

Day 10 Live Session

00:01 - 11:34

Audio shared by Sumedha: [Pre-session music played; lyrics not transcribed.]

12:05 - 12:14

Shasti: Hello, everyone. Welcome back. A very, very warm welcome to your Day 10 of Accelerator program. How are you guys doing?

12:15 - 12:23

Shasti: Good evening, good morning, good afternoon, whichever part of the world you guys are joining from. I hope you guys are doing well.

12:23 - 12:27

Shasti: I am doing good, thank you so much. How are you guys doing?

12:28 - 12:30

Shasti: Perfectly fine, excited.

12:31 - 12:32

Shasti: Great.

12:35 - 12:37

Shasti: Very much excited.

12:38 - 12:41

Shasti: I'm doing good, thank you so much.

12:42 - 12:54

Shasti: Looking forward... perfect. I still see a lot of us have not yet joined our session. We will wait for another 2 minutes for all of them to join, and then we will get started.

12:54 - 13:08

Shasti: In the meantime, folks, we are almost, at the end of ending our Week 2 of the program. Today is Day 10. We just have another 4 days left. So, how are you folks feeling about it?

13:12 - 13:19

Shasti: Let me know in the chat how are you guys feeling that we are already in day 10 of our program.

13:21 - 13:23

Shasti: Overwhelmed. Great. Sad.

13:24 - 13:25

Shasti: Amazed.

13:27 - 13:30

Shasti: Lot to be practiced, yes, that is true.

13:31 - 13:32

Shasti: Jazz?

13:33 - 13:58

Shasti: Havo says, can't believe it's... it is almost over. Yes, we have another 4 amazing days. Of course, there are bonus days, right, but those are optional, not mandatory for you folks to join. But, I think the next 4 days are going to be more interesting than the rest of the days, because one, your hackathon is going to get started, and you will be interacting with your amazing, teammates.

13:58 - 14:13

Shasti: And I'm not sure most of you, not yet know which team you belong to, or what is hackathon about, so all those details will be shared in the next couple of days. So stay tuned, stay excited, and we will give all the details very soon.

14:14 - 14:25

Shasti: With that said, we will quickly get started. So, what are we going to do today, folks? How many of you have actually gone through the pre-reads or gone through the schedule? What topic are we covering today?

14:25 - 14:32

Shasti: Let me know in the chat. Lawrence is me, okay? I'll wait for your answers on what are we going to cover today.

14:35 - 14:39

Shasti: Okay, most of you have got it right.

14:41 - 15:05

Shasti: Yes, we are going to cover a topic called... we are going to use a tool called Antigravity, which is like a coding tool for all the non-coders and all the non-tech people, here out there. So, we have a very amazing mentor coming in to teach you all about what anti-gravity is, and also, the use case of today is something that I want to talk about. So, how many of

15:05 - 15:13

Shasti: us here in the session, have built a portfolio for themselves. Let me know in the chat. How many of you have your own portfolios?

15:14 - 15:18

Shasti: And how many of you are interested to build one if you do not have it yet?

15:18 - 15:25

Shasti: I see majority of them saying that do not have a portfolio of themselves, and a couple of them saying yes.

15:26 - 15:36

Shasti: On a scale of 1 to 10, how amazed or interested would you be if we tell that today you will be building, by the end of today's session, you will have your own portfolio?

15:37 - 15:42

Shasti: I see all those tents coming in. Great, 100.

15:44 - 15:49

Shasti: Bring it on... When I say portfolio, it's your personal portfolio, folks.

15:50 - 15:52

Shasti: would be amazing.

15:54 - 15:55

Shasti: grid.

15:55 - 16:20

Shasti: Perfect! Now that you all are excited, that is what we are going to learn today. We are going to get introduced to a tool called Anti-Gravity, and for the first 2.5 to 3 hours, you will learn about how you can use Anti-Gravity, a platform for non-coders to build your portfolio, and then we get into breakout rooms. We have a very detailed workbook, and our amazing commenters in the breakout rooms.

16:20 - 16:30

Shasti: where you will be building your portfolio. So, for the first 2.5 to 3 hours, I hope you guys will not do it along with the mentor, right? For the first 2.5 hours.

16:30 - 16:41

Shasti: Try to take notes and learn and observe as much as you can. We have our breakout room activities planned, where you will be building one for yourself. Are we aligned? Are we aligned on the session's agenda?

16:42 - 16:44

Shasti: Yes, we know the drill.

16:46 - 16:47

Shasti: Perfect.

16:47 - 17:11

Shasti: Perfect. But before we get into the breakout room, after the teaching part is done, you guys will get to know which hackathon team you belong to, which is very important. And most of you might have questions about what is hackathon, do I need to participate, is it mandatory? All those questions we will address tomorrow, but for today, you will just know which hackathon team you belong to.

17:11 - 17:19

Shasti: And how will you find out who are your other team members? This is something that we will cover once the teaching part is done, and then we get into the breakout rooms.

17:22 - 17:39

Shasti: Yes. Everything about Hackathon, park your questions later. We will pick it up either in today's, Hackathon briefing, or tomorrow we have a dedicated section just to explain what Hackathon is and how it's gonna be done. We will get to that tomorrow. I'm just giving you guys a heads up.

17:41 - 17:42

Shasti: Great.

17:42 - 18:07

Shasti: With that said, I will not delay any further on. Let's welcome our amazing mentor for the day. Most of you have already met him in previous breakout rooms, or one of the breakout rooms, if you guys have attended live. So, we have Harshith Vadiparthi here, who is an AI consultant himself, and also the co-founder and CTO of Kenzai Intelligence, and he will be here today with all of us, and give us a complete

18:07 - 18:21

Shasti: walkthrough of what anti-gravity is, and how you can go ahead and build your own portfolio. With that said, let's welcome Harshith into our session. Let's give a very, very warm welcome to Harshith in the chat as well.

18:28 - 18:29

Shasti: Yes.

18:29 - 18:31

Shasti: Hi, Arshad, welcome back again.

18:34 - 18:36

Shasti: I think, Arshut we cannot hear you.

18:42 - 18:43

Harshith Vaddiparthi | Outskill: Is that good? Is that audible?

18:43 - 18:45

Shasti: It's perfect now, we can hear you.

18:45 - 18:47

Harshith Vaddiparthi | Outskill: Amazing, amazing, amazing. How are you all doing?

18:47 - 18:50

Harshith Vaddiparthi | Outskill: Guys, how are you all doing? Okay.

18:52 - 18:57

Harshith Vaddiparthi | Outskill: Okay, amazing, amazing. It looks like everybody is so thrilled for this session, Shasti.

18:57 - 18:58

Harshith Vaddiparthi | Outskill: Looks good.

18:59 - 19:03

Shasti: Yeah. So with that, Harshith, over to you for the next couple of hours.

19:03 - 19:04

Harshith Vaddiparthi | Outskill: Amazing.

19:04 - 19:14

Harshith Vaddiparthi | Outskill: All right, guys, now that we're all here, let's get started with our amazing session for today, which is actually going to be anti-gravity. I mean.

19:14 - 19:24

Harshith Vaddiparthi | Outskill: Take these off for now. Yes. So, guys, before we actually quickly get started, there's one thing I wanna, you know, just make it clear, and I wanna go ahead and clarify to all of you guys, right?

19:24 - 19:28

Harshith Vaddiparthi | Outskill: Guys, keep this in mind throughout this entire session.

19:28 - 19:38

Harshith Vaddiparthi | Outskill: that I am a complete non-coder, right? I am a complete non-coder myself. I cannot write a single line of code.

19:38 - 19:52

Harshith Vaddiparthi | Outskill: Right? Guys, just make sure you all know that, because what I'm about to show you might seem a little bit intimidating when you actually look at it for the first time, because the moment you look at it, you might be, hey, what's all this, you know, terminal that's going on? What is all this, you know, coding thing that's going on?

19:52 - 20:03

Harshith Vaddiparthi | Outskill: But trust me, guys, everything that we're currently doing is built for complete non-coders, right? So guys, give me a boom in the chat, everyone. Go ahead and give me a boom in the chat, everybody.

20:04 - 20:07

Harshith Vaddiparthi | Outskill: Give me a boom in the chat before I quickly get started.

20:07 - 20:09

Harshith Vaddiparthi | Outskill: Okay, okay, okay, okay.

20:10 - 20:11

Harshith Vaddiparthi | Outskill: Amazing.

20:11 - 20:30

Harshith Vaddiparthi | Outskill: Okay, and yeah, for all the folks who are asking me, yes, that's actually a 3D printer, which is actually printing, my mouse shell right now. So this is kind of broken, so I just... again, that also I wipe-coated. I literally wipe-coded. I took the... I took the file, put it, you know, put it in anti-gravity, asked it to go print it, and it's literally printing it right now.

20:30 - 20:40

Harshith Vaddiparthi | Outskill: Right? So that's literally awesome, right, guys? So that's exactly what I want to go ahead and show you guys, like, how we can, even as non-coders, build things out of nothing.

20:40 - 20:55

Harshith Vaddiparthi | Outskill: Right? So, I think it's time. Let's go ahead, and I'll start sharing my screen. I'm not gonna bore you out with a lot of, you know, you know, theory right now, because I want to dive and show you guys the tools itself, because it's very important for you guys to understand the tools and everything.

20:55 - 20:57

Harshith Vaddiparthi | Outskill: Okay, let's, let's quickly get started.

20:57 - 21:04

Harshith Vaddiparthi | Outskill: Let me move this right here... And... Okay, guys.

21:05 - 21:05

Harshith Vaddiparthi | Outskill: Nice!

21:06 - 21:12

Harshith Vaddiparthi | Outskill: You can all see my screen, right? It's a blank screen, but everyone can all see it. Perfect, perfect, perfect. All right.

21:17 - 21:18

Harshith Vaddiparthi | Outskill: Okay? No.

21:19 - 21:23

Harshith Vaddiparthi | Outskill: Let me just quickly go to the drawing board right now. All right.

21:23 - 21:30

Harshith Vaddiparthi | Outskill: Now, The first thing that we actually all understand right now, at this point, is that...

21:30 - 21:41

Harshith Vaddiparthi | Outskill: Prompting. Guys, we all understand prompting, right? Very simple, at a very basic level, and at even a meta level as well, we all understand that we give a prompt.

21:42 - 21:50

Harshith Vaddiparthi | Outskill: Right? We give a prompt of sorts, right? Whatever the prompt can be, it can be on ChatGPT, on whatever tool that you're using, you get some kind of an output.

21:50 - 21:58

Harshith Vaddiparthi | Outskill: Right? You get some kind of an output, which is, of course, what an LLM does, and this concept is very, very clear for you, right?

21:58 - 22:01

Harshith Vaddiparthi | Outskill: All of this is very, very clear for you, right?

22:01 - 22:06

Harshith Vaddiparthi | Outskill: But now, what we're gonna dive into right now is trying to understand

22:07 - 22:16

Harshith Vaddiparthi | Outskill: how prompt is not just gonna be, language, right? This time, we're transitioning from just language

22:17 - 22:25

Harshith Vaddiparthi | Outskill: language, which just gives out, you know, we ask it in English, it's gonna give us something out again in English, right? That's not what we're doing right now.

22:26 - 22:33

Harshith Vaddiparthi | Outskill: What we're trying to do right now is, again, give the exact same prompt But the output this time

22:33 - 22:43

Harshith Vaddiparthi | Outskill: it's gonna be code, right? The output this time would be a website, right? An output would be a dashboard, right?

22:43 - 22:59

Harshith Vaddiparthi | Outskill: This is, by and large, what we are gonna be working on right now, right? That's basically it, right? Very, very simple overview that I just wanted to give you, because I want you guys to be very clear with what we're gonna dive into right now, okay? So that's one.

23:00 - 23:00

Harshith Vaddiparthi | Outskill: Okay.

23:00 - 23:10

Harshith Vaddiparthi | Outskill: Now, the next thing I want to show you guys is something like, VS Code. Okay. Guys, have any of you guys heard about this tool?

23:10 - 23:16

Harshith Vaddiparthi | Outskill: Anyone heard about this tool, guys? Any of you guys heard about this tool? Yes in the chat, guys. Okay, Hussein says yes.

23:16 - 23:19

Harshith Vaddiparthi | Outskill: Dwang says no, okay?

23:19 - 23:30

Harshith Vaddiparthi | Outskill: Couple of you, yes and no, never heard about it. Okay, use it every day, not at all. Okay, but daily, I see a couple of you guys using daily. Okay.

23:30 - 23:33

Harshith Vaddiparthi | Outskill: Alright, you guys heard about it, right?

23:33 - 23:36

Harshith Vaddiparthi | Outskill: So here's the deal with this, right?

23:37 - 23:43

Harshith Vaddiparthi | Outskill: This tool is something called as VS Code, right? This tool

23:43 - 23:53

Harshith Vaddiparthi | Outskill: Just take a quick look at it, no need to, you know, worry too much about it. I'm just giving you guys an understanding, right? Let's make that clear. It's just to understand what this tool is.

23:54 - 24:06

Harshith Vaddiparthi | Outskill: It's called VS Code, and it is an open source tool. Like, it's open, like, anyone can, you know, use the codebase, they can build anything on top of it. It's actually owned by Microsoft, and it's completely free for the world to use.

24:06 - 24:07

Harshith Vaddiparthi | Outskill: No.

24:07 - 24:09

Harshith Vaddiparthi | Outskill: Off the bat, if you look at it.

24:09 - 24:26

Harshith Vaddiparthi | Outskill: Guys, doesn't it look, like, very, you know, like, intimidating? Like, it's very, you know, there's a lot of code going on, and there's, like, you know, there are files, you know, and literally, I don't understand any of that, right? That's exactly Kowshik, right? It looks scary, right, Chris? It does look scary at point.

24:26 - 24:31

Harshith Vaddiparthi | Outskill: when... yeah, okay, Tracy say it gives me a headache. Absolutely, that happens, you know, to us as well, because

24:31 - 24:42

Harshith Vaddiparthi | Outskill: Some of us are built in such a way that we are a bit more, you know, we might not be having that coding kind of a mindset, but the mindset that we carry is a bit more creative.

24:42 - 24:54

Harshith Vaddiparthi | Outskill: And I think that's basically the world we're living in. It's built for the creative folks. All these LLMs are built for creatives like us. Now, there's left side, there's all of this going on, there's too much going on, right? Now.

24:55 - 24:57

Harshith Vaddiparthi | Outskill: Now, what I wanna...

24:57 - 25:06

Harshith Vaddiparthi | Outskill: tell you right now is very important, because if you just understand the history of, you know, what is exactly happening, how these tools evolved.

25:06 - 25:21

Harshith Vaddiparthi | Outskill: you'll just grasp the entire, you know, session even better, right? Okay. So, there was something called as VS Code, right guys? Everyone clear with this tool? It's a scary coding kind of a tool. That's all you have to know right now.

25:21 - 25:33

Harshith Vaddiparthi | Outskill: Right? Yes in the chat... yes in the chat, guys? Guys, let's be very, very interactive, trust me, you guys can keep asking me a lot of things. I have my chat open. Anything, I'll try to answer, I'll try to, you know, cover as much as I can.

25:33 - 25:40

Harshith Vaddiparthi | Outskill: Right, Akshah? Okay. Brian, amazing, right? We all understood this for now. Amazing. Kalyani? Yes. Yes for now.

25:40 - 25:46

Harshith Vaddiparthi | Outskill: Okay? Now that we understood this, We're gonna get into...

25:47 - 25:48

Harshith Vaddiparthi | Outskill: The next part of it, right?

25:49 - 25:51

Harshith Vaddiparthi | Outskill: This was... VS Code.

25:53 - 25:55

Harshith Vaddiparthi | Outskill: VS Code.

25:56 - 26:12

Harshith Vaddiparthi | Outskill: Right? This was just built as a tool which, you know, developers had to write code, write code by hand, right? Developers had to write code by hand, right? This is what the tool was.

26:12 - 26:13

Harshith Vaddiparthi | Outskill: Right?

26:13 - 26:17

Harshith Vaddiparthi | Outskill: Now... The next version of this.

26:17 - 26:35

Harshith Vaddiparthi | Outskill: Where basically, we have large language models, right? LLMs, right? LLMs, which are giving us, such good, you know, inputs, because they have all of this

information about coding, because they literally have the world's knowledge, right? They literally have the world's knowledge.

26:35 - 26:42

Harshith Vaddiparthi | Outskill: Now, there was this company that came in, Someone called... Cursor, right?

26:43 - 26:48

Harshith Vaddiparthi | Outskill: cursor, And all they sa- all they did was...

26:49 - 26:55

Harshith Vaddiparthi | Outskill: You can write code by hand, plus... Huh?

26:55 - 26:56

Harshith Vaddiparthi | Outskill: Chatbot.

26:57 - 26:57

Harshith Vaddiparthi | Outskill: That's it.

26:58 - 27:00

Harshith Vaddiparthi | Outskill: Does that make sense now, guys?

27:00 - 27:06

Harshith Vaddiparthi | Outskill: This is how the evolution of all of these Vivek Coding tools happened.

27:07 - 27:12

Harshith Vaddiparthi | Outskill: That's a very simple interface, right? This scary interface

27:12 - 27:27

Harshith Vaddiparthi | Outskill: that, you know, if you don't understand it, it's very, it's very, you know, difficult and tedious to understand, right? This is what people were working with, right? They used to hide... they used to write code by hand. This is how it looked like.

27:28 - 27:34

Harshith Vaddiparthi | Outskill: But now, a company called Cursor just came in, And all they did was.

27:34 - 27:39

Harshith Vaddiparthi | Outskill: Just to the right side of this portion, they simply added,

27:39 - 27:47

Harshith Vaddiparthi | Outskill: A chatbot, right? A chatbot. Now, you can chat with it, and it is gonna write code by itself.

27:47 - 27:52

Harshith Vaddiparthi | Outskill: Right? Is this concept clear to you all? Let me also try to change my pointer for a second, guys.

27:54 - 27:56

Harshith Vaddiparthi | Outskill: Is this clear to you guys?

27:56 - 28:06

Harshith Vaddiparthi | Outskill: Is this clear to you all? Like, what Cursor did, and, you know, how the evolution of all these coding languages and everything started, right? That part is clear.

28:08 - 28:09

Harshith Vaddiparthi | Outskill: Okay.

28:10 - 28:19

Harshith Vaddiparthi | Outskill: Amazing, yeah. I'll do a summary, yes. It'll become way more clear as and when we proceed, right? It'll become even more clear as we proceed. So that's what I wanted to tell you.

28:19 - 28:24

Harshith Vaddiparthi | Outskill: But now, the session is about anti-gravity, why am I covering cursor?

28:24 - 28:40

Harshith Vaddiparthi | Outskill: I just want to tell you how we evolved, right? What is a chatbot? It's just a simple chat interface, which, Helen, you will see. You will see as we download Anti-Gravity and all that, you'll see. But for now, just understand that portion, right? That's one. But now.

28:40 - 28:43

Harshith Vaddiparthi | Outskill: Google also came in, and Google is like, hey.

28:43 - 28:52

Harshith Vaddiparthi | Outskill: why can't we do the same? Because they literally produce the best models in the world, right? Now, Google just came in, and they launched

28:54 - 28:55

Harshith Vaddiparthi | Outskill: Anti-gravity.

28:55 - 28:59

Harshith Vaddiparthi | Outskill: That's the tool that we'll be diving into right now.

28:59 - 29:13

Harshith Vaddiparthi | Outskill: Okay? The tool called Anti-Gravity, and again, write code by hand with the chat, you know, and there's also a chatbot next to you, plus all the Gemini models.

29:13 - 29:20

Harshith Vaddiparthi | Outskill: That's all you right now have to understand. That's it. Very, very clear. That's all.

29:20 - 29:33

Harshith Vaddiparthi | Outskill: Guys, is this understood? Even if it's as a concept, if it's understood, that's enough, because I'll be showing you the interface. Don't worry about the interface, I'll show you the interface, all of that. But this is all you have to understand.

29:35 - 29:41

Harshith Vaddiparthi | Outskill: Right? Understood? Amazing. Amazing. So this is a tool that will be amazing. Loud and clear? Perfect.

29:42 - 29:43

Harshith Vaddiparthi | Outskill: Perfect, guys. Alright.

29:43 - 29:50

Harshith Vaddiparthi | Outskill: Now what we're gonna do is... let me quickly just go to the platform called Anti-Gravity.

29:52 - 30:01

Harshith Vaddiparthi | Outskill: This is the website for anti-gravity. It's just at anti-gravity.google, and this is the website that you're gonna see, right?

30:01 - 30:02

Harshith Vaddiparthi | Outskill: Yep.

30:02 - 30:04

Harshith Vaddiparthi | Outskill: That's basically what it is.

30:05 - 30:09

Harshith Vaddiparthi | Outskill: And now, when you're scrolling, there's something else called Anti-Gravity 2.0.

30:10 - 30:25

Harshith Vaddiparthi | Outskill: Right? Now it gets a little tricky. Now you're like, hey, what is anti-gravity 2.0? What exactly is going on right now? Okay? So I'm gonna show you both, but right now we'll be diving into anti-gravity as an IDE, because if this part is clear.

30:25 - 30:27

Harshith Vaddiparthi | Outskill: Everything else will also be clear for you.

30:28 - 30:37

Harshith Vaddiparthi | Outskill: Right? So let's dive into something called as anti-gravity IDE. Now, anyone in the chat, guys, anyone know what IDE stands for?

30:38 - 30:40

Harshith Vaddiparthi | Outskill: Anyone know what IDE stands for?

30:40 - 30:42

Harshith Vaddiparthi | Outskill: No, no, okay.

30:44 - 30:45

Harshith Vaddiparthi | Outskill: Okay.

30:47 - 30:51

Harshith Vaddiparthi | Outskill: Alright, I do see a couple of answers coming in. Yes, I do see a couple of funds coming in, but...

30:52 - 30:55

Harshith Vaddiparthi | Outskill: Let me just quickly circle back on this again.

30:56 - 31:09

Harshith Vaddiparthi | Outskill: Guys, this is literally what an IDE is. All that means is, yes, Nafiza, Manoj, Rajani, Kavi, you guys are all correct. It's an integrated development environment.

31:10 - 31:13

Harshith Vaddiparthi | Outskill: All that means is, it's like one single place

31:13 - 31:24

Harshith Vaddiparthi | Outskill: where you have all the tools, everything that you need to work with, right? That is basically what an integrated development environment is.

31:24 - 31:34

Harshith Vaddiparthi | Outskill: Right? So that's basically what we are working with right now. Okay? So now, let me quickly go ahead and

31:34 - 31:36

Harshith Vaddiparthi | Outskill: download anti-gravity.

31:39 - 31:44

Harshith Vaddiparthi | Outskill: Now, let me go ahead and quickly download Anti-gravity and show you the entire thing. Okay?

31:44 - 31:58

Harshith Vaddiparthi | Outskill: Yeah, it's V... exactly, Rhi Singh, you're absolutely correct. VS Code is an IDE. All of these platforms where you can kind of type code, or you can generate code using AI,

31:58 - 32:11

Harshith Vaddiparthi | Outskill: Guys, it's all that it is. It's like one place where you can just go ahead and, you know, create your ideas, like, code, and do all of that, right? That's why it's called a development environment. That's all.

32:11 - 32:15

Harshith Vaddiparthi | Outskill: Okay, yes, saksham, we'll get into examples and all of that, too.

32:16 - 32:24

Harshith Vaddiparthi | Outskill: Now, let's dive into this completely, because you understood the image of it, but if I open the dashboard itself, it'll be way more clear for you.

32:24 - 32:31

Harshith Vaddiparthi | Outskill: Okay? Now... anti-gravity IDE, let me just go ahead and X go to the product.

32:31 - 32:40

Harshith Vaddiparthi | Outskill: Okay, now we have a simple website. All you really have to do is just go ahead and, you know, click on the download button. You download for whatever, platform there is.

32:41 - 32:50

Harshith Vaddiparthi | Outskill: Right now, I'm gonna download both of them. I'll show you the difference of what Anti-Gravity 2.0 is, and what IDE is, and then we'll completely dive in.

32:51 - 33:01

Harshith Vaddiparthi | Outskill: And yeah, I think, Kumar also has a very good question. How is it different from bold and lovable and all of that? Guys, all of that, it'll become way more clear

33:01 - 33:09

Harshith Vaddiparthi | Outskill: You know, as and when we proceed. So just try to pay a little bit more attention while we are at this, okay? Perfect. Now...

33:10 - 33:23

Harshith Vaddiparthi | Outskill: So, there's anti-gravity IDE, and... yeah. So, this is the one, right? You download the IDE using this button. Just click on that button, you just download it.

33:25 - 33:31

Harshith Vaddiparthi | Outskill: Okay? That's downloading for me right now, right? IDE is downloading for me.

33:31 - 33:37

Harshith Vaddiparthi | Outskill: The same way, I'm also going to go ahead and download the Anti-Gravity 2.0.

33:38 - 33:44

Harshith Vaddiparthi | Outskill: Right? 2.0 as well. Let me quickly go ahead and download that. Yeah, that's taking a bit of a second, guys, as you can see it.

33:44 - 33:45

Harshith Vaddiparthi | Outskill: Nate?

33:46 - 33:53

Harshith Vaddiparthi | Outskill: Okay. Yeah, and one quick thing, guys. Please do not follow me along, right? Guys, you have a breakout room.

33:53 - 34:04

Harshith Vaddiparthi | Outskill: We'll be diving into the entire thing, we'll be... we have an amazing workbook that we'll be diving into, right? A very amazing workbook, which you'll be very proud of, and you can showcase on your LinkedIn as well, okay?

34:04 - 34:19

Harshith Vaddiparthi | Outskill: But now, I just want your attention, no hands-on work, please, okay? Let's only, only focus right now, okay? And any questions, of course, you have all our amazing commenters who can, you know, give you, pointers about what we're diving into as well, okay? Now.

34:19 - 34:23

Harshith Vaddiparthi | Outskill: Firstly, I've got anti-gravity IDEA downloaded, right?

34:23 - 34:27

Harshith Vaddiparthi | Outskill: And to actually install this, let me just go ahead and open that on my folder.

34:29 - 34:36

Harshith Vaddiparthi | Outskill: I see it on my folder, yeah. So this is gonna be, like, a file that you'll see. If you go ahead and open it.

34:37 - 34:48

Harshith Vaddiparthi | Outskill: there's gonna be an installer that's gonna open, which is gonna look something like this, right? And then you install it. I already have it installed, so let me... I've just logged into an account, so that's it.

34:48 - 34:51

Harshith Vaddiparthi | Outskill: This is what It looks like.

34:52 - 34:57

Harshith Vaddiparthi | Outskill: Right? Guys, once again, we are in anti-gravity IDE, not the 2.0.

34:57 - 35:11

Harshith Vaddiparthi | Outskill: with an anti-gravity IDE. I'll show you the, 2.2 as well, as an understanding, and you're gonna tell... you guys are gonna tell us, hey, you guys are gonna be like, hey, it's so easy, you'll understand it even better, right? That's what we're dealing with right now. Okay.

35:11 - 35:12

Harshith Vaddiparthi | Outskill: No.

35:12 - 35:16

Harshith Vaddiparthi | Outskill: Everyone, yes in the chat, guys, if you understood

35:16 - 35:28

Harshith Vaddiparthi | Outskill: that this is anti-gravity IDE. All of you understand that this is the anti-gravity IDE, the Integrated Development Environment. Yes, amazing, I see all the yeses flowing in.

35:28 - 35:29

Harshith Vaddiparthi | Outskill: Perfect.

35:30 - 35:34

Harshith Vaddiparthi | Outskill: Perfect, perfect. Okay. Okay, also, I do recognize a lot of you guys.

35:34 - 35:38

Harshith Vaddiparthi | Outskill: Okay, hello Shailabh, how are you? I think Sohaib also.

35:39 - 35:41

Harshith Vaddiparthi | Outskill: Nice, good to see all of you guys again.

35:42 - 35:43

Harshith Vaddiparthi | Outskill: Perfect, perfect.

35:43 - 35:44

Harshith Vaddiparthi | Outskill: Alright.

35:44 - 35:45

Harshith Vaddiparthi | Outskill: No.

35:46 - 35:51

Harshith Vaddiparthi | Outskill: Guys, off the bat, Do you see something on the right side right here?

35:52 - 35:55

Harshith Vaddiparthi | Outskill: Guys, guys, do you see what's going on right here?

35:55 - 36:13

Harshith Vaddiparthi | Outskill: This section, guys, I made my cursor big red pointer, so I hope you guys can all see it right. It's like a chatbot, it's an agent that we have all been using for the last 3 years, like, using ChatGPT so much. That's literally what this is. There's an LLM

36:13 - 36:17

Harshith Vaddiparthi | Outskill: Inside, the IDE.

36:17 - 36:31

Harshith Vaddiparthi | Outskill: Exactly, that's the chatbot. This is what differentiates VS Code from anti-gravity. VS Code is more of a, you know, hand coding tool where you have to sit down and write code. But here.

36:31 - 36:37

Harshith Vaddiparthi | Outskill: you just... in this chatbot, you say, hey, I want to work on this, you give it the prompts.

36:38 - 36:44

Harshith Vaddiparthi | Outskill: it's gonna build that there, right? Now, you guys understand it even better. Amazing. So let me quickly

36:45 - 36:47

Harshith Vaddiparthi | Outskill: Take a screenshot of this, again.

36:47 - 36:51

Harshith Vaddiparthi | Outskill: And kind of, you know, put it in our... whiteboard.

36:54 - 36:55

Harshith Vaddiparthi | Outskill: Yep.

36:58 - 36:59

Harshith Vaddiparthi | Outskill: Perfect.

36:59 - 37:19

Harshith Vaddiparthi | Outskill: Of course, cursor also looks very, very similar to this, guys. They might all be having, you know, minor styling differences, but by and large, it's all the same thing, right? It's all the same thing. If you look at that, if you look at VS Code and, you know, Anti-Gravity, it's literally, you know, the same interface, you know, all those same buttons, all of that itself, right?

37:20 - 37:22

Harshith Vaddiparthi | Outskill: Now, let me tell you why.

37:22 - 37:27

Harshith Vaddiparthi | Outskill: Because... This is literally VS Code itself.

37:28 - 37:29

Harshith Vaddiparthi | Outskill: Right?

37:29 - 37:34

Harshith Vaddiparthi | Outskill: It's open source code, so anti-gravity is built on top of that.

37:34 - 37:36

Harshith Vaddiparthi | Outskill: With a chatbot.

37:36 - 37:39

Harshith Vaddiparthi | Outskill: That's it. So what I'm trying to tell you right now is that

37:40 - 38:00

Harshith Vaddiparthi | Outskill: If you understand the anti-gravity IDE, after the session, you will be comfortable with using cursor. You would be comfortable with using, let's say, windsurf. You will be comfortable to even use Claude Code, or let's say, integrate that inside VS Code as well, right?

38:00 - 38:17

Harshith Vaddiparthi | Outskill: Shailabh puts it better. Guys, I think Shailabh has, you know, put it in a much better way than I have. Let me take a screenshot of that, what Shailabh just posted, and let me just share it here. Guys, I think Shailabh, you put it even better. Anti-gravity is basically VS Kurt plus Gemini. That's it.

38:17 - 38:19

Harshith Vaddiparthi | Outskill: That's it.

38:19 - 38:31

Harshith Vaddiparthi | Outskill: Thank you, Shailabh, for making my job easy and making, you know, much more clear. That's it. It's just VS Code plus Gemini working together in one simple platform.

38:31 - 38:32

Harshith Vaddiparthi | Outskill: That's all.

38:32 - 38:46

Harshith Vaddiparthi | Outskill: Now, let me quickly also tell you the 2.0, because I want to give you the understanding of 2.0, and we'll come back to this, but you can also explore it as well, but it'll just make it even more clear. Now.

38:46 - 39:00

Harshith Vaddiparthi | Outskill: off the bat, I'm on this dashboard, but now, you know, Google is like, hey, there's, like, a big blue button that says, hey, try out Anti-Gravity 2.0. Guys, do you see that on the top right corner? It says, try out Anti-Gravity 2.0.

39:01 - 39:08

Harshith Vaddiparthi | Outskill: Right? Right? Exactly. So now, if you click on that, of course, it's gonna take you to their own website.

39:08 - 39:16

Harshith Vaddiparthi | Outskill: Exactly, which we were literally on, right? This exact same website, where they prompt you to download the 2.0 version as well.

39:17 - 39:17

Harshith Vaddiparthi | Outskill: Right?

39:18 - 39:21

Harshith Vaddiparthi | Outskill: Once again, There is no difference

39:22 - 39:31

Harshith Vaddiparthi | Outskill: There's no difference between these tools, it's just a user interface level difference. You can choose whatever you are comfortable with.

39:31 - 39:32

Harshith Vaddiparthi | Outskill: That's it.

39:32 - 39:49

Harshith Vaddiparthi | Outskill: That's it, guys. Is that difference also clear? There is no difference between Anti-Gravity 2.0 and the IDE. The models are going to be the same, the performance is going to be the same, the engine behind it is all gonna be the same. It's just the interface that you would like to choose.

39:49 - 39:54

Harshith Vaddiparthi | Outskill: Chris asks if anti-gravity is a white coding tool.

39:54 - 39:55

Harshith Vaddiparthi | Outskill: Chris.

39:55 - 40:13

Harshith Vaddiparthi | Outskill: right now, at this point, all of these tools have become VIP Coding, right? You can... that's exactly what we're gonna do right now. We're gonna wipe, we're

gonna, you know, code something, we're gonna build something as well. So it is a VIP Coding itself. Yeah, Kowshik, yes, it's just a user experience and user interface difference, that's all.

40:13 - 40:15

Harshith Vaddiparthi | Outskill: Underneath it, it's all the same.

40:15 - 40:17

Harshith Vaddiparthi | Outskill: Right? Now...

40:17 - 40:25

Harshith Vaddiparthi | Outskill: Let's also try to look into this 2.0 thing as well, right? So, I think we've already downloaded it. Let me see. That should be the one.

40:26 - 40:28

Harshith Vaddiparthi | Outskill: Give me a second.

40:30 - 40:36

Harshith Vaddiparthi | Outskill: Yes, this is... the anti-gravity 2.0. Let me open that as well.

40:36 - 40:38

Harshith Vaddiparthi | Outskill: Right? Let me quickly open that, too.

40:39 - 40:56

Harshith Vaddiparthi | Outskill: And, yeah, I think, guys, the only difference you see is this icon is, like, black, and that icon is, like, white. That's like a, you know, little way that they have kind of differentiated, but let's open it now, okay? Right? Okay. Now it says anti-gravity is an app, downloading from internet, okay, okay.

40:58 - 41:03

Harshith Vaddiparthi | Outskill: Let's see... Where is it opening? Yeah, it opened on this screen.

41:04 - 41:06

Harshith Vaddiparthi | Outskill: But now, let me show that to you as well.

41:07 - 41:13

Harshith Vaddiparthi | Outskill: And guys, please tell me if my switching between tabs is a little too quick, because...

41:13 - 41:21

Harshith Vaddiparthi | Outskill: But, you know, I'm just trying to, you know, move around and show you as much information as possible, but please let me know, right? Whatever it is, right?

41:23 - 41:24

Harshith Vaddiparthi | Outskill: It's fine? Okay.

41:25 - 41:26

Harshith Vaddiparthi | Outskill: Alright.

41:26 - 41:27

Harshith Vaddiparthi | Outskill: Okay, perfect.

41:28 - 41:33

Harshith Vaddiparthi | Outskill: Alright, now, Let's just do the onboarding process like a small security node that gives you

41:33 - 41:39

Harshith Vaddiparthi | Outskill: Light mode, dark mode. For this one, let me try to do light mode, so that you understand it better.

41:39 - 41:41

Harshith Vaddiparthi | Outskill: Right? And then let me go to the next one.

41:41 - 41:43

Harshith Vaddiparthi | Outskill: Plugins, guys, again.

41:43 - 41:44

Harshith Vaddiparthi | Outskill: No.

41:44 - 41:48

Harshith Vaddiparthi | Outskill: Guys, now tell me. You guys gotta tell me. Guys, what are plugins?

41:49 - 41:51

Harshith Vaddiparthi | Outskill: What are these plugins?

41:52 - 41:54

Harshith Vaddiparthi | Outskill: Tools and... and what else?

41:54 - 41:55

Harshith Vaddiparthi | Outskill: What else?

41:55 - 42:09

Harshith Vaddiparthi | Outskill: Exactly. Hussein, you are absolutely right. Hussein, Utsava, Evin Saloni, you guys are right. They're nothing but APIs and MCPs. Hardnesses! Who said that? Amazing. Sai... okay, Sai Gouri, nice to see you as well, right?

42:10 - 42:25

Harshith Vaddiparthi | Outskill: So, that's basically what it is. It's just these harnesses, these APIs, different connectors, which you can just use. And because it's like Google, it's just, you know, trying to push its own tools, like Firebase, you know, it's a Google Maps platform.

42:25 - 42:32

Harshith Vaddiparthi | Outskill: it's all Google ecosystem, right? So they have the power to push whatever tools that they want to, and then, you know, get users on that.

42:32 - 42:33

Harshith Vaddiparthi | Outskill: So that's it.

42:33 - 42:34

Harshith Vaddiparthi | Outskill: No.

42:35 - 42:36

Harshith Vaddiparthi | Outskill: Let me kind of dismiss this.

42:37 - 42:39

Harshith Vaddiparthi | Outskill: And let me open it.

42:40 - 42:41

Harshith Vaddiparthi | Outskill: Guys, that's it.

42:41 - 42:45

Harshith Vaddiparthi | Outskill: This is the Anti-Gravity 2.0. That's all.

42:45 - 42:47

Harshith Vaddiparthi | Outskill: Let me show you.

42:47 - 42:48

Harshith Vaddiparthi | Outskill: The normal one as well?

42:49 - 43:01

Harshith Vaddiparthi | Outskill: Who said that? Yes, exactly. Tracy is also correct. Tracy says, this looks more like ChatGPT UI. And Tracy, that's exactly what Anti-Gravity is trying to tap into.

43:02 - 43:13

Harshith Vaddiparthi | Outskill: you know, Google saw that, hey, a lot of users are going to ChatGPT, you know, they're going to, Cloud, right? They want to make something better, and they just gave this platform. That's it.

43:14 - 43:17

Harshith Vaddiparthi | Outskill: It's... that's all, guys. Now, is that clear?

43:17 - 43:34

Harshith Vaddiparthi | Outskill: In terms of code, everything the same. So, saksham has a question. So, saksham has said, hey, in terms of code, how is it gonna perform? Guys, it's gonna perform on the basis of the model you choose. If you choose Gemini 3.8 Flash here, and that too high.

43:34 - 43:45

Harshith Vaddiparthi | Outskill: and you choose Gemini 3.8 Flash, hi, I don't know why I'm not selecting. Yeah, I think my version doesn't have high here, but if you select the same models.

43:46 - 43:48

Harshith Vaddiparthi | Outskill: The output itself is gonna be the same.

43:49 - 43:58

Harshith Vaddiparthi | Outskill: Okay, Tracy says hilarious, and I'm glad you find it that way, because now you're getting more comfortable with these tools. Now you're able to understand these tools better.

43:58 - 44:01

Harshith Vaddiparthi | Outskill: Now, I'm asking, is it ChatGPT of code? saksham, yes.

44:02 - 44:06

Harshith Vaddiparthi | Outskill: It is. You can say Gemini, of code, right, whatever. Like, the same, same thing, basically.

44:06 - 44:20

Harshith Vaddiparthi | Outskill: Right? That's the difference. Now, I need a big yes in the chat, guys, if you all understand the difference between anti-gravity 2.0 and Anti-Gravity IDE.

44:22 - 44:27

Harshith Vaddiparthi | Outskill: Okay, I see one... no, I see, okay, Kalppun says, I think, I see, okay. I do see...

44:27 - 44:31

Harshith Vaddiparthi | Outskill: Couple of no's, right? Couple of no's, but mostly yeses.

44:31 - 44:32

Harshith Vaddiparthi | Outskill: Okay.

44:32 - 44:34

Harshith Vaddiparthi | Outskill: Let me try to...

44:34 - 44:46

Harshith Vaddiparthi | Outskill: show this to you with a, with a actual, you know, folder, right? Now, it'll just make it even more clear, okay? Alright, firstly, we have understood

44:47 - 44:53

Harshith Vaddiparthi | Outskill: Anti-Gravity 2.0. We've also understood the IDE as well.

44:53 - 44:56

Harshith Vaddiparthi | Outskill: Alright, it's the difference between an interface.

44:56 - 45:00

Harshith Vaddiparthi | Outskill: Now, what I'm gonna do right now is, I'm gonna show you

45:00 - 45:11

Harshith Vaddiparthi | Outskill: how to work with the IDE. For that, I'm going to create a very simple folder and show you, you know, how to even get started with the anti-gravity platform.

45:11 - 45:29

Harshith Vaddiparthi | Outskill: I'll try to show the exact same thing in 2.0 as well, and it'll be very, very clear. Guys, and the reason I actually want to tell you this is because if there's one thing that you really have to, you know, learn from this session, right, if there's... if you forget everything, and if there's just one thing that you remember.

45:29 - 45:32

Harshith Vaddiparthi | Outskill: Just try to remember the approach.

45:32 - 45:49

Harshith Vaddiparthi | Outskill: the approach and the way to think with these models, right? The way to think with these models. If you understand the way to think to communicate, you should be comfortable with any of the interfaces. It could be Cursor, Gemini, you know, Lovable, Bolt, whatever it is.

45:50 - 45:56

Harshith Vaddiparthi | Outskill: End of the day, you really have to know how to communicate with these models, right? That's basically it.

45:56 - 46:00

Harshith Vaddiparthi | Outskill: Alright. Now, let me go back to the IDE.

46:01 - 46:03

Harshith Vaddiparthi | Outskill: What I'm gonna do right now is...

46:03 - 46:09

Harshith Vaddiparthi | Outskill: I'm gonna create a folder, right? I'll create a folder. Let me actually delete this for a second.

46:10 - 46:13

Harshith Vaddiparthi | Outskill: And let me now... Create a folder.

46:13 - 46:14

Harshith Vaddiparthi | Outskill: Right?

46:14 - 46:20

Harshith Vaddiparthi | Outskill: I'm gonna call this folder let's just call it.

46:21 - 46:27

Harshith Vaddiparthi | Outskill: 3D... prints... That's because I've just been, you know, toying around with them, right?

46:27 - 46:33

Harshith Vaddiparthi | Outskill: That's all, okay? I'm just gonna call it folder, right? This folder exists on my computer now.

46:33 - 46:35

Harshith Vaddiparthi | Outskill: Right? It lives on my desktop.

46:35 - 46:37

Harshith Vaddiparthi | Outskill: Now, you're gonna see the difference.

46:38 - 46:43

Harshith Vaddiparthi | Outskill: If I just move back... okay, before that, before that, yes. Let me open this as well.

46:43 - 46:49

Harshith Vaddiparthi | Outskill: There's nothing inside it, right? There's nothing inside it, and it's just my blank folder, right? Now.

46:51 - 47:02

Harshith Vaddiparthi | Outskill: Let me quickly... go back to Anti-Gravity IDE, and click on Open Folder, I click on Open Folder.

47:02 - 47:07

Harshith Vaddiparthi | Outskill: And let me open This... folder.

47:08 - 47:26

Harshith Vaddiparthi | Outskill: Now, it does that, and it says, hey, do you trust the authors of the folder? Yes, because I literally, you know, created that folder. Now, guys, do you see this right here, 3D prints? Now, that folder has been opened inside the anti-gravity IDE platform.

47:27 - 47:37

Harshith Vaddiparthi | Outskill: That's basically it. Guys, do you see it? I need a yes for this one. Yes or no, whatever, guys. Yes or no, whatever, let me know, because I want to clearly understand where you're at.

47:39 - 47:44

Harshith Vaddiparthi | Outskill: Okay, so let me kind of repeat this once again. All that we just did was

47:44 - 47:47

Harshith Vaddiparthi | Outskill: All that we just did was, we created a folder.

47:47 - 47:56

Harshith Vaddiparthi | Outskill: And we just opened it inside this IDE. Let me zoom in this for you guys, you know, it'll just be way more easy for you guys to understand. Let me zoom this in.

47:56 - 47:57

Harshith Vaddiparthi | Outskill: Now...

47:57 - 48:09

Harshith Vaddiparthi | Outskill: 3D prints folder, that's it. That's basically the folder which I have just opened right here. Now, I'm just gonna ask, let's say, I just asked Gemini.

48:10 - 48:18

Harshith Vaddiparthi | Outskill: Can you... create A very simple, dot MD5.

48:19 - 48:26

Harshith Vaddiparthi | Outskill: In this... Just write in Hi.

48:28 - 48:29

Harshith Vaddiparthi | Outskill: Hi.

48:30 - 48:41

Harshith Vaddiparthi | Outskill: Arshad. Yeah, very simple, guys. I'm just asking, Gemini to create a file In this folder called...

48:41 - 48:47

Harshith Vaddiparthi | Outskill: Hello, hello.md, and hi, I'm Harshith. That's it, right? So I just got a folder.

48:47 - 48:53

Harshith Vaddiparthi | Outskill: Now, I have a button that says, Accept Changes. Let me accept the changes.

48:55 - 48:59

Harshith Vaddiparthi | Outskill: If I open that again, That's it.

49:00 - 49:06

Harshith Vaddiparthi | Outskill: Guys, do you see that? Now, hello.md is in this folder. Now.

49:06 - 49:08

Harshith Vaddiparthi | Outskill: Let's go back to the desktop.

49:10 - 49:12

Harshith Vaddiparthi | Outskill: Let me... yeah, that's it.

49:12 - 49:15

Harshith Vaddiparthi | Outskill: Types. Now, does that make sense?

49:15 - 49:34

Harshith Vaddiparthi | Outskill: Guys, does it make sense now? All that this platform is, it's just a way for coders to code. That's it, it's just an interface. It's just an interface. End of the day, what's in the files is what matters. All of these are just interfaces that lets you open these files.

49:35 - 49:36

Harshith Vaddiparthi | Outskill: Right?

49:36 - 49:48

Harshith Vaddiparthi | Outskill: Now, I mean, imagine, can coders go and, like, code on this, on this? Like, where? Where? Okay, now, okay, I want to code. Where do I code? Or where do I, you know, work with? How do I create a website on this? Not possible.

49:49 - 49:50

Harshith Vaddiparthi | Outskill: That's why...

49:50 - 49:58

Harshith Vaddiparthi | Outskill: There's a tool for this, where you can just open your folder and code, or, you know, do the work, you know, just wipe code, basically.

49:58 - 50:11

Harshith Vaddiparthi | Outskill: Again, guys, please don't, you know, please don't be like, hey, why am I using the word code? I'm just, I'm just saying Vivek Coding, right? I'm just vibe Coding, because I can't code myself, so I'm just saying Vivek Coding. Exactly, cloud code is also the same.

50:11 - 50:12

Harshith Vaddiparthi | Outskill: Right?

50:12 - 50:17

Harshith Vaddiparthi | Outskill: Yeah, so I'm gonna repeat how I've added the folder. Guys, I'll try to repeat the folder part, but...

50:18 - 50:26

Harshith Vaddiparthi | Outskill: I hope you all understand this very important thing. This is just an interface to work with. That's all.

50:26 - 50:35

Harshith Vaddiparthi | Outskill: Yes, Jeffrey, I'mma do it once again, but I hope this part is clear, though, Jeffrey, right? The doing part, I'mma do it, but I hope the concept is clear.

50:36 - 50:37

Harshith Vaddiparthi | Outskill: Right?

50:38 - 50:43

Harshith Vaddiparthi | Outskill: I'm gonna open it, of course. I'll show this to you again, because it's very important, alright? Now.

50:44 - 50:46

Harshith Vaddiparthi | Outskill: This is where I've asked it in the chat.

50:47 - 50:52

Harshith Vaddiparthi | Outskill: But previously, without, you know, when there was no AI,

50:52 - 51:02

Harshith Vaddiparthi | Outskill: Coders used to create this file, and they used to name this, like, hello, alok.

51:03 - 51:04

Harshith Vaddiparthi | Outskill: dot MD.

51:05 - 51:17

Harshith Vaddiparthi | Outskill: And then they used to write in, hi, this is... Alok... I'm a learner, at... Outskill.

51:17 - 51:32

Harshith Vaddiparthi | Outskill: That's it. Now, you might be seeing a small white icon. Guys, do you see that small white icon? Guys, and when I started white coding on cursor, I used to struggle with, you know, where is all of that? You know, where's all my code? Because I'll show you the difference.

51:33 - 51:47

Harshith Vaddiparthi | Outskill: So that white button that you're seeing, that just means it's not saved. Exactly, Lauren, you're correct. You have to save your file. I used to do this, and then look at my folders. Okay, now, for some reason, it's there, but it's... this part is not there, though. If I open it.

51:47 - 51:54

Harshith Vaddiparthi | Outskill: If I open it, for... if I open that in, let's say, open with, notes.

51:54 - 51:57

Harshith Vaddiparthi | Outskill: If I open this in notes, or, like, pages.

51:58 - 52:11

Harshith Vaddiparthi | Outskill: This is not saved. The file is there, but the content inside the file, that's not saved. Now, I just got to do Command-S or CTRL-S, and it'll be saved. Let me close that off. Yeah.

52:12 - 52:31

Harshith Vaddiparthi | Outskill: That's basically what this is. I mean, guys, I can't even imagine, like, you know, people used to type code in, like, this. Instead, here in Gemini, you can just say, hey, create a file for this, or let's say create a file for, you know, automation, create a file for web scraping, and it's gonna do that.

52:32 - 52:41

Harshith Vaddiparthi | Outskill: Right? That's, that's what it is. There's no way to do autosave, you just have to, you know, do Command-S, or just ask Gemini to save it, it's gonna do that, right?

52:41 - 52:42

Harshith Vaddiparthi | Outskill: That's it.

52:42 - 52:43

Harshith Vaddiparthi | Outskill: No.

52:44 - 52:59

Harshith Vaddiparthi | Outskill: Let me quickly do this one more time, because I want all of you to understand this, because that's literally what anti-gravity is, and that's the most important thing that you have to understand. Let me open anti-gravity once again. I'm gonna open the same folder. I'm gonna open the same folder.

52:59 - 53:02

Harshith Vaddiparthi | Outskill: Let me try to open my doc here.

53:05 - 53:08

Harshith Vaddiparthi | Outskill: Yes, I'll try to be a little slow with the tabs, yes.

53:09 - 53:10

Harshith Vaddiparthi | Outskill: Let me open that.

53:12 - 53:13

Harshith Vaddiparthi | Outskill: And?

53:15 - 53:19

Harshith Vaddiparthi | Outskill: One second... Alright?

53:19 - 53:22

Harshith Vaddiparthi | Outskill: Yeah, this is what you would see.

53:22 - 53:29

Harshith Vaddiparthi | Outskill: Right, this is what you would see when you open, you know, anti-gravity. There are two ways to open a folder.

53:29 - 53:33

Harshith Vaddiparthi | Outskill: One is... Click on Open Folder.

53:33 - 53:42

Harshith Vaddiparthi | Outskill: And then go to Desktop, and then open this, and then click on Open. Or just, like, a easy way to do it, or, like, a lazy way to do it, is just...

53:43 - 53:46

Harshith Vaddiparthi | Outskill: Just drag this... Here.

53:47 - 53:49

Harshith Vaddiparthi | Outskill: That is supposed to work.

53:49 - 53:51

Harshith Vaddiparthi | Outskill: I don't know why that's not working.

53:52 - 54:00

Harshith Vaddiparthi | Outskill: That's literally supposed to work. Oh, it's not working because it's open here. My bad. My bad. It was not working because it was, open there.

54:00 - 54:02

Harshith Vaddiparthi | Outskill: But I hope you guys got the twin, right?

54:02 - 54:08

Harshith Vaddiparthi | Outskill: I hope you guys got the tweet. Okay? Let me... let me do that again. Okay, let me create a new folder in this case.

54:08 - 54:18

Harshith Vaddiparthi | Outskill: Let me create a new folder, and let me call this, This... is...

54:18 - 54:22

Harshith Vaddiparthi | Outskill: You guys, you guys definitely are funny, okay? It's a new folder. Now.

54:22 - 54:28

Harshith Vaddiparthi | Outskill: Now, I can just go ahead and click on Open Folder, Desktop, and click on this one.

54:28 - 54:32

Harshith Vaddiparthi | Outskill: or just... Track, and drop it.

54:33 - 54:36

Harshith Vaddiparthi | Outskill: That's it. And just click on Trust Authors.

54:36 - 54:38

Harshith Vaddiparthi | Outskill: That's it. Guys, is this clear?

54:39 - 54:46

Harshith Vaddiparthi | Outskill: Is this clear? How to open a folder inside Anti-gravity, how the folder works, all of this completely clear, right?

54:48 - 54:49

Harshith Vaddiparthi | Outskill: Perfect.

54:50 - 54:51

Harshith Vaddiparthi | Outskill: Perfect.

54:52 - 54:53

Harshith Vaddiparthi | Outskill: Okay.

54:53 - 54:58

Harshith Vaddiparthi | Outskill: Alright, now that this part is clear, let me do the exact same thing

54:58 - 55:12

Harshith Vaddiparthi | Outskill: in the Anti-Gravity 2.0 as well, because you'll just get an understanding of what it is, and I'm going to close off the Anti-Gravity 2.0. You can, you know, go ahead and explore it, you know, you know, when you want to, right? Because it's all the same.

55:12 - 55:21

Harshith Vaddiparthi | Outskill: So let me quickly go to Anti-Gravity 2.0. Once again, just, repeating, this is Anti-Gravity 2.0, and I'm gonna increase the

55:22 - 55:26

Harshith Vaddiparthi | Outskill: a size of this, because I want you guys to, you know, kind of... Take a look at it.

55:27 - 55:29

Harshith Vaddiparthi | Outskill: That's all. Right now, it's open.

55:29 - 55:30

Harshith Vaddiparthi | Outskill: No.

55:31 - 55:35

Harshith Vaddiparthi | Outskill: How do you put in folders Here.

55:35 - 55:39

Harshith Vaddiparthi | Outskill: I hope that folder dropping thing also works. Let's see.

55:40 - 55:41

Harshith Vaddiparthi | Outskill: Let's see.

55:42 - 55:47

Harshith Vaddiparthi | Outskill: Yeah, I think here it doesn't work that well, or maybe... let's click on this, yeah.

55:47 - 55:53

Harshith Vaddiparthi | Outskill: Yeah, that drag and drop is not working that much, but that's still fine. You just have to click on

55:54 - 56:02

Harshith Vaddiparthi | Outskill: Click on the plus icon, click on New Project, and select Let me select 3D prints...

56:03 - 56:06

Harshith Vaddiparthi | Outskill: Yeah, that project is now open.

56:07 - 56:09

Harshith Vaddiparthi | Outskill: And it's just here.

56:09 - 56:17

Harshith Vaddiparthi | Outskill: Right? It's just here. It's... that's basically what it is, guys. It's just, interface thing, that's all. You can, instead of, doing

56:17 - 56:25

Harshith Vaddiparthi | Outskill: this, you can maybe use this. That's basically what the difference is right now, okay?

56:25 - 56:26

Harshith Vaddiparthi | Outskill: That's all.

56:26 - 56:37

Harshith Vaddiparthi | Outskill: You can, of course, create a new chat. Now, the chat is created inside this folder, but the only problem with this is that you can't see what the files inside it are.

56:37 - 56:47

Harshith Vaddiparthi | Outskill: Here, you can clearly see all the files which we're gonna keep building on the left side, but on Anti-Gravity 2.0, you can't actually do it.

56:47 - 56:57

Harshith Vaddiparthi | Outskill: That's the only difference. Totally depends on whatever you're comfortable with, or whatever you're working with. Sometimes, you might not want to see code, sometimes it just depends on you.

56:58 - 57:16

Harshith Vaddiparthi | Outskill: So, is IDE better? Chris, I mean, it depends, right? If you really want to see what each of the files are, then of course IDE is better. Let's say if sometimes you don't want to do that, you just want to, you know, proceed with, hey, you know all the file contents, you just want to work with it, you just do this. That's it.

57:17 - 57:35

Harshith Vaddiparthi | Outskill: No, no, not really. It's not just that this is a lighter version, you can change the version color, you can, you know, customize this, I think appearance should be here. Light mode, dark mode? Where's dark mode? Yeah, that's it. Like, that's it. You can do the same thing, guys, it's all the same thing.

57:36 - 57:54

Harshith Vaddiparthi | Outskill: Okay, why did the Vasim ask? Why did they build 2.0? It depends, Vasim, right? It's... it's a different use case. Like, you know, everyone might have a different use case, so that's basically it. So I think that's the reason we chose to, you know, focus on this tool, because it's just much more clear, and it'll just be able to, you know, understand as well.

57:54 - 57:57

Harshith Vaddiparthi | Outskill: That's basically what we'll be diving into. Now.

57:57 - 58:02

Harshith Vaddiparthi | Outskill: That proportion, I think that's fully clear, right? Now, let me close this off.

58:04 - 58:08

Harshith Vaddiparthi | Outskill: Let me actually open the... first folder.

58:11 - 58:16

Harshith Vaddiparthi | Outskill: Should be somewhere here... Yep.

58:17 - 58:20

Harshith Vaddiparthi | Outskill: Okay, now... Now, sometimes.

58:20 - 58:38

Harshith Vaddiparthi | Outskill: these chatbots, you know, the chatbot or this file might not be open, and once again, guys, please don't be intimidated, it's all just here. Just click on that button, that thing is gonna open up. Click on the chat, which one is the chat? Sometimes they just keep changing. I think, yeah, that is the chat.

58:38 - 58:44

Harshith Vaddiparthi | Outskill: Like, they all look kind of similar, so you'll just get used to it the more you use it, but that's it.

58:44 - 58:45

Harshith Vaddiparthi | Outskill: Okay.

58:46 - 58:52

Harshith Vaddiparthi | Outskill: Okay. Now... Let me just go back to... this part.

58:57 - 58:58

Harshith Vaddiparthi | Outskill: Let me just call this...

59:09 - 59:10

Harshith Vaddiparthi | Outskill: Alright.

59:10 - 59:16

Harshith Vaddiparthi | Outskill: Yeah, that's just for my mental mind map, guys, that we have just understood this, right?

59:16 - 59:17

Harshith Vaddiparthi | Outskill: Let me make that a green.

59:18 - 59:19

Harshith Vaddiparthi | Outskill: No.

59:19 - 59:35

Harshith Vaddiparthi | Outskill: Once again, I want to confirm before we head on to the next part of this, which is something that we'll be, you know, creating something out of it, we'll be using skills, we'll be... I'll be showing you a ton of different things, right? Because this was the foundation, and I wanted you guys to be very, very clear with it.

59:35 - 59:52

Harshith Vaddiparthi | Outskill: So once again, question to all of you, and I'm sorry if I'm asking you guys this a lot of times, but I just want to understand, and I want you all to be on the same page when we proceed to the next one, right? Once again, guys, question to all of you. Are you all clear with Anti-Gravity 2.0

59:52 - 59:58

Harshith Vaddiparthi | Outskill: anti-gravity IDE, and how the folder usage works.

59:59 - [01:00:01]

Harshith Vaddiparthi | Outskill: Okay? Okay.

[01:00:10] - [01:00:20]

Harshith Vaddiparthi | Outskill: Okay, of course, saksham has a question, still wants to know what you can do with it. The powers of these tools. We'll dive into that. That's literally what we're going to do right now.

[01:00:20] - [01:00:21]

Harshith Vaddiparthi | Outskill: Perfect.

[01:00:23] - [01:00:25]

Harshith Vaddiparthi | Outskill: Okay, alright.

[01:00:25] - [01:00:27]

Harshith Vaddiparthi | Outskill: Now that we understood this.

[01:00:28] - [01:00:36]

Harshith Vaddiparthi | Outskill: What I'm gonna first do is, I'm gonna create a folder right now. Let me, let me, you know, delete these temporary folders for now. Let's do something real, okay?

[01:00:37] - [01:00:38]

Harshith Vaddiparthi | Outskill: Let's do something real.

[01:00:39] - [01:00:42]

Harshith Vaddiparthi | Outskill: I'm gonna go ahead and create a new folder.

[01:00:42] - [01:00:44]

Harshith Vaddiparthi | Outskill: And I'm just gonna call it...

[01:00:45] - [01:00:49]

Harshith Vaddiparthi | Outskill: Oh, where's my folder? It's... Right here. Okay.

[01:00:53] - [01:00:58]

Harshith Vaddiparthi | Outskill: Okay, this folder... And I'm just gonna call it... Hardship.

[01:00:59] - [01:01:06]

Harshith Vaddiparthi | Outskill: Hmm... skills, or something, right? Harshith skills, or something. I'm just calling it that, right? Now.

[01:01:06] - [01:01:09]

Harshith Vaddiparthi | Outskill: The reason why I'm mentioning this is because

[01:01:09] - [01:01:13]

Harshith Vaddiparthi | Outskill: I want to tell you the things that are possible with this, right?

[01:01:14] - [01:01:18]

Harshith Vaddiparthi | Outskill: All the things are actually possible with tools like anti-gravity.

[01:01:18] - [01:01:34]

Harshith Vaddiparthi | Outskill: Now, this phase is going to be super important, guys, so please, once again, pay complete attention. You do not have to, you know, be doing it right now. We have a complete workbook session in the breakout rooms. We will be doing it hands-on, but let's try to understand it better. Okay, now...

[01:01:35] - [01:01:39]

Harshith Vaddiparthi | Outskill: The power of these tools, right? What all can you actually do with these tools?

[01:01:39] - [01:01:42]

Harshith Vaddiparthi | Outskill: If I just do this, and I put this here.

[01:01:42] - [01:01:54]

Harshith Vaddiparthi | Outskill: And now, whatever you have seen with Bold or Lovable, I hope you guys remember the session that we did, which was, you know, building an MVP session, right? An MVP session.

[01:01:55] - [01:02:02]

Harshith Vaddiparthi | Outskill: The MVP session, what we've seen, is it was all on the web, it was all on Lovable, and we were building things out of it.

[01:02:03] - [01:02:22]

Harshith Vaddiparthi | Outskill: But what IDE gives you is that it gives you powers and connectors to your existing computer, and you can connect it with various different things, various different tools that would not be possible with something like Lovable or Bold.

[01:02:22] - [01:02:40]

Harshith Vaddiparthi | Outskill: Right? It'll only be possible with something like these, right? Because all the code is definitely local, it's all in your folder. You can go file by file. You can be even more nuanced with whatever you're building, and that's the power that IDE gives you.

[01:02:40] - [01:02:41]

Harshith Vaddiparthi | Outskill: Right? Now...

[01:02:42] - [01:02:51]

Harshith Vaddiparthi | Outskill: And I just want to show you the things that I was able to build with all of this, right? Things that I was able to build. Let me quickly show you a couple of things, right?

[01:02:52] - [01:03:08]

Harshith Vaddiparthi | Outskill: Yeah, of course. The very first thing is my very own website itself. So my website at Harshith.com, right? Guys, the reason I'm showing you this is because I actually, firstly, I'm actually proud of my website. I don't still design, I still have to, you know, work on a little bit.

[01:03:08] - [01:03:17]

Harshith Vaddiparthi | Outskill: But, if I just think about it, 2 years ago, it was not possible for me to build something of my own by myself.

[01:03:17] - [01:03:22]

Harshith Vaddiparthi | Outskill: I had to approach, like, a developer friend. I had to approach, you know, developers who understood IDEs.

[01:03:23] - [01:03:31]

Harshith Vaddiparthi | Outskill: But I couldn't do anything with IDEs because I didn't have the skill. But right now, we all can just do it with

[01:03:32] - [01:03:36]

Harshith Vaddiparthi | Outskill: Agents, you know, with agents inside IDEs. And a couple of more examples,

[01:03:36] - [01:03:55]

Harshith Vaddiparthi | Outskill: something... you can actually build even more complex dashboards, like something like this, right? This is like a real project that I've been working on, and you can build out, like, a big knowledge graph, for my client, right? I took all my client's, you know, documentation, everything, I kind of built everything out, and how to, you know, show all of this.

[01:03:55] - [01:04:05]

Harshith Vaddiparthi | Outskill: These things are not possible with lovable and bold. Of course, you can make really good-looking websites, you can make really good-looking dashboards.

[01:04:06] - [01:04:15]

Harshith Vaddiparthi | Outskill: But if you want to dive deeper into the backend, if you want to make the backend more production-grade, and which is more scalable, or let's say.

[01:04:16] - [01:04:27]

Harshith Vaddiparthi | Outskill: something even like my own newsletter platform, right? I built my very own newsletter platform, right? I write newsletter, and I just wanted, like, a very nice dashboard where I can see everything, everything that's going on, right?

[01:04:27] - [01:04:29]

Harshith Vaddiparthi | Outskill: These things...

[01:04:29] - [01:04:42]

Harshith Vaddiparthi | Outskill: You can try to push it to an extent with Lovable and Bold, but they're gonna eat up your credits, like, lot, right? They're gonna eat up your credits because those tools are built for front-end. They have really, really good design.

[01:04:42] - [01:04:43]

Harshith Vaddiparthi | Outskill: What?

[01:04:43] - [01:04:50]

Harshith Vaddiparthi | Outskill: What they can't do is they cannot do heavy backend that we're gonna do with IDE.

[01:04:50] - [01:04:57]

Harshith Vaddiparthi | Outskill: Is that clear, guys? Is the difference between these tools and why we even, you know, use these tools clear?

[01:04:58] - [01:04:59]

Harshith Vaddiparthi | Outskill: Amazing.

[01:05:00] - [01:05:01]

Harshith Vaddiparthi | Outskill: Okay.

[01:05:04] - [01:05:05]

Harshith Vaddiparthi | Outskill: Perfect, perfect.

[01:05:06] - [01:05:07]

Harshith Vaddiparthi | Outskill: Alright.

[01:05:07] - [01:05:23]

Harshith Vaddiparthi | Outskill: All right. So, okay, yeah. So, Valentino, I would say, if you're still kind of having, you know, a gap between understanding, it's totally okay. I'll try to explain it, and the more we proceed with it, the clearer it'll become. But yes.

[01:05:23] - [01:05:32]

Harshith Vaddiparthi | Outskill: Just to sum it up, what I was saying was simple. Lovable, bold, those tools are built for front-end, right? They're built for front-end.

[01:05:32] - [01:05:43]

Harshith Vaddiparthi | Outskill: But these tools can do a bit more complex tasks with backend, and these tools can build scalable products, right? That's it.

[01:05:43] - [01:05:44]

Harshith Vaddiparthi | Outskill: Okay.

[01:05:44] - [01:05:45]

Harshith Vaddiparthi | Outskill: Now?

[01:05:46] - [01:05:53]

Harshith Vaddiparthi | Outskill: Let's dive into something called as skills, right? I want to dive into something called as skills.

[01:05:54] - [01:06:03]

Harshith Vaddiparthi | Outskill: Guys, first question to all of you. Guys, are you all aware of skills? I think you should all be knowing what skills does, because that's something that we did on the first day itself, right?

[01:06:04] - [01:06:08]

Harshith Vaddiparthi | Outskill: Yes, everyone, everyone knows skills, right? Everyone, okay.

[01:06:08] - [01:06:10]

Harshith Vaddiparthi | Outskill: Skills. Okay.

[01:06:10] - [01:06:18]

Harshith Vaddiparthi | Outskill: Yeah, exactly. SOPs, SOPs, and all of that. Yes, if there are any repeated work, you can just go ahead and, you know, create skins out of this.

[01:06:18] - [01:06:21]

Harshith Vaddiparthi | Outskill: Yeah, yes.

[01:06:22] - [01:06:25]

Harshith Vaddiparthi | Outskill: skills, his recipe, and all of that. Okay.

[01:06:27] - [01:06:30]

Harshith Vaddiparthi | Outskill: Alright, now that you understood skills.

[01:06:30] - [01:06:45]

Harshith Vaddiparthi | Outskill: let's say if I am working... let's say if I want to work here on, let's say if I just want to go ahead and create a... let's start with a very simple one, a very simple design skill, right? A very simple design skill.

[01:06:45] - [01:06:47]

Harshith Vaddiparthi | Outskill: If I want to start working on it.

[01:06:48] - [01:07:00]

Harshith Vaddiparthi | Outskill: The thing with lovable and Bold, you can't really go ahead and do that. Now the difference is gonna start making even... becoming even more clear to you right now, because all you really have to do is just

[01:07:00] - [01:07:08]

Harshith Vaddiparthi | Outskill: Go to this platform, called... Skills... dot... SH.

[01:07:09] - [01:07:13]

Harshith Vaddiparthi | Outskill: Like, skills.SS, let me... Close off everything out for now.

[01:07:13] - [01:07:19]

Harshith Vaddiparthi | Outskill: This is a tool, this is a website, called skills.sh.

[01:07:20] - [01:07:22]

Harshith Vaddiparthi | Outskill: Right? Skills.sh.

[01:07:23] - [01:07:28]

Harshith Vaddiparthi | Outskill: All right? Copied, guys, everyone copied? Have you all understood? The website, skills.sh? Right?

[01:07:30] - [01:07:48]

Harshith Vaddiparthi | Outskill: Okay, perfect. Now, of course, we can build our own skills, and that's what we've done on the very first day as well. If you guys remember, connecting with Gamma, and connecting with Asana, and doing that on ChatGPT, right? Something that we have done. We have, you know, we have created our own skills.

[01:07:48] - [01:07:55]

Harshith Vaddiparthi | Outskill: But because Skills is open source, anyone can go ahead and create skills.

[01:07:55] - [01:08:01]

Harshith Vaddiparthi | Outskill: Now, let's say if you create a skill, you can go ahead and list it on a platform called

[01:08:01] - [01:08:15]

Harshith Vaddiparthi | Outskill: skills.sh. Again, that's why Vercel, a company called Vercel. Guys, connecting back to my session on, Vivek building our MCP. Guys, let me see if I can bring that up.

[01:08:18] - [01:08:19]

Harshith Vaddiparthi | Outskill: Jens, do you remember this?

[01:08:20] - [01:08:22]

Harshith Vaddiparthi | Outskill: Everyone remember this?

[01:08:22] - [01:08:28]

Harshith Vaddiparthi | Outskill: front-end, back-end database. Everyone remembers this, right? That's something that we covered the other day.

[01:08:29] - [01:08:37]

Harshith Vaddiparthi | Outskill: Right? Here, I've mentioned, Next.js, right? Next.js, it's owned by a company called Vercel, remember?

[01:08:37] - [01:08:46]

Harshith Vaddiparthi | Outskill: That exact company has also created, like, their own website, like a marketplace for skills.

[01:08:46] - [01:08:52]

Harshith Vaddiparthi | Outskill: You can see that, you know, that white triangle, that's basically Vercel, right? They have created something like this. Now.

[01:08:52] - [01:08:59]

Harshith Vaddiparthi | Outskill: Let's say I want to go ahead and, install a skill for front-end design.

[01:09:00] - [01:09:02]

Harshith Vaddiparthi | Outskill: Front... End?

[01:09:02] - [01:09:03]

Harshith Vaddiparthi | Outskill: design.

[01:09:05] - [01:09:18]

Harshith Vaddiparthi | Outskill: Okay, Thomas says, I'm not sure what you're referring to, I don't recall seeing this whiteboard before. Okay, so Thomas, that's totally fine. You can watch the recording of the MVP session once again, but that's totally fine.

[01:09:18] - [01:09:22]

Harshith Vaddiparthi | Outskill: What I'm trying to tell you is just this Next.js thing.

[01:09:22] - [01:09:39]

Harshith Vaddiparthi | Outskill: this next.js, that's the code, okay? It's totally okay. It's totally okay. If you guys don't recall this, that's also fine. Please, please don't be bombarded by this. Please, once again, don't be bombarded by this. If you remember, that's fine. If you don't, it's totally fine as well. You can always go back, watch the recording, or try to understand.

[01:09:39] - [01:09:51]

Harshith Vaddiparthi | Outskill: But for now, let's just try to understand. Let's just try to understand this part, which is basically the front-end design, okay? Guys, guys, guys, it's okay, it's okay. If you don't remember.

[01:09:51] - [01:10:05]

Harshith Vaddiparthi | Outskill: Let's move past that. Let's move past that. The MVP, let's move past that. You can watch the recordings. Let's just try to focus. Alright guys, be with me, please, because I don't want you to divert. It's totally okay. I'm gonna repeat it. Okay, guys? Please.

[01:10:06] - [01:10:12]

Harshith Vaddiparthi | Outskill: Toro, Brian, Lauren, guys, with me? Thumbs up in the chat, you guys all with me, right?

[01:10:13] - [01:10:23]

Harshith Vaddiparthi | Outskill: I need a yes in the chat, guys. It's, yeah, it's just like a template, that's all. I'll try to explain everything again. Okay, okay, okay. Someone says FOMO, and also with me. Okay.

[01:10:23] - [01:10:24]

Harshith Vaddiparthi | Outskill: Alright.

[01:10:25] - [01:10:26]

Harshith Vaddiparthi | Outskill: Amazing. Perfect.

[01:10:27] - [01:10:32]

Harshith Vaddiparthi | Outskill: Let's just try to understand... let's just try to understand the skills part now.

[01:10:33] - [01:10:37]

Harshith Vaddiparthi | Outskill: Now that we're in the platform called skills.sh.

[01:10:38] - [01:10:41]

Harshith Vaddiparthi | Outskill: And I want to download some skill.

[01:10:41] - [01:10:55]

Harshith Vaddiparthi | Outskill: That's okay if you fully don't understand skill as well. I'll try to explain it once again. It just becomes way more easier for you as well. Okay, I'll try to explain it again, but for now, just understand what I'm doing, right? Just understand what I'm doing for now.

[01:10:56] - [01:10:57]

Harshith Vaddiparthi | Outskill: Okay.

[01:10:57] - [01:10:58]

Harshith Vaddiparthi | Outskill: Front-end design.

[01:10:58] - [01:11:01]

Harshith Vaddiparthi | Outskill: All I have to do right now is just

[01:11:01] - [01:11:09]

Harshith Vaddiparthi | Outskill: Click on the first one, which says Front-End Design, and of course, you can see one that is used by over

[01:11:09] - [01:11:18]

Harshith Vaddiparthi | Outskill: About a million people, right? Over a million installs. There were over a million installs for this one single skill.

[01:11:18] - [01:11:19]

Harshith Vaddiparthi | Outskill: Right?

[01:11:20] - [01:11:25]

Harshith Vaddiparthi | Outskill: Now, if I want to go ahead and install this on my anti-gravity

[01:11:26] - [01:11:30]

Harshith Vaddiparthi | Outskill: on my folder, which I want to work with, here is how I would proceed.

[01:11:31] - [01:11:34]

Harshith Vaddiparthi | Outskill: All I would do is just... Copy this command.

[01:11:35] - [01:11:35]

Harshith Vaddiparthi | Outskill: Right?

[01:11:36] - [01:11:43]

Harshith Vaddiparthi | Outskill: All we have to do is just copy that command, Go back to our anti-gravity

[01:11:44] - [01:11:46]

Harshith Vaddiparthi | Outskill: Let me zoom this in, yeah?

[01:11:47] - [01:11:48]

Harshith Vaddiparthi | Outskill: Right?

[01:11:48] - [01:11:53]

Harshith Vaddiparthi | Outskill: And just please pay attention on the left side of this as well, what we're doing, right?

[01:11:54] - [01:11:58]

Harshith Vaddiparthi | Outskill: Just paste that link in the chat.

[01:11:58] - [01:12:04]

Harshith Vaddiparthi | Outskill: And all I'm gonna say is, Can you run this

[01:12:05] - [01:12:10]

Harshith Vaddiparthi | Outskill: skill? Or can you just install? Can you... install.

[01:12:10] - [01:12:12]

Harshith Vaddiparthi | Outskill: this skill.

[01:12:12] - [01:12:17]

Harshith Vaddiparthi | Outskill: Yes, Subankar, yeah, works with Anti-Gravity 2.0, everything. Yeah.

[01:12:17] - [01:12:21]

Harshith Vaddiparthi | Outskill: If we just say, Install this.

[01:12:22] - [01:12:39]

Harshith Vaddiparthi | Outskill: Now, the agent is just trying to, you know, look into that, and it's just basically gonna run that skill for us, or install that skill for us. So just give that a second. Alright, now it's asking us, allow running the command.

[01:12:39] - [01:12:43]

Harshith Vaddiparthi | Outskill: For this one, I'm just gonna say, yes, allow this time.

[01:12:44] - [01:12:45]

Harshith Vaddiparthi | Outskill: and submit it.

[01:12:47] - [01:12:52]

Harshith Vaddiparthi | Outskill: And it's working, right? It's installing the folder, it's installing it.

[01:12:55] - [01:13:01]

Harshith Vaddiparthi | Outskill: So now what it's doing is it's installing, this... this particular skill right now.

[01:13:02] - [01:13:03]

Harshith Vaddiparthi | Outskill: Right, so let's give it a second.

[01:13:04] - [01:13:09]

Harshith Vaddiparthi | Outskill: Okay, I've started the installation, still in the background, I'll let you know as I've completed.

[01:13:11] - [01:13:18]

Harshith Vaddiparthi | Outskill: Okay, it's checking... Waiting for the command... Alright, once again.

[01:13:18] - [01:13:24]

Harshith Vaddiparthi | Outskill: Now, you also have a button that says, approve, so I can just go ahead and accept it.

[01:13:25] - [01:13:27]

Harshith Vaddiparthi | Outskill: Right? So let me just go ahead and accept it.

[01:13:27] - [01:13:30]

Harshith Vaddiparthi | Outskill: Again, you can see the difference off the bat.

[01:13:30] - [01:13:34]

Harshith Vaddiparthi | Outskill: Guys, boom. Do you see that on the, on the left side?

[01:13:34] - [01:13:35]

Harshith Vaddiparthi | Outskill: Guys, do you see this?

[01:13:37] - [01:13:38]

Harshith Vaddiparthi | Outskill: Let me zoom in a little bit more.

[01:13:39] - [01:13:45]

Harshith Vaddiparthi | Outskill: Slightly... I think that's a little too much, yeah. Guys, do you see this? Everyone see... everyone can see that, right?

[01:13:46] - [01:13:51]

Harshith Vaddiparthi | Outskill: If I open that, That is literally the skill itself.

[01:13:51] - [01:14:03]

Harshith Vaddiparthi | Outskill: Skill name, front-end design, description, guidance for distinctive, intentional visual design when building new UI or reshaping an existing one.

[01:14:03] - [01:14:04]

Harshith Vaddiparthi | Outskill: Right?

[01:14:04] - [01:14:08]

Harshith Vaddiparthi | Outskill: So that is how you go ahead and install a skill.

[01:14:08] - [01:14:12]

Harshith Vaddiparthi | Outskill: in your folder, right, in your codebase.

[01:14:12] - [01:14:15]

Harshith Vaddiparthi | Outskill: Now, if you think about it, this thing...

[01:14:15] - [01:14:34]

Harshith Vaddiparthi | Outskill: It's very difficult to do with lovable, because firstly, it's gonna eat up a lot of your tokens. The second part is, you can't really, you know, play around. You don't have so much of flexibility with what you can do. With IDE, I can see it, it's literally sitting here. If I don't like it.

[01:14:34] - [01:14:39]

Harshith Vaddiparthi | Outskill: I can just say, or I can just go ahead and type it. If I don't like this, I can...

[01:14:40] - [01:14:41]

Harshith Vaddiparthi | Outskill: Delete it.

[01:14:41] - [01:14:50]

Harshith Vaddiparthi | Outskill: Right? I can type whatever I want, I can add in whatever I want, right? That's basically what we are doing right now.

[01:14:50] - [01:15:01]

Harshith Vaddiparthi | Outskill: Right? Again, guys, don't focus on these NPX and all that. I'll get to that. I'll get to that. But right now, just try to understand what I have just done.

[01:15:02] - [01:15:03]

Harshith Vaddiparthi | Outskill: Right?

[01:15:04] - [01:15:05]

Harshith Vaddiparthi | Outskill: Okay.

[01:15:09] - [01:15:16]

Harshith Vaddiparthi | Outskill: Okay, I do see a couple of questions, coming in, but let me try to... let me try to, make it a little bit more clear.

[01:15:17] - [01:15:22]

Harshith Vaddiparthi | Outskill: Okay. Firstly, Guys, I want to understand, right, I just want to know from all of you.

[01:15:22] - [01:15:27]

Harshith Vaddiparthi | Outskill: Do you all understand how to go ahead and install a skill right now?

[01:15:27] - [01:15:38]

Harshith Vaddiparthi | Outskill: How to install a skill? If I give you skill.sh, can you now go ahead and find the skill that you like, and install that skill by yourself?

[01:15:39] - [01:15:40]

Harshith Vaddiparthi | Outskill: Perfect.

[01:15:40] - [01:15:41]

Harshith Vaddiparthi | Outskill: Perfect.

[01:15:41] - [01:15:59]

Harshith Vaddiparthi | Outskill: Right? Now you can, you know, go ahead and install a skill. Alright, now you like the front-end design. Let's say I also want to go ahead and install, let's say something with... something with... let's actually go... let's go ahead and explore on the platform, right? Let's explore on the platform.

[01:15:59] - [01:16:04]

Harshith Vaddiparthi | Outskill: skills.sh. Let's see some of these, you know, skills that a lot of people have been using.

[01:16:04] - [01:16:08]

Harshith Vaddiparthi | Outskill: Okay, there is, let's just see.

[01:16:09] - [01:16:28]

Harshith Vaddiparthi | Outskill: Hmm, okay, we've got front-end. Let's see something that's trending right now. Okay, that's cool. There's something called as AI image generation. If I also want to go ahead and add the skill inside my own folder, I can do that as well. Or let's say, I think this is an even better example.

[01:16:28] - [01:16:31]

Harshith Vaddiparthi | Outskill: Let's see how to design mobile apps.

[01:16:31] - [01:16:34]

Harshith Vaddiparthi | Outskill: The front-end part inside anti-gravity is good.

[01:16:34] - [01:16:43]

Harshith Vaddiparthi | Outskill: But let's say I don't want to do websites, I want to go to mobile applications. So there is a skill which you can see.

[01:16:43] - [01:16:47]

Harshith Vaddiparthi | Outskill: Built for designing mobile applications, right?

[01:16:48] - [01:17:01]

Harshith Vaddiparthi | Outskill: Now, I want you guys to start connecting the dots, guys. The reason I'm saying this is because as a non-coder, I might really not know how to proceed with mobile app creation.

[01:17:01] - [01:17:18]

Harshith Vaddiparthi | Outskill: But someone has put out a skill that anyone can just go ahead and download in their IDE, just run it, and then use it, and build amazing mobile applications, right? So that's the whole point I'm trying to tell again, guys.

[01:17:18] - [01:17:27]

Harshith Vaddiparthi | Outskill: Guys, please do not focus on, hey, what skill, how to use... not about all of that, right? Just... just try to understand my approach.

[01:17:27] - [01:17:32]

Harshith Vaddiparthi | Outskill: Even as a non-coder, if you can think that, hey.

[01:17:32] - [01:17:38]

Harshith Vaddiparthi | Outskill: I want to create a iOS application. I want to create an iPhone app, right? An iOS app.

[01:17:38] - [01:17:40]

Harshith Vaddiparthi | Outskill: But I don't know how to.

[01:17:40] - [01:17:52]

Harshith Vaddiparthi | Outskill: then you go to skills.seh, you find out an iOS skill, you know, iOS app creation skill, install that, and start working with it.

[01:17:52] - [01:18:01]

Harshith Vaddiparthi | Outskill: That's it. And yes, Nithal, again, very good question, Nithal. Can you edit skills? You can! That's the flexibility that you get.

[01:18:01] - [01:18:10]

Harshith Vaddiparthi | Outskill: you're completely, you know, it's all... guys, it's... you can do whatever you want, that's... that's basically the gist of it, right? You can do whatever you want.

[01:18:10] - [01:18:13]

Harshith Vaddiparthi | Outskill: So now, for example, let's also...

[01:18:13] - [01:18:20]

Harshith Vaddiparthi | Outskill: Let's test it out. I wanna just say, design mobile apps. Amazing. I just wanna go and say.

[01:18:21] - [01:18:25]

Harshith Vaddiparthi | Outskill: Copy the command, Go back to anti-gravity.

[01:18:25] - [01:18:30]

Harshith Vaddiparthi | Outskill: paste the command, and I can just say, Can you?

[01:18:32] - [01:18:37]

Harshith Vaddiparthi | Outskill: Go ahead and install this as well.

[01:18:40] - [01:18:49]

Harshith Vaddiparthi | Outskill: Okay, I think Praveen... Praveen Poojari says, basically, we're getting a ready-made template and use it as for requirements. Exactly. That is correct, Praveen.

[01:18:50] - [01:18:51]

Harshith Vaddiparthi | Outskill: No.

[01:18:51] - [01:18:53]

Harshith Vaddiparthi | Outskill: Again, you just go ahead and...

[01:18:54] - [01:18:58]

Harshith Vaddiparthi | Outskill: Submit it, you allow it for a second, And that is gonna work.

[01:18:59] - [01:19:03]

Harshith Vaddiparthi | Outskill: And guys, think about it, right? Whatever these commands that I'm telling you.

[01:19:03] - [01:19:16]

Harshith Vaddiparthi | Outskill: developers and coders, they used to run these commands in something called as a terminal, which I kinda hate. And I'm gonna show you terminal, you're gonna be like, hey, what is this terminal? Let's go back to anti-gravity.

[01:19:16] - [01:19:23]

Harshith Vaddiparthi | Outskill: Okay? Now... Now, it says the fold... guys, do you see the exact folder file as well?

[01:19:24] - [01:19:32]

Harshith Vaddiparthi | Outskill: It says desktop, Harshith Skills, under Agents folder, inside skills.

[01:19:32] - [01:19:36]

Harshith Vaddiparthi | Outskill: And there's one called Design Mobile Apps. Let's open that.

[01:19:37] - [01:19:44]

Harshith Vaddiparthi | Outskill: Let's... if you just drag down, it's basically the tree, right? You're just going deeper and deeper the more you open this.

[01:19:44] - [01:19:54]

Harshith Vaddiparthi | Outskill: Right? Before, it was just my folder. Now, you can open my folder, you can open the folder inside it, and now Design Mobile Apps has been installed.

[01:19:54] - [01:19:58]

Harshith Vaddiparthi | Outskill: You can open that again, And now you can see

[01:19:58] - [01:20:11]

Harshith Vaddiparthi | Outskill: the entire skill, right? The entire skill to create a real, working, production-grade mobile application is right here.

[01:20:11] - [01:20:12]

Harshith Vaddiparthi | Outskill: Right?

[01:20:12] - [01:20:23]

Harshith Vaddiparthi | Outskill: That is the possibility of all of these guys. You don't really have to, you know, it's not necessary that you might have to know something, but you can just install a skill and get that running.

[01:20:23] - [01:20:23]

Harshith Vaddiparthi | Outskill: Right?

[01:20:25] - [01:20:29]

Harshith Vaddiparthi | Outskill: And yes, let me just go back to my desktop.

[01:20:29] - [01:20:32]

Harshith Vaddiparthi | Outskill: My folder is right here. Let me open it.

[01:20:33] - [01:20:36]

Harshith Vaddiparthi | Outskill: Right, let me just, where was that? Arshad Schools.

[01:20:37] - [01:20:40]

Harshith Vaddiparthi | Outskill: Let me just do... Yeah, now, now you can see.

[01:20:40] - [01:20:41]

Harshith Vaddiparthi | Outskill: Agents?

[01:20:42] - [01:20:43]

Harshith Vaddiparthi | Outskill: Skills?

[01:20:44] - [01:20:48]

Harshith Vaddiparthi | Outskill: There's design, there's front-end, and a lot of this as well.

[01:20:48] - [01:20:50]

Harshith Vaddiparthi | Outskill: Okay? Now...

[01:20:51] - [01:21:05]

Harshith Vaddiparthi | Outskill: Now that you understood this, let me show this to you with a very real example, and try to connect it with everything that I have been kind of showing you right now, right? Let me quickly open my...

[01:21:06] - [01:21:11]

Harshith Vaddiparthi | Outskill: other tab, okay. Right?

[01:21:11] - [01:21:14]

Harshith Vaddiparthi | Outskill: Let me quickly open my other tab.

[01:21:16] - [01:21:22]

Harshith Vaddiparthi | Outskill: Just give me a second, give me a second... Yeah, just a second, guys.

[01:21:28] - [01:21:41]

Harshith Vaddiparthi | Outskill: Okay, now, I'm gonna show this to you with a very, very real example. I don't know how it's gonna work out, you guys tell me if you like the idea or not, but I'm just being very, very transparent with you, right, on how I have done this.

[01:21:41] - [01:21:48]

Harshith Vaddiparthi | Outskill: just... I've just used, you know, a different tool. Of course, I've just used ChatGPT, which is the exact same thing.

[01:21:48] - [01:21:52]

Harshith Vaddiparthi | Outskill: But here, as you guys know, guys, I can't code myself

[01:21:52] - [01:22:02]

Harshith Vaddiparthi | Outskill: And I just went ahead, and I wanted to print something. So I installed a skill for 3D design, guys. I installed a skill for 3D design.

[01:22:02] - [01:22:12]

Harshith Vaddiparthi | Outskill: And literally designed this, you know, designed the mouse shell for this, and that's literally what is being printed out right now.

[01:22:12] - [01:22:14]

Harshith Vaddiparthi | Outskill: Right? Guys, do you see that?

[01:22:15] - [01:22:22]

Harshith Vaddiparthi | Outskill: Thanks, I have no clue about how to go ahead and design anything. All that I did was

[01:22:22] - [01:22:25]

Harshith Vaddiparthi | Outskill: Just go to skills.sh, Right?

[01:22:26] - [01:22:28]

Harshith Vaddiparthi | Outskill: and download Blender.

[01:22:30] - [01:22:31]

Harshith Vaddiparthi | Outskill: Blender.

[01:22:31] - [01:22:32]

Harshith Vaddiparthi | Outskill: 3D.

[01:22:32] - [01:22:35]

Harshith Vaddiparthi | Outskill: That's something called S3D.

[01:22:37] - [01:22:41]

Harshith Vaddiparthi | Outskill: 3D... I think there's something I installed. I'll try to show that.

[01:22:44] - [01:22:45]

Harshith Vaddiparthi | Outskill: Let me see.

[01:22:47] - [01:22:54]

Harshith Vaddiparthi | Outskill: Yeah, this is one. Guys, guys, do you see that? Guys, do you see this? 3D modeling for anti-gravity.

[01:22:54] - [01:22:55]

Harshith Vaddiparthi | Outskill: Ghost.

[01:22:55] - [01:23:10]

Harshith Vaddiparthi | Outskill: Now, give me a boom in the chat if you understand all the possibilities of these anti... you know, of anti-gravity and the skills. You don't have to know, you just have to figure out what you want to do, and ask anti-gravity, that's it.

[01:23:11] - [01:23:22]

Harshith Vaddiparthi | Outskill: This is the skill that I've literally used to go ahead and, you know, search it, right? And how do you... that's a good question again, Helen. How do you know which skill to use?

[01:23:22] - [01:23:29]

Harshith Vaddiparthi | Outskill: Honestly, it is mostly on the popularity, and it's also on the research part, which I'll be diving into in a second.

[01:23:30] - [01:23:38]

Harshith Vaddiparthi | Outskill: Okay, okay, Debisiss has an even better pointer. Debis asks, can you combine skills Why not?

[01:23:39] - [01:23:54]

Harshith Vaddiparthi | Outskill: Guys, you can do whatever you want to. Oh, you've seen my LinkedIn? Yes, on my LinkedIn, I've posted about that. I called that Dwi, and it's all integrated. Exactly, right? So, that is the power of all these skills, guys. Now.

[01:23:55] - [01:23:58]

Harshith Vaddiparthi | Outskill: Alright, now, question to all of you once again.

[01:23:58] - [01:24:00]

Harshith Vaddiparthi | Outskill: I mean...

[01:24:02] - [01:24:14]

Harshith Vaddiparthi | Outskill: Yeah, question to all of you. You all understand this, right? That skills will be living inside your folder, and it'll all be shown here. Clear with that, right? Yes in the chat, guys? Clear with this?

[01:24:14] - [01:24:17]

Harshith Vaddiparthi | Outskill: Clear, clear, clear? Amazing. Okay.

[01:24:17] - [01:24:23]

Harshith Vaddiparthi | Outskill: Now, we got a lot of questions about the skill. Hey, What if the skill

[01:24:23] - [01:24:26]

Harshith Vaddiparthi | Outskill: You know, can you combine skills?

[01:24:27] - [01:24:30]

Harshith Vaddiparthi | Outskill: How do we know which skill to use?

[01:24:30] - [01:24:35]

Harshith Vaddiparthi | Outskill: And guys, the most important question I haven't seen a lot of you point out.

[01:24:36] - [01:24:38]

Harshith Vaddiparthi | Outskill: Anything? Any idea what I'm getting to, guys?

[01:24:39] - [01:24:44]

Harshith Vaddiparthi | Outskill: Again, I'm gonna, I'm gonna show, I'm gonna tell it, and you guys tell me if I have missed something.

[01:24:44] - [01:24:52]

Harshith Vaddiparthi | Outskill: All I'm doing is, hey, okay, I need a 3D skill, okay, 3D... 3D skill...

[01:24:52] - [01:24:59]

Harshith Vaddiparthi | Outskill: Still okay, and then... let's see, hmm, yeah, let's go ahead, download it, boom, install it.

[01:24:59] - [01:25:02]

Harshith Vaddiparthi | Outskill: Guys, anything that I have missed?

[01:25:07] - [01:25:08]

Harshith Vaddiparthi | Outskill: Exactly. Who was that?

[01:25:09] - [01:25:11]

Harshith Vaddiparthi | Outskill: I think Lalita says it correct.

[01:25:12] - [01:25:13]

Harshith Vaddiparthi | Outskill: Safety.

[01:25:13] - [01:25:21]

Harshith Vaddiparthi | Outskill: How do I know If the skill that I'm installing from the internet is even safe.

[01:25:21] - [01:25:26]

Harshith Vaddiparthi | Outskill: What if... The folder inside this might say Front-end design.

[01:25:27] - [01:25:32]

Harshith Vaddiparthi | Outskill: But the skill.empty file inside it might say, Paige.

[01:25:32] - [01:25:36]

Harshith Vaddiparthi | Outskill: Identify the chrome of the user.

[01:25:36] - [01:25:51]

Harshith Vaddiparthi | Outskill: open the Chrome. Yeah, exactly, Lauren, exactly, Lauren. I saw you ask that. I kind of ignored it to, you know, to build this up, but yes, I saw you ask that, Lauren, about security, right? Exactly, Brian is correct. Prompt injections, security checks.

[01:25:51] - [01:25:55]

Harshith Vaddiparthi | Outskill: What if there's a prompt being injected in this which says, hey.

[01:25:55] - [01:26:15]

Harshith Vaddiparthi | Outskill: open Chrome, open the Chrome passwords, send out all the passwords to so-and-so, right? So, there are a ton of these security checks also you have to keep in mind, right? So, I'm gonna show you about security as well, how to make sure your skills are safe.

[01:26:15] - [01:26:16]

Harshith Vaddiparthi | Outskill: An!

[01:26:16] - [01:26:19]

Harshith Vaddiparthi | Outskill: I'm gonna show you a skill

[01:26:19] - [01:26:26]

Harshith Vaddiparthi | Outskill: that can do this as well, right? Guys, there's a skill to do security check for skills.

[01:26:26] - [01:26:28]

Harshith Vaddiparthi | Outskill: It can't get more meta than that.

[01:26:28] - [01:26:29]

Harshith Vaddiparthi | Outskill: Right?

[01:26:30] - [01:26:34]

Harshith Vaddiparthi | Outskill: That's basically the power of all of this, right? Now.

[01:26:35] - [01:26:40]

Harshith Vaddiparthi | Outskill: Let me just go ahead and do the same. This time, I will be installing a skill.

[01:26:40] - [01:26:49]

Harshith Vaddiparthi | Outskill: But I'll be doing a very simple kind of a verification. I'm not gonna... I'm not gonna use the skill yet. I'm just... I'll just ask it here, right? So now just... just see what I'm gonna do.

[01:26:50] - [01:26:55]

Harshith Vaddiparthi | Outskill: I'm just gonna say, hey, let's... where's the 3D... 3D modeling?

[01:27:00] - [01:27:06]

Harshith Vaddiparthi | Outskill: Yeah, that was the one in anti-gravity. And now, I'm just gonna go ahead and copy this.

[01:27:07] - [01:27:14]

Harshith Vaddiparthi | Outskill: And this is what is recommended. You can just go ahead and copy and paste it in the chat, the command for the skill.

[01:27:15] - [01:27:16]

Harshith Vaddiparthi | Outskill: You can just ask it.

[01:27:18] - [01:27:34]

Harshith Vaddiparthi | Outskill: hey, can you go ahead and look into this skill, and can you make sure that this is completely safe to use and safe to run the skill? Please point out if there are any security flaws in this skill.

[01:27:40] - [01:27:46]

Harshith Vaddiparthi | Outskill: Okay? Very simple prompt, which I just, you know, freestyled it, I just, you know, put it there. And let me enter that.

[01:27:48] - [01:27:49]

Harshith Vaddiparthi | Outskill: Okay.

[01:27:57] - [01:27:59]

Harshith Vaddiparthi | Outskill: Yeah, it's working. Taking a second.

[01:28:00] - [01:28:17]

Harshith Vaddiparthi | Outskill: Alright, now it says, allow running this command. Yes, let's go ahead and click on this. Okay, now what it's doing is, it's kind of cloning this, this codebase, and it's gonna fully look into it, right? So you can just enter that.

[01:28:17] - [01:28:25]

Harshith Vaddiparthi | Outskill: If you also... if you don't want to clone that as well, it's totally up to you, but I just want to show you how this part works, so I'm just letting that be.

[01:28:27] - [01:28:27]

Harshith Vaddiparthi | Outskill: Alright.

[01:28:27] - [01:28:39]

Harshith Vaddiparthi | Outskill: Okay, I'm currently downloading the repository to secure a scratch environment so I can review the contents of any potential security flaws. I'll get back to you shortly once

[01:28:39] - [01:28:49]

Harshith Vaddiparthi | Outskill: I had a chance to inspect 3D modeling skill, and this is what I did, you know, before running that as well, right? Because I don't want, like, you know, any weird prints being printed out on my

[01:28:49] - [01:29:00]

Harshith Vaddiparthi | Outskill: you know, my filament being wasted, right? It's very important to do this, because you don't know... there might be prompt injection, and let me... let me also tell you a very real example, and a very, very real thing that actually happened was

[01:29:00] - [01:29:05]

Harshith Vaddiparthi | Outskill: So I was basically in crypto, right? So I had a friend from crypto.

[01:29:05] - [01:29:12]

Harshith Vaddiparthi | Outskill: who downloaded, like, a crypto trading skill, right? He downloaded a crypto trading skill. You know what that skill did, guys?

[01:29:13] - [01:29:17]

Harshith Vaddiparthi | Outskill: That skill had a prompt injection, which literally just said.

[01:29:17] - [01:29:32]

Harshith Vaddiparthi | Outskill: send all the crypto from this wallet to a different wallet, and boom, it sent it, because the LLMs were kind of dumb back then. Of course, now, the large language models have become way more powerful, they're way more secure with all these secure guardrails and everything.

[01:29:32] - [01:29:36]

Harshith Vaddiparthi | Outskill: And, Neetika, when I say prompt injection.

[01:29:36] - [01:29:53]

Harshith Vaddiparthi | Outskill: Prompt injection is nothing but forcefully injecting a prompt in a malicious way, to do something that the end user doesn't really want to do, or which is, you know, which is not what is being intended, right? That's basically what it is.

[01:29:53] - [01:29:54]

Harshith Vaddiparthi | Outskill: Now...

[01:29:54] - [01:30:06]

Harshith Vaddiparthi | Outskill: It says, okay, I've reviewed the 3D modeling skill, by first cloning the repository locally. I can confirm this is completely safe to use and run. It does not contain any executable code.

[01:30:06] - [01:30:10]

Harshith Vaddiparthi | Outskill: Do you see that, Neetika and Chris? Guys, do you see this, guys?

[01:30:10] - [01:30:13]

Harshith Vaddiparthi | Outskill: Executable code. What does that mean?

[01:30:13] - [01:30:26]

Harshith Vaddiparthi | Outskill: you might be downloading a front-end design skill, but your code, no, not that, Raviraj, not that. Executable skills literally just means

[01:30:26] - [01:30:39]

Harshith Vaddiparthi | Outskill: a command. The way we are running commands to run skills, they might just have some kind of a command to, you know, open the Chrome, or open WhatsApp, or open something sensitive, right? Open, like, you know,

[01:30:39] - [01:30:57]

Harshith Vaddiparthi | Outskill: like, passwords or something, right? There could be commands which do that. So this is what anti-gravity just did. And this is a very simple way to do it. You can just ask your LLM, you can ask your anti-gravity if, hey, is this safe to use? It's gonna look into it, and it's gonna tell you if it's safe to use or not.

[01:30:58] - [01:31:09]

Harshith Vaddiparthi | Outskill: Right? And that's what it did. Since it's secure, I went ahead and installed it for you as well. You can find it as at so-and-so, which is literally right

[01:31:10] - [01:31:11]

Harshith Vaddiparthi | Outskill: Kyu.

[01:31:11] - [01:31:17]

Harshith Vaddiparthi | Outskill: Right? So there are more references as well. And now, you can see more complex skills.

[01:31:17] - [01:31:23]

Harshith Vaddiparthi | Outskill: Let's... let's try to pay attention for this one, guys. The security part, and also, I think, something that just came up, which is really good.

[01:31:23] - [01:31:27]

Harshith Vaddiparthi | Outskill: Now... If you see... let me zoom in for this one. Let me zoom in, let me...

[01:31:28] - [01:31:32]

Harshith Vaddiparthi | Outskill: Kind of, you know, cancel this out, it's kind of distracting. Yeah, let's keep it clean.

[01:31:33] - [01:31:39]

Harshith Vaddiparthi | Outskill: What did I just do? Okay, I think I opened the entire thing in a different guy, just a second, just a second...

[01:31:40] - [01:31:42]

Harshith Vaddiparthi | Outskill: I dragged this way too much.

[01:31:47] - [01:31:48]

Harshith Vaddiparthi | Outskill: Let's get back.

[01:31:51] - [01:31:51]

Harshith Vaddiparthi | Outskill: Yeah.

[01:31:52] - [01:31:56]

Harshith Vaddiparthi | Outskill: Let's just look into this part once again.

[01:31:56] - [01:32:00]

Harshith Vaddiparthi | Outskill: Okay? Now... Now, we would talk, okay?

[01:32:00] - [01:32:08]

Harshith Vaddiparthi | Outskill: Now, the front-end design skill that we've installed was a very simple skill.md file, and this is the file which we all know.

[01:32:12] - [01:32:19]

Harshith Vaddiparthi | Outskill: Yeah, which we all know how it looks like. It's basically a big, large prompt that we're giving you feed into the AI.

[01:32:19] - [01:32:27]

Harshith Vaddiparthi | Outskill: Design skill also has something similar, it's just one simple file, which is what we have been doing until now.

[01:32:27] - [01:32:38]

Harshith Vaddiparthi | Outskill: But skills.md is more complex. Skills.md, if I open that, the 3D modeling skill not only has the skill.md file.

[01:32:39] - [01:32:45]

Harshith Vaddiparthi | Outskill: It also references to another folder inside it which says.

[01:32:46] - [01:33:01]

Harshith Vaddiparthi | Outskill: patterns, edges, right? Sharp edges, or, like, validation, right? The skill itself is not a skill. The skill is also referring to other SOPs of sorts to give you the best possible output.

[01:33:02] - [01:33:04]

Harshith Vaddiparthi | Outskill: Right? That is what

[01:33:04] - [01:33:19]

Harshith Vaddiparthi | Outskill: you know, these complex skills are, and it's very, very powerful when we are doing a real-world use case, right? It could be in marketing, analytics, sales, or even coding by itself, right? A lot of things that you can do here.

[01:33:19] - [01:33:20]

Harshith Vaddiparthi | Outskill: No.

[01:33:21] - [01:33:39]

Harshith Vaddiparthi | Outskill: In terms of, you know, coming back to the security part, we've understood how to just go ahead and ask, you know, we can just go ahead and ask, hey, is this skill secure? Can I go ahead and install it? And it did a very quick security check, and it was able to install it. That's a very simple layer of doing it.

[01:33:39] - [01:33:53]

Harshith Vaddiparthi | Outskill: But now, I want to introduce you to a very powerful and open-source, production-grade, enterprise-grade skill itself that a lot of people use to secure their skills, right? And let me show that to you.

[01:33:54] - [01:33:56]

Harshith Vaddiparthi | Outskill: Remove this for a second.

[01:33:58] - [01:33:59]

Harshith Vaddiparthi | Outskill: Yup.

[01:33:59] - [01:34:01]

Harshith Vaddiparthi | Outskill: I want to show you something called as...

[01:34:08] - [01:34:09]

Harshith Vaddiparthi | Outskill: Yes.

[01:34:09] - [01:34:10]

Harshith Vaddiparthi | Outskill: This is the file.

[01:34:11] - [01:34:14]

Harshith Vaddiparthi | Outskill: This is the skill, which is by Cloudflare, by the way, right?

[01:34:15] - [01:34:17]

Harshith Vaddiparthi | Outskill: Cloudflare has put out a skill

[01:34:17] - [01:34:26]

Harshith Vaddiparthi | Outskill: which is called Security Audit Skill. And the skill inside it has a lot of these folders.

[01:34:26] - [01:34:40]

Harshith Vaddiparthi | Outskill: which have been constantly being updated, just like 2 weeks ago, right? Do you see that? These are all being updated, right? There's so many security protocols, security, look at that, web protocol, validation, supply chain.

[01:34:40] - [01:34:50]

Harshith Vaddiparthi | Outskill: Right? Everything, everything, a lot of things right here inside this, and it's an industry, like, it's like an industry, the best skill which you can use.

[01:34:51] - [01:34:57]

Harshith Vaddiparthi | Outskill: Right? You can... all you have to do is now, just... Copy that link again.

[01:34:58] - [01:35:04]

Harshith Vaddiparthi | Outskill: Copy that link, Go back to anti-gravity, And you can just say.

[01:35:07] - [01:35:10]

Harshith Vaddiparthi | Outskill: Now, can you go ahead and install this skill

[01:35:10] - [01:35:27]

Harshith Vaddiparthi | Outskill: And I also want to make sure that every time I ask you to install a skill, you make sure to refer to this entire Cloudflare security audit skill, do a complete security audit, and give it to me.

[01:35:28] - [01:35:32]

Harshith Vaddiparthi | Outskill: Only when I approve it, you have to proceed with the skill installation.

[01:35:37] - [01:35:39]

Harshith Vaddiparthi | Outskill: Okay, let me just do that.

[01:35:40] - [01:35:59]

Harshith Vaddiparthi | Outskill: And now it's installing. Now, it's a little more advanced than what we have just done before. Before, we just asked, you know, Jim and I to, hey, look into the file, look into it, is that properly working? That's literally what we just said. But now, we have installed Cloudflare security audit skill to do the complete auditing for us.

[01:35:59] - [01:36:01]

Harshith Vaddiparthi | Outskill: Let's go ahead and check it.

[01:36:02] - [01:36:08]

Harshith Vaddiparthi | Outskill: I got full-free request to perform security audit. Okay, that's... it's weird that, you know, 3.1 says that.

[01:36:08] - [01:36:21]

Harshith Vaddiparthi | Outskill: 3.1, I'm using a slightly more dumber model. Dumber models do tend to act this way, right? If this happens, you have to also know how to mitigate it, or how to, you know.

[01:36:21] - [01:36:31]

Harshith Vaddiparthi | Outskill: navigate and kind of maneuver your sessions with AI. If, you know, sometimes if this happens, what I usually do is just copy it, and just create a new chat.

[01:36:31] - [01:36:41]

Harshith Vaddiparthi | Outskill: pays the exact same thing, and in this case, let me try using Claude Sonnet 4.6 instead of Gemini. Let's see how... let's see the results that we get.

[01:36:45] - [01:36:49]

Harshith Vaddiparthi | Outskill: Okay, as you can see, GitHub, yes, allow.

[01:36:50] - [01:36:54]

Harshith Vaddiparthi | Outskill: Now, you can see that as well, right? Guys, can you do this in Lubbable?

[01:36:54] - [01:37:10]

Harshith Vaddiparthi | Outskill: Can you go ahead and select... can you switch between models in Lovable? You really can't, right? You can't switch between models. Like, Lovable has its own model, right? We don't know what model they're using underneath, but now I can do it the way I want to. Firstly, I'm also saving a ton of tokens, right?

[01:37:10] - [01:37:17]

Harshith Vaddiparthi | Outskill: I don't always want to use the best model for all of my simple tasks, right?

[01:37:17] - [01:37:25]

Harshith Vaddiparthi | Outskill: So, I just wanted to use normal tokens. So, in this case, I wanted to think I'm using a better model, so it's gonna do all that for me.

[01:37:32] - [01:37:43]

Harshith Vaddiparthi | Outskill: Okay, how do you get it from GitHub? It's just a link. It's just a link. I'll also show you how to connect your GitHub as well. I'll show you that, but for now, let's try to kind of, you know, understand how it's doing this.

[01:37:46] - [01:37:57]

Harshith Vaddiparthi | Outskill: No, no, no. Sanjeev, okay, Sanjeev has a question. Sanjeev says, now this is running locally, so there might not be any tokens. Not really, Sanjeev.

[01:37:57] - [01:38:03]

Harshith Vaddiparthi | Outskill: So, right now, anti-gravity as an application is running locally on my computer.

[01:38:03] - [01:38:06]

Harshith Vaddiparthi | Outskill: But the models are not running on my computer.

[01:38:06] - [01:38:16]

Harshith Vaddiparthi | Outskill: it's not possible to run these models on my computer, because I'm just using a MacBook, you know, M3 Pro, and with an 18GB RAM,

[01:38:16] - [01:38:29]

Harshith Vaddiparthi | Outskill: to install, you know, Anthropic 4.6, that needs, like, a very large setup, right? So that's not running locally. You still can, though. You still can if you... that's something that you're looking for, you can run locally as well.

[01:38:31] - [01:38:33]

Harshith Vaddiparthi | Outskill: Yeah, it's still working on it, guys.

[01:38:34] - [01:38:53]

Harshith Vaddiparthi | Outskill: It's analyzing all that, and it's good that it's taking some time, because we want it to take some time when it, you know, when it gets to things like these complex, or when it's anything related to security. I always do recommend, take your time, try to give it to your AI, use the best model as possible, and then work with it.

[01:38:53] - [01:38:54]

Harshith Vaddiparthi | Outskill: Right? That's it.

[01:38:58] - [01:38:58]

Harshith Vaddiparthi | Outskill: Okay.

[01:39:02] - [01:39:13]

Harshith Vaddiparthi | Outskill: Yeah, and by the way, all the questions about, you know, I see a couple of questions about, for executions, how many do you need? For running these applications, I would... I would say a 48 GB RAM should be okay.

[01:39:13] - [01:39:28]

Harshith Vaddiparthi | Outskill: I've been okay with, you know, an 18GB RAM, but sometimes it does, you know, give me some hiccups when I'm using a lot of tabs. Like, sometimes I might be using Claude, Anti-Gravity, Chad GPT, all of them together. It's better to go with anything like 48GB RAM,

[01:39:28] - [01:39:33]

Harshith Vaddiparthi | Outskill: But if you want to do OLAMA models, even smaller models, you can just install them.

[01:39:33] - [01:39:36]

Harshith Vaddiparthi | Outskill: Right? It's still possible with that.

[01:39:37] - [01:39:38]

Harshith Vaddiparthi | Outskill: Okay.

[01:39:38] - [01:39:46]

Harshith Vaddiparthi | Outskill: Now, guys, also question. Guys, are you all having fun? While you're doing this, are you having fun as well? Because that's very important, right?

[01:39:46] - [01:39:50]

Harshith Vaddiparthi | Outskill: We want to do something fun, we want to learn something fun, right? Amazing.

[01:39:51] - [01:39:52]

Harshith Vaddiparthi | Outskill: Perfect.

[01:40:06] - [01:40:24]

Harshith Vaddiparthi | Outskill: Okay, so Shabankar says, having fun, but what are we trying to build? So, the building we haven't done yet, we'll get to that. Right now, all that we're trying to do is understanding anti-gravity properly, installing skills, how to install skills, because if you get the foundations right, the building process would become way more easier.

[01:40:25] - [01:40:25]

Harshith Vaddiparthi | Outskill: Alright.

[01:40:26] - [01:40:30]

Harshith Vaddiparthi | Outskill: Let me minimize this a little bit so you can see the entire thing.

[01:40:30] - [01:40:38]

Harshith Vaddiparthi | Outskill: Alright guys, that's your complete security audit, right? Security audit, safe to install, executive summary.

[01:40:39] - [01:40:59]

Harshith Vaddiparthi | Outskill: Right? This entire thing. You can see exactly what, the entire folder is actually built about, right? Everything, right? The phase one, right? There's so much right here, guys, that you can actually look into. Once again, if anything, you find, hey, okay, that's a little bit too technical, I'm not able to understand something. Okay, let's say...

[01:40:59] - [01:41:03]

Harshith Vaddiparthi | Outskill: I really actually don't understand What is in this?

[01:41:04] - [01:41:06]

Harshith Vaddiparthi | Outskill: All I have to do is just...

[01:41:06] - [01:41:11]

Harshith Vaddiparthi | Outskill: Click on a comment and just say, can you explain this.

[01:41:14] - [01:41:17]

Harshith Vaddiparthi | Outskill: like, I'm a... I'm a 10-year-old, maybe.

[01:41:18] - [01:41:21]

Harshith Vaddiparthi | Outskill: It's any erosion, right? And just enter, right?

[01:41:21] - [01:41:27]

Harshith Vaddiparthi | Outskill: Now, in the comment you've just added, it'll try to do that in the next prompt, or you can just

[01:41:28] - [01:41:36]

Harshith Vaddiparthi | Outskill: Copy this... Paste it in this chat, and just say, Can you... Explain this.

[01:41:37] - [01:41:38]

Harshith Vaddiparthi | Outskill: Miah.

[01:41:39] - [01:41:49]

Harshith Vaddiparthi | Outskill: Like, 10 years old, that's it. It's also gonna explain you, right? So, these are all the nuances that you can do, right?

[01:41:49] - [01:41:56]

Harshith Vaddiparthi | Outskill: Okay, explain, like, your 10. Imagine the security audit tool is for robot workers, like agents.

[01:41:56] - [01:42:16]

Harshith Vaddiparthi | Outskill: Amazing. Agent name, okay, that's amazing. So, there's an agent name. It's gonna tag the agent, right? Now, it's much more clear to me, right? This is what I would suggest you do when you're trying to install your own skills and try to, you know, start trying to build everything itself, right? That's what we're doing right now. Okay.

[01:42:16] - [01:42:17]

Harshith Vaddiparthi | Outskill: No.

[01:42:17] - [01:42:25]

Harshith Vaddiparthi | Outskill: Now that we have understood the entire, building process, let me... Take a second...

[01:42:26] - [01:42:28]

Harshith Vaddiparthi | Outskill: Just give me a second, guys.

[01:42:39] - [01:42:42]

Harshith Vaddiparthi | Outskill: Okay, now that we have clearly understood this.

[01:42:43] - [01:42:59]

Harshith Vaddiparthi | Outskill: Let me fully confirm if you all understood, because we'll just go for a very quick break, and then we'll come back, and we'll actually start building something. Right, Subhankar, so I want to make you happy as well, right? Because Subhankar's like, hey, I'm having fun, but what are we building?

[01:42:59] - [01:43:03]

Harshith Vaddiparthi | Outskill: Guys, you are fortunate, we're gonna print something really cool, okay?

[01:43:03] - [01:43:05]

Harshith Vaddiparthi | Outskill: We're gonna build something really cool. Alright.

[01:43:06] - [01:43:06]

Harshith Vaddiparthi | Outskill: No.

[01:43:07] - [01:43:17]

Harshith Vaddiparthi | Outskill: First, we've understood everything. First, guys, clarity. I want clarity first, only then we take a break. Everyone clear, right? Everyone clear with everything that we have unpacked.

[01:43:17] - [01:43:25]

Harshith Vaddiparthi | Outskill: Understanding anti-gravity, 2.0, skills, security, folder structure, all of that clear, guys.

[01:43:26] - [01:43:27]

Harshith Vaddiparthi | Outskill: Everything clear?

[01:43:30] - [01:43:31]

Harshith Vaddiparthi | Outskill: Okay.

[01:43:32] - [01:43:33]

Harshith Vaddiparthi | Outskill: Perfect, perfect.

[01:43:33] - [01:43:34]

Harshith Vaddiparthi | Outskill: Okay.

[01:43:37] - [01:43:51]

Harshith Vaddiparthi | Outskill: Okay, missing the bigger picture. See, see, honestly, let me quote Steve Jobs. You can only start... you can only, you know, understand the bigger picture when you look backwards, because only then, you know, the dots connect. I think he put it in a better way, but that's what I'm trying to say.

[01:43:51] - [01:43:59]

Harshith Vaddiparthi | Outskill: you'll understand it clear, okay? Let's quickly take a quick 10-minute break, come back, and then we'll start building on top of this, okay?

[01:43:59] - [01:44:00]

Harshith Vaddiparthi | Outskill: Alright.

[01:44:02] - [01:44:04]

Harshith Vaddiparthi | Outskill: Let me... Stop my screen.

[01:44:09] - [01:44:09]

Shasti: Yep.

[01:44:10] - [01:44:13]

Shasti: We'll quickly take a 5-minute break, folks.

[01:44:13] - [01:44:16]

Shasti: I'll quickly share my screen, and then we'll come back.

[01:44:21] - [01:44:24]

Shasti: Yes, I'll play the music, just give me a second.

[01:50:08] - [01:50:09]

Shasti: Abhi bad, guys?

[01:50:09] - [01:50:13]

Shasti: I hope that 5 minutes was sufficient enough.

[01:50:18] - [01:50:21]

Shasti: Great. Over to you, Harshith. We can get started.

[01:50:30] - [01:50:32]

Shasti: Nadia hung up.

[01:50:35] - [01:50:36]

Shasti: Can you hear us, Arshad?

[01:50:36] - [01:50:37]

Harshith Vaddiparthi | Outskill: Yeah, just a second.

[01:50:38] - [01:50:40]

Shasti: Yeah, we can hear you enough.

[01:50:48] - [01:50:49]

Harshith Vaddiparthi | Outskill: Yep.

[01:50:50] - [01:50:51]

Shasti: Perfect.

[01:50:57] - [01:50:59]

Harshith Vaddiparthi | Outskill: Alright then. Yeah.

[01:50:59] - [01:51:02]

Harshith Vaddiparthi | Outskill: So, let's get started, guys, alright?

[01:51:03] - [01:51:06]

Harshith Vaddiparthi | Outskill: Yeah, let's get started and dive into this.

[01:51:07] - [01:51:09]

Harshith Vaddiparthi | Outskill: I hope my microphone is okay, guys.

[01:51:09] - [01:51:11]

Harshith Vaddiparthi | Outskill: Can you confirm if my microphone is okay?

[01:51:12] - [01:51:14]

Harshith Vaddiparthi | Outskill: Everything good, with microphone, everything?

[01:51:15] - [01:51:16]

Harshith Vaddiparthi | Outskill: Better, better?

[01:51:18] - [01:51:19]

Harshith Vaddiparthi | Outskill: Okay.

[01:51:20] - [01:51:20]

Harshith Vaddiparthi | Outskill: Alright.

[01:51:22] - [01:51:28]

Harshith Vaddiparthi | Outskill: Okay, now... Now that we understood, let me quickly do a quick, quick recap, guys, because

[01:51:28] - [01:51:31]

Harshith Vaddiparthi | Outskill: We have to dive into the building part as well, so let me...

[01:51:31] - [01:51:36]

Harshith Vaddiparthi | Outskill: quickly kind of tell you what I've just went through, right? Firstly, yeah.

[01:51:36] - [01:51:43]

Harshith Vaddiparthi | Outskill: We have understood the IDE as well, and then we have understood Anti-Gravity 2.0,

[01:51:43] - [01:51:57]

Harshith Vaddiparthi | Outskill: have understood how all these folders work, right? And it's literally just a reflection just inside the folder which exists on your own computer. You can just open them, and all of... whatever you're installing.

[01:51:57] - [01:52:07]

Harshith Vaddiparthi | Outskill: will all be shown here, right? That's what we've been working with right now. But now, what else can you do? Like, how do we just go ahead and build from here, right?

[01:52:07] - [01:52:08]

Harshith Vaddiparthi | Outskill: No.

[01:52:08] - [01:52:11]

Harshith Vaddiparthi | Outskill: Let me... Kind of do this.

[01:52:12] - [01:52:15]

Harshith Vaddiparthi | Outskill: Let me close this off for a second.

[01:52:16] - [01:52:17]

Harshith Vaddiparthi | Outskill: Yes.

[01:52:18] - [01:52:22]

Harshith Vaddiparthi | Outskill: Just a second, let me... Let's add a new folder...

[01:52:23] - [01:52:26]

Harshith Vaddiparthi | Outskill: Alright, yeah, we have this, right? Now.

[01:52:26] - [01:52:33]

Harshith Vaddiparthi | Outskill: Now that we have all of these skills, what I want to do right now is I want to go ahead and build something, right?

[01:52:33] - [01:52:39]

Harshith Vaddiparthi | Outskill: And someone also asked, right, where is the preview? Like, where does it even show?

[01:52:39] - [01:52:59]

Harshith Vaddiparthi | Outskill: So this is what we'll be doing. Number one, I'll be showing you guys how you can go ahead and build out your entire dashboard, like, where to even source that dashboard from. That's what I'll be showing. The second part is, I'll also be showing you how to just go ahead and create your own portfolio website. And lastly.

[01:52:59] - [01:53:05]

Harshith Vaddiparthi | Outskill: how to connect your anti-gravity with GitHub, right? So please do pay attention.

[01:53:05] - [01:53:22]

Harshith Vaddiparthi | Outskill: with all of these three things, right? Number one, we dive into a dashboard, and then a very simple portfolio website, and the last one is going to be how to install and connect anti-gravity with your GitHub, right? That's a lot, exactly, that's a lot to do.

[01:53:23] - [01:53:28]

Harshith Vaddiparthi | Outskill: But we have to try to, you know, try to connect it, because GitHub is where your code is pushed.

[01:53:29] - [01:53:37]

Harshith Vaddiparthi | Outskill: Now, my code exists in my folder, but I want to go ahead and make it live, right? I want to go ahead and push it to the GitHub as well.

[01:53:37] - [01:53:38]

Harshith Vaddiparthi | Outskill: Right? Now...

[01:53:38] - [01:53:46]

Harshith Vaddiparthi | Outskill: Let's quickly go ahead and work on this. Now, now that we understood this, I want to go ahead and introduce you

[01:53:47] - [01:53:57]

Harshith Vaddiparthi | Outskill: To something called as... CHADCNUI, okay? Something called as CHADCNUI.

[01:53:57] - [01:54:11]

Harshith Vaddiparthi | Outskill: Right? So, once again, nothing too crazy. All that this is, it's just the component library. If you click on components, you have a ton of these components, like an accordion, something like this.

[01:54:12] - [01:54:28]

Harshith Vaddiparthi | Outskill: An alert button, something like that, right? Exactly! Margishi, okay, nice, nice to see you again, Margishi. Yes, it's for better dashboard options, that's absolutely correct. Let's say I like something like a breadcrumb, you know, something, you know, these things that pop up on, like, multiple websites, right?

[01:54:28] - [01:54:37]

Harshith Vaddiparthi | Outskill: Now, if I want to go ahead and build out a real dashboard, exactly, right? We kind of, you know, went through this, right? It's basically... Let me...

[01:54:38] - [01:54:41]

Harshith Vaddiparthi | Outskill: I'll show this to you with an example of what I have been working with.

[01:54:41] - [01:54:57]

Harshith Vaddiparthi | Outskill: Yeah. So, once again, I'm just trying to show you my real example, right? I'm just keeping it very, very real. So this is my dashboard which I have built, and to do this from scratch using Lovable, it's gonna take a ton of time, a ton of tokens as well.

[01:54:58] - [01:55:03]

Harshith Vaddiparthi | Outskill: But right now, with something called as ShADCMUI,

[01:55:03] - [01:55:08]

Harshith Vaddiparthi | Outskill: Where blocks and all of these templates already exist.

[01:55:08] - [01:55:15]

Harshith Vaddiparthi | Outskill: We can just copy them, we can put it on our anti-gravity, and we can ask it to run it.

[01:55:15] - [01:55:16]

Harshith Vaddiparthi | Outskill: So let's quickly do that.

[01:55:17] - [01:55:19]

Harshith Vaddiparthi | Outskill: Let's check blocks as well.

[01:55:20] - [01:55:33]

Harshith Vaddiparthi | Outskill: Yes, you can see a lot of these blocks, and I think you can make it dark mode and light mode as well. Let's choose dark mode for now. Okay, you have a ton of these components, right? You can literally install this entire

[01:55:33] - [01:55:35]

Harshith Vaddiparthi | Outskill: You know, entire block.

[01:55:35] - [01:55:43]

Harshith Vaddiparthi | Outskill: which you can just use for your real product, which I do myself, because you've already seen some real examples, right?

[01:55:43] - [01:55:51]

Harshith Vaddiparthi | Outskill: Let's say you want to explore more. You want to explore just the sidebars, meaning, you know, these sidebar components are something you want to install.

[01:55:51] - [01:55:55]

Harshith Vaddiparthi | Outskill: Guys, these are all things that have already been built out. You can just...

[01:55:55] - [01:56:09]

Harshith Vaddiparthi | Outskill: copy the command, put it on your anti-gravity, ask it to install it, and that's about it, right? So let's quickly do give it a try, right? Let's do that. First, let me just go to the featured ones, because the featured ones are, like, really cool.

[01:56:09] - [01:56:17]

Harshith Vaddiparthi | Outskill: Okay, now we have something like this. Yeah, please ignore this, my password fill thing, please ignore this part. Yeah, we have this, right? Now.

[01:56:17] - [01:56:22]

Harshith Vaddiparthi | Outskill: How do I go ahead and install this dashboard

[01:56:23] - [01:56:32]

Harshith Vaddiparthi | Outskill: on my anti-gravity, how do I do that? Once again, Copy the command, Go back to my anti-gravity.

[01:56:33] - [01:56:39]

Harshith Vaddiparthi | Outskill: Paste it here, For this case, I think I can just choose

[01:56:40] - [01:56:49]

Harshith Vaddiparthi | Outskill: GPT... sorry, Gemini 3.1 Pro, low that should be enough, right? Now, I can just say, Testing, testing.

[01:56:52] - [01:56:54]

Harshith Vaddiparthi | Outskill: Yeah, I think it's working.

[01:56:55] - [01:57:05]

Harshith Vaddiparthi | Outskill: Can you now go ahead and install the entire dashboard on my folder? Can you go ahead and fully install this?

[01:57:06] - [01:57:09]

Harshith Vaddiparthi | Outskill: Yeah, I don't know why I repeated myself, but I'm just...

[01:57:09] - [01:57:24]

Harshith Vaddiparthi | Outskill: You know, in the flow, right? Okay, that's literally what I just did. Hey, just go ahead and install this dashboard. Have a Cama. Nice to see you again, Cama. Right, Cama... I'm doing this one. I'm copying this dashboard, Cama, if you remember, right?

[01:57:24] - [01:57:33]

Harshith Vaddiparthi | Outskill: This one is what I'm copying, and copying is very easy. Copy the command, right? And guys, what is happening under the hood?

[01:57:33] - [01:57:39]

Harshith Vaddiparthi | Outskill: The moment we copy the command, we are literally copying the code underneath it

[01:57:40] - [01:57:45]

Harshith Vaddiparthi | Outskill: That runs it and makes the entire folder, right?

[01:57:46] - [01:58:05]

Harshith Vaddiparthi | Outskill: Didn't ask it for security. Yeah, I didn't ask it this time because, firstly, it's a front-end tool, and also it's a production-grade open-source tool, so a lot of people have already done security checks. Now, here it asks, please initialize a new Next.js project and install the dashboard.

[01:58:06] - [01:58:07]

Harshith Vaddiparthi | Outskill: Yes, that's it.

[01:58:07] - [01:58:22]

Harshith Vaddiparthi | Outskill: And yes, it's completely editable, guys. It's completely editable, and I'm gonna show you some really, really cool designs as well, and how you can edit it in such a way that it looks like a million-dollar application, right?

[01:58:22] - [01:58:24]

Harshith Vaddiparthi | Outskill: Okay, you just have to keep continuing it.

[01:58:25] - [01:58:28]

Harshith Vaddiparthi | Outskill: And it's gonna proceed, right? It's running that command.

[01:58:30] - [01:58:34]

Harshith Vaddiparthi | Outskill: Is there any legal stuff like copyright? Okay, good question, Wasim, right?

[01:58:34] - [01:58:43]

Harshith Vaddiparthi | Outskill: So, when it comes to front-end applications like all of this, all of these tools fall under MIT license.

[01:58:43] - [01:58:55]

Harshith Vaddiparthi | Outskill: MIT license is actually by, you know, Massachusetts Institute of Technology itself. They have created a license where all of this code... no, you don't have to give them credit at all.

[01:58:56] - [01:59:12]

Harshith Vaddiparthi | Outskill: You don't have to give them credit. You can use that code, modify the code, build on top of that code, sell the code, you know, make money out of it. You can literally do whatever you want to, because it's just... that's what's called FOSS.

[01:59:12] - [01:59:19]

Harshith Vaddiparthi | Outskill: Right? Free and open source software. Right? That's what FOSS stands for.

[01:59:19] - [01:59:21]

Harshith Vaddiparthi | Outskill: Right? That's basically what it is.

[01:59:23] - [01:59:27]

Harshith Vaddiparthi | Outskill: Alright, now... There are a ton of these.

[01:59:27] - [01:59:28]

Harshith Vaddiparthi | Outskill: Amazing.

[01:59:28] - [01:59:31]

Harshith Vaddiparthi | Outskill: Let's wait for, you know, to install it.

[01:59:32] - [01:59:41]

Harshith Vaddiparthi | Outskill: Alright, I'm creating a new Next.js project in this folder called Dashboard to host the ShADCN UI dashboard. Guys, do you see that?

[01:59:41] - [01:59:50]

Harshith Vaddiparthi | Outskill: all I had to do was copy a command that I really like, copy a folder or a dashboard that I connect with, or I resonate with, or which I just like.

[01:59:50] - [01:59:58]

Harshith Vaddiparthi | Outskill: put it on anti-gravity, ask it to install it, and it literally started installing this entire codebase, guys.

[01:59:58] - [02:00:03]

Harshith Vaddiparthi | Outskill: I don't know how to stress on this. Guys, this was not possible 2 years ago.

[02:00:03] - [02:00:17]

Harshith Vaddiparthi | Outskill: Guys, I am telling you this because in 2022 is where I actually exited my own AI startup, and that's when I had to go ahead and, you know, hire developers, build everything out, you know, that's what I was doing. But now.

[02:00:17] - [02:00:26]

Harshith Vaddiparthi | Outskill: Guys, everything that I'm building right now is completely by myself as a solo, you know, solopreneur, like a solo founder, right? That's what I've been able to do.

[02:00:26] - [02:00:36]

Harshith Vaddiparthi | Outskill: Right? Okay, Gulnaz says, Gulnaz has a CS degree, and Gulnaz is also shocked, right? Exactly, because that's how powerful these large language models are.

[02:00:36] - [02:00:42]

Harshith Vaddiparthi | Outskill: You like a dashboard, you put it on, you can build something out of it, something tangible out of it.

[02:00:43] - [02:00:43]

Harshith Vaddiparthi | Outskill: Right?

[02:00:44] - [02:00:47]

Harshith Vaddiparthi | Outskill: That's what I've been, you know, working on. It's totally, totally possible.

[02:00:48] - [02:01:03]

Harshith Vaddiparthi | Outskill: Exactly, Shallab was like, we Vivek Coders are vibing, right? Because, you know, everyone who has that creative knack, right? Hey, maybe this is something that would work. Maybe, okay, let's implement this. That's something called as taste.

[02:01:03] - [02:01:06]

Harshith Vaddiparthi | Outskill: Right? And you all have that taste.

[02:01:06] - [02:01:10]

Harshith Vaddiparthi | Outskill: Taste is the most important skill right now, so it's literally what it is.

[02:01:10] - [02:01:11]

Harshith Vaddiparthi | Outskill: Okay?

[02:01:11] - [02:01:12]

Harshith Vaddiparthi | Outskill: No.

[02:01:12] - [02:01:32]

Harshith Vaddiparthi | Outskill: Yeah, I'mma show you how to modify it as well, yeah. Let's let it install it for a second first, and I'll be showing you everything. It's taking some time. As you can see, it says that it's still pending. Let's give it a second. Once that's done, I'm gonna properly show you how to, you know, run it, modify it, make it yours, right?

[02:01:34] - [02:01:36]

Harshith Vaddiparthi | Outskill: I mean, if it takes too long, I just go ahead and ask it.

[02:01:37] - [02:01:38]

Harshith Vaddiparthi | Outskill: Bro.

[02:01:38] - [02:01:46]

Harshith Vaddiparthi | Outskill: why is... It... Taking too long. Okay, I think it's doing it. I think it's doing it. Let's see.

[02:01:46] - [02:01:48]

Harshith Vaddiparthi | Outskill: If not, I'm gonna go ahead and ping it.

[02:01:49] - [02:01:50]

Harshith Vaddiparthi | Outskill: Let's see if it does it.

[02:01:51] - [02:02:01]

Harshith Vaddiparthi | Outskill: Okay, it's initialized UI. Okay, I'm not gonna type it in. Let me give it a benefit of the doubt, right? It's doing it, guys, it's doing it. Gemini is not as bad as I thought. He's a good friend, he's a good friend.

[02:02:01] - [02:02:03]

Harshith Vaddiparthi | Outskill: Alright, it's doing it.

[02:02:07] - [02:02:08]

Harshith Vaddiparthi | Outskill: Okay?

[02:02:09] - [02:02:14]

Harshith Vaddiparthi | Outskill: Okay, I'm continuing the SatCN initialization.

[02:02:14] - [02:02:17]

Harshith Vaddiparthi | Outskill: once... That finishes.

[02:02:17] - [02:02:21]

Harshith Vaddiparthi | Outskill: I will install the dashboard. Amazing! It's installing the dashboard now.

[02:02:21] - [02:02:26]

Harshith Vaddiparthi | Outskill: Okay, it's installing, but where is it? Guys, are you all having the same question?

[02:02:26] - [02:02:32]

Harshith Vaddiparthi | Outskill: Are you all having the same question? Like, okay, the code is installed, but where is it? How can I see it?

[02:02:32] - [02:02:36]

Harshith Vaddiparthi | Outskill: Lovable shows it immediately, but it's not showing it right here.

[02:02:36] - [02:02:42]

Harshith Vaddiparthi | Outskill: Okay, who says, who says that? Okay, HARIHoran is correct. Okay, HARIHARIHoran, I'm not gonna say that word.

[02:02:42] - [02:02:46]

Harshith Vaddiparthi | Outskill: wait, let's wait for it, and I'm gonna point that out, Hari Arun, right?

[02:02:46] - [02:02:53]

Harshith Vaddiparthi | Outskill: Okay, let's give it a second. Again, you can just vibe, right? You can literally just vibe, and it's doing it.

[02:02:53] - [02:03:00]

Harshith Vaddiparthi | Outskill: And, okay, now it's running the command to install the dashboard, okay?

[02:03:00] - [02:03:05]

Harshith Vaddiparthi | Outskill: Okay, Ranjani also, Manoj also, I think you guys are smart, okay? You guys all know it.

[02:03:07] - [02:03:12]

Harshith Vaddiparthi | Outskill: Okay, a camera, not really. So we wouldn't be able to see this on the left side folder, I'll show you.

[02:03:12] - [02:03:15]

Harshith Vaddiparthi | Outskill: I'll show you. So this one is going to be slightly different.

[02:03:16] - [02:03:22]

Harshith Vaddiparthi | Outskill: Okay, guys, do you see that it's editing some files? There are some files that, you know, need to be edited.

[02:03:23] - [02:03:24]

Harshith Vaddiparthi | Outskill: Amazing.

[02:03:24] - [02:03:27]

Harshith Vaddiparthi | Outskill: I'm just gonna go ahead and click on Accept All.

[02:03:28] - [02:03:33]

Harshith Vaddiparthi | Outskill: Now... Everyone, please pay attention.

[02:03:33] - [02:03:39]

Harshith Vaddiparthi | Outskill: Gueurra clearly mentions The dashboard page has been created.

[02:03:40] - [02:03:47]

Harshith Vaddiparthi | Outskill: then visit... Local host 3000, Dashboard. Slash dashboard. So let's go ahead and open it.

[02:03:47] - [02:03:49]

Harshith Vaddiparthi | Outskill: Okay, it's not running just yet.

[02:03:49] - [02:03:51]

Harshith Vaddiparthi | Outskill: This is the link that we have to open.

[02:03:52] - [02:03:55]

Harshith Vaddiparthi | Outskill: If it's not running, all you have to do

[02:03:56] - [02:03:58]

Harshith Vaddiparthi | Outskill: Go back again, and just say.

[02:04:00] - [02:04:08]

Harshith Vaddiparthi | Outskill: Okay, this is great, but looks like it's not running. Can you run this locally and keep it running?

[02:04:13] - [02:04:14]

Harshith Vaddiparthi | Outskill: Okay.

[02:04:16] - [02:04:26]

Harshith Vaddiparthi | Outskill: Yes, possible, saksham. It's possible to combine different dashboards, different skills, different UI, everything. Guys, anything... see, that's exactly what I'm actually liking, saksham, right?

[02:04:26] - [02:04:36]

Harshith Vaddiparthi | Outskill: you're not just looking at what I'm doing and, you know, just telling, you're also thinking of, hey, can you combine one thing with another? Can you combine something with this?

[02:04:36] - [02:04:48]

Harshith Vaddiparthi | Outskill: That's what the thinking that you require to become the elite, you know, elite, you know, Vipoder, right? That's what you need. Now, let's just go back, and now let's reload.

[02:04:49] - [02:04:50]

Harshith Vaddiparthi | Outskill: Let's give it a second.

[02:04:56] - [02:04:59]

Harshith Vaddiparthi | Outskill: Guys, that is it.

[02:04:59] - [02:05:18]

Harshith Vaddiparthi | Outskill: Guys, can I get a boom in the chat for this one, guys? Can I get a boom in the chat for this one? We were able to go ahead and install a completely, you know, built-out dashboard on our local computer, and it's running at localhost 3000, right? Now.

[02:05:18] - [02:05:20]

Harshith Vaddiparthi | Outskill: What is this localhost 3000?

[02:05:21] - [02:05:22]

Harshith Vaddiparthi | Outskill: Very simple, right?

[02:05:23] - [02:05:26]

Harshith Vaddiparthi | Outskill: Right now, my computer

[02:05:26] - [02:05:35]

Harshith Vaddiparthi | Outskill: my laptop is running as the server. Now, my laptop is the server, so my laptop has produced a link

[02:05:35] - [02:05:40]

Harshith Vaddiparthi | Outskill: And this is it. And let's say if you open this link right now, it's not gonna work.

[02:05:40] - [02:05:46]

Harshith Vaddiparthi | Outskill: That's because my computer Is the only server for this.

[02:05:46] - [02:05:55]

Harshith Vaddiparthi | Outskill: Of course, to take it live, I'll also try to show you that, how we can take it live using Vercel, but now, that's all you have to understand.

[02:05:55] - [02:05:56]

Harshith Vaddiparthi | Outskill: Right?

[02:05:57] - [02:06:05]

Harshith Vaddiparthi | Outskill: Okay, okay, amazing. Actually, okay, really good to see that, Gulnaz. So, Gulnaz says, I never thought I could... I could be a coder until this, honestly, right?

[02:06:06] - [02:06:22]

Harshith Vaddiparthi | Outskill: Exactly. Now, what you're seeing is all the possibilities of everything that you can do. You might not even like my style, maybe you don't like this black and white, you might want to change it the way you want to. It's all possible, guys. If you can see it in your mind, and if you can prompt it, you can build it.

[02:06:22] - [02:06:24]

Harshith Vaddiparthi | Outskill: That's... that's what I'm trying to say.

[02:06:24] - [02:06:29]

Harshith Vaddiparthi | Outskill: Okay? Now... Now that we understood this.

[02:06:29] - [02:06:36]

Harshith Vaddiparthi | Outskill: Let's go ahead and modify this, because it's good But it isn't great.

[02:06:36] - [02:06:45]

Harshith Vaddiparthi | Outskill: Right? Now, I am going to introduce you to my secret sauce of how I create Beautiful dashboards!

[02:06:45] - [02:06:57]

Harshith Vaddiparthi | Outskill: something like this. Like, guys, look at that. It's a dashboard, completely built out, right? Something like that. Or even, something that I've just been working on lately, which is called,

[02:06:59] - [02:07:04]

Harshith Vaddiparthi | Outskill: Yeah, that's my own product, which I've just been working on. Let's look at the dashboard for this.

[02:07:04] - [02:07:07]

Harshith Vaddiparthi | Outskill: I hope I remember my own password, guys, for this one.

[02:07:11] - [02:07:13]

Harshith Vaddiparthi | Outskill: I think I do remember, let's see.

[02:07:13] - [02:07:24]

Harshith Vaddiparthi | Outskill: Yeah, that's it. That very simple dashboard, but it's my own tool, right? It's my own scraping tool, which I have just built out. It's yet to go public, it's not public just yet.

[02:07:24] - [02:07:30]

Harshith Vaddiparthi | Outskill: But, as you can see, Right? You can just go ahead and...

[02:07:30] - [02:07:47]

Harshith Vaddiparthi | Outskill: build custom dashboards like these. And guys, you can see on Twitter, right? If you just go see on Twitter, there are people actually charging thousands of dollars just to build custom dashboards like these for, clients, right? For enterprises.

[02:07:47] - [02:07:58]

Harshith Vaddiparthi | Outskill: Now, what's the secret sauce? I'm going to show you two of them. One, let's just do two of them, right? Because I think... you know what, let's do three. It just came into my mind, because that's something I just learned yesterday.

[02:07:58] - [02:08:12]

Harshith Vaddiparthi | Outskill: Which is really cool. You can, you can, you know, explore it. Okay, I'm going to show you 3 secret sauce, and once again, guys, please, if you forget the links or whatever, please don't worry about it. All the links will be shared with you in the resources.

[02:08:12] - [02:08:20]

Harshith Vaddiparthi | Outskill: And I'll try to share the resources a little early this time, right? So that it all reaches your LMS, you know, you can all, you know, see all the resources, right? Now.

[02:08:21] - [02:08:29]

Harshith Vaddiparthi | Outskill: These three resources. Number one, Is something gonna be called as... tweak CM.

[02:08:29] - [02:08:31]

Harshith Vaddiparthi | Outskill: It's called TweakCN, right?

[02:08:32] - [02:08:33]

Harshith Vaddiparthi | Outskill: tweak CN.

[02:08:33] - [02:08:36]

Harshith Vaddiparthi | Outskill: Now, if I just go ahead and try it out.

[02:08:37] - [02:08:39]

Harshith Vaddiparthi | Outskill: And let's just go to Dashboard.

[02:08:39] - [02:08:40]

Harshith Vaddiparthi | Outskill: And that's it.

[02:08:40] - [02:08:47]

Harshith Vaddiparthi | Outskill: There are so many of these dashboard styles, That you can completely explore.

[02:08:47] - [02:08:48]

Harshith Vaddiparthi | Outskill: Right?

[02:08:48] - [02:09:05]

Harshith Vaddiparthi | Outskill: There's something called as Bubblegum, something called as Candyland, Claymorphism? Who's that? Someone say claymorphism? Okay? Utsav says Claymorphism? Yes, I think Claymorphism is one of my favorites, actually, right? So many dashboards, right? And again, this can be dark mode, light mode as well.

[02:09:06] - [02:09:09]

Harshith Vaddiparthi | Outskill: Okay, Kalpana used bubblegum this Saturday, that's nice.

[02:09:10] - [02:09:14]

Harshith Vaddiparthi | Outskill: Okay, there's one for Claude, that is so funny, that's literally just Claude's UI.

[02:09:15] - [02:09:16]

Harshith Vaddiparthi | Outskill: Right?

[02:09:16] - [02:09:23]

Harshith Vaddiparthi | Outskill: Exactly, right? So this is what you can just go ahead and use. Now, Clamorphism?

[02:09:23] - [02:09:28]

Harshith Vaddiparthi | Outskill: So now, how do we go ahead and install this beautiful design?

[02:09:28] - [02:09:34]

Harshith Vaddiparthi | Outskill: Like, look at that dashboard, it's so powerful, it's so good, right? How do I install the same thing

[02:09:34] - [02:09:40]

Harshith Vaddiparthi | Outskill: For my current dashboard, that doesn't look that great, but it's still powerful underneath.

[02:09:41] - [02:09:54]

Harshith Vaddiparthi | Outskill: Okay, how did you get the dashboard into TweakCN? I didn't do that. I didn't do this, it's just their own website. I didn't put in the dashboard into that, so it's just their website. This is, like, the visual way, they're just showing you.

[02:09:54] - [02:10:02]

Harshith Vaddiparthi | Outskill: how your dashboard would look like if you selected that color, or this color, or something. I haven't added anything, it's just the website theme.

[02:10:04] - [02:10:04]

Harshith Vaddiparthi | Outskill: Okay?

[02:10:05] - [02:10:06]

Harshith Vaddiparthi | Outskill: Now, let me do this.

[02:10:07] - [02:10:11]

Harshith Vaddiparthi | Outskill: All I'm gonna do is... Click on the code.

[02:10:12] - [02:10:17]

Harshith Vaddiparthi | Outskill: Copy the command for this, fully copy that.

[02:10:18] - [02:10:29]

Harshith Vaddiparthi | Outskill: go back... yes, the numbers are... I wouldn't call it fake, Aditi. The numbers just are placeholders, because we haven't added any back-end just yet. So the numbers are placeholders.

[02:10:30] - [02:10:32]

Harshith Vaddiparthi | Outskill: Yeah. So let's copy that.

[02:10:33] - [02:10:35]

Harshith Vaddiparthi | Outskill: Let's go back to our anti-gravity.

[02:10:36] - [02:10:37]

Harshith Vaddiparthi | Outskill: Based?

[02:10:37] - [02:10:43]

Harshith Vaddiparthi | Outskill: this... In this case, I would actually be using,

[02:10:44] - [02:10:49]

Harshith Vaddiparthi | Outskill: Sonnet 4.6, which will just give us better results. I'm just gonna say.

[02:10:50] - [02:10:54]

Harshith Vaddiparthi | Outskill: Can you just go ahead and install this

[02:10:54] - [02:11:11]

Harshith Vaddiparthi | Outskill: a style into my dashboard, make sure you install the exact style completely, and don't miss anything. The font, the text, the style, everything has to be exactly as it is in this command.

[02:11:12] - [02:11:13]

Harshith Vaddiparthi | Outskill: That's all.

[02:11:13] - [02:11:14]

Harshith Vaddiparthi | Outskill: You just have to say that.

[02:11:16] - [02:11:17]

Harshith Vaddiparthi | Outskill: And let's enter!

[02:11:19] - [02:11:21]

Harshith Vaddiparthi | Outskill: That's it. Guys!

[02:11:21] - [02:11:24]

Harshith Vaddiparthi | Outskill: I don't know how to say it, guys, this used to be a job.

[02:11:24] - [02:11:42]

Harshith Vaddiparthi | Outskill: Guys, this was like a job of, like, 5 or 10 people together, sitting down, creating a dashboard, then, you know, just going ahead and designing it, right? All of this happening. It's... it used to be a job, guys, right? Now, even Vivek Coders can do it.

[02:11:43] - [02:11:54]

Harshith Vaddiparthi | Outskill: Vivek Coders can do it. We can literally build anything out of this, right? We don't have to depend on anyone. We don't have to depend on, hey, we need a coder, you can just do it by yourself, so it's that powerful.

[02:11:54] - [02:11:55]

Harshith Vaddiparthi | Outskill: Right?

[02:11:55] - [02:12:01]

Harshith Vaddiparthi | Outskill: Okay, so I think a couple of you are asking, how do you copy the dashboard layout? Let me show that again.

[02:12:01] - [02:12:05]

Harshith Vaddiparthi | Outskill: While it's working on it, let me kind of show this again.

[02:12:05] - [02:12:07]

Harshith Vaddiparthi | Outskill: So, all that I did was...

[02:12:07] - [02:12:15]

Harshith Vaddiparthi | Outskill: This is the, website, right? I went to the button that said Code, Click on that code.

[02:12:15] - [02:12:20]

Harshith Vaddiparthi | Outskill: Copy the command, put it here, and give your, prompt. That's it.

[02:12:21] - [02:12:22]

Harshith Vaddiparthi | Outskill: That's basically it.

[02:12:28] - [02:12:29]

Harshith Vaddiparthi | Outskill: Okay.

[02:12:29] - [02:12:30]

Harshith Vaddiparthi | Outskill: Someone also asks.

[02:12:31] - [02:12:47]

Harshith Vaddiparthi | Outskill: Okay, how do we change custom elements? Yeah. Again, it's, it's honestly just prompting journey, right? It's the same thing that I was just gonna show you as well. It's just prompting. You're just prompt it to do it, it's gonna make the changes, and it's all gonna happen live.

[02:12:47] - [02:12:48]

Harshith Vaddiparthi | Outskill: Guys...

[02:12:48] - [02:12:57]

Harshith Vaddiparthi | Outskill: Boom. It just happened while we were speaking. Can I get a boom in the chat for this also, guys? Look at that!

[02:12:57] - [02:13:13]

Harshith Vaddiparthi | Outskill: All I just did was, hey, I asked it, can you go ahead and make the changes? Claymorphism, theme has been applied, and here it is, the entire theme, exactly like I wanted it.

[02:13:14] - [02:13:14]

Harshith Vaddiparthi | Outskill: Nice.

[02:13:15] - [02:13:17]

Harshith Vaddiparthi | Outskill: Look at that. Like, isn't that amazing?

[02:13:17] - [02:13:22]

Harshith Vaddiparthi | Outskill: Isn't that amazing? Let's see how it's doing, right? It's so cool, it's so cool. Now.

[02:13:23] - [02:13:25]

Harshith Vaddiparthi | Outskill: Now, one thing that you would notice is

[02:13:25] - [02:13:32]

Harshith Vaddiparthi | Outskill: the rest of these buttons are actually not working, right? I'm clicking on it, It doesn't work.

[02:13:33] - [02:13:33]

Harshith Vaddiparthi | Outskill: Guys!

[02:13:34] - [02:13:42]

Harshith Vaddiparthi | Outskill: Shamim, yes, I confirm I'm actually receiving your messages. I don't know why you asked that. Okay, now, guys, do you see that?

[02:13:42] - [02:13:45]

Harshith Vaddiparthi | Outskill: I click on it, They're not opening.

[02:13:45] - [02:13:50]

Harshith Vaddiparthi | Outskill: Can anyone tell me in the chat why that's not happening?

[02:13:50] - [02:13:52]

Harshith Vaddiparthi | Outskill: Anyone in the chat?

[02:13:56] - [02:14:02]

Harshith Vaddiparthi | Outskill: No data attached, no connectors... No design, no backend.

[02:14:03] - [02:14:03]

Harshith Vaddiparthi | Outskill: Okay.

[02:14:05] - [02:14:10]

Harshith Vaddiparthi | Outskill: No. So, you, okay, you guys are close? You guys are close?

[02:14:10] - [02:14:22]

Harshith Vaddiparthi | Outskill: Yeah, you guys are closed. The thing is that it has nothing to do with the backend, right? We can still build a very powerful front-end without a backend as well. It's possible.

[02:14:22] - [02:14:25]

Harshith Vaddiparthi | Outskill: Okay, Rajani, you're actually even more closer. So, Rajani says.

[02:14:25] - [02:14:29]

Harshith Vaddiparthi | Outskill: not linked. Pawan says it needs to be linked.

[02:14:29] - [02:14:31]

Harshith Vaddiparthi | Outskill: Okay, but that's the point.

[02:14:32] - [02:14:37]

Harshith Vaddiparthi | Outskill: Right now, Let's go ahead and look back into this.

[02:14:38] - [02:14:40]

Harshith Vaddiparthi | Outskill: This dashboard, right?

[02:14:40] - [02:14:41]

Harshith Vaddiparthi | Outskill: No.

[02:14:41] - [02:14:44]

Harshith Vaddiparthi | Outskill: Let me ask the same question.

[02:14:44] - [02:14:47]

Harshith Vaddiparthi | Outskill: On, anti-gravity, and you'll actually see the answer.

[02:14:48] - [02:15:05]

Harshith Vaddiparthi | Outskill: Okay, okay, this is great, but then if I click on Dashboard, if I click on Lifecycle, if I click on Analytics, if I click on projects or teams, nothing is opening. There is nothing opening. Why is that happening? Explain that to me clearly.

[02:15:07] - [02:15:13]

Harshith Vaddiparthi | Outskill: You guys are close, but not yet, guys. Like, a lot of you are saying there's no underlying data, there's no data.

[02:15:13] - [02:15:15]

Harshith Vaddiparthi | Outskill: It's not about data, even.

[02:15:16] - [02:15:22]

Harshith Vaddiparthi | Outskill: You're gonna see... No, we're on localhost. Very... guys, it's a very, very simple answer.

[02:15:22] - [02:15:25]

Harshith Vaddiparthi | Outskill: Very simple. Yes. Margishi, you are correct.

[02:15:26] - [02:15:28]

Harshith Vaddiparthi | Outskill: It's because the pages itself don't exist.

[02:15:29] - [02:15:37]

Harshith Vaddiparthi | Outskill: That's it, guys. Exactly, Barun, you're also correct, because the pages itself do not exist.

[02:15:37] - [02:15:40]

Harshith Vaddiparthi | Outskill: Right? We have to build those pages.

[02:15:40] - [02:15:52]

Harshith Vaddiparthi | Outskill: Right? We have to start building... yeah, it's a very simple one, right, Pawan? I was just trying to, you know, have fun, but it's a better way to think, right? Now, you guys are thinking, that's what I want. You guys have to answer something.

[02:15:52] - [02:16:03]

Harshith Vaddiparthi | Outskill: You guys have to tell me, hey, is it linking? Is it database? Is it backend? Because the reason is that, guys, once again, it's not that I'm trying to say, you know, like, gotcha, I'm not trying to do that. All I'm trying to say is that

[02:16:04] - [02:16:15]

Harshith Vaddiparthi | Outskill: The exact same thinking process that you guys are having is what I used to have when I was, you know, building this. And that is what is needed to become an elite Vivek coder.

[02:16:15] - [02:16:28]

Harshith Vaddiparthi | Outskill: Right? You have to think, you have to know, you have to ask the AI, why is it not working? Where are my pages? How do I connect? How do I connect to the backend? Where is the backend? Are these numbers fake?

[02:16:28] - [02:16:29]

Harshith Vaddiparthi | Outskill: Everything.

[02:16:29] - [02:16:36]

Harshith Vaddiparthi | Outskill: Once again, guys, all the questions that you guys are actually asking me are prompts itself.

[02:16:37] - [02:16:53]

Harshith Vaddiparthi | Outskill: everything that you guys are actually asking me right now are prompts itself. Honestly, if I take your entire, you know, pointers that you're asking, and I make it into a product requirement document, and I give it to Claude, it's gonna, you know, build the entire thing out.

[02:16:53] - [02:17:00]

Harshith Vaddiparthi | Outskill: Because all the questions that you're asking are very important ones, which LLMs we have to ask the LLMs to build our stuff.

[02:17:00] - [02:17:01]

Harshith Vaddiparthi | Outskill: That's basically it.

[02:17:01] - [02:17:05]

Harshith Vaddiparthi | Outskill: So for now, Okay, question to you, guys?

[02:17:05] - [02:17:10]

Harshith Vaddiparthi | Outskill: For the demo, should we build out the rest of these pages? Do you want me to build it out?

[02:17:11] - [02:17:13]

Harshith Vaddiparthi | Outskill: Do you want me to build out the rest of the pages?

[02:17:17] - [02:17:21]

Harshith Vaddiparthi | Outskill: Oh, a couple of you just say no. Outright, you're like, no, no need for pages.

[02:17:21] - [02:17:23]

Harshith Vaddiparthi | Outskill: Okay? Okay.

[02:17:23] - [02:17:31]

Harshith Vaddiparthi | Outskill: So, let's do that, let's still do that. I won't take a lot of time for this one, but let's just try to understand how it works.

[02:17:31] - [02:17:40]

Harshith Vaddiparthi | Outskill: Okay, yeah, let's do one or two. Okay, let's do one or two pages. Let's try to do dashboard and cycle, because I want to show you something called as routing.

[02:17:41] - [02:17:43]

Harshith Vaddiparthi | Outskill: Now... Alright?

[02:17:43] - [02:17:52]

Harshith Vaddiparthi | Outskill: If you remove this DASHORD, you're at this blank Next.js page.

[02:17:53] - [02:17:58]

Harshith Vaddiparthi | Outskill: Right? You're at this blank Next.js page, and there's nothing in it.

[02:17:58] - [02:18:06]

Harshith Vaddiparthi | Outskill: But when you go back to the root that says DASHORD, that's when the dashboard is opening, which is not what we want.

[02:18:06] - [02:18:19]

Harshith Vaddiparthi | Outskill: Right? Yeah, the Venkurt, yeah, the second and the third saw, the secret sauce, I'mma share it. Let's... let's try to build this, and I'll show that as well. Because I want to first build it and show you the other dashboards as well. Okay? Yeah.

[02:18:19] - [02:18:36]

Harshith Vaddiparthi | Outskill: Now, but good that, you know, kept that in mind. Yeah, we have two more, yes, Nirmala, we have two more, you know, things that I want to show you, but let's try to build something first, right? Let's try to make this tangible, because if I just go back to Localhost 3000, which is supposed to be the actual link.

[02:18:37] - [02:18:39]

Harshith Vaddiparthi | Outskill: the Next.js template shows up.

[02:18:40] - [02:18:45]

Harshith Vaddiparthi | Outskill: But our dashboard exists on this route. Remember that? It's a root, right? It's a root.

[02:18:46] - [02:18:47]

Harshith Vaddiparthi | Outskill: Now, let's go back.

[02:18:47] - [02:18:49]

Harshith Vaddiparthi | Outskill: And just see this, see this?

[02:18:50] - [02:18:54]

Harshith Vaddiparthi | Outskill: Okay, this is great, so here's what I want you to do.

[02:18:54] - [02:19:13]

Harshith Vaddiparthi | Outskill: Right now, the slash dashboard is actually routing to, localhost 3... localhost 3000 slash dashboard, which is not what I want. I just want to go ahead and open a localhost 3000, and it should open my entire dashboard itself. That's number one.

[02:19:13] - [02:19:22]

Harshith Vaddiparthi | Outskill: The second and third thing which I want you to go ahead and work on is the pages. I also want you to go ahead and work on

[02:19:22] - [02:19:26]

Harshith Vaddiparthi | Outskill: Lifecycle page, and analytics page.

[02:19:31] - [02:19:33]

Harshith Vaddiparthi | Outskill: Okay, let's do that.

[02:19:35] - [02:19:38]

Harshith Vaddiparthi | Outskill: Yeah, that's it, and I'm giving it the prompt.

[02:19:46] - [02:19:47]

Harshith Vaddiparthi | Outskill: Okay.

[02:19:52] - [02:19:55]

Harshith Vaddiparthi | Outskill: By the way, the print is done, guys. The print is done. I'm so excited for that print.

[02:20:00] - [02:20:01]

Harshith Vaddiparthi | Outskill: Okay.

[02:20:05] - [02:20:16]

Harshith Vaddiparthi | Outskill: Perfect. Good. It has everything now, it's gonna execute. Guys, do you see that? You can see this live, that it is modifying all these pages.

[02:20:16] - [02:20:18]

Harshith Vaddiparthi | Outskill: Like, you can literally see it live.

[02:20:21] - [02:20:25]

Harshith Vaddiparthi | Outskill: Yeah, by the way, I think it's done. Let me... let me bring it...

[02:20:29] - [02:20:29]

Harshith Vaddiparthi | Outskill: Whew!

[02:20:30] - [02:20:50]

Harshith Vaddiparthi | Outskill: Guys, this is the print which I was able to vibe code. So, that's literally something I just vibe-coded, guys. These are, like, the supports. Guys, there's so many possibilities with this. I'm just showing you a tangible example of what you can do with these skills, which you can, you know, install it, right? I mean, I'm gonna use it to kind of replace this.

[02:20:50] - [02:20:53]

Harshith Vaddiparthi | Outskill: And that's... I just vibe-coded that, guys. Think about it.

[02:20:53] - [02:21:00]

Harshith Vaddiparthi | Outskill: Right? Someone who knows nothing about 3D printing, someone who knows nothing about modeling, anything, you can do all of that.

[02:21:00] - [02:21:01]

Harshith Vaddiparthi | Outskill: Right?

[02:21:03] - [02:21:16]

Harshith Vaddiparthi | Outskill: saksham says, how much learning do we need for that? saksham, I think that you're learning you've already done. Go to skills.sh, download the exact skill you want, put it back on anti-gravity, ask it to go ahead and do that.

[02:21:16] - [02:21:17]

Harshith Vaddiparthi | Outskill: That's it.

[02:21:18] - [02:21:29]

Harshith Vaddiparthi | Outskill: That's literally just it. Yeah, sakshay, I'm not even kidding, man. How do I tell you? I'm shocked myself. It did that, man. It's crazy, it's crazy that, you know, it does all of this.

[02:21:29] - [02:21:35]

Harshith Vaddiparthi | Outskill: Okay, now... You can also see all of these pages also working.

[02:21:35] - [02:21:37]

Harshith Vaddiparthi | Outskill: Click on Accept All.

[02:21:37] - [02:21:38]

Harshith Vaddiparthi | Outskill: Yeah.

[02:21:38] - [02:21:41]

Harshith Vaddiparthi | Outskill: It's working on the main navbar, you know, all of that.

[02:21:48] - [02:21:54]

Harshith Vaddiparthi | Outskill: Perfect. Guys, now, as you can see, Now, as you can see, Yes.

[02:21:54] - [02:21:56]

Harshith Vaddiparthi | Outskill: What was done?

[02:21:56] - [02:22:06]

Harshith Vaddiparthi | Outskill: This dashboard route, lifecycle, analytics page, all of these things were done. Let me just go ahead and click on Accept All.

[02:22:06] - [02:22:11]

Harshith Vaddiparthi | Outskill: Let me go back to... Here, let me just go back here.

[02:22:11] - [02:22:13]

Harshith Vaddiparthi | Outskill: And let me kind of reload this.

[02:22:14] - [02:22:22]

Harshith Vaddiparthi | Outskill: Because it should just go... even just... just localhost 3000 should route to the actual website, which... which is... it's doing.

[02:22:23] - [02:22:30]

Harshith Vaddiparthi | Outskill: Now, let me click on Dashboard, yeah, because this... we're in the dashboard. Let's click on Lifecycle.

[02:22:31] - [02:22:35]

Harshith Vaddiparthi | Outskill: Which is good. Guys, do you see the lifecycle happening? Isn't that great?

[02:22:38] - [02:22:39]

Harshith Vaddiparthi | Outskill: Isn't that great?

[02:22:41] - [02:22:44]

Harshith Vaddiparthi | Outskill: Okay, the next one, analytics.

[02:22:46] - [02:22:47]

Harshith Vaddiparthi | Outskill: Perfect.

[02:22:48] - [02:22:50]

Harshith Vaddiparthi | Outskill: Total sessions, unique users.

[02:22:50] - [02:23:00]

Harshith Vaddiparthi | Outskill: That's amazing, guys. Do you see that? Everything. Again, guys, this data is all mock data. It's all mock data. We have to make it real. Right now, we're just working on...

[02:23:01] - [02:23:05]

Harshith Vaddiparthi | Outskill: The dashboard front-end itself, everything is mock. It's all mock data.

[02:23:05] - [02:23:10]

Harshith Vaddiparthi | Outskill: Right? Of course, like you said, dashboard, lifecycle, and analytics is done.

[02:23:10] - [02:23:11]

Harshith Vaddiparthi | Outskill: No.

[02:23:11] - [02:23:17]

Harshith Vaddiparthi | Outskill: Okay, the question is about how do we add live data? Live data, you would need

[02:23:17] - [02:23:25]

Harshith Vaddiparthi | Outskill: SUBASE. If you have Supabase, you need to, connect Supabase with your... with your codebase.

[02:23:25] - [02:23:29]

Harshith Vaddiparthi | Outskill: And that's it. You just need a very simple API connection. Even that.

[02:23:29] - [02:23:44]

Harshith Vaddiparthi | Outskill: you can just prompt it here. That's it. Okay, so one thing I can do for you guys, let me actually, you know, the resources that I give you guys, I'll try to add in a resource of how you can connect your Supabase to

[02:23:44] - [02:23:53]

Harshith Vaddiparthi | Outskill: your front-end codebase, and the prompts also, the actual ready prompts also, I'm gonna give it to you. Will that work, guys? Will that work if I'd be able to do that for you guys?

[02:23:53] - [02:23:58]

Harshith Vaddiparthi | Outskill: Right? I'll try to go ahead and do, you know, create all of that, and then just share it with you. Right?

[02:23:59] - [02:24:00]

Harshith Vaddiparthi | Outskill: Perfect.

[02:24:02] - [02:24:08]

Harshith Vaddiparthi | Outskill: Amazing, yeah. Now... Now that we understood this side, Here's what we're gonna do.

[02:24:08] - [02:24:17]

Harshith Vaddiparthi | Outskill: Let's just go back... yeah. So, of course, we've been able to, you know, go ahead and create everything, you know, nice-looking dashboard. Now.

[02:24:18] - [02:24:19]

Harshith Vaddiparthi | Outskill: This is great!

[02:24:19] - [02:24:23]

Harshith Vaddiparthi | Outskill: But... Can I share it with someone? Not really.

[02:24:23] - [02:24:31]

Harshith Vaddiparthi | Outskill: It is just on my computer. I want you guys to test it out, you know, I want to paste it in the chat, and I want you guys to kind of

[02:24:31] - [02:24:35]

Harshith Vaddiparthi | Outskill: See how this dashboard looks like, and, you know, test it out by yourself.

[02:24:36] - [02:24:40]

Harshith Vaddiparthi | Outskill: Now, how do I do that? Any... anyone in the comments? Anyone? Anyone?

[02:24:41] - [02:24:42]

Harshith Vaddiparthi | Outskill: How do we do that?

[02:24:44] - [02:24:47]

Harshith Vaddiparthi | Outskill: DNS is correct, hosting is correct, that's correct.

[02:24:48] - [02:24:49]

Harshith Vaddiparthi | Outskill: Okay.

[02:24:49] - [02:24:51]

Harshith Vaddiparthi | Outskill: Publishing.

[02:24:51] - [02:24:52]

Harshith Vaddiparthi | Outskill: Okay.

[02:24:56] - [02:24:57]

Harshith Vaddiparthi | Outskill: Okay.

[02:24:58] - [02:25:04]

Harshith Vaddiparthi | Outskill: Yes, you guys are correct, you guys are absolutely correct. Let me show this to you right now, okay? Now.

[02:25:04] - [02:25:06]

Harshith Vaddiparthi | Outskill: I have to go back to the drawing board first.

[02:25:09] - [02:25:11]

Harshith Vaddiparthi | Outskill: Yes.

[02:25:11] - [02:25:13]

Harshith Vaddiparthi | Outskill: Kurt, I want to share this.

[02:25:13] - [02:25:15]

Harshith Vaddiparthi | Outskill: Right, here's how we proceed.

[02:25:16] - [02:25:28]

Harshith Vaddiparthi | Outskill: The first thing that we actually have to do right now is... are code-based our codebase corn base... exists.

[02:25:29] - [02:25:30]

Harshith Vaddiparthi | Outskill: locally on.

[02:25:31] - [02:25:33]

Harshith Vaddiparthi | Outskill: Locally. And it exists locally.

[02:25:33] - [02:25:34]

Harshith Vaddiparthi | Outskill: No.

[02:25:34] - [02:25:46]

Harshith Vaddiparthi | Outskill: We have to go ahead and take the codebase that exists locally, and push it Push it to... GitHub.

[02:25:46] - [02:25:48]

Harshith Vaddiparthi | Outskill: Exactly, sanjeev, you're correct.

[02:25:48] - [02:25:52]

Harshith Vaddiparthi | Outskill: Yes, local Git. Jaydev correct. We push it to GitHub.

[02:25:52] - [02:26:00]

Harshith Vaddiparthi | Outskill: After pushing it to GitHub, Then, we... host it on Vercel.

[02:26:00] - [02:26:03]

Harshith Vaddiparthi | Outskill: We host it on Vercel.

[02:26:03] - [02:26:10]

Harshith Vaddiparthi | Outskill: it's gonna give us, like, a temporary link, like, something like versatile.com or something like that. If you want to go even further.

[02:26:10] - [02:26:16]

Harshith Vaddiparthi | Outskill: And let's say if you want, like, a custom domain, something like Harshith.com.

[02:26:16] - [02:26:19]

Harshith Vaddiparthi | Outskill: You might have to go ahead and buy the domain.

[02:26:20] - [02:26:34]

Harshith Vaddiparthi | Outskill: It depends on the domain pricing and everything, because this domain... it depends. Dot-com domains are way more expensive. The shorter the domain, the more expensive it gets, but you can, you know, definitely find domains that you would like.

[02:26:35] - [02:26:45]

Harshith Vaddiparthi | Outskill: I'm gonna show that, okay? Post it on Vercel, and there is. I might not be able to get a domain and buy it right now, because I just bought, like, a ton of domains recently.

[02:26:45] - [02:26:47]

Harshith Vaddiparthi | Outskill: I can show you. I can show you how.

[02:26:51] - [02:26:52]

Harshith Vaddiparthi | Outskill: Bye.

[02:26:52] - [02:26:53]

Harshith Vaddiparthi | Outskill: And?

[02:26:53] - [02:26:54]

Harshith Vaddiparthi | Outskill: Connect.

[02:26:55] - [02:27:07]

Harshith Vaddiparthi | Outskill: Domain. Yes, Chris says, don't forget my secret sauce. This time, Chris, I actually kind of forgot. Let me... I'm so sorry, because, you know, I'll just add them here, because I'll just remember them, okay?

[02:27:08] - [02:27:09]

Harshith Vaddiparthi | Outskill: Okay.

[02:27:26] - [02:27:30]

Harshith Vaddiparthi | Outskill: I'm gonna put it like that, and then 3. Also, I'm gonna keep it that way, okay?

[02:27:31] - [02:27:36]

Harshith Vaddiparthi | Outskill: Alright, now... Yeah, I'll share everything. Subankar everything, everything would be shared.

[02:27:37] - [02:27:41]

Harshith Vaddiparthi | Outskill: Yeah, guys, one thing you have to remember, all of these have to be interconnected.

[02:27:41] - [02:27:51]

Harshith Vaddiparthi | Outskill: Your local codebase has to be connected to GitHub. Your GitHub has to be connected to Vercel, or whatever, wherever you're hosting, and

[02:27:52] - [02:27:55]

Harshith Vaddiparthi | Outskill: your VCL also has to be connected to domain.

[02:27:55] - [02:28:08]

Harshith Vaddiparthi | Outskill: this just gives the most efficient, you know, coding experience, or the most experienced, shipping, you know, or product publishing experience, because if I just sit down and I make a change on my anti-gravity.

[02:28:09] - [02:28:19]

Harshith Vaddiparthi | Outskill: I just have to push the change to GitHub. GitHub is connected to WordCell, WordCell is connected to my domain, so all of that properly just goes ahead and

[02:28:19] - [02:28:28]

Harshith Vaddiparthi | Outskill: I know, deploys, right? And yes, Vercel is free. I think I've been using Vercel for about 2 years with a lot of projects, I haven't paid anything just yet.

[02:28:28] - [02:28:37]

Harshith Vaddiparthi | Outskill: But you can, it depends on the... I think the organization thing you have to pay for, but a free hobby version, it's totally free.

[02:28:37] - [02:28:39]

Harshith Vaddiparthi | Outskill: Is this clear, guys?

[02:28:39] - [02:28:44]

Harshith Vaddiparthi | Outskill: Hosting locally, then pushing to GitHub, then Vercel, then Connect Domain. Is this clear?

[02:28:44] - [02:28:45]

Harshith Vaddiparthi | Outskill: Right, that's clear, right?

[02:28:45] - [02:28:54]

Harshith Vaddiparthi | Outskill: I mean, look at how, like, a non-coder is, you know, explaining to other, you know, fellow coders and non-coders, right? Guys, I asked the same thing to my

[02:28:54] - [02:29:06]

Harshith Vaddiparthi | Outskill: you know, to my developer friend, and he was like, oh, you would have to know something called as CICD pipeline, right? I was like, oh, what is the CI-CD pipeline, right?

[02:29:06] - [02:29:08]

Harshith Vaddiparthi | Outskill: Guys, I think at this point.

[02:29:08] - [02:29:12]

Harshith Vaddiparthi | Outskill: They just make up all these names to just sound intimidating.

[02:29:13] - [02:29:32]

Harshith Vaddiparthi | Outskill: Yeah, I mean, this is literally what a CI-CD pipeline is, and I forgot what this even means. Like, I forgot what the full form is. That's the whole point, you don't even have to know what this means. Full form, I forgot what it means, let's see. Continuous integration and continuous delivery. I mean, was that that difficult, guys, to my developer friend who explained it that way, right?

[02:29:33] - [02:29:41]

Harshith Vaddiparthi | Outskill: Okay? So, it's... you just have to understand it, right? Just, you know, bring it down to first principles, and I'll all be able to understand.

[02:29:41] - [02:29:54]

Harshith Vaddiparthi | Outskill: Okay, IT managers need to survive, that's why they say it like that. True, like, you have to make up, you know, cook up all these names. Okay, so I would say, you guys also now know CICD pipeline, right?

[02:29:55] - [02:29:59]

Harshith Vaddiparthi | Outskill: Okay, if someone says, okay, I'll be like, yes, I do know what a CICD pipeline is.

[02:29:59] - [02:30:00]

Harshith Vaddiparthi | Outskill: Okay?

[02:30:01] - [02:30:08]

Harshith Vaddiparthi | Outskill: Now... The next part about this is actually going to be, let's start pushing this to GitHub.

[02:30:08] - [02:30:11]

Harshith Vaddiparthi | Outskill: Now, we have the codebase, I'm gonna mark it as green.

[02:30:11] - [02:30:18]

Harshith Vaddiparthi | Outskill: The next thing that we have to do right now is push it to GitHub and host it locally, right? I'll kind of walk you through this quickly.

[02:30:19] - [02:30:21]

Harshith Vaddiparthi | Outskill: Push it to GitHub. Now, GitHub?

[02:30:24] - [02:30:30]

Harshith Vaddiparthi | Outskill: open GitHub, and just make sure you have your GitHub account fully connected, right?

[02:30:31] - [02:30:34]

Harshith Vaddiparthi | Outskill: your GitHub account fully connected, so this is my GitHub account.

[02:30:34] - [02:30:36]

Harshith Vaddiparthi | Outskill: Let me copy that.

[02:30:37] - [02:30:38]

Harshith Vaddiparthi | Outskill: Right, let me copy that.

[02:30:39] - [02:30:40]

Harshith Vaddiparthi | Outskill: Let me go back.

[02:30:41] - [02:30:49]

Harshith Vaddiparthi | Outskill: And now, here's how you connect it, right? We'll be exploring this in the workbook in a much better way, but I quickly want to show you how I would do this.

[02:30:50] - [02:30:52]

Harshith Vaddiparthi | Outskill: paste this, and I would just be like.

[02:30:53] - [02:31:12]

Harshith Vaddiparthi | Outskill: hey, here is my GitHub account. Can you go ahead and fully connect to my GitHub account, using GitHub CLI, using GitHub command line interface, and just give me the code, I'll copy the code and just, you know, add it in the link, and let's fully connect to my GitHub.

[02:31:13] - [02:31:13]

Harshith Vaddiparthi | Outskill: Again.

[02:31:14] - [02:31:32]

Harshith Vaddiparthi | Outskill: Don't have to stress about what a CLI means right now. All it just means is a easier way for computers to communicate and understand. That's basically what it is. Okay? So now it's first checking if the GitHub command interface exists. So I'm gonna allow it, I'm gonna say, yes, it does exist.

[02:31:33] - [02:31:41]

Harshith Vaddiparthi | Outskill: I've actually installed it before, right, so it does exist. If it's not already there, it's gonna install it for you. That's gonna be easy.

[02:31:41] - [02:31:47]

Harshith Vaddiparthi | Outskill: Okay, Diwakar says, GitHub is a public resource, so anyone can connect or copy?

[02:31:47] - [02:31:54]

Harshith Vaddiparthi | Outskill: That's only if your repository is public. If your repository is public, they can. If it's private, they cannot.

[02:31:54] - [02:31:59]

Harshith Vaddiparthi | Outskill: Okay, so I do have my GitHub connected, so all that I'm gonna do right now is just say.

[02:32:00] - [02:32:09]

Harshith Vaddiparthi | Outskill: That is amazing. Can you now go ahead and push this entire codebase, the entire Harshith skills...

[02:32:09] - [02:32:16]

Harshith Vaddiparthi | Outskill: dashboard, my entire codebase, to my GitHub repository, create a GitHub repository, and just push it.

[02:32:17] - [02:32:25]

Harshith Vaddiparthi | Outskill: Once again, guys, this used to be, like, commands. There were commands like git push, git... I don't know what that is.

[02:32:25] - [02:32:31]

Harshith Vaddiparthi | Outskill: Right? Guys, one second, one second, okay? Another thing is, please don't focus on my prompts.

[02:32:31] - [02:32:36]

Harshith Vaddiparthi | Outskill: So, see, guys, don't focus on my prompts. The prompts, you can make them.

[02:32:36] - [02:32:55]

Harshith Vaddiparthi | Outskill: Right? If you understand the concept, you can just ask it. Like, see, I don't have a template prompt, right? I'm just asking it, and it's so bad, you know? My grammar might be kind of, you know, here and there when I'm talking to it. Just talk to it like your friend. That's it. Just talk to it like your friend, ask it, like, a hundred times. But Margishi, it'll all be shared, though. All the prompts will be shared.

[02:32:55] - [02:32:59]

Harshith Vaddiparthi | Outskill: the workbook is there, so everything should be there. Guys, boom!

[02:32:59] - [02:33:01]

Harshith Vaddiparthi | Outskill: The dashboard is now live.

[02:33:01] - [02:33:11]

Harshith Vaddiparthi | Outskill: Yeah, right, Toro? I think Toro just mentioned, there used to be a commit, like, you know, they used to go on terminal, they used to type, git, commit, guys, I mean...

[02:33:11] - [02:33:17]

Harshith Vaddiparthi | Outskill: I mean, that's so difficult, I would not be able to do that. You know, guys, Published.

[02:33:18] - [02:33:29]

Harshith Vaddiparthi | Outskill: Okay, these files... why did I say 33... yeah, 33 minutes ago, they're edited 33 minutes ago, that's why it's up there, but that's literally the entire codebase right here, right?

[02:33:29] - [02:33:35]

Harshith Vaddiparthi | Outskill: Now, Is this clear, guys? Pushing to your own GitHub account, is that clear?

[02:33:36] - [02:33:38]

Harshith Vaddiparthi | Outskill: Is that clear?

[02:33:39] - [02:33:43]

Harshith Vaddiparthi | Outskill: Okay? Now... Let me quickly go to this one.

[02:33:43] - [02:33:46]

Harshith Vaddiparthi | Outskill: We have done this as well. Now.

[02:33:46] - [02:33:51]

Harshith Vaddiparthi | Outskill: The next part of the CI-CD pipeline is...

[02:33:51] - [02:34:02]

Harshith Vaddiparthi | Outskill: the word sell. Okay, now, Helen, it'll answer your question. Why did I push the code to GitHub? Because I want the code to stay on the cloud so that

[02:34:02] - [02:34:15]

Harshith Vaddiparthi | Outskill: it can run on Vercel, and I kept it public, I believe it is public. Yeah, the codebase is public, because I want you guys also to, you know, test it out, you guys can, you know, make copies of this, it's completely free, you can do that.

[02:34:15] - [02:34:17]

Harshith Vaddiparthi | Outskill: Now I'm gonna be like.

[02:34:18] - [02:34:29]

Harshith Vaddiparthi | Outskill: Okay, this is great. Can you also go ahead and connect to Vercel CLI? If it's already connected, can you just go ahead and host this

[02:34:29] - [02:34:33]

Harshith Vaddiparthi | Outskill: host this codebase on Vercel as well.

[02:34:34] - [02:34:42]

Harshith Vaddiparthi | Outskill: That's one way of doing it, right? That's one way of doing it where you can just ask it. If it's connected to the Vercel CLI, it's gonna do it automatically.

[02:34:42] - [02:34:44]

Harshith Vaddiparthi | Outskill: Right? That's basically what it is.

[02:34:45] - [02:34:51]

Harshith Vaddiparthi | Outskill: But while it's doing it, I also want to show you I think my,

[02:34:52] - [02:35:02]

Harshith Vaddiparthi | Outskill: Quota has just reached. Okay, I think my, credits have just reached. So, okay, you know what? Let me... let me show you the dashboard way as well, okay?

[02:35:02] - [02:35:08]

Harshith Vaddiparthi | Outskill: Now, it'll make sense. Why... what is Vercel? What is... why... why Vercel? Let's... let's show this to you, okay? Now...

[02:35:09] - [02:35:20]

Harshith Vaddiparthi | Outskill: Guys, once again, clear, right? GitHub part is clear, right? The GitHub part, why we have taken our code, moved it onto, like, a cloud version. That is clear. Now.

[02:35:20] - [02:35:23]

Harshith Vaddiparthi | Outskill: The next version is going to be...

[02:35:23] - [02:35:26]

Harshith Vaddiparthi | Outskill: posted on a tool called Vercel.

[02:35:26] - [02:35:28]

Harshith Vaddiparthi | Outskill: Let me open that tool.

[02:35:28] - [02:35:31]

Harshith Vaddiparthi | Outskill: It's just at Vercel.com.

[02:35:31] - [02:35:35]

Harshith Vaddiparthi | Outskill: And if you log in, This is gonna be your dashboard.

[02:35:36] - [02:35:48]

Harshith Vaddiparthi | Outskill: Right? This is gonna be your dashboard, and you have to connect your GitHub to your Vercel, right? It'll give you a prompt, like, log in with Google or log in with GitHub.

[02:35:49] - [02:35:53]

Harshith Vaddiparthi | Outskill: I recommend you just, you know, log in with GitHub, that'll just make it very easy. Now.

[02:35:54] - [02:35:57]

Harshith Vaddiparthi | Outskill: Now, look at this, okay? Look at this, guys, okay? Simple.

[02:35:58] - [02:36:00]

Harshith Vaddiparthi | Outskill: Click on Add New.

[02:36:01] - [02:36:01]

Harshith Vaddiparthi | Outskill: Select.

[02:36:02] - [02:36:03]

Harshith Vaddiparthi | Outskill: project.

[02:36:04] - [02:36:06]

Harshith Vaddiparthi | Outskill: Now, the moment you select project.

[02:36:06] - [02:36:12]

Harshith Vaddiparthi | Outskill: It's already connected to my GitHub account of Harshith Right?

[02:36:12] - [02:36:19]

Harshith Vaddiparthi | Outskill: Now, the moment it's connected, it's gonna show all the repositories that I have just worked on.

[02:36:20] - [02:36:26]

Harshith Vaddiparthi | Outskill: So, you can just search for Harsh *****

[02:36:26] - [02:36:32]

Harshith Vaddiparthi | Outskill: So yeah, that's... guys, right here. It's right here. Harshith Skills Dashboard, which we just worked on 3 minutes ago.

[02:36:33] - [02:36:34]

Harshith Vaddiparthi | Outskill: Guys, is that making sense?

[02:36:35] - [02:36:37]

Harshith Vaddiparthi | Outskill: Am I making sense, guys?

[02:36:37] - [02:36:38]

Harshith Vaddiparthi | Outskill: Of what we're doing right now.

[02:36:39] - [02:36:43]

Harshith Vaddiparthi | Outskill: Right? It's already connected, so it's already gonna show up.

[02:36:44] - [02:36:47]

Harshith Vaddiparthi | Outskill: Now, just click on... import.

[02:36:48] - [02:36:53]

Harshith Vaddiparthi | Outskill: Click on import, The moment you click on import.

[02:36:54] - [02:36:57]

Harshith Vaddiparthi | Outskill: You just have to go ahead and click on deploy.

[02:37:02] - [02:37:05]

Harshith Vaddiparthi | Outskill: Give it a second, guys, just give it a second right now.

[02:37:12] - [02:37:14]

Harshith Vaddiparthi | Outskill: Taking a second, taking a second...

[02:37:18] - [02:37:22]

Harshith Vaddiparthi | Outskill: Let's see. If there are some errors, I'll also try to show you how to

[02:37:22] - [02:37:26]

Harshith Vaddiparthi | Outskill: you know, kind of debug them, but I hope it should just work.

[02:37:26] - [02:37:29]

Harshith Vaddiparthi | Outskill: But it's a very simple, repository.

[02:37:30] - [02:37:34]

Harshith Vaddiparthi | Outskill: Let's give it a second... So now, here's what's happening, right?

[02:37:35] - [02:37:39]

Harshith Vaddiparthi | Outskill: We have taken our codebase, We have pushed it to GitHub.

[02:37:40] - [02:37:46]

Harshith Vaddiparthi | Outskill: Now, we have connected GitHub, our particular project, to ourself.

[02:37:47] - [02:37:51]

Harshith Vaddiparthi | Outskill: Now, our codebase... The exact same way.

[02:37:51] - [02:38:07]

Harshith Vaddiparthi | Outskill: how it was running on our computer is now running on Vercel's servers, which are open and running 24 by 7. That's the only reason why we're doing it, because we want it running 24 by 7.

[02:38:07] - [02:38:11]

Harshith Vaddiparthi | Outskill: Now, I just have to go ahead and click on this.

[02:38:11] - [02:38:14]

Harshith Vaddiparthi | Outskill: And boom, guys, the dashboard is right here.

[02:38:15] - [02:38:29]

Harshith Vaddiparthi | Outskill: Guys, can I get a boom in the chat? We went from nothing to going ahead and deploying a production-grade dashboard. I'm gonna drop the link in the chat as well, but I just wanna let some booms coming in, guys.

[02:38:29] - [02:38:38]

Harshith Vaddiparthi | Outskill: get me all the booms as possible, because we went from nothing to build something out. Yeah, Jay, Vercel is free, yes.

[02:38:38] - [02:38:43]

Harshith Vaddiparthi | Outskill: The pro plan... there's a pro plan, but Vercel is... hobby plan is free.

[02:38:43] - [02:38:44]

Harshith Vaddiparthi | Outskill: Right?

[02:38:44] - [02:38:46]

Harshith Vaddiparthi | Outskill: That's literally just it.

[02:38:48] - [02:38:51]

Harshith Vaddiparthi | Outskill: Now, let me just go ahead and...

[02:38:51] - [02:38:58]

Harshith Vaddiparthi | Outskill: click this link, and I'm just... I'm just sharing the link with everyone, you can just go ahead and check out the link, but...

[02:38:59] - [02:39:03]

Harshith Vaddiparthi | Outskill: But while you're at it, You can see the project is live.

[02:39:04] - [02:39:11]

Harshith Vaddiparthi | Outskill: But now you might be wondering, okay, I don't want something like HarshithskillsDashboard.versal.app

[02:39:11] - [02:39:17]

Harshith Vaddiparthi | Outskill: I just want Harshith.com. That's it. I just want Harshith.com.

[02:39:17] - [02:39:23]

Harshith Vaddiparthi | Outskill: How do you do that? Let me show that to you as well. First, let's go back to our drawing board.

[02:39:23] - [02:39:25]

Harshith Vaddiparthi | Outskill: We have done hosting it on Vercel.

[02:39:26] - [02:39:29]

Harshith Vaddiparthi | Outskill: The last thing that we have is connecting a domain.

[02:39:29] - [02:39:31]

Harshith Vaddiparthi | Outskill: Okay, connecting a domain.

[02:39:31] - [02:39:37]

Harshith Vaddiparthi | Outskill: Okay? Now, the way you connect a domain, first, to even connect a domain, you need a domain.

[02:39:37] - [02:39:42]

Harshith Vaddiparthi | Outskill: To get a domain, you have to either go to... there are a lot of platforms you can go to.

[02:39:42] - [02:39:45]

Harshith Vaddiparthi | Outskill: You can go to Godaddy.com.

[02:39:45] - [02:39:48]

Harshith Vaddiparthi | Outskill: It's... I don't know why they named it that way, I mean...

[02:39:48] - [02:39:55]

Harshith Vaddiparthi | Outskill: It is what it is, right? Okay, there's GoDaddy.com, and then there is Namecheap, which is what I use.

[02:39:55] - [02:39:57]

Harshith Vaddiparthi | Outskill: There is Hostinger as well.

[02:39:57] - [02:40:00]

Harshith Vaddiparthi | Outskill: Yeah, I think Suzanne just mentioned Namecheap.

[02:40:01] - [02:40:04]

Harshith Vaddiparthi | Outskill: The cheapest domain, I don't know, I mean, you have to kind of find it out, right?

[02:40:05] - [02:40:09]

Harshith Vaddiparthi | Outskill: You have to kind of, you know, scroll through and find out, because every domain might be different.

[02:40:09] - [02:40:11]

Harshith Vaddiparthi | Outskill: Let's go to my account.

[02:40:11] - [02:40:14]

Harshith Vaddiparthi | Outskill: I'm gonna show you some of my domains.

[02:40:15] - [02:40:21]

Harshith Vaddiparthi | Outskill: So, see, dot-com is gonna be very expensive, but... I mean, I would say...

[02:40:22] - [02:40:25]

Harshith Vaddiparthi | Outskill: you know, something like .XYZ would be very cheap.

[02:40:25] - [02:40:37]

Harshith Vaddiparthi | Outskill: Right, okay, so I got something like... so I've been working on a project, right? I've been working on something, and I got this. I got a domain, for, like, Agentscraper... I got a domain, right? Okay, Agentscraper.dev.

[02:40:37] - [02:40:43]

Harshith Vaddiparthi | Outskill: Now, Venkat, please don't spam in the chat. I saw it, which is a good recommendation, big rock.

[02:40:43] - [02:40:46]

Harshith Vaddiparthi | Outskill: But let's not spam the chat, because it'll kind of divert the attention.

[02:40:46] - [02:40:47]

Harshith Vaddiparthi | Outskill: Right?

[02:40:47] - [02:40:56]

Harshith Vaddiparthi | Outskill: But I do get your excitement, and I would do the same, though, for PS. Okay, so let's see the domain, okay? Now, so you have to buy a domain.

[02:40:56] - [02:41:00]

Harshith Vaddiparthi | Outskill: the way you buy the domains is click on Domains.

[02:41:00] - [02:41:10]

Harshith Vaddiparthi | Outskill: and, you know, search for a domain, right? Let's, let's search something like, Skill... Dashboard.

[02:41:11] - [02:41:16]

Harshith Vaddiparthi | Outskill: skills dashboard, and you're gonna find a ton of these dashboards, right? Sorry, I got some done in these water.

[02:41:17] - [02:41:31]

Harshith Vaddiparthi | Outskill: That's, like, \$5,000, guys. This is, like, \$5,000. You can find cheaper ones, like the .world, there's .co.inc.fit, there are a ton of these. You have to scout, though. It depends on you, you have to scout.

[02:41:32] - [02:41:32]

Harshith Vaddiparthi | Outskill: Right?

[02:41:33] - [02:41:37]

Harshith Vaddiparthi | Outskill: You have to scout. Let me... let me make it in dollars, it may just be very easy.

[02:41:38] - [02:41:43]

Harshith Vaddiparthi | Outskill: Yeah, around \$5,000 there, right, so you have it here.

[02:41:44] - [02:41:44]

Harshith Vaddiparthi | Outskill: Okay.

[02:41:45] - [02:41:45]

Harshith Vaddiparthi | Outskill: No.

[02:41:46] - [02:41:59]

Harshith Vaddiparthi | Outskill: Now that you have it here, you can get whatever domain that you want. A lot of people, what they do for a personal domain is, let's say if they're in AI, they get something in AI, or something like me. I think Mi is also very famous. Yeah, Mihir Shah says.

[02:41:59] - [02:42:08]

Harshith Vaddiparthi | Outskill: For a personal portfolio, you can get a .me, yes. A .me is also good, but a .com is just... it's a standard, right? It's a global standard.

[02:42:08] - [02:42:18]

Harshith Vaddiparthi | Outskill: That's all. Now, you can just go ahead and get a domain. You can buy a domain. I'll go to my existing domains, which I just recently just got. I just got them, like, a couple days ago.

[02:42:19] - [02:42:23]

Harshith Vaddiparthi | Outskill: Okay. Now, what I'm gonna do right now is I'm gonna show you how it works.

[02:42:25] - [02:42:44]

Harshith Vaddiparthi | Outskill: Right? So, I can't reveal the records, but the way this works is, if I show this, right, if I open this, there are going to be certain records in, like, advanced DNS, right? So, I'm not going to open that because it has my domain records, but if I open that, you're going to get some different codes, right? Different records and all that.

[02:42:44] - [02:42:48]

Harshith Vaddiparthi | Outskill: All that you have to do is just go back.

[02:42:48] - [02:42:53]

Harshith Vaddiparthi | Outskill: to the exact dashboard, right, this one. Let me continue to dashboard.

[02:42:53] - [02:42:56]

Harshith Vaddiparthi | Outskill: the versatile Dashboard, it means. Now.

[02:42:56] - [02:43:00]

Harshith Vaddiparthi | Outskill: You have to go back to your Vercel dashboard of your particular project.

[02:43:00] - [02:43:05]

Harshith Vaddiparthi | Outskill: Now that you have it, All you really have to do right now is just

[02:43:05] - [02:43:12]

Harshith Vaddiparthi | Outskill: scroll down, and then you'll be finding domains. Guys, do you see that? On the left side, you have domains.

[02:43:12] - [02:43:17]

Harshith Vaddiparthi | Outskill: Right, domains on the left side? Off your dashboard. And I hope you guys know how to get here.

[02:43:18] - [02:43:28]

Harshith Vaddiparthi | Outskill: Getting here is actually very simple. Just go to Home, and all your projects would be here. The most recent one should be here. Click on that, and this opens up.

[02:43:29] - [02:43:37]

Harshith Vaddiparthi | Outskill: Now... Click on Domains, Now, once you click on Domains.

[02:43:37] - [02:43:46]

Harshith Vaddiparthi | Outskill: You can see, you can add existing domains, or even buy. Click on Add Existing Domain. Now, type in whatever the domain is.

[02:43:50] - [02:43:52]

Harshith Vaddiparthi | Outskill: Just type in whatever the domain is.

[02:43:52] - [02:43:55]

Harshith Vaddiparthi | Outskill: And then click on Add Domain.

[02:43:55] - [02:44:03]

Harshith Vaddiparthi | Outskill: Once that's done, you are gonna get something like... These... these configurations, right?

[02:44:04] - [02:44:08]

Harshith Vaddiparthi | Outskill: All that you have to do is just Copy, type A,

[02:44:08] - [02:44:15]

Harshith Vaddiparthi | Outskill: inside the advanced DNS, you know what, let me just show it off. Let's... let's just... let's just show it. It'll just make it easy for you guys.

[02:44:16] - [02:44:17]

Harshith Vaddiparthi | Outskill: Yeah, right now.

[02:44:18] - [02:44:21]

Harshith Vaddiparthi | Outskill: Click on Advanced, under A,

[02:44:22] - [02:44:31]

Harshith Vaddiparthi | Outskill: Just literally just copy that, guys. I hope I'm making sense, right? Just do A, the add the rate, and then that value. The same thing for CNAME, this, and that.

[02:44:31] - [02:44:33]

Harshith Vaddiparthi | Outskill: And it is gonna connect to the domain.

[02:44:33] - [02:44:39]

Harshith Vaddiparthi | Outskill: Guys, is that clear? Is that clear on how you can also connect the domains as well?

[02:44:39] - [02:44:46]

Harshith Vaddiparthi | Outskill: Just click on the new record, exactly see whatever it is on the, you know, whatever cell is showing, and do that.

[02:44:47] - [02:44:50]

Harshith Vaddiparthi | Outskill: Okay, let me... let me explain that again. Let me explain that again, okay?

[02:44:51] - [02:44:56]

Harshith Vaddiparthi | Outskill: See, you have added your domain. Once you've added the domain, this thing shows up.

[02:44:57] - [02:45:02]

Harshith Vaddiparthi | Outskill: Just view configurations, you have the complete configurations right here.

[02:45:02] - [02:45:04]

Harshith Vaddiparthi | Outskill: Type is A.

[02:45:04] - [02:45:09]

Harshith Vaddiparthi | Outskill: Name is at the rate. Value is this.

[02:45:09] - [02:45:10]

Harshith Vaddiparthi | Outskill: Right?

[02:45:10] - [02:45:20]

Harshith Vaddiparthi | Outskill: Now... Let's go back to... Advanced DNS. Again, this exact same thing would be on whatever platform you choose.

[02:45:21] - [02:45:29]

Harshith Vaddiparthi | Outskill: Because that's the standard. Namecheap, GoDaddy, whatever it is, the standard is going to be the same, the protocol is the same. Now.

[02:45:31] - [02:45:38]

Harshith Vaddiparthi | Outskill: A record, Post is at the rate, IP address is... this.

[02:45:39] - [02:45:41]

Harshith Vaddiparthi | Outskill: So let me... is that.

[02:45:41] - [02:45:44]

Harshith Vaddiparthi | Outskill: Now... That this part is done.

[02:45:45] - [02:45:46]

Harshith Vaddiparthi | Outskill: Let's do the next one.

[02:45:47] - [02:45:50]

Harshith Vaddiparthi | Outskill: s name, www, and this one. Let's do that.

[02:45:51] - [02:45:54]

Harshith Vaddiparthi | Outskill: Let's find... C name?

[02:45:54] - [02:45:58]

Harshith Vaddiparthi | Outskill: WWW, and the target is... this.

[02:45:59] - [02:46:03]

Harshith Vaddiparthi | Outskill: Paste that... Enter, you know, just save it.

[02:46:04] - [02:46:05]

Harshith Vaddiparthi | Outskill: And just save this.

[02:46:08] - [02:46:09]

Harshith Vaddiparthi | Outskill: And?

[02:46:11] - [02:46:13]

Harshith Vaddiparthi | Outskill: just refresh.

[02:46:13] - [02:46:20]

Harshith Vaddiparthi | Outskill: And I think it should be there. Okay, I think Ray Bahiri asks, how am I actually teaching you as a non-coder, you know.

[02:46:20] - [02:46:35]

Harshith Vaddiparthi | Outskill: if I'm a non-coder, you know, how did I learn all this? I think it's just prompting, guys. Anytime I get an issue, all I do is just take a screenshot. There are, you know, my early charts in ChatGPT literally used to be this, right? I used to take a screenshot

[02:46:35] - [02:46:49]

Harshith Vaddiparthi | Outskill: and put it on Claude, and then be like, hey, exactly tell me what to do. And now it's just become even more easy, right? I mean, now with the power of, you know, everything that you're learning in these 14 days, you're fast-tracked, and you know, you literally know everything that you can just do with

[02:46:50] - [02:46:56]

Harshith Vaddiparthi | Outskill: Okay, I don't know, it's taking some time, just keep refreshing it. Under 24 hours is what it should just, you know, take it live.

[02:46:58] - [02:47:08]

Harshith Vaddiparthi | Outskill: Did I save it, or something? It should take around 24 hours, guys, okay? Just give it around 24 hours, and everything should just take it live.

[02:47:09] - [02:47:10]

Harshith Vaddiparthi | Outskill: And try to reload.

[02:47:12] - [02:47:13]

Harshith Vaddiparthi | Outskill: I think it's done.

[02:47:14] - [02:47:29]

Harshith Vaddiparthi | Outskill: Okay, just give it about 24 hours, and then after the configuration, that should be done. But that's basically what it is. It does take some time to configure, but that's literally how you just go ahead and copy-paste inside your DNS. That's it.

[02:47:29] - [02:47:32]

Harshith Vaddiparthi | Outskill: So let's go back... And?

[02:47:33] - [02:47:34]

Harshith Vaddiparthi | Outskill: This is it.

[02:47:35] - [02:47:36]

Harshith Vaddiparthi | Outskill: Alright.

[02:47:36] - [02:47:38]

Harshith Vaddiparthi | Outskill: Now, Everyone.

[02:47:39] - [02:47:44]

Harshith Vaddiparthi | Outskill: Is the entire... CICD pipeline Clear to all of you.

[02:47:45] - [02:47:50]

Harshith Vaddiparthi | Outskill: we went from the entire codebase that we added on GitHub

[02:47:50] - [02:47:52]

Harshith Vaddiparthi | Outskill: To taking it live to production.

[02:47:53] - [02:48:01]

Harshith Vaddiparthi | Outskill: everything we have just done, you literally know the CICD pipeline right now, right? So that's basically that.

[02:48:01] - [02:48:04]

Harshith Vaddiparthi | Outskill: And now, let me get back to my secret sauce.

[02:48:04] - [02:48:11]

Harshith Vaddiparthi | Outskill: If I zoomed in a little bit, I might have... my ADHD mind would have... Honestly, just forgotten this...

[02:48:11] - [02:48:25]

Harshith Vaddiparthi | Outskill: Right? Yeah, someone says, okay, right, Kurt and say it's a very sophisticated name, right? Guys, how's the CICD pipeline? Okay. Okay, Shamim, 60% clear, that's okay. With the workbook, it'll be 100% clear.

[02:48:26] - [02:48:32]

Harshith Vaddiparthi | Outskill: Alright, now that we understood this, the next secret sauce is nothing but another cool repository which I just found.

[02:48:32] - [02:48:34]

Harshith Vaddiparthi | Outskill: What it's basically called?

[02:48:36] - [02:48:39]

Harshith Vaddiparthi | Outskill: interior.dev.

[02:48:39] - [02:48:41]

Harshith Vaddiparthi | Outskill: Again, it's just a repository, guys.

[02:48:42] - [02:48:52]

Harshith Vaddiparthi | Outskill: you know, another repository. You can just search for different components. You're gonna find a ton of these different components, and this is what I've actually been using right now.

[02:48:52] - [02:49:03]

Harshith Vaddiparthi | Outskill: And for the product that I'll also be launching very, very soon, you know, I think you've seen the domain already, so maybe if you come back to that domain, I think there'll be a product live with this UI itself.

[02:49:03] - [02:49:11]

Harshith Vaddiparthi | Outskill: Right? So that's basically what I've been using internally, and I find this is very, very clean, right? And the best part, the best part.

[02:49:11] - [02:49:17]

Harshith Vaddiparthi | Outskill: This is also built on shared CNUI itself.

[02:49:17] - [02:49:24]

Harshith Vaddiparthi | Outskill: Does that make sense, guys? So it's basically like a package with a lot of people just go ahead and, you know.

[02:49:24] - [02:49:37]

Harshith Vaddiparthi | Outskill: build things on top of that and, you know, make it live and everything. Okay, so backend, we might not be able to fully cover in this session, Sunil, right? But I hope you understood the prompting methodology and how to, you know, proceed with all of this.

[02:49:37] - [02:49:45]

Harshith Vaddiparthi | Outskill: If you understood that, you can also, you know, I'll be sharing you, like, a resource on how to connect with SUBABASE, and backend will also be very easy for you.

[02:49:45] - [02:49:47]

Harshith Vaddiparthi | Outskill: Okay? Now...

[02:49:47] - [02:50:01]

Harshith Vaddiparthi | Outskill: This is the other secret sauce which I wanted to share, guys, interior.dev. I've been using it very, very heavily, so... yeah, I'm just gonna keep that. That's a very cool thing, that's what I do. And there's another one that I found out, it's called...

[02:50:01] - [02:50:03]

Harshith Vaddiparthi | Outskill: Beautiful UI.dev?

[02:50:04] - [02:50:14]

Harshith Vaddiparthi | Outskill: It, you know, it just makes these crazy creatives. Guys, do you see these creatives on, like, you know, on different, you know, AI platforms, right? On these AI platforms?

[02:50:15] - [02:50:23]

Harshith Vaddiparthi | Outskill: Okay, guys, once again, the two tools that I'm sharing you guys are literally other design alternatives.

[02:50:23] - [02:50:25]

Harshith Vaddiparthi | Outskill: Go to these designs.

[02:50:25] - [02:50:33]

Harshith Vaddiparthi | Outskill: Go to these designs, check if you like something, let's say you like this component. If you want to integrate that in your dashboard.

[02:50:34] - [02:50:43]

Harshith Vaddiparthi | Outskill: copy the command, give it to your anti-gravity, and it's gonna integrate it... integrate that for you. Is that clear, guys? Are these secret sauce very clear for you guys?

[02:50:43] - [02:50:59]

Harshith Vaddiparthi | Outskill: One is beautifului.dev, and the other... yeah, they're all free, exactly, they're all just, you know, code bases, right? So there's nothing to do there, it's just a

code base. So there's nothing to pay for, it's just code, which, you know, someone has just built out, and it's out for free, which you can just use.

[02:51:01] - [02:51:07]

Harshith Vaddiparthi | Outskill: Right? Once again, guys, once again, everything clear on how to use

[02:51:07] - [02:51:23]

Harshith Vaddiparthi | Outskill: you know, all these three secret sauce to make your dashboard even, even, you know, production-grade. TweakCN, interior.dev, and beautiful UI. These are things that I found out, so I wanted to share with you. They're very, very cool to use. Again, just copy, paste whatever you like.

[02:51:23] - [02:51:30]

Harshith Vaddiparthi | Outskill: let's say you like this thing, copy that, put it on anti-gravity, integrate that in your UI, that's basically just it.

[02:51:30] - [02:51:34]

Harshith Vaddiparthi | Outskill: Guys, everyone clear with this, right? Everyone clear with this?

[02:51:35] - [02:51:37]

Harshith Vaddiparthi | Outskill: Everyone fully clear with how to go ahead and use this?

[02:51:38] - [02:51:39]

Harshith Vaddiparthi | Outskill: Yes!

[02:51:40] - [02:51:41]

Harshith Vaddiparthi | Outskill: Yes?

[02:51:41] - [02:51:42]

Harshith Vaddiparthi | Outskill: Okay.

[02:51:42] - [02:51:45]

Harshith Vaddiparthi | Outskill: Alright, perfect. Now that this part is done.

[02:51:46] - [02:52:00]

Harshith Vaddiparthi | Outskill: We have the next 15 minutes, so I'm gonna kind of give you an overview on how to build your own portfolio as well. I might not be able to go completely deep into it, but I'm going to show you the exact methodology.

[02:52:00] - [02:52:07]

Harshith Vaddiparthi | Outskill: And this exact same steps, which you just have to repeat by yourself, and we'll also kind of go through that in the workbook too, right? Now.

[02:52:08] - [02:52:11]

Harshith Vaddiparthi | Outskill: Let me just go to my folder now.

[02:52:12] - [02:52:12]

Harshith Vaddiparthi | Outskill: No.

[02:52:12] - [02:52:19]

Harshith Vaddiparthi | Outskill: Guys, like I promised, we all want to go ahead and create our own portfolio that we'll be very proud of.

[02:52:19] - [02:52:27]

Harshith Vaddiparthi | Outskill: Now that we understood the entire pipeline on how to build everything, let's build a very, very simple website as well, okay? Now.

[02:52:29] - [02:52:35]

Harshith Vaddiparthi | Outskill: I'm gonna create a new folder, I'm gonna call it... Harshith...

[02:52:37] - [02:52:55]

Harshith Vaddiparthi | Outskill: portfolio, right? I'm just calling it my portfolio, and I think you guys know the drill already. Just open this... you can just drag and drop this in anti-gravity. My anti-gravity is on my Mac, so I don't... I don't think you guys can see it, but you just drag and drop that inside the anti-gravity app.

[02:52:55] - [02:52:57]

Harshith Vaddiparthi | Outskill: And it's gonna open it like this.

[02:52:57] - [02:52:58]

Harshith Vaddiparthi | Outskill: That's it.

[02:52:58] - [02:53:05]

Harshith Vaddiparthi | Outskill: Now, Now, we have, you know, a completely blank folder.

[02:53:05] - [02:53:10]

Harshith Vaddiparthi | Outskill: Where I wanna just go ahead and create a complete portfolio of myself.

[02:53:11] - [02:53:15]

Harshith Vaddiparthi | Outskill: And for portfolio, I'm gonna take my LinkedIn as a reference.

[02:53:15] - [02:53:23]

Harshith Vaddiparthi | Outskill: Right, I'm going to take my LinkedIn as a reference. So let me open my LinkedIn as well. And once again, if you do not have a LinkedIn account.

[02:53:24] - [02:53:26]

Harshith Vaddiparthi | Outskill: A resume should also work.

[02:53:26] - [02:53:30]

Harshith Vaddiparthi | Outskill: Right? So let's go ahead and open my LinkedIn.

[02:53:30] - [02:53:44]

Harshith Vaddiparthi | Outskill: Yeah, so there's my LinkedIn that's open. Couple of ways to do it, I would say. One is you could just copy the link, but I would recommend, and it's better, if you print the... print it.

[02:53:44] - [02:53:48]

Harshith Vaddiparthi | Outskill: Just do Command-P, And just print your entire, you know.

[02:54:03] - [02:54:03]

Harshith Vaddiparthi | Outskill: An order.

[02:54:05] - [02:54:10]

Harshith Vaddiparthi | Outskill: Yeah, guys, am I here? Am I just confirming, the same page, right?

[02:54:11] - [02:54:14]

Harshith Vaddiparthi | Outskill: Okay... okay, okay, okay. Oof.

[02:54:14] - [02:54:26]

Harshith Vaddiparthi | Outskill: Yeah, we're close. So my Mac basically crashed, guys. My Mac crashed because of all of my websites and everything that you guys have seen. So let me quickly quit all of them for a second.

[02:54:28] - [02:54:32]

Harshith Vaddiparthi | Outskill: Yeah, let me... let me turn off my video and turn on again.

[02:54:33] - [02:54:35]

Harshith Vaddiparthi | Outskill: Okay... Yeah.

[02:54:37] - [02:54:43]

Harshith Vaddiparthi | Outskill: Yeah, you basically need more RAM, guys. Yeah, it's exactly, Ray, that's exactly what it is. It's basically a RAM issue.

[02:54:43] - [02:54:49]

Harshith Vaddiparthi | Outskill: Oh, you guys can see all of this as well? So, cool, okay. Let me quit this for now.

[02:54:50] - [02:54:52]

Harshith Vaddiparthi | Outskill: Not as well for now.

[02:54:53] - [02:54:57]

Harshith Vaddiparthi | Outskill: Yeah, guys, this is, something I'm just doing really quick.

[02:54:58] - [02:55:00]

Harshith Vaddiparthi | Outskill: Oh, Zoom, I can't quit, *****

[02:55:01] - [02:55:03]

Harshith Vaddiparthi | Outskill: That'd be crazy if I just quit Zoom.

[02:55:05] - [02:55:06]

Harshith Vaddiparthi | Outskill: Okay.

[02:55:06] - [02:55:07]

Harshith Vaddiparthi | Outskill: Whew!

[02:55:08] - [02:55:09]

Harshith Vaddiparthi | Outskill: Alright.

[02:55:09] - [02:55:10]

Harshith Vaddiparthi | Outskill: Now?

[02:55:10] - [02:55:15]

Harshith Vaddiparthi | Outskill: Let me quickly... Just, you know, tell you guys what we were doing.

[02:55:18] - [02:55:19]

Harshith Vaddiparthi | Outskill: Yeah.

[02:55:21] - [02:55:22]

Harshith Vaddiparthi | Outskill: Yes, the folder.

[02:55:23] - [02:55:36]

Harshith Vaddiparthi | Outskill: Okay, so right now, all that I just did was open the folder of Harshith.arshith skills in my anti-gravity. That's it, right?

[02:55:36] - [02:55:42]

Harshith Vaddiparthi | Outskill: Once I've done it, I'm gonna, guys, I'm gonna open Chrome, So, wish me luck!

[02:55:43] - [02:55:49]

Harshith Vaddiparthi | Outskill: It's opening? Yeah, it's open. Okay, my... also open.

[02:55:49] - [02:55:56]

Harshith Vaddiparthi | Outskill: I'm not gonna restore the 118 pages that I have, I'm just gonna quietly go to LinkedIn, Okay?

[02:55:57] - [02:56:01]

Harshith Vaddiparthi | Outskill: And let me open my... LinkedIn? Yes. Now.

[02:56:02] - [02:56:06]

Harshith Vaddiparthi | Outskill: How do you go ahead and use your creative website out of it?

[02:56:07] - [02:56:11]

Harshith Vaddiparthi | Outskill: I would suggest, like I said, go ahead and print it.

[02:56:11] - [02:56:18]

Harshith Vaddiparthi | Outskill: If you print it, you're gonna... you're gonna get the complete credentials and all of that. Just make sure it loads completely.

[02:56:18] - [02:56:33]

Harshith Vaddiparthi | Outskill: and then you print it, that's much better. You'll get all of the information and everything. And of course, you can do Show All as well. You can print multiple pages as well, right? You can do that. For now, let me just go ahead and print this.

[02:56:33] - [02:56:34]

Harshith Vaddiparthi | Outskill: Right?

[02:56:34] - [02:56:37]

Harshith Vaddiparthi | Outskill: Now, once you do that, just go ahead and save it.

[02:56:38] - [02:56:41]

Harshith Vaddiparthi | Outskill: I am gonna save it on my desktop for now.

[02:56:43] - [02:56:45]

Harshith Vaddiparthi | Outskill: Where is it, on my desktop?

[02:56:46] - [02:56:50]

Harshith Vaddiparthi | Outskill: Okay, it's here. Okay, now... Now that I have it here.

[02:56:50] - [02:56:54]

Harshith Vaddiparthi | Outskill: And I have my anti-gravity also here.

[02:56:54] - [02:57:00]

Harshith Vaddiparthi | Outskill: All that I'm gonna do right now is just... Drag and drop this

[02:57:00] - [02:57:04]

Harshith Vaddiparthi | Outskill: here. You can either drag and drop this here, or, you know, you can just put it

[02:57:05] - [02:57:06]

Harshith Vaddiparthi | Outskill: One second, because...

[02:57:07] - [02:57:12]

Harshith Vaddiparthi | Outskill: It's usually just to add it here, okay? Okay, for some reason it's not adding it.

[02:57:12] - [02:57:17]

Harshith Vaddiparthi | Outskill: I would suggest Put the folder inside... put the file inside the folder.

[02:57:17] - [02:57:25]

Harshith Vaddiparthi | Outskill: and then it should clearly show up, right? Guys, do you see this? Everyone clear with what I just did, guys?

[02:57:25] - [02:57:32]

Harshith Vaddiparthi | Outskill: everyone clear, right, with what I just did? I just took a, you know, print of my LinkedIn, and I just put it here. That's it.

[02:57:32] - [02:57:33]

Harshith Vaddiparthi | Outskill: No.

[02:57:33] - [02:57:39]

Harshith Vaddiparthi | Outskill: All that I really have to do right now is just go ahead and... go ahead and ask you to build a website.

[02:57:40] - [02:57:46]

Harshith Vaddiparthi | Outskill: But instead of just doing that, we can try to add a little bit of a nice UI taste.

[02:57:47] - [02:57:53]

Harshith Vaddiparthi | Outskill: With another skill, which is called... Taste skill.

[02:57:54] - [02:57:57]

Harshith Vaddiparthi | Outskill: Yes, exactly, exactly what you'd be doing in your workbook.

[02:57:57] - [02:58:00]

Harshith Vaddiparthi | Outskill: But now, I want to give you an overview as well.

[02:58:00] - [02:58:04]

Harshith Vaddiparthi | Outskill: Now, all you have to do is just Copy this link.

[02:58:05] - [02:58:15]

Harshith Vaddiparthi | Outskill: Go back to your, agent, or your, you know, anti-gravity, Paste that, paste that skill, And now, also.

[02:58:15] - [02:58:18]

Harshith Vaddiparthi | Outskill: Drag and drop this inside the chat.

[02:58:19] - [02:58:20]

Harshith Vaddiparthi | Outskill: And all you just have to just say is, hey.

[02:58:21] - [02:58:36]

Harshith Vaddiparthi | Outskill: Here is the skill. I want you to go ahead and install the skill, and this is my entire, entire LinkedIn. I want you to go ahead and create a complete, LinkedIn, create my own personal portfolio, right? Create a personal portfolio right now.

[02:58:40] - [02:58:42]

Harshith Vaddiparthi | Outskill: That's it. That's all.

[02:58:42] - [02:58:53]

Harshith Vaddiparthi | Outskill: You just have to go ahead and save that. Now, it'll start working on the entire thing. Of course, it might take some time, though. Let's see if it can, you know, do it in the next 8 minutes, but if it does it, that's amazing.

[02:58:53] - [02:58:54]

Harshith Vaddiparthi | Outskill: Right? Now...

[02:58:55] - [02:59:07]

Harshith Vaddiparthi | Outskill: Now, it's asking if we wanted to allow to extract the PDF. Yes, of course, because only if the PDF text is extracted, I can, you know, give it better, right? That's one way to do it.

[02:59:07] - [02:59:10]

Harshith Vaddiparthi | Outskill: Yeah, I'm just gonna keep allowing it, keep submitting it.

[02:59:11] - [02:59:28]

Harshith Vaddiparthi | Outskill: Right? And just keep doing that. It's gonna do two things, right? We have asked it to do two things. One is also the PDF and the taste skill as well. If you don't like the taste skill, guys, if you don't like the taste skill, you can also just go ahead and,

[02:59:28] - [02:59:47]

Harshith Vaddiparthi | Outskill: you know, maybe use the front-end design skill, or you can use a different kind of a skill, or you can use the three, you know, the three secret sauce which I gave you. You can pick up components from each of those, from interior, or let's say, from beautiful UI, or even, I think, the first one that I shared, right?

[02:59:48] - [02:59:49]

Harshith Vaddiparthi | Outskill: A lot of these what you can do.

[02:59:51] - [03:00:01]

Harshith Vaddiparthi | Outskill: Did you open all your things on LinkedIn? I haven't, I haven't. Helen, right now, I just kept it very simple, because, you know, to respect the time, I just want to do it a little quick, that's all.

[03:00:01] - [03:00:10]

Harshith Vaddiparthi | Outskill: I said, just keep, you know, proceeding with it, just keep, allowing it. What it's gonna do right now is it's gonna build out the entire webpage for you.

[03:00:10] - [03:00:13]

Harshith Vaddiparthi | Outskill: Right? So that's the best part about this, guys.

[03:00:15] - [03:00:17]

Harshith Vaddiparthi | Outskill: Okay, allow this time...

[03:00:26] - [03:00:29]

Harshith Vaddiparthi | Outskill: Allow... yeah, just keep allowing it.

[03:00:29] - [03:00:34]

Harshith Vaddiparthi | Outskill: Now, it al- guys, do you see that? It already has... let me, turn the full screen.

[03:00:35] - [03:00:36]

Harshith Vaddiparthi | Outskill: Let me zoom in.

[03:00:36] - [03:00:42]

Harshith Vaddiparthi | Outskill: And you can see it has already added the skill here. It's working on the rest of that.

[03:00:44] - [03:00:46]

Harshith Vaddiparthi | Outskill: I can see the submit button? Yeah.

[03:00:48] - [03:00:59]

Harshith Vaddiparthi | Outskill: Can we give a prompt starting to automatically allow all the steps? Nilesh, you can, but I think you just have to change that in the commands here. In this one. Let me see, because...

[03:01:00] - [03:01:09]

Harshith Vaddiparthi | Outskill: There should be commands to completely make it, you know, make the permissions in such a way that you don't have to keep allowing, so it's possible, it's possible you can do that as well.

[03:01:12] - [03:01:12]

Harshith Vaddiparthi | Outskill: No.

[03:01:13] - [03:01:33]

Harshith Vaddiparthi | Outskill: It's installing Node.js as well, all of that too. Yeah, the security prompt also. Even the Cloudflare security audit skill that I've shared with you guys, even that will be shared. All of that would be shared. Perfect. So now we do have a nice implementation plan for our portfolio. All that we have to do right now is just click on Proceed.

[03:01:33] - [03:01:40]

Harshith Vaddiparthi | Outskill: Alright, click on Proceed, and now... I would suggest you go ahead and review this, right? Just go ahead and review this properly.

[03:01:40] - [03:01:42]

Harshith Vaddiparthi | Outskill: And then it's gonna work on it.

[03:01:48] - [03:02:04]

Harshith Vaddiparthi | Outskill: Yeah, it's installing the node modules. So, node modules... I mean, as a non-coder, I've never really understood what these modules were. So, modules are nothing but just these packages that are needed to run your codebase. That's it.

[03:02:06] - [03:02:14]

Harshith Vaddiparthi | Outskill: Okay, right there, modules to beginners for websites, Portfolio, Gemini Stackholder... Utsa, I didn't get you, I didn't catch you right there.

[03:02:16] - [03:02:29]

Harshith Vaddiparthi | Outskill: Okay, cinematic executive profile of an ambitious young youth Asian tech founder? Guys that's generating an image? That's not even me, that's... what? That's guys that's not even me. I'm more handsome, right?

[03:02:29] - [03:02:32]

Harshith Vaddiparthi | Outskill: Like, what is that, guys? That's just AI.

[03:02:32] - [03:02:48]

Harshith Vaddiparthi | Outskill: Okay, so what I'm just gonna do, right? So what we're actually looking at right now is hallucinations, right? Because I'm using a dumber model, sometimes it does that. So in this case, if I just wanna, you know, add in my actual image.

[03:02:48] - [03:02:55]

Harshith Vaddiparthi | Outskill: All I have to do right now is just go ahead and, you know, put in my image, and then ask it to go ahead and generate it.

[03:02:55] - [03:02:56]

Harshith Vaddiparthi | Outskill: Right?

[03:02:56] - [03:02:57]

Harshith Vaddiparthi | Outskill: So...

[03:02:57] - [03:03:06]

Harshith Vaddiparthi | Outskill: I could either, you know, take my image where I had slightly more longer hair, which I genuinely do miss right now, after you guys told me about it.

[03:03:07] - [03:03:09]

Harshith Vaddiparthi | Outskill: And I'm just gonna paste it here.

[03:03:10] - [03:03:13]

Harshith Vaddiparthi | Outskill: And I'm just gonna say, use this

[03:03:14] - [03:03:22]

Harshith Vaddiparthi | Outskill: Use this image of a very, very handsome man, Handsome man.

[03:03:22] - [03:03:27]

Harshith Vaddiparthi | Outskill: in the... Portfolio.

[03:03:28] - [03:03:29]

Harshith Vaddiparthi | Outskill: That's it.

[03:03:30] - [03:03:33]

Harshith Vaddiparthi | Outskill: And now, you can also queue the message, or directly go ahead and send it.

[03:03:34] - [03:03:39]

Harshith Vaddiparthi | Outskill: Why are you guys laughing, though? It's true, right? It's true, why are you guys laughing? I don't care why you guys are laughing.

[03:03:39] - [03:03:40]

Harshith Vaddiparthi | Outskill: Okay.

[03:03:40] - [03:03:42]

Harshith Vaddiparthi | Outskill: But I...

[03:03:42] - [03:03:54]

Harshith Vaddiparthi | Outskill: Okay, now, now what it's basically doing is you can keep adding more context, right? The more context you add, the better it performs. And in scenarios like this.

[03:03:55] - [03:04:13]

Harshith Vaddiparthi | Outskill: I would go ahead and ask you to go ahead and give it as much context as possible about you, right? So, even if it's, like, a Notion document, or, like, documents which are here and there, guys, dump all of these documents inside one of this portfolio folder.

[03:04:13] - [03:04:26]

Harshith Vaddiparthi | Outskill: And that is what I would suggest. Dump everything in one folder, give it to Anti Gravity, ask it to go ahead and build a complete website out of it, and after that, you guys already know the drill, which is basically

[03:04:27] - [03:04:44]

Harshith Vaddiparthi | Outskill: I think, which is... I lost the XCal draw, which is the CI-CD pipeline which I told you guys about, right? So that's how you go ahead and proceed. But guys, it does require a couple of more iterations. The first one might not always be perfect.

[03:04:44] - [03:05:02]

Harshith Vaddiparthi | Outskill: you'll have to keep doing a couple of iterations. That's where you have to keep pushing code to GitHub. You have to keep making it better, right? So every time I find, you know, like, a new link or a new, you know, tool that can actually help out in my website, that's what I generally do. So let's say my website...

[03:05:02] - [03:05:07]

Harshith Vaddiparthi | Outskill: And, you know, these kind of, you know, kosos, or these buttons.

[03:05:07] - [03:05:15]

Harshith Vaddiparthi | Outskill: Anything that I find, I'm gonna just go ahead and use them in my dashboard. So that's basically what I would do.

[03:05:16] - [03:05:22]

Harshith Vaddiparthi | Outskill: Yeah, these designs do take some time to, you know, perfect, but it totally depends on what... how you want to proceed with it.

[03:05:23] - [03:05:29]

Harshith Vaddiparthi | Outskill: Okay. Yeah, just keep allowing it, keep submitting it. I think we're close, guys, let's see if we can, you know.

[03:05:29] - [03:05:39]

Harshith Vaddiparthi | Outskill: finish this off in the next 2 minutes. If not, of course, we'll be doing it in the workbook as well, but I hope you understood the entire idea of what we're working with right now.

[03:05:40] - [03:05:45]

Harshith Vaddiparthi | Outskill: Yeah, so, you know, editing some styles.css, Running commands and everything.

[03:05:47] - [03:05:51]

Harshith Vaddiparthi | Outskill: Exactly, Kavi is correct. It's a complete... it's an entirely new way to work, right?

[03:05:52] - [03:05:56]

Harshith Vaddiparthi | Outskill: So it's just becoming more skewed. All these different professions are just becoming more skewed.

[03:05:57] - [03:05:57]

Harshith Vaddiparthi | Outskill: Right?

[03:06:00] - [03:06:15]

Harshith Vaddiparthi | Outskill: We can use FireCrawl to your website to build similar site. Utsava, you can, you absolutely can, but it might be difficult to find the exact components. But if you can, absolutely, which is also great, right?

[03:06:17] - [03:06:18]

Harshith Vaddiparthi | Outskill: Okay.

[03:06:20] - [03:06:27]

Harshith Vaddiparthi | Outskill: How do you know if the code with a malicious prompt or someone has already experienced it?

[03:06:27] - [03:06:44]

Harshith Vaddiparthi | Outskill: Like, when, like, when we have on websites or something, okay. Abhilash, I think the security side of things actually comes more in the backend, because front-end is usually very clean, right? It's just front-end is very, you know, easy. It's just, you know, just a bunch of different styles and components coming together.

[03:06:44] - [03:07:03]

Harshith Vaddiparthi | Outskill: Right? That's what it is. But I think the backend flaws might have a lot more security issue, but for that, I would recommend you build out your own set of skills if you are serving a client, or, you know, if you have to, you know, build out your own security protocols and all that. It's all possible. You can build your own stack, you can build your own skills.

[03:07:04] - [03:07:11]

Harshith Vaddiparthi | Outskill: Okay, so I think the link is currently running right now, guys. Let's do... give it a look, right?

[03:07:11] - [03:07:14]

Harshith Vaddiparthi | Outskill: Yeah, it's working right now. Let's go check it out.

[03:07:15] - [03:07:18]

Harshith Vaddiparthi | Outskill: I think that'll be amazing if, you know, everything properly worked.

[03:07:19] - [03:07:23]

Harshith Vaddiparthi | Outskill: Yeah, that's basically it, guys. Another boom in the chat, if possible, because...

[03:07:23] - [03:07:31]

Harshith Vaddiparthi | Outskill: we were able to go ahead and take a very simple LinkedIn page to create an entire website

[03:07:31] - [03:07:32]

Harshith Vaddiparthi | Outskill: But as well.

[03:07:32] - [03:07:38]

Harshith Vaddiparthi | Outskill: Right? Of course, it's not that great of a website, but we still built something out in this particular time.

[03:07:39] - [03:07:54]

Harshith Vaddiparthi | Outskill: Isn't that amazing, guys? Now, all of you can have website, and that's basically what I think AI is, right? So if I want to just end it on this note for the session, I would just say, think about AI, think about these LLMs as a way of expression.

[03:07:54] - [03:08:01]

Harshith Vaddiparthi | Outskill: Right? Previously, I wanted to express myself and put it on a website, but I couldn't. But now, we can.

[03:08:01] - [03:08:13]

Harshith Vaddiparthi | Outskill: Right? So, think of it as a way of expression, and just understand that methodology to think, keep asking the AI as much as possible. And Subankar, I'm also gonna check out your website as well, which you shared. So, amazing.

[03:08:13] - [03:08:19]

Harshith Vaddiparthi | Outskill: I think... thank you so much, guys. I think it was amazing, right, the session. So, I generally love to interact with you guys a lot.

[03:08:19] - [03:08:23]

Harshith Vaddiparthi | Outskill: As well, so yeah, I think we shall pass it on to Shasti.

[03:08:23] - [03:08:41]

Shasti: Awesome. Thank you so much, Harshal. I think that was a wonderful last 3 hours we had. How was it, folks, from getting introduced to a tool called Anti-Gravity, and then installing your design skills, building a live dashboard, and ending with our very own portfolios?

[03:08:41] - [03:08:59]

Shasti: On a scale of 1 to 10, how was it? There is also a poll that is launched, which you can see on your Zoom screen. Go ahead and let us know how this session went for you, and also any feedback that you have. Yes, we will get to the break. I see all those messages about breaks. We will get to the break, folks. Do not worry about it.

[03:09:01] - [03:09:16]

Shasti: With that, thank you so much, Harshith. I'll let you go and get some good rest before we again start off with breakout rooms, and folks, you'll be seeing Harshith in the breakout rooms as well. So yeah, let's thank him for the wonderful session here in the chat, also on the LMS. Do not forget about it.

[03:09:19] - [03:09:31]

Shasti: Perfect. With that, yes, we do have a workbook, and I also mentioned something that we would be talking after the learning part is done. Anyone remember what is it about?

[03:09:35] - [03:09:40]

Shasti: We will get to the break, folks. Oh my god, you guys so desperately want a break.

[03:09:40] - [03:09:43]

Shasti: Yes, hackathon. True.

[03:09:43] - [03:10:00]

Shasti: So, we will quickly take a 5 minutes break, and then we'll come back, talk about Hackathon, you will know which group you belong to, and how you can go ahead and check who are your teammates, and then we get into breakout rooms, where you will be building your first ever portfolio.

[03:10:02] - [03:10:03]

Shasti: Aligned?

[03:10:06] - [03:10:19]

Shasti: Yes, we'll also have Sumedha joining us in the next 5 minutes, who's going to be here, and giving you a complete walkthrough of how you can go ahead and check which group you belong to. So, we will take a quick 5 minutes break, and then come back.

[03:10:19] - [03:10:22]

Shasti: Team, we can quickly take a 5 minutes break.

[03:15:36] - [03:15:39]

Shasti: Okay, everyone, are we back from the break?

[03:15:41] - [03:15:46]

Shasti: Drop a yes or a thumbs up, any reaction would work.

[03:15:47] - [03:15:49]

Shasti: Somebody says no.

[03:15:50] - [03:15:53]

Shasti: Okay, I hope you're still taking the break.

[03:15:55] - [03:15:56]

Shasti: Great.

[03:15:57] - [03:16:15]

Shasti: I saw a few questions about the reflection link and the workbook link. We will drop the reflection link and the workbook link once the hackathon group briefing part is done, right? For now, let's focus on the hackathon group allocation part. Yes, we will drop all the required links required for the day. Do not worry about it.

[03:16:15] - [03:16:31]

Shasti: Perfect. With that, as I mentioned, we have Sumedha joining us, who is going to give a walkthrough of this complete process on how you can go ahead and find out your hackathon team, and who are your teammates.

[03:16:31] - [03:16:36]

Shasti: She built this in-house product that she is going to demo, right, to make this hackathon process

[03:16:37] - [03:16:58]

Shasti: as easy and as simple as possible for all of you folks, so that it's not a difficult task for you to go and just see who are your teammates are. So, I am very much excited for all of you to

know how this process works and get started with the hackathon. Let's give a very, very warm welcome to Sumedha, and with that, over to you, Sumedha. I think let's not gatekeep anymore, let's just

[03:16:58] - [03:17:01]

Shasti: Tell them which groups they belong to, and everything about Hackathon.

[03:17:08] - [03:17:10]

Sumedha: Alright, hello, everyone!

[03:17:11] - [03:17:12]

Sumedha: Hello!

[03:17:13] - [03:17:21]

Sumedha: Alright, so are we excited for the hackathon? On a scale of 1 to 10, how excited are we for a hackathon?

[03:17:22] - [03:17:26]

Sumedha: Very excited. 10. Oh, thousand, amazing.

[03:17:26] - [03:17:32]

Sumedha: 111... okay, 7, 9, 9, 10... so many tens.

[03:17:34] - [03:17:37]

Sumedha: Nervous as well, yes, all right.

[03:17:37] - [03:17:52]

Sumedha: So, we will try to ease your nervousness as much as possible from our side. We will try to simplify all the steps that is there from our side, so that you do not face any challenges in the process.

[03:17:52] - [03:17:58]

Sumedha: And you can, you know, use your energy, your thoughts, everything you can focus.

[03:17:58] - [03:18:03]

Sumedha: on the product that you will be building. So we will definitely try that.

[03:18:03] - [03:18:18]

Sumedha: Alright, with that, let... without any further ado, let's get started with the details of Hackathon. So today, so, for the entire hackathon journey, let's think of it as, you know.

[03:18:18] - [03:18:34]

Sumedha: a four-step journey, okay? So today, we will be taking only step one. So, what are these four steps? So, the first step is knowing your groups. So, who are your teammates, who are your work buddies who you will be working with?

[03:18:34] - [03:18:48]

Sumedha: So, knowing that, and also what channel you will be using to communicate with your teammates, to brainstorm with your teammates. So, that is step one. So, knowing who you will work with.

[03:18:48] - [03:18:52]

Sumedha: And how you will communicate with them is step one.

[03:18:53] - [03:19:04]

Sumedha: Step 2 is knowing all the details, what products, what is the idea, finalizing the idea, where to submit, all these details will be step two.

[03:19:04] - [03:19:08]

Sumedha: Right? Now, step 3 is working on the product.

[03:19:08] - [03:19:17]

Sumedha: whatever product you as a team decide to, like, work on, actually working on that product will be your step 3.

[03:19:18] - [03:19:25]

Sumedha: And step 4 is submitting the product. So, these are the 4 steps that we will be following for this hackathon.

[03:19:25] - [03:19:28]

Sumedha: Alright, are we clear on the four steps?

[03:19:29] - [03:19:33]

Sumedha: A quick yes or no in the chat? Yes?

[03:19:33] - [03:19:39]

Sumedha: Perfect. Amazing. I love this audience. Everybody understood. Amazing. All right.

[03:19:41] - [03:19:48]

Sumedha: Sure, I can repeat one more time. So, as I was saying, we will be dividing this entire hackathon

[03:19:48] - [03:20:02]

Sumedha: into four steps. So the entire hackathon journey will be divided into four steps. Step 1 is knowing who your teammates are, how you will communicate and connect with your teammates.

[03:20:02] - [03:20:18]

Sumedha: Step 2 is knowing all the details about what product you will be building, where you will be finding your product ideas, where to submit your products, and finalize your product. Like, this is the product that you want to work on.

[03:20:19] - [03:20:24]

Sumedha: And third step. Third step will be your,

[03:20:24] - [03:20:37]

Sumedha: like, working, actually working on the product, like, from, like, you know, brainstorming to actually deploying it. And fourth step is submitting the product.

[03:20:37] - [03:20:52]

Sumedha: Right? So these are the four steps that we will follow for the entire hackathon. And today, we are just gonna do step one, okay? We will take baby steps, no hurry, no rush, we will just do step one during. Alright?

[03:20:53] - [03:20:56]

Sumedha: I hope I was able to clarify. Yeah.

[03:20:57] - [03:20:59]

Sumedha: Alright, perfect.

[03:21:00] - [03:21:18]

Sumedha: Now, let me quickly go ahead, share my screen, and show you how you can know about your groups. Now, how many of you know the channel that we will be using to communicate with our teammates? Anybody over here who knows that the channel we are using?

[03:21:19] - [03:21:22]

Sumedha: Okay, WhatsApp, LMS, Slack...

[03:21:23] - [03:21:33]

Sumedha: Outskill platform, okay, LMS, GitHub, okay. Yeah, GitHub for sure, to share the codes, but in order to talk, yeah.

[03:21:33] - [03:21:38]

Sumedha: Okay, I see a lot of you are correct. So, it is WhatsApp.

[03:21:39] - [03:21:50]

Sumedha: Okay, so we have created groups for you, for each group, like, from group 1 to all the way all groups, we have created WhatsApp groups for you.

[03:21:51] - [03:22:06]

Sumedha: And you... what you have to do is, you just have to join the group, and you will be able to connect with your teammates. That is all you have to do, okay? Now, the next question comes is, how do I find my WhatsApp group?

[03:22:06] - [03:22:12]

Sumedha: So, let me quickly pull up my screen and share how you can find your WhatsApp group.

[03:22:14] - [03:22:17]

Sumedha: Okay, just give me a quick second.

[03:22:19] - [03:22:20]

Sumedha: And...

[03:22:24] - [03:22:28]

Sumedha: There you go. I hope my screen is visible.

[03:22:38] - [03:22:43]

Sumedha: Perfect, alright. Now, I'll pause the chat for next

[03:22:44] - [03:22:47]

Sumedha: One minute. I'll just take one minute of yours.

[03:22:47] - [03:22:52]

Sumedha: And I will just explain you how you can

[03:22:52] - [03:23:15]

Sumedha: find your groups, and if you don't find your groups, what you have to do, and how we will be able to help you, right? To do that, I will just need 1-2 minutes of your time, so please, please, please pay your laser-focused attention on the screen right now, okay? So I'll quickly pause the chat, and I'll reopen once I'm done, so that you do not get distracted.

[03:23:15] - [03:23:16]

Sumedha: Okay.

[03:23:18] - [03:23:23]

Sumedha: Perfect. So, I pause the chat, and let me show you the platform now.

[03:23:23] - [03:23:40]

Sumedha: So, this is your group allocator platform. This is where you will be able to find your WhatsApp groups, okay? So, what you have to do is, you just have to open the link that I'll be sharing in next 2-3 minutes.

[03:23:40] - [03:23:42]

Sumedha: And you just have to come

[03:23:42] - [03:23:50]

Sumedha: Here, you have to click here and type your email ID. So, I'll just quickly type my email ID.

[03:23:53] - [03:23:58]

Sumedha: And once I type my email ID, I can just press Enter, or click on Find Group.

[03:23:59] - [03:24:04]

Sumedha: As soon as I click on Find Group, I will be getting my group.

[03:24:05] - [03:24:26]

Sumedha: So, this is my group number. Also, this is just for test purpose, only the internal team, like me, Shashti, Utsapa, Shashwat, all of these people are added in this group, so that I can just demo this product to you, right? So, for you, your group number will be different, your group link will be different, and your scanner will be different too.

[03:24:26] - [03:24:43]

Sumedha: Okay? Now, as soon as you type in your email and click on Find Group, you will be getting your group number right here, okay? And just under that, there is something called Open WhatsApp Group. So, if you click on Open WhatsApp group.

[03:24:44] - [03:25:04]

Sumedha: you will be redirected to this, okay? So you can directly, like, join using the WhatsApp app on your desktop, or you can use, if you're using WhatsApp Web, you can use to continue with WhatsApp Web, okay? And you can join the WhatsApp group.

[03:25:04] - [03:25:17]

Sumedha: from your system. Now, in case you are using your phone to join the WhatsApp group, you can use this, application in your phone as well.

[03:25:17] - [03:25:24]

Sumedha: If the link is not handy, then what you can do is, you can open WhatsApp in your phone, and

[03:25:24] - [03:25:43]

Sumedha: Once you open, you will see a camera button on top right corner. At least that is the Indian UI, but if it is different from, for any other country, you will see a camera button in WhatsApp. You can just click that, and you can scan this QR code, and you will be able to join the WhatsApp group.

[03:25:43] - [03:25:54]

Sumedha: Okay, so this is the simple process that you will have to follow for joining the WhatsApp group, okay? Now, now the question is, let's say.

[03:25:54] - [03:25:58]

Sumedha: What if my email ID is not

[03:25:58] - [03:26:00]

Sumedha: in the group list. So there...

[03:26:00] - [03:26:20]

Sumedha: is, like, 99.99% chance that your ID is gonna be here, but let's say the email ID of enrollment and the email ID that you are using is different, so please make sure you are using only your registered email ID, then only you will be allocated to the group, okay?

[03:26:20] - [03:26:21]

Sumedha: If...

[03:26:21] - [03:26:35]

Sumedha: In case you are using your registered email ID, and still you are not able to find the group, what happens then? So, let me quickly demo that as well. So, let's say I'll use Shashti's email ID.

[03:26:35] - [03:26:36]

Sumedha: for example.

[03:26:39] - [03:26:51]

Sumedha: So, I'll just go ahead, and I typed out the wrong email ID just to show you. So, there you go. So, you will see something like, we couldn't find that email. So...

[03:26:51] - [03:27:02]

Sumedha: you will see a button over here as Raj a Request. So, if you are, by any chance seeing that your group is not found, just go ahead, click on Razor Request.

[03:27:02] - [03:27:14]

Sumedha: Type in your full name, your email ID, please mention your registered email ID, and your phone number as well, and submit the request. So, let's say I will quickly put up

[03:27:14] - [03:27:23]

Sumedha: a test... And I will submit, okay? Okay, numbers are mandatory, so I'll just put a random number.

[03:27:24] - [03:27:41]

Sumedha: Okay, and there you go. And I will just submit, okay? And you will receive something like request received, okay? So once you submit, we in the backend will give you the access to a group, okay? And post that. Once you refresh this.

[03:27:42] - [03:27:48]

Sumedha: and you come back, you will be able to find your group at that point of time, okay?

[03:27:48] - [03:27:51]

Sumedha: So, was this process clear?

[03:27:51] - [03:28:01]

Sumedha: just let me open the chat quickly. There you go, the chat is open. Let me know if it was clear, any doubts, any questions you have.

[03:28:02] - [03:28:05]

Sumedha: Not at all clear, okay.

[03:28:05] - [03:28:08]

Sumedha: It's simple. Okay, perfect.

[03:28:11] - [03:28:13]

Sumedha: Perfect!

[03:28:18] - [03:28:33]

Sumedha: Alright, I see so many symbols in the chat. I am so glad that it was simple for you. That was the agenda that we needed to make it simple for you. Okay, I see a few repeats, okay.

[03:28:33] - [03:28:37]

Sumedha: Besides that... Let me quickly skim through the chat.

[03:28:40] - [03:28:53]

Sumedha: Okay, perfect. I love the start. All right, let me quickly repeat one more time. So, once I share the link with you all, all you have to do is... okay, let me quickly also share the link with you. So...

[03:28:53] - [03:29:04]

Sumedha: Before that, let me quickly demo. So, once I shared the link with you all, all you have to do is type in your registered email ID, and click on Find Group.

[03:29:04] - [03:29:11]

Sumedha: And you will be able to find your group number, okay, and join the WhatsApp group.

[03:29:11] - [03:29:27]

Sumedha: Okay? You can click on this, and you will be able to join the WhatsApp group from your system itself, okay? And if you're using phone, you can directly open this application in phone, or you can open WhatsApp. Click on the camera button.

[03:29:27] - [03:29:30]

Sumedha: scan the QR code right over here.

[03:29:30] - [03:29:34]

Sumedha: And you will be able to join the WhatsApp group.

[03:29:34] - [03:29:39]

Sumedha: In case, let's say, your WhatsApp group is not available.

[03:29:39] - [03:30:03]

Sumedha: then you will see something like, we couldn't find that email. There could be two reasons. One, that you are not using your registered email ID. If so, please try to use your registered email ID. If not, what you have to do is just click on raise a request, and you can fill in your full name, your email ID, and your phone number, and click on Submit Request.

[03:30:03] - [03:30:17]

Sumedha: Within 1 or 2 hours, the team will be giving you the access to the WhatsApp group, okay? So once we do, we will drop an email or a WhatsApp to you, and you will be able to access your group.

[03:30:19] - [03:30:22]

Sumedha: Perfect. Now, I hope this was clear.

[03:30:24] - [03:30:31]

Sumedha: There is no option to attend the hackathon individually, it is a group activity. So, yeah.

[03:30:33] - [03:30:53]

Sumedha: Also, guys, please do not use the 78 group. It is not your group. It is not gonna get considered, because it's just for your reference and example. You will only find the internal people out here, like me, Shashti, Utsapa, Shashwat, all these people, okay?

[03:30:54] - [03:31:00]

Sumedha: Yes, now, without any further ado, let me quickly share the link in the chat.

[03:31:08] - [03:31:11]

Sumedha: Okay, it's super duper clear. Perfect.

[03:31:21] - [03:31:31]

Sumedha: There you go. In the chat is the Hackathon group allocator, okay? So you can go ahead and use this link to find a group.

[03:31:32] - [03:31:47]

Sumedha: It's in the chat, okay. Now, let me also quickly demo how you can find it in your LMS as well, okay? So, we have already shared the link in your LMS as well. So, let me quickly share my screen.

[03:31:47] - [03:31:57]

Sumedha: and you have to go to Resources and Recording. Either ways, like, it's IST or EST, for both it is same. Once you click on Resources and Recordings.

[03:31:57] - [03:32:00]

Sumedha: Scroll all the way down, okay?

[03:32:00] - [03:32:15]

Sumedha: So, once you scroll all the way down, you will see something called Hackathon Handbook, okay? So, under Hackathon Handbook, you will see something called Find Your Group. This is the first section under Hackathon Handbook.

[03:32:15] - [03:32:26]

Sumedha: So you have to click on Find Your Group, and you will be able to find the link right over here. So if you click on the link, you will be redirected to the application.

[03:32:27] - [03:32:39]

Sumedha: Okay? And also, for those who might miss the steps, we have also mentioned the exact steps that I just said right over here, okay?

[03:32:39] - [03:32:41]

Sumedha: So, that will be all.

[03:32:42] - [03:32:49]

Sumedha: Now, I will just quickly skim through the chat if there is any questions, and we can get started with the

[03:32:50] - [03:32:51]

Sumedha: Workbook for today.

[03:32:58] - [03:33:15]

Sumedha: Okay, so, the hackathon officially begins tomorrow post-session, that is 11.59pm, to be exact, okay? So, after tomorrow's session, we will have Utsapa come in, and he will be sharing all the product

[03:33:15] - [03:33:39]

Sumedha: ideas, the product options that you have, and how you can submit your hackathon pro- like, products, and what you will need to fill in the details, every detail we will be discussing tomorrow. That is step two of our hackathon, right? And post that, you will go ahead into the breakout rooms, discuss with your teams that, what product you wanna

[03:33:40] - [03:33:53]

Sumedha: And once you finalize that, you are good to drop for tomorrow, okay? Post that, you can connect among each other using the WhatsApp groups, and you can start working on your product.

[03:33:53] - [03:34:13]

Sumedha: And your submission deadline will be Sunday, 10 a.m. in the morning, okay? So it is 48 hours, but we just increased it a bit, because we are also gonna have sessions, and we do not want you to miss any of the sessions with such important topics, which are very interesting, by the way.

[03:34:14] - [03:34:15]

Sumedha: Alright.

[03:34:26] - [03:34:42]

Sumedha: So, the groups are allocated as per your region, as well as how you are attending the sessions. So, first parameter is the region. Second parameter is how active or not active you are.

[03:34:42] - [03:35:01]

Sumedha: And post that, if you haven't filled the region, then it is... it could be random, so, yeah, pardon for that. But yeah, we have tried our best to keep you in your time zone, so you do not have any problem with connecting with people.

[03:35:01] - [03:35:19]

Sumedha: While you're joining the WhatsApp group, you will already see some 7-8 people in the group who are the admins of the group, so it is just the internal team. Do not worry about them, you can just ignore it. And once you have everyone from your group join in, you can start your conversations.

[03:35:19] - [03:35:29]

Sumedha: Each group will have around 8 to 10 people. Now, it also depends if every one of them is participating in the hackathon or not, right? So...

[03:35:30] - [03:35:37]

Sumedha: You will have around 8 to 10 people, but let's say if only 5 of them are participating, then 5 is the number for you.

[03:35:37] - [03:35:38]

Sumedha: Okay.

[03:35:39] - [03:35:43]

Sumedha: So, I hope I was able to, like.

[03:35:43] - [03:35:54]

Sumedha: help you with all your queries. A quick yes if you were able to understand this process, and you will be able to complete it by, like, before tomorrow's session.

[03:35:54] - [03:35:55]

Sumedha: Yes?

[03:35:56] - [03:35:57]

Sumedha: Perfect.

[03:35:57] - [03:36:00]

Sumedha: Perfect, I see so many yeses in the chat.

[03:36:01] - [03:36:02]

Sumedha: Amazing.

[03:36:03] - [03:36:16]

Sumedha: Perfect. Now, without any further ado, we have a very interesting workbook for today. So for that, I will call in back Shasti, who will take it up, and you guys can go ahead for the breakout room post that.

[03:36:17] - [03:36:18]

Sumedha: Over to you, Shashti.

[03:36:19] - [03:36:20]

Shasti: Yep.

[03:36:20] - [03:36:30]

Shasti: Thank you so much, Sumedha. I think that was helpful, folks, right? I did see all those questions about what is Hackathon, and how many,

[03:36:30] - [03:36:35]

Shasti: team members per group, and Rashid, yes, I do see your message on the chat.

[03:36:35] - [03:36:50]

Shasti: the link is working for almost for all of us. If it is not working for you, try refreshing it, right? And if you see that error with Sumedha Showcase that your email is not part of it, submit the form, we will give you the access from backend. If not, try to open it in incognito mode.

[03:36:51] - [03:37:00]

Shasti: Right? And all this information is also available on LMS. Anybody still ask questions, please go to your LMS, click on data and resources, and just scan through it, you will understand.

[03:37:01] - [03:37:08]

Shasti: As most of you said, this process is simple. I hope this... we all have clarity on that how to go about this.

[03:37:08] - [03:37:23]

Shasti: How many per group? As I mentioned, as Sumedha mentioned, it will be 8 to 10, and joining and participating in Hackathon is not a mandatory process. If somebody is interested, they will be joining. If somebody's not interested, they will not be joining.

[03:37:25] - [03:37:29]

Shasti: With that said, I hope all your hackathon questions are clear.

[03:37:29] - [03:37:47]

Shasti: And to talk about what about step 2, step 3 tomorrow, we will be having a dedicated 30-minute section on it, where Utsa will be back, and he will let you guys know on what exactly Hackathon is, and other steps that Sumedha mentioned. Today was supposed to be you getting to know what is step 1, which is finding your groups.

[03:37:47] - [03:37:49]

Shasti: I hope that is clear.

[03:37:53] - [03:38:16]

Shasti: Great. With that, I am not going to take up the other questions about Hackathon, because we have a dedicated section for it, and we have already, a bit beyond the scheduled time that we are supposed to get into the breakout room. So, team, we can also drop the workbook link and the reflection link for the day. With that, we will also quickly get into the breakout rooms. Let me just quickly demo on

[03:38:16] - [03:38:19]

Shasti: What exactly are we going to do inside the breakout room?

[03:38:22] - [03:38:26]

Shasti: Just let me know once you guys can see my screen.

[03:38:30] - [03:38:36]

Shasti: Okay, one sec. Looks like my Zoom is... Acting weird today.

[03:38:41] - [03:38:42]

Shasti: Yeah.

[03:38:43] - [03:38:45]

Shasti: I think my screen should be visible enough.

[03:38:49] - [03:39:06]

Shasti: Yes. So this is the workbook that we are going to solve in today's breakout room, right? Same thing that Arshad demoed, you will be using and installing anti-gravity IDE, and then you will be downloading your LinkedIn profile. If you do not have LinkedIn, try to create one, and

[03:39:06] - [03:39:16]

Shasti: Using LinkedIn as a base, you will go ahead and create your portfolio website, deploy it on Versal, and you will have your first ever portfolio website.

[03:39:16] - [03:39:20]

Shasti: live, running on Versal by end of today's breakout room.

[03:39:20] - [03:39:25]

Shasti: Again, a quick disclaimer, if you are sticking to the prompts that we have mentioned in the workbook.

[03:39:25] - [03:39:30]

Shasti: This can be easily done with the free models and free version of Anti-Gravity.

[03:39:30] - [03:39:52]

Shasti: Do not try for perfectionism for the very first time when we are trying. Stick to the prompts that we have given in the workbook, and stick to the models that we have mentioned in the workbook, so that you can build the first version of your portfolio and deploy it. Later, you can go ahead and make changes. For the very first time, if you are trying multiple prompts with multiple customizations, you might face issues with credits as well.

[03:39:53] - [03:39:54]

Shasti: I hope that is clear.

[03:39:56] - [03:40:03]

Shasti: Yes, if you do not have a LinkedIn profile, please, as Mahesh mentioned, do use your resume as well. That should also work.

[03:40:04] - [03:40:07]

Shasti: Clear, folks? Clear on what we are doing in the breakout rooms.

[03:40:08] - [03:40:22]

Shasti: I still see a couple of questions about, Hackathon. Please, go ahead and explore the product. All your questions will be clear. If you're still having any doubts, go ahead and write to support at the Rate Outskill.com, and team will help.

[03:40:24] - [03:40:26]

Shasti: And we will have

[03:40:26] - [03:40:51]

Shasti: the breakout rooms for next 1.5 to 2 hours, right? Because I want all of you to go ahead and build your portfolio, because I am very much excited for all of you, not sure if you guys are excited. So, we will have the breakout room for next 1.5 to 2 hours. If you are somebody who gets it done quickly, you are allowed to drop off. Please don't come back and complain about the timings. I am giving you... I'm giving you guys the option to choose if you want to stay back and build

[03:40:51] - [03:40:57]

Shasti: in the breakout rooms, or you already have the workbook, you can drop off and build all alone by yourself as well.

[03:40:57] - [03:41:16]

Shasti: But for those of you who are interested to build in the breakout rooms with the help of co-mentors, we will have the next 1.5 hours dedicatedly in the breakout rooms, and we will wait for all of you to come back and share your portfolio website. So if you are somebody who's very particular about timings, you can go ahead, drop off, see the recording, and do the workbook yourself.

[03:41:17] - [03:41:21]

Shasti: With that said, team, whenever we are ready, we can get into the breakout rooms.

[03:41:27] - [03:41:32]

Shasti: The breakout rooms will be open in next 2 seconds.

[03:41:44] - [03:41:56]

Shasti: Yeah, your breakout rooms are open, folks. You should see the pop-up on your screen, like our everyday session. If you have not seen the pop-up, only thing is you have joined from Zoom web and not Zoom app.

[03:42:04] - [03:42:26]

Shasti: How can you download the workbook document from this link? Team, we can also drop the downloaded version in the chat, and how you can go ahead and download is open the file. On your left-hand side, you will have an option called File, right? Click on that File option, you will see an option to download. You can download in whichever format you want, which is a Word document or a PDF.

[03:42:27] - [03:42:29]

Shasti: Or any format that you would want.

[03:42:34] - [03:42:49]

Shasti: Breakout rooms are open. If you have joined from Zoom app, you will see a pop-up. If you have missed it, please do click on the More option on your screen, and you will see the invite already on your screen for the breakout room.

[03:42:49] - [03:42:54]

Shasti: For those of you who are saying that haven't got the invite, I am gonna send it again.

[03:42:57] - [03:42:59]

Shasti: Please do accept it.

[03:43:30] - [03:43:33]

Shasti: Team, we can also drop the webinar ID in the chat.

[03:43:37] - [03:43:40]

Shasti: Arun, if you're unable to open Zoom app,

[03:43:40] - [03:43:48]

Shasti: try restarting your entire system, and then try to join from Zoom app, because if you're on web, I cannot help you join the breakout room.

[03:44:00] - [03:44:13]

Shasti: Folks, even if you have missed the pop-up on your screen, the pop-up will still stay on your system if you click on the more option, right? Just click on the More option on your screen, and you will have an option to join the breakout room.

[03:44:33] - [03:44:44]

Shasti: For everybody who has put on the chat that you're having issues, invites have been shared again. If there are anyone who's still facing issue, please do drop your issue in the chat, and we'll be able to help you guys.

[03:44:53] - [03:44:54]

Shasti: Okay.

[03:44:56] - [03:45:02]

Shasti: Nazeer, we did share the invite to Room 1, sending it again.

[03:45:18] - [03:45:24]

Shasti: Naziraf sent the invite again. Please do click on the More option on your screen, you should be able to see it.

[05:38:54] - [05:39:04]

Shasti: Okay, everyone, we are back in the main room. How was it, folks? How many of you went ahead and built your portfolio website for yourselves?

[05:39:04] - [05:39:06]

Shasti: Let me know in the chat.

[05:39:09] - [05:39:12]

Shasti: Okay, I see a lot of Mis in the chat.

[05:39:14] - [05:39:39]

Shasti: Also, go ahead and drop your links in the chat, also on the LMS folks. I'm sure that all of us would love to take a look, right? And for those of you who have already dropped it in the chat, I did went through them. I loved the UI and also the kind of efforts you guys have put in. With that, thank you so much, all the amazing commenters, for your time and efforts and helping our learners build their first ever portfolio. I'll let you guys go and get some good

[05:39:39] - [05:39:43]

Shasti: good amount of rest, and I'll see you guys tomorrow in tomorrow's session. I'll take it up from here.

[05:39:44] - [05:39:49]

Shasti: Team, we can also drop the reflection link and also the breakout room feedback form in the chat.

[05:39:50] - [05:40:11]

Shasti: whoever has not yet gone through the breakout room feedback form, please do give your feedback, let us know how this activity went for you. And I see all those portfolio links in the chat. Folks, as I said, if you drop it in the chat, I might not be able to go through all the links, so go ahead and drop it on the gratitude channel or the reflection channel on your LMS, and we will take a look.

[05:40:13] - [05:40:35]

Shasti: I see a couple of you saying that phased issues with credits and, wasn't last step. Again, you have the workbook, and credit is not something that I can solve for. Try, using the free models. If not, try waiting for it, 24 hours so that you can get new credits tomorrow and try it again. And for those of you who said that you are still in the last step.

[05:40:35] - [05:40:53]

Shasti: We waited as much as we can for all of you to complete the workbook. You already have the support channel that you need to raise your request on. Go ahead, try it on after the session is done, take your time. Any questions that you have, or any issues that you face, take a screenshot, put it on the Ask channel, and the mentor will revert back to you in the next 24 hours.

[05:40:56] - [05:41:12]

Shasti: All the resources mentioned by Arshid will be shared on the LMS under Day 10 Resources section, and if you're still facing issues with finding your groups, which is part of your hackathon, write to support at Great Outskill.com. I'm gonna drop the email ID again in the chat.

[05:41:14] - [05:41:15]

Shasti: And team will look into it.

[05:41:18] - [05:41:25]

Shasti: I'll wait for one more minute for those of you who have not yet filled the feedback to fill, and then we will be officially closing for the day.

[05:41:28] - [05:41:49]

Shasti: Tomorrow, we are going to do a deep dive on Claude, right? You will get to know how you can go ahead and use Claude Code, Clot Design, and also cloud co-work, so make sure you

are making it live for the session, and also, we will be talking more about what Hackathon is, and everything that you need to know about your 48-hour hackathon, so try to make it live for the session.

[05:41:50] - [05:41:56]

Shasti: If you have filled the feedback form, great, go ahead, drop off, get some good amount of rest. I'll see you guys tomorrow.

[05:42:01] - [05:42:11]

Shasti: Perfect. With that, thank you so much, everyone, for joining today's session, and get good amount of rest, and we'll see you guys tomorrow with another session on Claude.

[05:42:11] - [05:42:12]

Shasti: Have a great night.
