep Karri: And I can go back, and I can upload the skill, and others can upload the same skill that I have.

[02:27:17] - [02:27:31]

Dileep Karri: Now, if I am on individual accounts, this is the process to do that, but if I'm on a Teams or an Enterprise Cloud account, I should be... once I create a skill and I give the permissions, others should also be able to see the skills.

[02:27:32] - [02:27:41]

Dileep Karri: All good? Do you understand how to create a skill? How to update the skill? How do you make it work better? All of that? Is it clear, everyone?

[02:27:44] - [02:27:45]

Dileep Karri: Alright.

[02:27:45] - [02:27:55]

Dileep Karri: So then, what you will see right now is, like, a plethora of workflows, right? Go... let us go back to our image.

[02:27:55] - [02:28:05]

Dileep Karri: you have the AI, which is having, you know, your connectors and plugins, and you have got your skills, which is your recipes.

[02:28:05] - [02:28:29]

Dileep Karri: Okay? Now, a little deeper into connectors, what is this connectors, etc. Some part of tech terminology, we will see it a little bit on Day 5. On day 5, we will check on the tech terminology over there. For now, this is a sufficient thing. So, what we have seen is connect tools and recipes. In a way, we slightly defined, like, how an AI agent works.

[02:28:30] - [02:28:39]

Dileep Karri: So, an AI agent requires both tools and recipes to work. So, in a way, we created a very small AI agent today.

[02:28:39] - [02:29:03]

Dileep Karri: of how it works. We will see more about agents, etc, on, you know, day 3, day 4, you will see a little more of agents, and then you keep working through multiple agents. There is a lot of exciting things coming, but just a quick recap of what we had done today. Number one, we tried to move away from prompting towards briefing or

[02:29:03] - [02:29:04]

Dileep Karri: context engineering.

[02:29:04] - [02:29:13]

Dileep Karri: We learned about three major loops after you kind of brief the AI. One loop is for basic

[02:29:13] - [02:29:32]

Dileep Karri: feedback and asking it to check its assumptions. Then another loop to kind of ask it to list the assumptions, what it thinks is pro, what it thinks is con, etc. Then the third and final loop to give it the permission to not hallucinate and tell explicitly things are unknown.

[02:29:32] - [02:29:49]

Dileep Karri: After you do the three loops, you can actually get the output. And one important thing to remember is, once you get the first draft of your output, if you can provide a good reference of what good really means, ask it to compare and contrast.

[02:29:49] - [02:30:01]

Dileep Karri: That would be a great way to improve the AI output. As I said, because of so much guardrails coming in, the AI output on a first task is slightly degrading, so this will push it in that manner.

[02:30:01] - [02:30:08]

Dileep Karri: Or, you can ask AI to create multiple versions and judge itself which version it thinks is best.

[02:30:08] - [02:30:13]

Dileep Karri: what is missing in each version. That way, you can improve the output overall.

[02:30:13] - [02:30:32]

Dileep Karri: Okay? After that, we talked about custom instructions. We have the operating instructions template. It'll be shared with all of you as part of your resources. You can check it out, and you can set up your operating instructions for any of the tools that we have. That is number two.

[02:30:32] - [02:30:38]

Dileep Karri: After that, we went into the definition of a chef, that a chef as a person who has

[02:30:38] - [02:30:43]

Dileep Karri: The connectors are tools and the recipes. Chef has a tool and the recipes.

[02:30:43] - [02:31:00]

Dileep Karri: AI has the connectors, plugins, and the skills, or the recipes. And we saw how to build a simple skill, how to look at the connectors, and how do I build a simple workflow? And as I said, context is spread across multiple tools.

[02:31:00] - [02:31:06]

Dileep Karri: You are bringing the context from multiple tools together, and then planning it out.

[02:31:06] - [02:31:22]

Dileep Karri: Okay? So we will learn deeper about skills and tools on day 5, and we will see more deeper, advanced workflows of what we could do there properly, and that is what we will see.

[02:31:22] - [02:31:41]

Dileep Karri: Okay? So this is just like a introductory primer. Some of you will be... would have seen some things before. You might know this before, but this is, you know, kind of to get you kick-started on the journey, revising few things, you know, telling a few new things. I know there is some new pockets that we have covered, and

[02:31:41] - [02:31:48]

Dileep Karri: the idea is you kind of kick off from here. You have... we have a packed agenda coming up. So first.

[02:31:48] - [02:32:01]

Dileep Karri: off to Uthappa to explain you the worksheet and what we are going to do, and then we are going to... I'll come back to you on day 5, where we go deeper into workflows using the skills and the tools that you have learned today.

[02:32:01] - [02:32:05]

Dileep Karri: All right, thank you, everyone. You have been a great audience. Over to Uthappa.

[02:32:07] - [02:32:15]

Uthappa Outskill: Thank you so much, Philippe. That was a wonderful start for this 14-day sprint. So, to all the learners, did we make you uncomfortable on day one?

[02:32:15] - [02:32:18]

Uthappa Outskill: Did it challenge your thought process?

[02:32:21] - [02:32:26]

Uthappa Outskill: While you let us know, there's also been a poll that has been launched, where you can go ahead and share your feedback.

[02:32:26] - [02:32:41]

Uthappa Outskill: Now, all of this feedback is important because, one, it gives us a direction for the upcoming cohorts, and also for the current cohort. At the same time, on day 14, we're going to reflect back upon all these ratings and feedbacks that you've provided, and kind of get a sense of how did we do, or where did we do right, where did we do wrong.

[02:32:41] - [02:32:47]

Uthappa Outskill: All of that report card is going to be presented to you on day 14, so make sure you participate in these

[02:32:47] - [02:32:50]

Uthappa Outskill: Feedbacks and polls that we, have launched.

[02:32:51] - [02:33:05]

Uthappa Outskill: Okay? So, overall, Dilip, that is... that is lovely for Day 1, so thank you so much. We will expect more, difficulty, the... the bar to raise higher on Day 5, and you're back, so I'll let you go at this point of time while I'll take the rest of the session.

[02:33:06] - [02:33:24]

Dileep Karri: Yeah, one last comment. I see some people saying it was very easy, I wanted to go deeper, right? So, FYI, we will go very deep, right? But, see, this is day one, right? I'm just... I'm the pace setter right now. I'm just making you jog on day one, okay? Day five, you will see, alright?

[02:33:24] - [02:33:31]

Dileep Karri: For those who want to connect with me, I see some people asking me that. Let me share my LinkedIn.

[02:33:38] - [02:33:42]

Dileep Karri: Okay? So you can connect with me on LinkedIn.

[02:33:45] - [02:33:56]

Dileep Karri: Okay? So, you can, connect with me there, you can ask me things. Again, don't expect instantaneous responses. I will do respond, but give me some time.

[02:33:56] - [02:33:59]

Dileep Karri: All right? Thank you, Uthappa, over to you.

[02:33:59] - [02:34:01]

Uthappa Outskill: Thank you, thank you so much, Leigh.

[02:34:01] - [02:34:07]

Uthappa Outskill: Alright, I see people asking for workbooks, homeworks, etc. I'll explain that.

[02:34:07] - [02:34:09]

Uthappa Outskill: 5 minutes before we get there.

[02:34:11] - [02:34:15]

Uthappa Outskill: What we're gonna do is, team, we can give all the learners 10 minutes break after I'm done.

[02:34:16] - [02:34:18]

Uthappa Outskill: I have two things for all the learners to do.

[02:34:18] - [02:34:23]

Uthappa Outskill: First thing, during the break, since this is day one, we're going to give you a link.

[02:34:23] - [02:34:29]

Uthappa Outskill: I'll let the team know when to drop it. So, we'll give you a link, which will go ahead.

[02:34:30] - [02:34:37]

Uthappa Outskill: participate in it. It is going to be more of testing your AI skill at this point of time. It's, like, more of a reflection of where you are on day one.

[02:34:37] - [02:34:48]

Uthappa Outskill: It is going to be both of a, you know, tracker for you as well as for us, and we're going to do a similar check on Day 7 and day 14 to understand what kind of progress that you have made.

[02:34:49] - [02:35:07]

Uthappa Outskill: Personally, when you start reflecting about how you have been using AI in these 14 days. So that is going to be a kind of a guiding path for both you, as well as us, to see if

you're in the right direction. So we'll do that first thing during the break, in that 10 minutes, it's going to hardly take about less than a minute.

[02:35:07] - [02:35:10]

Uthappa Outskill: The second thing that we wanted you to make sure is...

[02:35:11] - [02:35:15]

Uthappa Outskill: that you're installed the Zoom application that we were talking about, the Zoom Workplace app.

[02:35:16] - [02:35:33]

Uthappa Outskill: Whoever is installed, don't worry, you can directly get into the breakout rooms, and if you have logged in through that particular application, you can log into your breakout rooms. Others, you will have difficulty getting access to this breakout room activity, so make sure you use that 10 minutes to do this setup if it is not already done.

[02:35:33] - [02:35:37]

Uthappa Outskill: Okay? So this is the first thing. Is this clear? Is the first point clear?

[02:35:40] - [02:35:47]

Uthappa Outskill: So, whenever we post a link in the chat, it is going to be a hyperlink, don't try to copy it, just click on it, it'll open up a new link.

[02:35:48] - [02:35:49]

Uthappa Outskill: Okay?

[02:35:51] - [02:35:59]

Uthappa Outskill: So, two things. One, you take that skill assessment to see where we stand as of day one, once the team drops a link in the chat.

[02:35:59] - [02:36:02]

Uthappa Outskill: After that, in case you have not

[02:36:02] - [02:36:07]

Uthappa Outskill: install the Zoom Workplace app. Try to do that once we get to the break.

[02:36:08] - [02:36:14]

Uthappa Outskill: Okay, the first point is we're going to test where we stand today in terms of AIC. For example, your understanding

[02:36:14] - [02:36:34]

Uthappa Outskill: or how do you use AI today, is something that we want to kind of understand, and then kind of do a similar check on day 7 and day 14 to figure out if there has been some change in the way that we are operating. That is going to be the right way to measure effectiveness when it comes to you using AI, and also for us, a guiding direction on

[02:36:34] - [02:36:37]

Uthappa Outskill: If we are in the right path or not.

[02:36:37] - [02:36:39]

Uthappa Outskill: Okay? So this is something that we will do.

[02:36:41] - [02:36:47]

Uthappa Outskill: Then, as it said, as part of the daily formalities that we have.

[02:36:47] - [02:37:02]

Uthappa Outskill: you have your session, you give feedback for the session. Also, if any part of the session, the mentor, the topic, or something that caught your mind and you want to give a shout-out, you can go ahead, on your LMS, there is a space called as Gratitude, if I can just show you.

[02:37:04] - [02:37:14]

Uthappa Outskill: On your LMS, there is a space called as Gratitude. Just go there and drop in your shoutouts, your gratitude to the people who made it

[02:37:14] - [02:37:21]

Uthappa Outskill: Better for you, helpful for you, especially the mentors who come in and teach, and share all those lovely

[02:37:21] - [02:37:38]

Uthappa Outskill: instructions, right? Because it is normal when people don't like a part of the session or a day, they just... they can go ahead and put it out, but people who love any part of it, if you can share it in these spaces, it is also going to be a motivational factor for our mentors also to do more and keep doing better at it.

[02:37:39] - [02:37:42]

Uthappa Outskill: Okay, so two things we have covered. Then...

[02:37:44] - [02:37:49]

Uthappa Outskill: Every day after your breakout room activity, you are going to get a reflection link.

[02:37:49] - [02:37:52]

Uthappa Outskill: In simple terms, you're going to get a badge

[02:37:52] - [02:38:01]

Uthappa Outskill: for... on a daily basis, which is going to be more of, like, celebrating your milestone for that particular day. For example, today, what are the things that you learned? Go ahead.

[02:38:01] - [02:38:15]

Uthappa Outskill: Share it across with people, share that badge on LinkedIn, share that badge on your LMS, on the Reflections channel. We'll talk about it later, but you'll get a badge at the end of the day, after the workbook is done, so make sure you leave the room with that.

[02:38:16] - [02:38:31]

Uthappa Outskill: And you can also go ahead, since it's a 14-day sprint, right? You can keep talking about every step, learning in public. How do you go about doing this? You can go ahead, share this badge, or even write an article for yourself, for example, LinkedIn article, whatever you want to write, keep sharing that outcome

[02:38:31] - [02:38:40]

Uthappa Outskill: make people aware on the journey that you are, taking towards, right? So, make sure this is also part of your daily workflow as well.

[02:38:41] - [02:38:44]

Uthappa Outskill: Now, we'll take that 10 minutes break. Once we come back.

[02:38:45] - [02:38:59]

Uthappa Outskill: Shasti is going to be there, helping you out, understand how to go about the workbook, what is a workbook about, how does a workbook get solved, what is a breakout room activity, how does it operate, and also give you a bit of instructions on important

[02:38:59] - [02:39:11]

Uthappa Outskill: I would say parts of your LMS that should be aware when it comes to live sessions, recordings, how do you get access to it. Very short, in 2 to 3 minutes. We'll touch base upon that so that nobody asks us

[02:39:12] - [02:39:14]

Uthappa Outskill: Where to find the recording or transcripts tomorrow.

[02:39:16] - [02:39:18]

Uthappa Outskill: Is this much of an instruction clear?

[02:39:24] - [02:39:29]

Uthappa Outskill: I know I've shared too much in the last one minute, but I... I'm clear.

[02:39:34] - [02:39:39]

Uthappa Outskill: Okay, if it's not, we'll go step by step, no worries. Team, the first thing that we can do is...

[02:39:39] - [02:39:41]

Uthappa Outskill: Drop the self-assessment link.

[02:39:42] - [02:39:45]

Uthappa Outskill: and then the meeting ID for...

[02:39:45] - [02:39:52]

Uthappa Outskill: the breakout rooms, I mean, the session, and the workbook, once we get into the break.

[02:39:52] - [02:39:54]

Uthappa Outskill: There you go. Sumedha's already shared your...

[02:39:55] - [02:39:58]

Uthappa Outskill: scale assessment. All that you have to do is open that link.

[02:40:03] - [02:40:06]

Uthappa Outskill: Open that link, put in your registered email ID,

[02:40:07] - [02:40:10]

Uthappa Outskill: And then you'll get this personalized link here.

[02:40:11] - [02:40:15]

Uthappa Outskill: Open it on the portal, click on this button, open it.

[02:40:16] - [02:40:22]

Uthappa Outskill: you should be able to see, I've already taken the Day 1 assessment, so you should be able to take your Day 1 skill check.

[02:40:31] - [02:40:36]

Uthappa Outskill: You don't need to get a paid Claude account right now. I will tell you when you need to get Word, for now it is not required.

[02:40:46] - [02:40:50]

Uthappa Outskill: Folks, if link is not working, try opening an incognito window once.

[02:40:53] - [02:40:59]

Uthappa Outskill: Okay, so just open this link, put in your email ID, do this, we'll see you in the next 10 minutes.

[02:40:59] - [02:41:05]

Uthappa Outskill: Waiting for you. Team, whenever you're ready, we can get to that break, 10 minutes, and come back.

[02:51:24] - [02:51:26]

Uthappa Outskill: Alright, welcome back.

[02:51:27] - [02:51:35]

Uthappa Outskill: So, I was going through the chat while we were on the break, so a couple of questions came up, which I'll first address, and then I'll hand it over to Shasti.

[02:51:35] - [02:51:39]

Uthappa Outskill: First things, Zahir asking what tags should I use on LinkedIn, etc.

[02:51:39] - [02:51:58]

Uthappa Outskill: you can just share your story, that's all. Just share what you've learned, what were you able to build, just put out your learning journey out there so that people observe it. It does sometimes help, right? And if you do, try using a LinkedIn article instead of using a LinkedIn post, whichever works for you, but we have seen LinkedIn article is

[02:51:58] - [02:52:06]

Uthappa Outskill: Kind of treated better when it comes to such stories being shared, so that you can also go elaborate about what did you kind of build with it.

[02:52:07] - [02:52:16]

Uthappa Outskill: Second question, day one, of course, we know it can get overwhelming for a few, so how do you go from here, like, because so much of things were covered, how do you go from here?

[02:52:16] - [02:52:17]

Uthappa Outskill: This is where...

[02:52:17] - [02:52:32]

Uthappa Outskill: The first layer of things should be your workbooks and homework. So there are going to be two things given to you. One is a workbook which you will do in the breakout room activity right now, right? So that is going to immediately, put the...

[02:52:33] - [02:52:38]

Uthappa Outskill: Method to create your own skills and create your own workflow to test, and you'll learn how to do that.

[02:52:38] - [02:52:47]

Uthappa Outskill: Second thing is a homework that we'll be providing you to set your own operational instructions, or your custom instructions to your... it can be called a ChatGPT.

[02:52:47] - [02:52:49]

Uthappa Outskill: That was the crux of today's session.

[02:52:50] - [02:52:55]

Uthappa Outskill: The third... the next layer after this workbook, your post-session resource.

[02:52:55] - [02:53:13]

Uthappa Outskill: whoever wants to try it out, I'm saying, you can go ahead and do that. And the third layer is basically replicating everything that the mentor did. That depends upon how much time do you have in a particular day. Either do it in between these today's session and tomorrow's session, or kind of try to do it after your 14 days is done.

[02:53:13] - [02:53:17]

Uthappa Outskill: whoever had this question of how do I map these things out.

[02:53:17] - [02:53:20]

Uthappa Outskill: Do you understand now what should be a priority right now?

[02:53:20] - [02:53:31]

Uthappa Outskill: Don't try to do everything. Focus on the workbook first, then you go to the additional resources that we provide you, and then after 14 days, you go ahead and start replicating everything that has been done.

[02:53:37] - [02:53:38]

Uthappa Outskill: Whoops.

[02:53:40] - [02:53:52]

Uthappa Outskill: Cool. Shasti will show you where to find these, homework, or your additional resource to set up your custom instructions later, but this is what you focus, and this is how exactly you should proceed for the entire 14 days.

[02:53:53] - [02:53:54]

Uthappa Outskill: That is...

[02:53:54] - [02:54:07]

Uthappa Outskill: Point number one. Second, I saw a good number of you have already taken this self-assessment. Now, if you've taken that, if one of you were also able to use that tool and you, get it done, that means it should work for everyone.

[02:54:07] - [02:54:16]

Uthappa Outskill: In case it has not worked for you right now, some of you are saying that it showed that Paige was not found. That can only happen if you're not using the registered email ID.

[02:54:16] - [02:54:36]

Uthappa Outskill: Alright? Second thing, the link was not opening up. Check if there's any VPN settings on your system, or you're using your office laptop, XYZ things, because if a good number of them were able to do it, it should work for you as well. Or give it some time, like half an hour, 30 minutes, give it some time, and re-attempt using the same link.

[02:54:36] - [02:54:39]

Uthappa Outskill: We can add it under resources as well, on your LMS.

[02:54:40] - [02:54:41]

Uthappa Outskill: Okay?

[02:54:42] - [02:54:44]

Uthappa Outskill: With me so far?

[02:54:49] - [02:54:54]

Uthappa Outskill: will show where to find in the LMS, etc, etc, etc. All of those things will show. Don't worry.

[02:54:54] - [02:54:56]

Uthappa Outskill: We're still...

[02:54:56] - [02:55:04]

Uthappa Outskill: there's a lot of time left, right, for the day. I told you it is going to be a longer session, so it is going to be... there's enough time left, we'll cover all of those.

[02:55:04] - [02:55:11]

Uthappa Outskill: Third important thing, someone brought it out, right? We were using the paid version, like, Dilip was showing you Claude Kow Work.

[02:55:12] - [02:55:17]

Uthappa Outskill: you can use Claude Chat as well if you don't want to get into a paid subscription model of Cloud.

[02:55:17] - [02:55:28]

Uthappa Outskill: There is no necessity... the point we were trying to say is there is no necessity for you to get into a cloud subscription or a Chat JPT subscription for this program to do your workbooks or practice.

[02:55:28] - [02:55:40]

Uthappa Outskill: But if you want to try all of these advanced, additional, or the best-in-class resources that we share, or tech that we share, then it is your choice whether you want to go forward or not. But the same thing can also be done with the help of

[02:55:40] - [02:55:43]

Uthappa Outskill: the chat version also. Maybe not at the same level of

[02:55:44] - [02:55:50]

Uthappa Outskill: Fennesse at how co-work works, but you can still do it on chat, the chat version.

[02:55:52] - [02:55:54]

Uthappa Outskill: Okay? So...

[02:55:55] - [02:56:01]

Uthappa Outskill: the workbook today, we have designed it around ChatGPT for the same reason, because Claude is notorious enough

[02:56:01] - [02:56:20]

Uthappa Outskill: to trouble you with their tokens and credits, so that's the reason we have taken ChatGPT as an example to do it, so that nobody has to figure out how do you basically

play around with the free version, should I get a paid version of Clot? All of that is not going to be a problem. We're going to use the ChatGPT's free version. I hopefully...

[02:56:22] - [02:56:33]

Uthappa Outskill: who hope that you're using the right model for it, which is being explained in the workbook, or your mentors, and you don't consume too many tokens while doing this, right? We're trying to do everything with the free versions of the product.

[02:56:35] - [02:56:36]

Uthappa Outskill: Cool?

[02:56:36] - [02:56:48]

Uthappa Outskill: If you're still overwhelmed, folks, for day one, just sit back, see what things are, how things are working. I told you the 3-day check, day one, day two, day three, pass that check first, and then we will talk about it.

[02:56:51] - [02:57:08]

Uthappa Outskill: Okay. I think with that, I'll not take much time. I'll call up Shasti. I'll probably see you folks again over the weekend, where we get into longer versions of these sessions, the full-day sessions. So until then, I'll leave you with able hands of Shasti and Sumedha, who will be helping you out navigating this journey.

[02:57:08] - [02:57:20]

Uthappa Outskill: So Shasti, you can take over, explain to them how the workbook, flows, and maybe a bit about a couple of important sections of elements that they should be aware of, and then probably in the next 10 minutes, we can get into the breakout rooms.

[02:57:22] - [02:57:25]

Shasti: Yeah, Shara Uthappa. Thank you so much.

[02:57:27] - [02:57:47]

Shasti: Okay, folks, I did see a lot of questions around, when do we get into breakout rooms? Can you help us? I do not find the links. Please park all your questions regarding the breakout rooms, for the next 10 minutes, because I'll exactly guide you on how you can go ahead and join your breakout rooms. Before that, one quick check.

[02:57:47] - [02:58:01]

Shasti: The Track Your Learning Journey, which is the skill graph, is already available out there. If you are facing an issue which says the portal is not available, please drop your registered email IDs in the chat, and team will be giving you access. Hope that is clear.

[02:58:01] - [02:58:09]

Shasti: Right? And the second thing, the workbook that we are going to do is already dropped in the chat, so you can go ahead and take a look at it.

[02:58:09] - [02:58:29]

Shasti: But I also saw a lot of questions around where do we find the recordings of the session once the session is done, and where do we find the post-reads of the session? And very important question that came again and again in the Q&A boxes, do we get access to the Q&A report? Like, there are multiple questions asked by

[02:58:29] - [02:58:35]

Shasti: Most of you in the Q&A box and mentors have responded with the answers, so all of you want access to that.

[02:58:35] - [02:58:50]

Shasti: I'll just take 2 minutes of your time to show you where you can find your transcript, your post-reads, recordings, and the Q&A report, and then I'll explain you on what today's workbook is about, and how it will help you, and then we'll get into the breakout rooms.

[02:58:50] - [02:58:55]

Shasti: Are we clear? Do I have 2 minutes of your time to, go through this process?

[02:58:57] - [02:59:07]

Shasti: Workbook be shared in Outskills LMS? Yes, everything is already available out there, that's why I want 2 minutes of your time to showcase you on how you can go ahead and access it.

[02:59:07] - [02:59:12]

Shasti: Great, let me quickly share my screen, and just let me know once my screen is visible.

[02:59:15] - [02:59:18]

Shasti: Great. I hope my screen is visible.

[02:59:19] - [02:59:30]

Shasti: Great. So, whichever cohort you're part of, C14 IST or C14EST, it doesn't matter, just go to Resources and Recording section.

[02:59:30] - [02:59:43]

Shasti: And scroll all the way down to Day 1, because today is Day 1, right? So, go to Day 1, and your predates were already made available, you can go... if you have not yet watched it, you can go through it even after the session is done.

[02:59:44] - [03:00:07]

Shasti: Now, here is where you will find the session recording. As the title itself says, the session recording will be uploaded 12 hours post the session, and I saw a couple of questions around why 12 hours, because one, we are running a 5-hour session on Zoom, so Zoom itself takes a lot of time to give us the recordings, and once that is done, we do a round of QC and then upload the recordings on LMS.

[03:00:07] - [03:00:14]

Shasti: So, we try our best to give it as soon as possible, that's why 12 hours is the minimum that we can get to upload the recording. So, by...

[03:00:14] - [03:00:22]

Shasti: Next day, 10 a.m. IST, you will have your recordings live on the LMS. You can go through it whenever you have time.

[03:00:22] - [03:00:30]

Shasti: Right? And then this is the important part, which is the post-read section on your LMS. Everything that you would need, one.

[03:00:30] - [03:00:55]

Shasti: the document summarizing what we covered in the session. If you do not have time to go through the entire recording, you can just go through this document of post-read. Two, it will have the transcript of the session. Now, most of you were asking that I was not able to cope up, can I use the transcript to give it to my ChatGPT, etc, etc. So you can go ahead and make use of this transcript. And third, we will have the Q&A report provided

[03:00:55] - [03:00:57]

Shasti: to you here on the LMS.

[03:00:57] - [03:01:03]

Shasti: Every question that you have asked and your peers have asked, you will be finding it here.

[03:01:03] - [03:01:09]

Shasti: Are we clear, folks? Are we clear on where you can find the recording, where you can find the post streets on your LMS?

[03:01:12] - [03:01:13]

Shasti: Okay.

[03:01:13] - [03:01:21]

Shasti: If a couple of you are saying no, I'll repeat for one last time. Go to your LMS, and then click on Resources and Recordings.

[03:01:21] - [03:01:24]

Shasti: Scroll down all the way to Day 1.

[03:01:26] - [03:01:40]

Shasti: Yes, folks, I am repeating it for the one last time on where you can find your resources and recording. This was mentioned in our kickoff call as well, so I'm gonna repeat it again for one last time, so please do pay attention, because we also have breakout rooms to get started with.

[03:01:41] - [03:01:53]

Shasti: Go to Resources and Recordings on your LMS, and scroll all the way down to Day 1. Pradeeps will be available before the session. Session recordings will be available 12 hours post the session.

[03:01:53] - [03:02:02]

Shasti: And post-reads is where you will have a summarized document on what we did in the session, the transcript of the session, and also the Q&A report.

[03:02:03] - [03:02:08]

Shasti: And then, most of you were asking about where do I find the workbook on LMS?

[03:02:09] - [03:02:16]

Shasti: Under post rates, you have a section called Workbook. If you click on it, this is the workbook that we are going to solve in today's session.

[03:02:17] - [03:02:31]

Shasti: Right? And Dilip also mentioned that he will provide us the operating instructions that he made for all of you. It is already available out here on LMS. All you need to do is just go ahead and explore it.

[03:02:32] - [03:02:43]

Shasti: If you go to Resources and Recordings and click on Resources section, you have the operating instructions that Dilip promised that will be shared with all of you. It is already uploaded, all you need to do is just explore.

[03:02:44] - [03:03:05]

Shasti: And then we have also given additional workbooks for us. As Uthappa said, that we will be doing hands-on in the breakout room, and even after the breakout room is done, we will be providing additional materials to help as much as we can for you to go ahead and explore the topics that we have taught in the session, right? So, along with the current workbook, you also have an additional workbook.

[03:03:05] - [03:03:23]

Shasti: Which is basically how you can go ahead, like, how Dileep customized his LLM, you can go ahead and customize your LLM as well. So, we have created a workbook, and we have given it as additional workbook on your resources section of day one. So, go ahead and explore it.

[03:03:25] - [03:03:34]

Shasti: Are we clear so far? Are we aligned on where to find all the resources that you would need, starting from today? If yes, then we will move to the breakout room section.

[03:03:36] - [03:03:37]

Shasti: Great.

[03:03:38] - [03:03:39]

Shasti: Yet.

[03:03:41] - [03:03:50]

Shasti: Operating instructions is available here, folks. As you can see it on my screen. There is no way it's not there. Maybe try to refresh your system, and then you'll be able to see it.

[03:03:52] - [03:03:54]

Shasti: Perfect. Now, let me...

[03:03:54] - [03:04:02]

Shasti: talk about what we are going to do in today's breakout room. So, I will quickly share my screen, and...

[03:04:03] - [03:04:06]

Shasti: Showcase the workbook that we are going to do today.

[03:04:17] - [03:04:20]

Shasti: I hope you guys can still see my screen.

[03:04:24] - [03:04:25]

Shasti: Yes.

[03:04:25] - [03:04:26]

Shasti: Perfect.

[03:04:26] - [03:04:46]

Shasti: So, this is the workbook that we are going to solve today. Now, what this workbook does is... so you got a clear understanding on how you can go ahead and build your own skill, and how you can use MCP connectors, like Philippe used a Gmail connector, he used Slack connector, and he showcased multiple connectors, like Gamma and Asana.

[03:04:46] - [03:04:47]

Shasti: So today, in...

[03:04:47] - [03:05:02]

Shasti: today's workbook, what we are going to do is, we are going to build our very first skill, a skill that can create slides for you. Again and again, you do not have to give your prompts on how you want your slides to look like. So, you will create a reusable slide skill.

[03:05:02] - [03:05:12]

Shasti: And then, you will connect your, Gamma and Asana plugins from ChatGPT, and then, using a transcript of a,

[03:05:12] - [03:05:20]

Shasti: revenue review meeting. This is a sample data, again, not a real data, right? So, this is a sample data that we have given. You will use this sample data

[03:05:21] - [03:05:32]

Shasti: Okay, I'm gonna slow down for whoever is facing issues. So, what we will be doing is, you'll be taking this, sample data of Revenue Review, which is our meeting notes, basically.

[03:05:32] - [03:05:41]

Shasti: And then you will be building a skill. Connect your ChatGPT, Asana, and Gamma plugin. By using all of this, you will build a workflow.

[03:05:42] - [03:05:57]

Shasti: Where you will go from a random sample notes to building a deck, and also using Asana, which is a task management platform. If you have a team, and you want to allocate tasks to your team after a meeting is done, Asana is a platform that you can use.

[03:05:57] - [03:06:07]

Shasti: So, depending on what you discussed in this, quarterly review meeting, you will assign tasks to your team using Asana plugin, and then use Gamma to build a deck.

[03:06:07] - [03:06:21]

Shasti: And all of this, you're not going to use the actual platforms and manually do it. You will use it... you'll use ChatGPT plugins and get it done in just 3 prompts. This is the entire workflow you are going to build inside the breakout room.

[03:06:23] - [03:06:24]

Shasti: Are we clear?

[03:06:24] - [03:06:33]

Shasti: Yes, the questions about can we do this on Claude? Of course, you can do this on Claude. In the same workbook, if you see, you have two tabs.

[03:06:33] - [03:06:48]

Shasti: One is in-session tab, one is post-session tab. Now, in-session, during the breakout rooms, you will be using ChatGPT to do this workflow. But post-session, you can go ahead and use Claude to do the same workflow.

[03:06:49] - [03:07:03]

Shasti: You have the complete step-by-step process on how you can go ahead and do it. If you ask me question about why in session we are, choosing ChatGPT instead of Claude, because Claude, as Uthappa mentioned, will have issues with credits.

[03:07:03] - [03:07:21]

Shasti: generally, Claude provides, less free credits compared to ChatGPT. That's why we have given both options. If you have Claude post-session, go ahead and try the same workflow in

Claude. If you do not have the Claude paid version, you can make use of this workbook in just ChatGPT's free version.

[03:07:22] - [03:07:39]

Shasti: This is what we are going to do inside the breakout rooms, and yes, you will have the help, you will get the help you need from all the amazing commenters that we have, which I'll be introducing very soon. But before that, I want to understand if you guys are clear on what we are going to do inside the breakout rooms.

[03:07:39] - [03:07:42]

Shasti: Let me know quickly in the chat if you guys are clear.

[03:07:45] - [03:07:51]

Shasti: If you are somebody who would prefer doing the workbook all alone by yourself, yes, you can do it. No issues at all.

[03:07:54] - [03:07:55]

Shasti: Great, great.

[03:07:57] - [03:08:15]

Shasti: Now that all of you are clear with the breakout rooms, let me quickly... as Uthappa mentioned, the breakout rooms are going to be open for the next 1.5 to 2 hours, because this workbook is very simple, folks. As most of you said in the beginning, that it was very easy, so...

[03:08:15] - [03:08:37]

Shasti: 1.5 hours is the maximum that anyone would take to finish this workbook, but we are going to be here until all of you finish your workbook, create your first ever workflow successfully, and come back. But if you are somebody who's already done with the workbook, you can come back to the main room, we will be sharing the reflection link, generate your reflection, and then you can drop off from the session.

[03:08:38] - [03:08:42]

Shasti: With that said, let me quickly introduce,

[03:08:42] - [03:08:45]

Shasti: All the amazing commenters that we have for today.

[03:08:54] - [03:09:07]

Shasti: So, here are all the amazing commenters that we have for today. We have Harshith Vadiparthi, who's a head of growth, and he's one of the top mentors that we have here at Outskill. Harshith, if you can quickly say hi, that would be great.

[03:09:10] - [03:09:27]

Harshith Vaddiparthi | Outskill: Yes, hey everyone, glad to be here, and super excited for the breakout room session, guys, and yeah, I think, like Shasti also mentioned, this session is gonna be amazing. You're gonna learn a ton, and of course, you know, the next 14 days, incredible, growth. So, yeah, see you guys in the breakout room.

[03:09:28] - [03:09:38]

Shasti: Yeah, thank you, Arshad. And then we have Sandeshesh, who's an in-house mentor at Outskill, also the supply chain architect. Sandeshesh, if you can quickly say hi, we can get started.

[03:09:39] - [03:09:44]

Sandesh Gandiga: Hello, everyone, welcome. Super excited to be here and see you all in the breakout rooms.

[03:09:46] - [03:09:51]

Shasti: Thank you, Sandesh. And then we have Sai Sunkara, who's a director at ScaleRite AI. Hi, Sai.

[03:09:54] - [03:10:02]

Sai Sunkara Outskill: Hi, everyone. Welcome. So, today is going to be the start of a disruptive journey. It'll test your limits.

[03:10:03] - [03:10:07]

Sai Sunkara Outskill: be up for the challenge. See you all in the coming sessions.

[03:10:07] - [03:10:14]

Shasti: Thank you, Sai. And then we have Samrati, who's the founder at Pace Labs, and let's welcome Samrati in the chat.

[03:10:18] - [03:10:21]

Samruddhi Mokal Outskill: Hello everyone, looking forward to seeing you in the breakout rooms.

[03:10:22] - [03:10:23]

Shasti: Brilliant.

[03:10:24] - [03:10:31]

Shasti: And then we have, okay. And then we have Cameron here, who is the founder of Techify AI. Welcome, Cameron.

[03:10:32] - [03:10:38]

Cameron Sullivan Outskill: Thank you, Shasti. Hello, everyone, it's great to meet you. I look forward to the breakout. There's lots of energy here today, and I think it's gonna be a great one.

[03:10:38] - [03:10:43]

Shasti: Great. And then we have Luca, who's a co-founder of Lambie. Welcome, Luca.

[03:10:44] - [03:10:48]

Luca John_Outskill: Hello, everyone. Excited to be here, looking forward to the breakout room.

[03:10:49] - [03:10:54]

Shasti: Great. And we have Vishwas here, who's an AI generalist himself, and also the filmmaker. Welcome, Vishwas.

[03:10:55] - [03:10:59]

vishwas _outskill: Hey everyone, super excited for today's session, let's build something crazy.

[03:10:59] - [03:11:05]

Shasti: Great. And we have Ritesh Kala here, who's a director and also a generative AI enthusiast. Welcome, Ritesh.

[03:11:06] - [03:11:08]

Ritesh Outskill: Hi everyone, good to be here.

[03:11:09] - [03:11:12]

Ritesh Outskill: And looking forward to working with you guys over the next 14 years.

[03:11:13] - [03:11:20]

Shasti: Great, thank you. And then, last but not the least, we have Poima, who's a technical trainer herself, and let's welcome Poima, folks.

[03:11:21] - [03:11:29]

Poornima _Outskill: Hey everyone, I'm sorry I'm a little bit under the weather, this is not my regional voice, but I'm super excited, and yeah, looking forward to seeing you in the breakout rooms.

[03:11:30] - [03:11:31]

Shasti: Perfect.

[03:11:31] - [03:11:46]

Shasti: So, we have all the amazing commenters we would need to help all of you, in the breakout rooms. So, let's welcome everybody, and then, with one small check, folks, are we clear? Are we clear on what we are going to do?

[03:11:47] - [03:11:49]

Shasti: Please drop a yes in the chat if you guys are clear.

[03:11:51] - [03:12:09]

Shasti: Okay, I see all those thumbs up reactions and yeses in the chat, so I'm assuming that majority of you are clear. So, we will get into the breakout rooms. The team will be opening breakout rooms very soon, but the question about how you can join your breakout rooms, right? First thing, if you're joined from Zoom app.

[03:12:09] - [03:12:19]

Shasti: you will not face any issues joining the breakout rooms. But if you join from Zoom Web, you will not be able to join the breakout rooms. So make sure

[03:12:19] - [03:12:37]

Shasti: If at all you're still joining from Zoom web and not the app, team, we can also drop the webinar ID once again in the chat. So go ahead, leave the session, and download Zoom app, and the team will drop the webinar ID. Use that webinar ID to join from the Zoom app if you're not able to join from LMS.

[03:12:37] - [03:12:39]

Shasti: Right? And once you're in Zoom app.

[03:12:40] - [03:12:46]

Shasti: As soon as we open the... Outskill team opens the breakout rooms, you will see a pop-up on your screen.

[03:12:46] - [03:13:04]

Shasti: Saying that you have been invited to join a breakout room, all you need to do is just click on the Join button. That's it. If you're not getting the pop-up, or if you have closed a pop-up

because you might be on a different screen, then there will be a more option on your bottom of the screen. If you click on the bottom of the screen button.

[03:13:04] - [03:13:13]

Shasti: you will be able to join the allocated breakout room. These are the two options how you can join your breakout room. Again, repeating only if you're joining from app.

[03:13:13] - [03:13:19]

Shasti: If you're joining from web, none of us can help you. All you need to do is log out and join from app.

[03:13:19] - [03:13:25]

Shasti: clear on how you can join the breakout rooms? If yes, we'll quickly get started with the breakout rooms.

[03:13:29] - [03:13:32]

Shasti: Yes, you have to join from Zoom app.

[03:13:34] - [03:13:46]

Shasti: Yeah, so for those... whoever is clear about how you can join the breakout room, team, we can, launch the breakout rooms and we can get started. If you're facing issues, stay back, and I'll help you joining the breakout rooms.

[03:13:52] - [03:14:07]

Shasti: repeating it again for whoever is asking me to repeat. If you're on Zoom web, you will not be able to join the, breakout rooms. If you're on Zoom app, only then you can join the breakout rooms. There is no room code. As soon as we open the breakout rooms from our end.

[03:14:07] - [03:14:13]

Shasti: you will get a pop-up on your screen saying, join so-and-so breakout room. All you need to do is just click on Join.

[03:14:13] - [03:14:17]

Shasti: The rooms are not yet open, I'll let you know when the rooms are open.

[03:14:18] - [03:14:30]

Shasti: Great. Now the breakout rooms are open. You would have received a pop-up on your screen. Just click on Join. If you have not yet seen the pop-up, click on your more option, and you will see an option to join the breakout rooms.

[03:14:59] - [03:15:16]

Shasti: Okay, folks, the breakout rooms are open. If you're somebody who's still facing an issue to join the breakout rooms, please do let me know in the chat, and I'll be able to help you guys, only if you're joining from app. If not, you will have to join from the app. None of us can help you, unfortunately.

[03:15:33] - [03:15:43]

Shasti: Hani, I don't think you have joined from Zoom app, because I clearly cannot allocate you a breakout room, so please make sure you're leaving this session and joining from Zoom app.

[03:15:51] - [03:15:58]

Shasti: Same with Ramesh as well. I am not able to allocate you to a breakout room because you have joined from the web, not from the app. Please do join from the app.

[03:17:22] - [03:17:30]

Shasti: Folks, a quick check again, if you're facing any issues joining the breakout room, do let me know in the chat, and I'll be able to help you.

[03:18:25] - [03:18:32]

Shasti: So, Nilh, if you're on the app, you should not be facing any issues, joining the breakout rooms.

[03:18:34] - [03:18:46]

Shasti: And, I cannot allow you to a breakout room because it still says you're not joining from the app. So, please do download the desktop app and join from your desktop app, not from the web.

[03:18:53] - [03:19:03]

Shasti: Suman, you already got an invite to join the breakout room. I'm sending an invite again. See if you can join. If not, you can work individually as well.

[03:19:15] - [03:19:29]

Shasti: Sunil, what I can suggest is I'm dropping the webinar ID again for you. Please do leave the session and use the desktop app on your system. Don't try to join from the LMS, try to use this webinar ID.

[03:19:29] - [03:19:33]

Shasti: On your desktop, and just join the session.

[03:19:33] - [03:19:36]

Shasti: Because I still cannot allot you a breakout room.

[03:23:30] - [03:23:50]

Shasti: Hani, then maybe your system settings would have been updated in such way where if you're opening any link, it is taking you to the web, then the app. So what I would suggest is the same thing. Don't try to join from the LMS through the link. Leave the session, just click on the Zoom desktop app from your system.

[03:23:50] - [03:23:58]

Shasti: And, click on Join a Meeting. Use the webinar ID that I have shared in the chat, I'll share it again, and then you should be able to join.

[03:23:58] - [03:24:00]

Shasti: If the link is not helping.

[03:26:27] - [03:26:35]

Shasti: Williams, I'm not sure what you're referring to, because there is no breakout room ID for,

[03:26:36] - [03:26:50]

Shasti: Zoom. So, if you're on the app, you'll either get a pop-up saying that join so-and-so breakout room. If not, you'll be seeing on your more option on your screen. I'll try to allocate a breakout room to you, just give me a second.

[03:26:51] - [03:26:55]

Shasti: I'm not able to do it because you are not on the app.

[03:26:56] - [03:27:02]

Shasti: So please do join from the app. Even if you're joining from phone, make sure you're joining from the app from phone.

[03:27:05] - [03:27:13]

Shasti: Honey, unfortunately, I can still not see you in the participant list, and I'm not able to allocate a breakout room to you.

[03:27:13] - [03:27:19]

Shasti: Not sure what the issue is, because it usually won't happen if you're joining from the app.

[03:27:22] - [03:27:25]

Shasti: Hani, the link that you're trying to share is the web.

[03:27:25] - [03:27:45]

Shasti: So anything that is ending with app.zoom.us is a web page that you're trying to log into. What I'm referring to is a desktop app that sits on your system, not a web page. So you have to download the app, which sits on your system, and then try to join from there. That is what we mean as desktop app, not the web.

[03:27:49] - [03:27:52]

Shasti: Yes, Williams, you can do it on your own as well.

[03:27:59] - [03:28:10]

Shasti: If you do not have laptop as of now, try joining from Zoom app from the phone if it is facing any issues. Maybe you can try on your own and then ask any questions in the Ask Dove channel.

[03:28:38] - [03:28:56]

Shasti: So if you're trying to join from phone, let me give you the webinar ID. I'm dropping it in the chat. So, just open the Zoom app on your phone, click on join a meeting, drop this webinar ID. As soon as you're in, you'll get a pop-up, asking you to join a breakout room. That should help.

[03:37:22] - [03:37:35]

Shasti: Hey, Supriya, if you're done with the workbook, you can go ahead and drop off. I'll share the reflection link in the chat. Go ahead, create your day one reflection batches, and post it on reflection channel, share your gratitude on the gratitude channel.

[03:37:36] - [03:37:48]

Shasti: And, tomorrow we'll be connecting again for our day-to session at 7.30 PM ISD. For everybody who's done with the workbook, you all are good to leave. Let me quickly share the reflection link in the chat, and we'll be seeing you guys tomorrow.

[03:52:04] - [03:52:12]

Shasti: Hey folks, I'm looking into the questions that are coming in the chat, just give me a couple of seconds to respond, and just scanning through it.

[03:52:12] - [03:52:23]

Shasti: If you're done with the breakout room activity, perfect. I'm assuming that you built your first ever workflow. So, I'm gonna share two links. One is a reflection link, and the other one is a

[03:52:23] - [03:52:26]

Shasti: breakout room feedback form link.

[03:52:26] - [03:52:44]

Shasti: If you have not yet generated your Day 1 batch, and if you have not yet given the feedback on how this activity was for you today, please do go ahead and do that. If you are done with that, perfect, we are officially done with Day 1 of your program. We will be seeing you guys again tomorrow at 7.30pm.

[03:52:44] - [03:52:47]

Shasti: So, you can go ahead and drop off.

[03:52:47] - [03:52:58]

Shasti: How do you generate the batch? I dropped the reflection link in the chat. Just click on it, and give your details and the three key takeaways that you learned today, and it'll automatically generate.

[03:52:59] - [03:53:05]

Shasti: Anmol, yes, I am giving you an invite to Room 2, just a second.

[03:53:07] - [03:53:10]

Shasti: Yeah, send an invite to Room 2, please do accept.

[03:53:18] - [03:53:25]

Shasti: Ajay, Samrat, and Hemanth, I hope it is clear for you guys. If you are done with the breakout room activity, please go ahead and drop off.

[03:53:55] - [03:54:00]

Shasti: Hemanth, looks like I missed your question. If you can drop it again in the chat, I'll be able to answer.

[03:54:05] - [03:54:15]

Shasti: the skill graph page, I've already shared the link in the chat, let me share it again for those of you, who missed it in the beginning.

[03:54:22] - [03:54:28]

Shasti: Here is the skill graph link. Will there be one breakout room for the session?

[03:54:29] - [03:54:44]

Shasti: If you're referring to the activity on, how many breakout room activities will we have, yes, every day after the learning part is done, you will have one breakout room activities. If you're referring to how many rooms are there, depends on the,

[03:54:45] - [03:54:49]

Shasti: Kind of workbook that we are going to do, so we will have multiple breakout rooms.

[03:54:50] - [03:55:00]

Shasti: Yes, Sabrina, if you're done with the workbook, please do fill this feedback form and generate your reflection link for the day, and then you can drop off.

[03:55:02] - [03:55:27]

Shasti: Great. Folks, everybody who has completed your Day 1 workbook, please do go ahead and post it on the reflection channel, and share your gratitude on the gratitude channel. We would love to see the kind of outcomes that, you have driven on day one itself. It would be good for you also, once you finish the program on 14 days, reflecting back on everything that you have done, starting from day one to day 14, so make sure you're documenting it somewhere.

[03:55:27] - [03:55:37]

Shasti: if not LMS, either maybe your personal blog or your personal document somewhere, please do document it, and I'm sure you're gonna enjoy it once you look back at it after the 14 days.

[03:56:28] - [03:56:53]

Shasti: Hemanth, the breakout rooms are structured in a way where all of you will be able to drop your queries in the chat, and commenters will also cater to as much of questions as possible, right? We try as much our best to cater to each of our learners in the breakout room, even when the task is complicated. As you mentioned, today's task for you, might not be that difficult, but for others who are starting from scratch, it might also be difficult.

[03:56:53] - [03:56:58]

Shasti: Right? So even going forward, whenever we have, advanced workbooks.

[03:56:58] - [03:57:05]

Shasti: Commenters will do their best to help you with any step that you're stuck at, so do not worry about it.

[03:57:06] - [03:57:25]

Shasti: Yes, guys, if you're done for today, good luck for tomorrow's session, and well done for today's breakout room. I'm dropping the reflection link and, breakout room feedback form again for one last time in the chat, so go ahead, give your feedback on how this activity was, and also generate the day one batch links.

[03:57:25] - [03:57:39]

Shasti: And do post on your LinkedIn, or LMS, or anywhere that you would want to document, and then you can drop off. We'll be seeing you guys again at 7.30pm tomorrow. I'll wait for the other folks who are in the breakout room, to come back.

[03:57:39] - [03:57:41]

Shasti: Thank you so much for joining today.

[04:02:01] - [04:02:13]

Shasti: Hey everyone, if you guys are done with the workbook, go ahead and drop off. I'll quickly share the reflection link and the feedback form link once again in the chat.

[04:02:14] - [04:02:16]

Shasti: You guys can make use of this.

[04:02:18] - [04:02:37]

Shasti: Yeah, if it's already done, good enough, go ahead and drop off. We'll be connecting again tomorrow at 7.30pm IST for your day 2 session, where we'll be exploring image and video manipulation using AI. Thank you so much for joining in. I'll wait for the rest of the folks who are still doing the workbook, and then we'll be wrapping up the session.

[04:03:28] - [04:03:41]

Shasti: Yes, Rohit, we are done with the session. If you have finished your breakout room activity, go ahead and drop off. We'll be connecting again at 7.30pm IST tomorrow for our Day 2 session.

[04:03:42] - [04:03:44]

Shasti: I'm just waiting for others to come back.

[04:03:57] - [04:04:02]

Shasti: Hey Mahod, could you be more specific about what exact changes are you referring to?

[04:04:03] - [04:04:13]

Shasti: If you're referring to the schedule, as we discussed in the kickoff as well, we try to, you know, cover the updated topics and updated,

[04:04:13] - [04:04:25]

Shasti: AI trends that are already out there in the world, so we try to inculcate that in our schedule as well. But if you're referring to anything else, please do let me know, and be specific so that I can check with the team.

[04:04:31] - [04:04:42]

Shasti: Yes, folks, whoever has completed the workbooks, go ahead and drop off. We'll be connecting tomorrow, so you can also generate your, day one batch and fill the feedback form

[04:04:42] - [04:04:43]

Shasti: with the link that I've shared.

[04:13:30] - [04:13:47]

Shasti: Hey folks, whoever is done with the workbook, please do drop off. I've already dropped the reflection link and the breakout room feedback, link on the chat, dropping it again, so whoever has not yet generated your batches, go ahead, generate it, and you can post it on LinkedIn or on LMS.

[04:13:47] - [04:14:00]

Shasti: And you can also give your feedback on how the breakout room activity was for you guys. And if you're done with both, go ahead and drop off. We'll be seeing you guys again tomorrow at 7.30pm IST. Thank you.

[04:25:44] - [04:25:59]

Shasti: Hey folks, whoever is back into the main room from the breakout rooms, if you're done with the workbook, perfect, go ahead and drop off, and I'm assuming that you would have already generated your reflection, batch and also filled the feedback form. If not, let me know, I'll drop the link.

[04:26:00] - [04:26:16]

Shasti: If yes, thank you so much for joining today. We will be connecting again at tomorrow, 7.30pm ISD. You can go ahead and drop off. For those of you who are saying no, I'm gonna drop the reflection link and the feedback form link in the chat. You can make use of it.

[04:26:26] - [04:26:44]

Shasti: Yes, Ramesh, the batch that you need to update on LMS is the reflection batch. If you open that link that I shared on the chat, all you need to do is just fill your name and three key takeaways of today's session on what you learned, and then just click on Generate Batch. It would automatically generate a batch.

[04:39:02] - [04:39:12]

Shasti: Hey folks, whoever is back in the main room, I'm assuming that you guys are done with the breakout room activity and, did your first ever workflow. So, if you're done with

[04:39:12] - [04:39:32]

Shasti: generating your, day one batch, and if you have filled the feedback form link, you are good to get, dropped from the session. Please go ahead and drop off. We'll be closing the rooms in another minute, and everybody will be back in the main rooms. I'll wait for them. If you are done, you can log off, and we'll see you guys at 7.30 PM ISD tomorrow for our Day 2 session.

[04:39:34] - [04:39:45]

Shasti: What to do with the batch? You can either post it on your reflection channel, or on your LinkedIn. Basically, it will help you reflect on the journey you had on your day 14, if you look back at it from day 1.

[04:40:10] - [04:40:10]

Harshith Vaddiparthi | Outskill: Hello?

[04:40:10] - [04:40:14]

Shasti: Can we get... Okay.

[04:40:14] - [04:40:15]

vishwas _outskill: Okay.

[04:40:16] - [04:40:31]

Shasti: Okay, everyone, we are back in the main room. How was it, folks? How many of you were able to connect your ChatGPT plugins, and how many of you were able to actually take the raw transcript into a presentable tech? Let me know in the chat.

[04:40:32] - [04:40:43]

Shasti: On a scale of 1 to 10, how much would you rate your breakout room activity? Team, we can also drop the breakout room feedback form. In the meantime, whoever has not yet filled it, go ahead and please do fill it.

[04:40:43] - [04:40:44]

Shasti: I see a lot of...

[04:40:45] - [04:41:00]

Shasti: 10s and 9s in the chat. Thanks to all the amazing commenters for helping our learners with everything that they had to do. With that, thank you so much. I'll let you go and get some good amount of rest. We'll see you guys soon in our upcoming sessions. I'll take it up from here.

[04:41:01] - [04:41:01]

Harshith Vaddiparthi | Outskill: Thank you.

[04:41:02] - [04:41:11]

Shasti: Yeah, give it to all the commenters folks here in the chat, and also on the gratitude channel, whoever has helped you in the breakout rooms, make sure we are showing our gratitude to them.

[04:41:14] - [04:41:15]

Shasti: Great.

[04:41:15] - [04:41:39]

Shasti: Perfect. I'm so glad that most of you were able to finish the workbook, and I did see a lot of you saying that... a couple of you saying that I couldn't finish the workbook because of ChatGPT credit issues. Folks, there are certain problems that we at Outskill can fix, and there are certain problems that we do not solve for you guys. And one such thing is the credits of ChatGPT, or let's say Claude, right?

[04:41:39] - [04:41:52]

Shasti: That's why we gave both, available options for you, ChatGPT and Claude. If you have the paid version, you can go ahead and use it. If you have the free version, I would suggest using ChatGPT, because that will give more usage compared to Claude.

[04:41:52] - [04:42:06]

Shasti: So, if you have reached your limit, what I can say is maybe try logging in using a different email ID, not the one that you have lost credits on, and then try solving the workbook. Our team, we can drop the feedback form again, and also the reflection link.

[04:42:06] - [04:42:11]

Shasti: There you go, Anika has already dropped the feedback form link, and

[04:42:13] - [04:42:15]

Shasti: You'll also have the reflection link in the chat.

[04:42:16] - [04:42:18]

Shasti: I'm not hearing... Folks, am I audible?

[04:42:19] - [04:42:21]

Shasti: Can anyone let me know in the chat if I'm audible?

[04:42:22] - [04:42:31]

Shasti: Yes, okay. Looks like your system issues, whoever said that, I'm not audible, can you please check ones from your end?

[04:42:31] - [04:42:45]

Shasti: Yes. Reflection link and feedback form link is in the chat. Whoever is done with both of it, thank you so much for joining Day 1. I know that we went a bit beyond the schedule, because, as Uthappa said.

[04:42:45] - [04:43:10]

Shasti: And even I mentioned on our kickoff that we would not want to restrict ourselves, to the timings just because we want to cut short it. Again, the learning happened from 7.30 to 9 and 10 PM... 9 or 10 p.m. IST, and the rest of the time went on in hands-on in the breakout room. That is something that if you do not want to be in the session and be very particular about your timings, you can drop off.

[04:43:10] - [04:43:23]

Shasti: and solve it on your own as well. And whenever you're trying to solve it on your own, if you're, facing any issues, and you can just go ahead and ask it in the Ask Dove channel on the LMS, and the mentor will be dedicatedly looking into it.

[04:43:24] - [04:43:31]

Shasti: Whoever is asking for the feedback form link and the reflection link, our team, we can drop it for... yeah, there you go, you have it in the chat.

[04:43:33] - [04:43:44]

Shasti: how to get the feedback link. So, if you want to write the feedback for a particular mentor, let me quickly share my screen and show it to you guys on how you can go ahead and do that.

[04:43:48] - [04:43:51]

Shasti: Just let me know once my screen is visible, guys.

[04:43:59] - [04:44:00]

Shasti: I hope my screen is visible.

[04:44:04] - [04:44:05]

Shasti: Yeah.

[04:44:05] - [04:44:27]

Shasti: So, once you click on the feedback form link, this is where you'll land up. So just scroll down, and give your name, email ID, and the number. And if you click here, breakout room and mentor, you will see all the mentors that were part of the breakout room. Just go ahead and select which mentor, breakout room you were part of, and then you can go ahead and rate and give your detailed feedback as well.

[04:44:31] - [04:44:38]

Shasti: is the second workbook, Azon Clot. So, in the same workbook that was given to you, there is a second tab.

[04:44:38] - [04:44:59]

Shasti: And, that is the workbook that you can go ahead and solve it on the clot. If you're talking about the additional workbook that is there on the LMS, that is about how Dileep showcased, right? Him using custom instructions to customize his LLM. That is the workbook

that we have given for you. If you also want to personalize your LLM, you can go ahead and solve that workbook as well.

[04:45:00] - [04:45:11]

Shasti: Maria, if you have filled the form for you to switch from IST to EST, or EST to ISD, the team is looking into it. We will get back as soon as possible, so do not worry about it.

[04:45:13] - [04:45:23]

Shasti: Where is the form? Where is the batch? It is already shared in the chat, folks. Team, we can drop once again for those of them who are asking to share it again.

[04:45:27] - [04:45:28]

Shasti: Yep.

[04:45:29] - [04:45:53]

Shasti: Perfect. With that, I'll just wait for another 2 minutes for those of you who have not yet filled the feedback form to fill. Whoever has filled the feedback form, yes, you can leave the room, you can drop off from the session. We will be connecting with you guys again at tomorrow, 7.30pm IST, where we are going to do a deep dive on image and video manipulation using AI. And I would also want you guys to go through Vaibavi's Instagram.

[04:45:53] - [04:46:02]

Shasti: and, YouTube, if you have not yet gone through. I'll try to, give the links in the chat, just give me a couple of, seconds.

[04:46:02] - [04:46:26]

Shasti: And I'll drop it. Go ahead and explore, that is the exact workflow that we are going to learn tomorrow. And I'm very sure this workflow is not available anywhere out there, because this is an in-house workflow that we are building and working on for Vaib socials. So, if you are excited to learn, I am very much excited to learn, so please do show up tomorrow. And we also have a surprise announcement to make.

[04:46:26] - [04:46:28]

Shasti: Tomorrow, once the teaching part is done.

[04:46:28] - [04:46:45]

Shasti: I'm not gonna reveal much details about it, but I'm very sure if you're very keen on learning and making the most of this 14 days, you are going to love the surprise announcement

that I'm going to make tomorrow, so please do show up if you do want to know about it. Whoever is done, go ahead and drop off.

[04:46:45] - [04:46:54]

Shasti: And I'll just wait for the rest of the folks to fill the feedback form. In the meantime, I'll also drop Vaibhanti's socials as well. Just give me a second.

[04:47:06] - [04:47:07]

Shasti: Koi.

[04:47:07] - [04:47:12]

Shasti: I have dropped Vaibhu Sinter's Instagram and YouTube. You can go ahead and explore.

[04:47:13] - [04:47:26]

Shasti: Maria, the form is currently closed. As we said, we were taking the responses until day one of the session, but if you'd want us to consider, please do write to support at the rateoutskill.com, and team will look into it.

[04:47:31] - [04:47:34]

Shasti: Thank you, Zahira. I'm sorry if I'm pronouncing your name wrong.

[04:47:36] - [04:47:46]

Shasti: Reflection link, yes, there you go Gan Sika's dropped it in the chat. Let me re-drop it again.

[04:47:46] - [04:47:51]

Shasti: The reflection link is in the chat, folks. Whoever want to make use of it, go ahead and make use.

[04:47:56] - [04:48:03]

Shasti: I'll just wait for 2 more minutes for those of you who have not yet filled the feedback form, and then we will be ending the session.

[04:48:08] - [04:48:10]

Shasti: I have dropped,

[04:48:10] - [04:48:26]

Shasti: Vaibavi's Instagram and YouTube. Okay, if you have time, it's not a mandatory thing for you to go through, but if you have time, go through it and see the kind of content that we are posting, and tomorrow you will know the playbook on how we create such content as well.

[04:48:29] - [04:48:37]

Shasti: And apart from that, you can also go through the pre-reads of Day 2 session that are made available on the LMS. That would be sufficient for tomorrow's session.

[04:48:44] - [04:48:53]

Shasti: We'll wait for another minute, and whoever is dropping off, thank you so much for joining today's session. We'll be seeing you guys tomorrow.

[04:49:00] - [04:49:24]

Shasti: Any issues about not having access to LMS, and any tools issues, please do write to support at Rate Outskill.com, so you get the response from the team, and they'll be able to look into it. Anything about content and in-session, we'll be able to help it, but if you would want to support about tools, LMS access, please do write to support at the R8outskill.com. Recordings will be made available, 12 hours per

[04:49:24] - [04:49:28]

Shasti: post the session, because as I said, Zoom will take time to process it.

[04:49:29] - [04:49:34]

Shasti: If you have already sent an email, our team is looking into it, we'll revert back soon.

[04:49:43] - [04:49:52]

Shasti: Where do I find pre-reads? Looks like you have not attended the kickoff, or do not pay attention for the, first couple of hours. You can find it on LMS under Day 2.

[04:49:54] - [04:50:13]

Shasti: Great. With that, we are done with day one of our AI Generalist Tags Letter program. I hope you guys had a great start, and I'm glad most of you were able to do the workbook, and I already saw most of you posting it on the Reflection channel. So thank you so much for joining in and staying up with us for the first

[04:50:13] - [04:50:30]

Shasti: very first day of our fire journey together, and we will be having such journeys, starting from tomorrow as well. So, go rest up and, get the energy, the same energy that you had for tomorrow's session as well. We'll be seeing you guys tomorrow at 7.30pm IST. Thank you so much, everybody.

[04:50:30] - [04:50:31]

Shasti: Good night, have a great night.
