

Day 3 Live Session

01:57 - 01:58

Audio shared by Shashwat: Yummy

02:13 - 02:15

Audio shared by Shashwat: Dumum, dummyum.

13:28 - 13:32

Sumedha: Hello, everyone! How is everyone doing?

13:34 - 13:42

Sumedha: The chat is open for everyone. Hello, good evening, good afternoon, good morning from wherever you are joining in. How is everyone doing?

13:44 - 13:47

Sumedha: Wonderful, great, sleepy, okay.

13:49 - 13:52

Sumedha: I'm doing great, amazing.

13:56 - 14:16

Sumedha: Okay, somebody said in the chat that they love the music, and they want the playlist as well, so these are AI-generated music, and we will be sharing you the playlist, so we will be sharing with you the playlist on your graduation day. That is day 14. So, please stay tuned till then.

14:20 - 14:27

Sumedha: Amazing, alright. So, I do see some people saying that my video is a little blurred.

14:28 - 14:34

Sumedha: So my camera is a little damaged, of the laptop, so please bear with me.

14:35 - 14:37

Sumedha: Yeah.

14:37 - 14:43

Sumedha: So, it cannot be fixed, it's a physical damage, so please bear with it, and yeah, okay.

14:43 - 14:50

Sumedha: Alright, with that... Okay, so...

14:51 - 14:58

Sumedha: With that, we can get started for today's session. So, let me quickly pull up my screen.

14:59 - 15:13

Sumedha: So, in the meantime, I did see a lot of you posting in the LMS about what you have been working on, your videos from yesterday's session, and I loved watching that, by the way.

15:13 - 15:23

Sumedha: But I do see a lot of you also not posting, so I quickly just wanted to check in the chat that are you guys

15:23 - 15:39

Sumedha: like, having time, or did you guys get a chance to, you know, practice anything that you have learned in Day 1 or day two? It could be a prompt, or could be a video, whatever it is. Did you guys get a chance to check it?

15:39 - 15:42

Sumedha: A quick yes, no in the chat.

15:47 - 15:50

Sumedha: Just give me another quick second...

15:56 - 16:04

Sumedha: Okay... Okay, I see a lot of yeses, and a lot of nos as well.

16:05 - 16:11

Sumedha: Okay, a very tight schedule. Understandable, okay?

16:14 - 16:28

Sumedha: Yes, for people asking or confused why to post it, so you can post it in the reflection channel, you can post it in the gratitude channel, whichever is more...

16:28 - 16:37

Sumedha: convenient for you. If you want to keep a track of what you have been doing, and a record of your daily

16:37 - 16:41

Sumedha: learnings, I would suggest you should post it in the reflection channel.

16:41 - 16:57

Sumedha: And if it is part of your gratitude, then you can put it up in the gratitude channel as well. So we do go through, the team in Outskill go through it, mentors go through it, so you can always, whatever you are working on, you can share it with us using the reflection channel.

17:02 - 17:04

Sumedha: Perfect!

17:05 - 17:22

Sumedha: Alright, so, for people who did say no, so it's completely fine too, do not worry. The whole point of the program, basically, is to, you know, not just become perfect at everything, what we are learning and doing immediately.

17:22 - 17:26

Sumedha: It's just to start experimenting and actually building things.

17:26 - 17:34

Sumedha: So, whenever you have your first chance, go ahead and, you know, maybe whatever you do, share it with us, that will be amazing, right?

17:35 - 17:53

Sumedha: Alright, so over the last couple of days, we have been building the foundations. So, we have talked about AI, we have explored how we can work with these tools, and we have started thinking about what AI can actually do for us.

17:55 - 17:59

Sumedha: Today, we are taking one very important step forward.

18:00 - 18:11

Sumedha: Okay? So, because there is a very big difference between, like, asking AI to do something and getting AI to actually do something for you automatically.

18:11 - 18:16

Sumedha: And that is because what we are getting into today, okay?

18:17 - 18:18

Sumedha: So...

18:18 - 18:27

Sumedha: Going ahead with the topic for today, AI Automations. Specifically, we are going to get introduced to Anneton today.

18:27 - 18:45

Sumedha: So, before we get started, just a quick check in the chat. What's one repetitive task that you do regularly that you should, like, or you think that you can automate this task? Or if this task is something that it would be automated.

18:45 - 18:47

Sumedha: Then, it will be much, much easier.

18:47 - 18:52

Sumedha: I see so many people posting about email, okay?

18:53 - 18:55

Sumedha: Read my WhatsApp.

18:55 - 18:57

Sumedha: Reports?

18:58 - 19:04

Sumedha: Planning, reports, appointments, Expense, okay.

19:04 - 19:08

Sumedha: Presentation, email, again.

19:08 - 19:10

Sumedha: Calendars...

19:10 - 19:19

Sumedha: Amazing, amazing. I see so many people of you are posting about the same thing that you wanna automate.

19:20 - 19:38

Sumedha: Right? And honestly, like, if you take your time and think about it, on your day-to-day, there is a lot of things that you do every day, and are basically the same steps that is repeated over and over. Like, every time you get an email, you update a sheet.

19:38 - 19:49

Sumedha: send a message, or move one information from one place to another. Or you are just, you know, maybe following a workflow, right?

19:49 - 20:07

Sumedha: So, that is the same repetitive task that you do every day, and all of this you can just automate, right? So, the idea behind automation is simple. So, what if the steps could happen automatically, instead of us having to do them every single time?

20:07 - 20:12

Sumedha: And that's what we are going to explore today with anything.

20:12 - 20:25

Sumedha: So for that, we have our mentor for the day, Jitesh. Jitesh is a founder at Media Jade, an authorized Zoho partner, and also, Jitesh is a verified Annet and creator.

20:25 - 20:46

Sumedha: So, when it comes to automation, workflows, and actually making these tools work together, he knows the stuff, and he knows the best out there. And I think today's going to be a really hands-on session, because we are not just going to talk about it, like what automations can do. We are actually going to see

20:46 - 20:53

Sumedha: That what we can do, and we are gonna do it hands-on in the breakout room session later as well.

20:53 - 21:02

Sumedha: So, super excited to have Jitesh with us today. Jitesh, over to you. I will leave the session to you for next couple of hours.

21:02 - 21:05

Jitesh Dugar: Alright, thank you. Thank you, Sumedha.

21:05 - 21:07

Jitesh Dugar: Hello, everyone!

21:09 - 21:11

Jitesh Dugar: Quick check, just to make sure the chat is working.

21:12 - 21:16

Jitesh Dugar: I want all of you to answer on chat, where are you guys coming from?

21:20 - 21:24

Jitesh Dugar: All right, so many, so many responses. Hyderabad, Switzerland.

21:24 - 21:37

Jitesh Dugar: USA, Dubai, Gujarat, Naida, Sweden, Los Angeles, Mumbai, Pakistan, Bahrain, Bangalore, Saudi, okay, perfect, perfect, wonderful, love to see that energy. And we are able to see all the chats. The chats is sent

21:37 - 21:44

Jitesh Dugar: set to host and panelist, which means we can read your charts, you guys cannot read your charts. That is to ensure that you are away from distractions.

21:44 - 21:45

Jitesh Dugar: No.

21:47 - 21:52

Jitesh Dugar: Now... Over the next two, or possibly two and a half hours.

21:52 - 21:59

Jitesh Dugar: I have a few requests to all of you. I need your undivided attention for the next, probably, two and a half hours.

22:00 - 22:08

Jitesh Dugar: And what I mean by that is, if you have any distractions around you, any distractions, keep your phones on silent, any other distractions, keep all of that away.

22:08 - 22:11

Jitesh Dugar: And if I can get that promise from all of you.

22:11 - 22:20

Jitesh Dugar: I would return something back to all of you. My promise to all of you is, you will walk away with some extremely valuable

22:20 - 22:21

Jitesh Dugar: resource.

22:22 - 22:25

Jitesh Dugar: Extremely valuable resource in the world of automations.

22:25 - 22:28

Jitesh Dugar: And I know a thing or two about automations.

22:28 - 22:35

Jitesh Dugar: And I have been doing... building automation solutions for the past 7 years right now, so can I have that promise from everyone?

22:36 - 22:41

Jitesh Dugar: Your precious two and a half hours time, undivided attention, is all that I'm asking for.

22:42 - 22:45

Jitesh Dugar: All right, with that, thank you everyone for all the energy. Yes, thank you.

22:46 - 22:47

Jitesh Dugar: With that.

22:47 - 22:59

Jitesh Dugar: And I'll be asking a ton of questions, and throughout the session, I will be making some mistakes also. So, in case you are paying attention, you will have to help me catch those mistakes while I'm building something.

23:00 - 23:01

Jitesh Dugar: And...

23:02 - 23:08

Jitesh Dugar: Yeah, I'm not sharing my screen yet. I will just start by sharing my screen. I hope everyone can see my whiteboard.

23:10 - 23:14

Jitesh Dugar: I hope everyone can see my whiteboard, okay? Perfect. Now...

23:15 - 23:21

Jitesh Dugar: Remember, in the first two and a half hours, I will teach you guys, I will tell you how automation works.

23:22 - 23:26

Jitesh Dugar: Okay? After that, you will have a hands-on session.

23:26 - 23:35

Jitesh Dugar: You will have a hands-on session where you will be split into breakout rooms, and you will have individual mentors helping you solve a workbook.

23:35 - 23:42

Jitesh Dugar: So, during the first two and a half hours, you should not do hands-on, because you might miss very important stuff that I will be talking about.

23:43 - 23:48

Jitesh Dugar: So, I request to you, please observe as much as you can during the first two and a half hours.

23:48 - 23:52

Jitesh Dugar: With that, With that, I want all of you

23:53 - 23:59

Jitesh Dugar: to help me with a very small game, and I promise you this game is related to our topic of discussion today.

24:00 - 24:00

Jitesh Dugar: Okay?

24:01 - 24:06

Jitesh Dugar: And the game goes like this. I will put in some questions or some messages here, and you'll have to

24:07 - 24:08

Jitesh Dugar: Fill in the blanks for me.

24:09 - 24:14

Jitesh Dugar: Okay? My first message here is... Very simple one.

24:17 - 24:25

Jitesh Dugar: It is better late than DASH. Can someone tell me what should be the answer after that? Oh, wow.

24:25 - 24:33

Jitesh Dugar: I'm not going to read out the answer, but I can tell all of you that every single one of you answered it correctly. Okay, that's the first question.

24:33 - 24:38

Jitesh Dugar: Whoever answered it correctly, I know all of you answered it correctly. Okay, that's perfect.

24:38 - 24:40

Jitesh Dugar: The next question.

24:41 - 24:45

Jitesh Dugar: is... Twinkle, twinkle.

24:46 - 24:47

Jitesh Dugar: Little.

24:48 - 24:50

Jitesh Dugar: What goes after this?

24:51 - 24:56

Jitesh Dugar: Yes, I'm not going to read out the answer, but I know every single one of you answered it correctly.

24:56 - 24:58

Jitesh Dugar: Yes, perfect, okay.

24:58 - 24:59

Jitesh Dugar: The next one.

25:01 - 25:09

Jitesh Dugar: Mary had a little... Yes, as usual, all of you answered it exactly correctly.

25:12 - 25:14

Jitesh Dugar: Okay? The fourth question.

25:15 - 25:17

Jitesh Dugar: The fourth question goes like this.

25:21 - 25:23

Jitesh Dugar: Hope this email finds you.

25:28 - 25:30

Jitesh Dugar: Well, okay.

25:33 - 25:41

Jitesh Dugar: Okay, I can see some of you answered something different, but most of you are very, very correct. All of you are actually going in the exact same direction. Okay, perfect.

25:42 - 25:43

Jitesh Dugar: And the last one.

25:44 - 25:45

Jitesh Dugar: is...

25:48 - 25:51

Jitesh Dugar: Thanks, in, and DASH.

25:51 - 25:53

Jitesh Dugar: What comes after this?

25:56 - 25:57

Jitesh Dugar: Oh, wow.

25:58 - 26:03

Jitesh Dugar: Yes, I can see the same answer across all of you. Okay, perfect.

26:03 - 26:05

Jitesh Dugar: No. Perfect.

26:06 - 26:13

Jitesh Dugar: And I can tell you most of you scored 5 on 5, because everyone was going in the same direction.

26:13 - 26:15

Jitesh Dugar: Now, everyone, take a pause right now.

26:16 - 26:19

Jitesh Dugar: take a pause right now, and I want to ask all of you a question.

26:20 - 26:23

Jitesh Dugar: When I asked you all of these questions.

26:23 - 26:27

Jitesh Dugar: When I asked you all of these questions, nobody told you the answer.

26:28 - 26:31

Jitesh Dugar: But how did you know what was the answer?

26:32 - 26:35

Jitesh Dugar: How did you know what was the answer?

26:35 - 26:40

Jitesh Dugar: Yes, brain, memory, learnt it, predict, okay, wow.

26:40 - 26:45

Jitesh Dugar: Okay? I can see some answers right now. Prediction, right?

26:45 - 26:48

Jitesh Dugar: brain. It is already stored in our memory.

26:49 - 26:51

Jitesh Dugar: Yes, and we've heard it before, yes?

26:52 - 26:57

Jitesh Dugar: Yes, all of you are correct, yes, there is a pattern around it, yes, that's correct.

26:57 - 26:59

Jitesh Dugar: Hardwired in the brain, yes.

27:01 - 27:03

Jitesh Dugar: Common knowledge, yes, that's right.

27:04 - 27:07

Jitesh Dugar: Routine phrases, that is correct.

27:13 - 27:21

Jitesh Dugar: Yes, you guys are correct, and I think... I think one of you kind of identified which direction I'm going to. I'm not gonna take the name right now, but...

27:22 - 27:31

Jitesh Dugar: Nobody told you the answers, but your brain automatically got trained around something, because you've possibly heard it possibly thousand times.

27:31 - 27:38

Jitesh Dugar: If you hear it thousand times the same word again and again, it is already a part of your brain, it has been trained into your brain.

27:38 - 27:40

Jitesh Dugar: And these are repetitive phrases.

27:41 - 27:46

Jitesh Dugar: Okay? And in the world of machines, do you know what is the name for something like this?

27:47 - 27:55

Jitesh Dugar: As humans, we are able to do it. In the machine world, what is it that does exactly this? It predicts the next word.

27:56 - 27:57

Jitesh Dugar: Oh, wow.

27:58 - 28:01

Jitesh Dugar: Okay, someone's saying automation, I can see a few answers.

28:01 - 28:04

Jitesh Dugar: Okay, I can see some answers saying automations.

28:05 - 28:15

Jitesh Dugar: someone saying generative AI, someone saying LLMs, let me put all of those down here. Automation Generative AI, LLMs.

28:16 - 28:22

Jitesh Dugar: Machine learning... Yes, I think some of you are correct.

28:23 - 28:26

Jitesh Dugar: But the closest answer to all of this is LLMs.

28:28 - 28:32

Jitesh Dugar: LLMs is that next word predictor.

28:33 - 28:42

Jitesh Dugar: In the world of machines, So, what it does is, it is one of the next word predictors itself.

28:44 - 28:49

Jitesh Dugar: And let me tell you, LLMs is all that it does. It predicts the next word for you.

28:50 - 28:55

Jitesh Dugar: So you can even call it... The world's best

28:56 - 29:09

Jitesh Dugar: Next word predictor. And I do not have to tell you what next word predictor means. You have all seen it right now. You have all seen it. You guys have experienced what it feels like predicting that next word.

29:09 - 29:16

Jitesh Dugar: Because it has... you've heard it so many times, imagine LLMs have so much of power, so much of...

29:17 - 29:22

Jitesh Dugar: A computing intelligence that they may have been trained with so much of information.

29:22 - 29:28

Jitesh Dugar: So much of words, so much of tokens put together, so much of sentences put together.

29:28 - 29:31

Jitesh Dugar: And they are only able to predict the next word.

29:32 - 29:35

Jitesh Dugar: And... When they predict the next word.

29:36 - 29:41

Jitesh Dugar: When they predict the next word, they look at the context from the previous words.

29:41 - 29:44

Jitesh Dugar: And maybe the questions also.

29:44 - 29:47

Jitesh Dugar: Now, let me tell you what LLM stands for.

29:49 - 29:53

Jitesh Dugar: LLM stands for... Large language model.

29:54 - 29:56

Jitesh Dugar: They understand languages.

29:57 - 30:02

Jitesh Dugar: And, let me tell you, LLMs only predict the next word.

30:02 - 30:14

Jitesh Dugar: It just guesses what the next word could be. But that guess is not random. It is based on so much of calculations, so much of heavy calculations, that it most likely gets you the correct one itself, and we think it is magic.

30:15 - 30:22

Jitesh Dugar: Okay? It is not magic. It is a structured way for us to be able to predict that next word.

30:23 - 30:27

Jitesh Dugar: Everyone good until this point. Now you know what an LLM is.

30:32 - 30:33

Jitesh Dugar: Okay?

30:34 - 30:36

Jitesh Dugar: In the world of machines.

30:36 - 30:41

Jitesh Dugar: LLM is that thing that predicts the next word, stuff that we did just now.

30:41 - 30:43

Jitesh Dugar: Okay? Now...

30:43 - 30:50

Jitesh Dugar: Are you ready to play one more round of that game again? One more time? Are you ready and excited?

30:51 - 30:52

Jitesh Dugar: Round 2.

30:53 - 30:58

Jitesh Dugar: of a similar game, okay? Now, my question, same rules.

30:58 - 31:00

Jitesh Dugar: But my questions will change.

31:01 - 31:03

Jitesh Dugar: My questions are...

31:06 - 31:11

Jitesh Dugar: The best cricketer... Of all time is.

31:11 - 31:14

Jitesh Dugar: Can someone tell me what is the answer for this?

31:17 - 31:23

Jitesh Dugar: Okay, I can see so many answers. Wow, Bradman, Sachin, Tendulkar, Sunil Gavaskar, okay?

31:23 - 31:28

Jitesh Dugar: Zahir Khan, okay, Veerat Kohli, okay, so many. I think, why are we all divided right now?

31:28 - 31:34

Jitesh Dugar: When we started Stage 1, Round 1, we were all going in the same direction.

31:35 - 31:39

Jitesh Dugar: But in round 2, suddenly, we are all so very well divided.

31:40 - 31:49

Jitesh Dugar: Okay, someone's saying, Vive Richards, answers keep coming. Yes, you guys are right. Okay, let us start... try one more time to see if you're able to go in the same direction.

31:49 - 31:51

Jitesh Dugar: And that next question is.

31:55 - 32:00

Jitesh Dugar: The best place to live in Bengaluru is.

32:01 - 32:03

Jitesh Dugar: Can someone answer this question?

32:03 - 32:07

Jitesh Dugar: Or you can say whatever, in your context. Yes, I can see some answers.

32:07 - 32:14

Jitesh Dugar: Okay, London is the best place, Marathil is the best place, Madiwala, no idea, that's okay, okay? But what I wanted to explain was.

32:15 - 32:24

Jitesh Dugar: Again, no clue, that's okay, yes, but a lot of you answered questions, Las Vegas, Indira Nagar, Kauramangla, okay. Perfect. But yeah, again, we are still very divided, right?

32:25 - 32:31

Jitesh Dugar: Compared to round one, we were all going in the same direction. In round two, we are all divided right now.

32:32 - 32:39

Jitesh Dugar: Again, Maybe people who could not relate to the second one, my favorite food is...

32:43 - 32:50

Jitesh Dugar: My favorite food is... Okay, Biryani idli chapati, okay? Dhal risotto, okay?

32:50 - 32:53

Jitesh Dugar: Grilled, okay, so much of stuff, yes, perfect.

32:53 - 33:02

Jitesh Dugar: Oh, no. We're all going in the wrong direct... I mean, different direction right now, not the wrong direction, but all different direction. What did... what changed here?

33:02 - 33:04

Jitesh Dugar: Why did this happen?

33:05 - 33:13

Jitesh Dugar: Same exercise, we played the same kind of the game, we were all going in the same direction earlier, but this time we are all going in different directions. What happened?

33:14 - 33:15

Jitesh Dugar: Everyone.

33:23 - 33:26

Jitesh Dugar: Yes, it's personalized, right?

33:26 - 33:30

Jitesh Dugar: It is personalized, and it depends on the context.

33:31 - 33:33

Jitesh Dugar: It depends on the context.

33:33 - 33:36

Jitesh Dugar: Now... And a lot of times.

33:37 - 33:40

Jitesh Dugar: A lot of times, the answer to this could vary.

33:41 - 33:46

Jitesh Dugar: The answer to this could vary, and the same thing applies to LLMs also.

33:47 - 33:53

Jitesh Dugar: In the world of LLMs, Because it is a next-word predictor.

33:53 - 33:58

Jitesh Dugar: It could give different answers for the same question every single time.

33:59 - 34:05

Jitesh Dugar: Let me ask all of you a question. Have you experienced a situation where you ask an LLM to

34:05 - 34:07

Jitesh Dugar: Write an email.

34:07 - 34:17

Jitesh Dugar: Okay? And you ask an LLM to write a sales-related email twice, and both of these times, the LLM is giving you different kind of responses.

34:18 - 34:21

Jitesh Dugar: And we've never experienced something like this with machines before.

34:21 - 34:23

Jitesh Dugar: But LLMs are doing it.

34:24 - 34:30

Jitesh Dugar: Right? Exact same model, exact same prompt, but it's giving us a different reply.

34:31 - 34:32

Jitesh Dugar: Okay?

34:32 - 34:34

Jitesh Dugar: On top of that.

34:34 - 34:40

Jitesh Dugar: If you change the context, I'm using the term context, everyone. I'm using the term context.

34:40 - 34:45

Jitesh Dugar: There is a term called context that LLMs use to predict that next word.

34:45 - 34:48

Jitesh Dugar: And let me tell you what context means.

34:49 - 34:52

Jitesh Dugar: And I am going to take a very simple example.

34:55 - 35:01

Jitesh Dugar: If we go to any LLM, if we go to any LLM, and I ask a question.

35:02 - 35:10

Jitesh Dugar: What is the capital... off, the United Kingdom.

35:12 - 35:17

Jitesh Dugar: If we go to an LLM and ask this question, what is the capital of the United Kingdom?

35:19 - 35:22

Jitesh Dugar: the way the LLMs generate an answer.

35:22 - 35:23

Jitesh Dugar: is.

35:24 - 35:28

Jitesh Dugar: It will already have the question in the context.

35:28 - 35:32

Jitesh Dugar: Along with this, it will have so much of training data.

35:32 - 35:41

Jitesh Dugar: So, what it does is... It converts this question into a set of something called tokens.

35:42 - 35:48

Jitesh Dugar: Before giving you the answer, internally, what happens is it converts the question into a set of tokens.

35:51 - 35:52

Jitesh Dugar: Like this.

35:54 - 35:57

Jitesh Dugar: This is token 1, token 2, token 3, and so on.

35:59 - 36:01

Jitesh Dugar: All different colors.

36:02 - 36:11

Jitesh Dugar: And... After that, It uses this information, this question, it looks up its training data.

36:11 - 36:15

Jitesh Dugar: And then it starts typing word after the other.

36:15 - 36:16

Jitesh Dugar: Okay?

36:16 - 36:18

Jitesh Dugar: And the way this goes is.

36:18 - 36:20

Jitesh Dugar: When it is writing you the answer.

36:20 - 36:25

Jitesh Dugar: The answer goes like this. First, it writes the first word, the.

36:26 - 36:29

Jitesh Dugar: Then it starts writing the second word, the capital.

36:30 - 36:34

Jitesh Dugar: Then, it predicts the third word, which is the capital city.

36:35 - 36:36

Jitesh Dugar: Then, the next one.

36:36 - 36:46

Jitesh Dugar: Then the next one, then it finally gives you the right answer that says, or the right answer, the capital city of the United Kingdom.

36:47 - 36:49

Jitesh Dugar: Is... London.

36:50 - 36:52

Jitesh Dugar: That is how this works.

36:53 - 36:55

Jitesh Dugar: And how does it get an idea of

36:56 - 37:00

Jitesh Dugar: the fact that I have to give you... give you this kind of a response. Because...

37:01 - 37:09

Jitesh Dugar: It knows... it uses that question, it uses its knowledge that it has been trained on, and it keeps predicting the next word.

37:09 - 37:18

Jitesh Dugar: And at the time of predicting that next word, it is using so much of calculations behind it. Behind the scenes, so much of calculations is happening.

37:19 - 37:23

Jitesh Dugar: And the next time you go to a ChatGPT and ask it to draft a

37:24 - 37:33

Jitesh Dugar: a draft a 400-word email. You have to remember, it does not go ahead and draft it right away. It internally goes word after word.

37:33 - 37:36

Jitesh Dugar: Technically, it is not even a word. Technically, it is tokens.

37:38 - 37:40

Jitesh Dugar: Tokens are like words itself.

37:41 - 37:43

Jitesh Dugar: Tokens are like words?

37:44 - 37:50

Jitesh Dugar: Okay? And it keeps predicting one word after the other, and that is how it drafts that 400-word email for you.

37:51 - 37:59

Jitesh Dugar: And that entire process is being handled by LLMs, which is nothing but a predictor.

38:00 - 38:01

Jitesh Dugar: That's all it does.

38:02 - 38:03

Jitesh Dugar: Okay?

38:03 - 38:06

Jitesh Dugar: Now, I got a very interesting question, okay?

38:06 - 38:08

Jitesh Dugar: Two very interesting questions, rather.

38:10 - 38:12

Jitesh Dugar: What about images and videos?

38:13 - 38:21

Jitesh Dugar: And how come... how come if LLM is just about prediction, or guessing, how come it is able to write such good code?

38:21 - 38:27

Jitesh Dugar: We all trust coding agents, it's able to write code in Python, JavaScript, stuff that is so complex.

38:28 - 38:30

Jitesh Dugar: Everyone has that curiosity.

38:31 - 38:35

Jitesh Dugar: Okay? So, what it does... Here's...

38:35 - 38:43

Jitesh Dugar: Just like text, just like text, it converts these images or videos into tokens.

38:44 - 38:46

Jitesh Dugar: Tokens are nothing but numbers.

38:46 - 38:49

Jitesh Dugar: And then the internal processing still remains the same.

38:50 - 38:58

Jitesh Dugar: Internal processing for tokens also will remain the same. So, the way it handled text, text was converted into tokens.

39:00 - 39:02

Jitesh Dugar: Sorry, this is text.

39:02 - 39:07

Jitesh Dugar: text before doing something. It was converted into the form of tokens.

39:07 - 39:08

Jitesh Dugar: And then it...

39:10 - 39:19

Jitesh Dugar: did all of the calculations on top of it. Images and videos also work in a similar way. The only thing is the complexity with images and videos is multifold.

39:19 - 39:23

Jitesh Dugar: But the internal stuff of the prediction algorithm is the same.

39:25 - 39:31

Jitesh Dugar: Next, how does it handle code? Something like such complex code, how is it able to write all of this?

39:31 - 39:32

Jitesh Dugar: Okay?

39:33 - 39:47

Jitesh Dugar: So, in case of code, because it is trained with so much of data, so much of pattern around how good Python codes are written, it is already able to predict it in such good way that we're not able to realize that it is just guessing something.

39:47 - 39:53

Jitesh Dugar: And it is able to give weights to the next word that it is supposed to predict.

39:53 - 40:04

Jitesh Dugar: Before arriving to this answer, it would have done so much of calculation to identify that. After the, I have to... the next word that I should do is capital.

40:04 - 40:12

Jitesh Dugar: And after capital, the next word should be city. There was so much of calculations that happened behind the scene to get that next word.

40:12 - 40:20

Jitesh Dugar: And there was so much of competition between so many words to identify, and city was the one that won for that next word.

40:21 - 40:23

Jitesh Dugar: That is what an LLM is.

40:25 - 40:29

Jitesh Dugar: Everyone good until now. Do you understand what an LLM is?

40:29 - 40:33

Jitesh Dugar: If this is clear, there's so much interesting stuff that I will talk about next.

40:35 - 40:36

Jitesh Dugar: Okay?

40:39 - 40:42

Jitesh Dugar: Now, I have a question to ask all of you.

40:42 - 40:45

Jitesh Dugar: All of you use... use ChatGPT.

40:45 - 40:47

Jitesh Dugar: Can you answer a question for me?

40:48 - 40:50

Jitesh Dugar: Is ChatGPT an LLM?

40:53 - 41:00

Jitesh Dugar: is ChatGPT and LLM. Okay, some of you are saying no, some of you are saying yes. A lot of you are saying yes, majority, yes.

41:01 - 41:03

Jitesh Dugar: Okay, majority of you are saying yes, okay?

41:04 - 41:10

Jitesh Dugar: Okay, we will get to that answer, okay? We'll get to that answer. I will ask you this question one more time.

41:11 - 41:11

Jitesh Dugar: Nope.

41:12 - 41:19

Jitesh Dugar: After we have learned about LLMs, we've learned about LLMs, let us talk about another interesting stuff.

41:21 - 41:28

Jitesh Dugar: And that is... So, we spoke about LLMs.

41:29 - 41:31

Jitesh Dugar: Which was the first topic right here.

41:34 - 41:41

Jitesh Dugar: The next term that I want to talk about Is something called memory.

41:43 - 41:44

Jitesh Dugar: No.

41:45 - 41:49

Jitesh Dugar: Remember, LLMs are just about prediction.

41:50 - 41:52

Jitesh Dugar: LLMs are just about prediction.

41:52 - 41:58

Jitesh Dugar: But... For us to be able to function properly, We need some memory.

41:59 - 42:03

Jitesh Dugar: Okay? We need some memory so that we can

42:04 - 42:08

Jitesh Dugar: Wait, is everyone able to see my screen? One of you said my screen is blank.

42:09 - 42:14

Jitesh Dugar: Debashis, please check one more time, I think my screen is visible. Okay.

42:15 - 42:16

Jitesh Dugar: Perfect.

42:17 - 42:25

Jitesh Dugar: Until now, LLM was only able to predict that next word. Now, imagine a situation where I went to ChatGPT, and I asked a question.

42:26 - 42:28

Jitesh Dugar: And my question goes like this.

42:28 - 42:33

Jitesh Dugar: What is the... capital of... the United Kingdom.

42:38 - 42:43

Jitesh Dugar: I'll just use, the United Kingdom itself, yes, okay.

42:44 - 42:46

Jitesh Dugar: This is a question that I asked.

42:48 - 42:48

Jitesh Dugar: And...

42:52 - 42:58

Jitesh Dugar: Everyone knows what answer it would give us. It would say, London is the capital of the United Kingdom.

42:59 - 43:02

Jitesh Dugar: Then... On the same chat, I asked a question.

43:03 - 43:11

Jitesh Dugar: The next question for me was like this. Let me call this question 1, answer 1, and I asked a follow-up question on the same chat.

43:12 - 43:14

Jitesh Dugar: And my next question went like this.

43:20 - 43:23

Jitesh Dugar: Who is the Prime Minister of this country?

43:25 - 43:29

Jitesh Dugar: Remember, This time, I did not tell it which country.

43:29 - 43:31

Jitesh Dugar: You know what'll happen?

43:33 - 43:37

Jitesh Dugar: You know what'll happen, everyone? Can you guess what could happen?

43:37 - 43:43

Jitesh Dugar: It will refer to online sources, No.

43:43 - 43:45

Jitesh Dugar: If there was no memory.

43:45 - 43:51

Jitesh Dugar: If there was no memory, assuming there's no memory yet, okay? The answer would have been something like...

43:54 - 43:57

Jitesh Dugar: Sorry, which country are you talking about?

44:01 - 44:03

Jitesh Dugar: This is a situation where there was no memory.

44:03 - 44:09

Jitesh Dugar: Because... Typically, LLMs do not have their own built-in memory.

44:11 - 44:14

Jitesh Dugar: So, when we ask this second question.

44:15 - 44:23

Jitesh Dugar: LLM only took this question as the reference, and this question was not added along with the previous questions.

44:24 - 44:25

Jitesh Dugar: So?

44:25 - 44:29

Jitesh Dugar: This question was independent of the previous question and the answer.

44:29 - 44:34

Jitesh Dugar: That's why it said, sorry, which country are you talking about? It did not know what I were talking about.

44:35 - 44:38

Jitesh Dugar: But this is a situation where there was no memory.

44:38 - 44:39

Jitesh Dugar: No.

44:39 - 44:43

Jitesh Dugar: If there was a memory, If there was a memory.

44:44 - 44:50

Jitesh Dugar: In that situation, what would happen is, Same situation here.

44:51 - 45:02

Jitesh Dugar: whenever LLM gets the second question, what it does is, to the LLM, in the previous question, the LLM only gets question 2 as the context.

45:03 - 45:06

Jitesh Dugar: To the LLM, we only feed question 2.

45:07 - 45:09

Jitesh Dugar: Only question 2 is feeded to the LLM.

45:10 - 45:13

Jitesh Dugar: And then LLM is not sure what to answer.

45:13 - 45:16

Jitesh Dugar: Whenever there is a memory, what happens is...

45:17 - 45:21

Jitesh Dugar: We feed something else also to question 2.

45:21 - 45:26

Jitesh Dugar: Along with question 2, we also feed it question 1 plus Answer 1.

45:28 - 45:28

Jitesh Dugar: Okay?

45:29 - 45:33

Jitesh Dugar: And... This information is then sent to the LLM.

45:33 - 45:34

Jitesh Dugar: Now?

45:35 - 45:43

Jitesh Dugar: Before predicting that next word, LLM already knows that we are talking about United Kingdom as a country.

45:43 - 45:45

Jitesh Dugar: And it will give us the right answer.

45:47 - 45:49

Jitesh Dugar: It will give us the right answer.

45:49 - 45:52

Jitesh Dugar: Can someone tell me what will be the answer for this one?

45:57 - 45:58

Jitesh Dugar: Okay?

46:04 - 46:06

Jitesh Dugar: Yes, this is the answer for this.

46:07 - 46:09

Jitesh Dugar: Right? Now, because...

46:10 - 46:17

Jitesh Dugar: Yes, let me explain this one more time. If there was no memory, the LLM only gets the question 2

46:18 - 46:30

Jitesh Dugar: as the question to the LLM. And in the situation where we have a memory, the LLM gets question 2 along with question 1 and answer one, also as a context.

46:30 - 46:35

Jitesh Dugar: So, context is everything that you mix along with your original question to the LLM.

46:36 - 46:37

Jitesh Dugar: That's how it works.

46:38 - 46:40

Jitesh Dugar: Everyone good with what a memory is?

46:42 - 46:46

Jitesh Dugar: We have learned LLMs, And we have learned memory.

46:46 - 46:48

Jitesh Dugar: Okay? Yes, context is king.

46:49 - 46:52

Jitesh Dugar: And if you give it good context, LLMs will do really well.

46:54 - 46:57

Jitesh Dugar: So, we've learned LLMs, and we've learned memory also.

46:59 - 47:00

Jitesh Dugar: No.

47:00 - 47:04

Jitesh Dugar: People are already guessing what is the point that I'm trying to make.

47:04 - 47:05

Jitesh Dugar: We will answer that.

47:08 - 47:12

Jitesh Dugar: Now, the next thing that I want to talk about Aes?

47:14 - 47:17

Jitesh Dugar: is now... We have something.

47:18 - 47:20

Jitesh Dugar: We have something. Yes, this is our page.

47:35 - 47:39

Jitesh Dugar: Now, until now, our LLM can do two things.

47:40 - 47:49

Jitesh Dugar: With large language model, it can understand our message, it can predict the word for us. It can do really good talking for us, it can remember stuff, it can answer a lot of our questions.

47:50 - 47:51

Jitesh Dugar: And...

47:51 - 47:57

Jitesh Dugar: Everyone, I... I hope I have your attention. We are going to talk about something very important, okay? So.

47:58 - 48:07

Jitesh Dugar: If I ask the LLM a question, and that question goes like this, Write me a sales...

48:07 - 48:09

Jitesh Dugar: Pitch email for my company.

48:10 - 48:13

Jitesh Dugar: Do you think the LLM will give us a very good answer?

48:14 - 48:15

Jitesh Dugar: Hey, everyone.

48:18 - 48:19

Jitesh Dugar: No. Yes?

48:20 - 48:26

Jitesh Dugar: Yes, okay? Because we have not given context, but let's say if we're giving more context.

48:26 - 48:30

Jitesh Dugar: We are saying, write me an email for my company that sells

48:34 - 48:39

Jitesh Dugar: a lot of stuff. We're giving a lot of information, and it'll give us a good answer this time, right?

48:39 - 48:42

Jitesh Dugar: If you're giving it good context, okay?

48:43 - 48:44

Jitesh Dugar: And it'll give us a good answer.

48:48 - 48:56

Jitesh Dugar: Now, if I give it another question, Okay? And if I tell... K... Can you...

48:57 - 49:01

Jitesh Dugar: Can you go ahead and... Send this email.

49:02 - 49:08

Jitesh Dugar: 2... My... 10 clients.

49:08 - 49:13

Jitesh Dugar: or 10 prospects, and you've given them the list of those prospects. Do you think it can do it?

49:17 - 49:19

Jitesh Dugar: No, everyone's saying no.

49:19 - 49:21

Jitesh Dugar: Okay, why do you think that is happening?

49:25 - 49:31

Jitesh Dugar: Yes, I think some of you identified it. Okay. Now, I want to tell you...

49:31 - 49:36

Jitesh Dugar: Until now, it was able to predict, it had a memory, it could remember stuff.

49:36 - 49:40

Jitesh Dugar: But, it could not do anything in the real world.

49:41 - 49:46

Jitesh Dugar: It could not do anything in the real world. It could just be do a question-answer with us, right? That's all it does.

49:47 - 49:51

Jitesh Dugar: Because... It does not have access to our emails.

49:52 - 49:59

Jitesh Dugar: It'll say, sorry, I do not... Have access to your email.

49:59 - 50:00

Jitesh Dugar: So, I cannot.

50:02 - 50:03

Jitesh Dugar: That's what it does.

50:04 - 50:07

Jitesh Dugar: So it is not doing anything in the real world at all.

50:07 - 50:12

Jitesh Dugar: So... What if we could give our hand to our LLM?

50:12 - 50:21

Jitesh Dugar: So that it can do something. So far, it is only doing the talking, not executing something. Okay, what if we could give a hand to our LLM?

50:21 - 50:22

Jitesh Dugar: Okay?

50:22 - 50:28

Jitesh Dugar: And that hand to the LLM, is called... Tools.

50:30 - 50:35

Jitesh Dugar: Tools is like... giving a hand to an LLM.

50:35 - 50:37

Jitesh Dugar: To execute something.

50:44 - 50:49

Jitesh Dugar: And it could be anything. It could be anything, right? It could be giving it access to your emails.

50:49 - 50:52

Jitesh Dugar: So that it can send emails on your behalf.

50:52 - 51:02

Jitesh Dugar: It... giving it access to your calendar so that it can book meetings on your calendar, it can cancel your meetings, giving it access to possibly a food delivery app.

51:03 - 51:05

Jitesh Dugar: a food delivery app. So...

51:05 - 51:14

Jitesh Dugar: If you give it a tool, and you give it access to a tool, that gives it an ability to order food from a food delivery app.

51:15 - 51:18

Jitesh Dugar: Order food from a food delivery app.

51:21 - 51:25

Jitesh Dugar: It can actually go ahead and order a food for you. Order food for you.

51:27 - 51:30

Jitesh Dugar: Because you have given it the tool.

51:30 - 51:33

Jitesh Dugar: So that it can order food for you.

51:34 - 51:35

Jitesh Dugar: No.

51:35 - 51:52

Jitesh Dugar: For tools, whenever you're in the AI world, whenever you're talking about tools, you'll hear similar-looking terms. If you hear these terms, you should remember these are tools only, okay? If you ever use a... hear a term called connector, remember connector is same as a tool.

51:53 - 51:57

Jitesh Dugar: Have you heard of this term called MCPs, everyone?

51:57 - 52:00

Jitesh Dugar: Right? Extremely fancy term.

52:01 - 52:01

Jitesh Dugar: Right?

52:02 - 52:02

Jitesh Dugar: Yes.

52:03 - 52:09

Jitesh Dugar: MCP is also a way to give an LLM, And access to a tool.

52:10 - 52:17

Jitesh Dugar: Okay, I will not get into too much of details around MCP, we'll possibly already have some sessions around it, but MCP just stands for

52:17 - 52:27

Jitesh Dugar: model context protocol, and the easiest explanation that I can give right now is, it gives AI an ability to connect to external systems.

52:28 - 52:29

Jitesh Dugar: Okay?

52:31 - 52:35

Jitesh Dugar: And connectors can be in the form of APIs or MCPs.

52:35 - 52:38

Jitesh Dugar: So, all of these are tools itself.

52:39 - 52:42

Jitesh Dugar: Everyone good with the term tool?

52:42 - 52:45

Jitesh Dugar: So, we have discussed these three terminologies.

52:46 - 52:51

Jitesh Dugar: Memory, large language model, memory, and tools now.

52:52 - 52:53

Jitesh Dugar: Okay?

52:56 - 53:04

Jitesh Dugar: And tools can be anything, giving it a hand to execute something, order food from a food delivery app. Let me give more examples also.

53:05 - 53:09

Jitesh Dugar: Send email, from your... Email address.

53:10 - 53:12

Jitesh Dugar: Read all your emails.

53:13 - 53:17

Jitesh Dugar: I'm giving you some really common examples, but they can be extremely complex ones also.

53:18 - 53:20

Jitesh Dugar: Book meeting on your calendar.

53:22 - 53:26

Jitesh Dugar: So these are all examples of tools, or rather MCPs also.

53:26 - 53:32

Jitesh Dugar: So, I will explain tool one more time. Tool will give an LLM, or rather.

53:32 - 53:35

Jitesh Dugar: Something that can execute something, okay?

53:35 - 53:36

Jitesh Dugar: No.

53:39 - 53:45

Jitesh Dugar: Now, I want to introduce all of you to something very interesting, okay?

53:45 - 53:49

Jitesh Dugar: And that next terminology, everyone, is...

53:49 - 53:51

Jitesh Dugar: All of you heard it already.

53:53 - 53:54

Jitesh Dugar: AI agents.

53:56 - 54:02

Jitesh Dugar: AI agents. People who did not understand tools, do not worry, I will give you a live example for it.

54:02 - 54:06

Jitesh Dugar: Okay? Now... Everyone has heard the term AI agent.

54:10 - 54:15

Jitesh Dugar: Yes, everyone has heard of the term AI agents, and let me tell you what AI agents are.

54:15 - 54:21

Jitesh Dugar: AI agents are typically a mix of three things.

54:23 - 54:26

Jitesh Dugar: And those 3 things are... LLMs?

54:30 - 54:32

Jitesh Dugar: The next one is a memory.

54:33 - 54:36

Jitesh Dugar: And the next one is a tool.

54:36 - 54:39

Jitesh Dugar: All the three stuff that we have learned so far.

54:39 - 54:42

Jitesh Dugar: And that is what NAI Agent includes.

54:44 - 54:54

Jitesh Dugar: Okay? Now... So this AI agent has LLMs that gives it an ability to Think?

54:56 - 55:00

Jitesh Dugar: AI agent has a brain that gives it an ability to remember.

55:03 - 55:06

Jitesh Dugar: The next one is, AI agents have an ability to

55:07 - 55:13

Jitesh Dugar: execute, or perform actions. I would just say execute right now, but it can perform actions.

55:14 - 55:17

Jitesh Dugar: So, I will repeat it one more time.

55:17 - 55:24

Jitesh Dugar: AI agents has access to LLMs that gives it an ability to think or process. It is like the brain.

55:25 - 55:26

Jitesh Dugar: Okay?

55:26 - 55:28

Jitesh Dugar: And in some cases, it is also called

55:29 - 55:32

Jitesh Dugar: Typically, those brains can be chat models.

55:33 - 55:35

Jitesh Dugar: Those brains can be chat models.

55:36 - 55:38

Jitesh Dugar: And I'll tell you more about CHAND models.

55:39 - 55:43

Jitesh Dugar: AI agents can remember previous conversations using a memory.

55:44 - 55:49

Jitesh Dugar: AI agents are able to execute tasks on an external system.

55:49 - 56:01

Jitesh Dugar: the moment you tell an AI agent that, hey, can you book a cab for me? It will say, if you give me access to your app so that I can... that gives me an ability to book a cab, I can, of course, do it for you.

56:02 - 56:11

Jitesh Dugar: Okay? So, tools are like hands, giving AI agent a hand to do something on an external something... external system.

56:12 - 56:14

Jitesh Dugar: perform actions.

56:16 - 56:18

Jitesh Dugar: On an external system.

56:21 - 56:23

Jitesh Dugar: This is what tools mean.

56:24 - 56:30

Jitesh Dugar: Everyone good with AI Agent so far. Everything that I've spoken about so far.

56:30 - 56:32

Jitesh Dugar: On a scale of 1 to 10,

56:33 - 56:37

Jitesh Dugar: Have you understood all that I've spoken about? LLMs?

56:37 - 56:50

Jitesh Dugar: Memory and tools. Oh, wow. 10. 10 from a lot of you. 7 from some of you, 9, okay, perfect. A lot of you said 10, okay, perfect. Thank you, everyone. And I have to give credit to all of you, too, for being so patient throughout.

56:50 - 56:55

Jitesh Dugar: And... listening to me. Perfect. Thousand, okay, perfect, thank you. Now...

56:57 - 56:59

Jitesh Dugar: How do LLMs get memory? We will learn all of that.

57:00 - 57:08

Jitesh Dugar: Yes, perfect. Now, Now... Now, I want to come back to that question again.

57:08 - 57:10

Jitesh Dugar: is ChatGPT an LLM?

57:12 - 57:16

Jitesh Dugar: The question that I want to ask all of you is ChatGPT an LLM?

57:18 - 57:21

Jitesh Dugar: Okay, now... now all of you guys are flipped, okay?

57:21 - 57:25

Jitesh Dugar: Earlier, a lot of you were saying, yes, it is an LLM,

57:25 - 57:27

Jitesh Dugar: Now, a lot of you are saying no.

57:27 - 57:28

Jitesh Dugar: Okay?

57:28 - 57:30

Jitesh Dugar: Then what is ChatGPT?

57:32 - 57:34

Jitesh Dugar: What is Chart JP? It's an AI agent.

57:36 - 57:39

Jitesh Dugar: Okay, yes, CHPD is an AI agent.

57:39 - 57:43

Jitesh Dugar: And remember, people who are saying LLM, you guys are not... Wrong?

57:44 - 57:47

Jitesh Dugar: But that was applicable possibly about 3 years ago.

57:47 - 57:52

Jitesh Dugar: 3 years ago, when ChatGPT was introduced, it would act as an LLM only.

57:52 - 58:01

Jitesh Dugar: It did not have possibly a memory, it was not able to execute something, it was just writing good poems for you, good emails for you, that's what it was doing earlier.

58:02 - 58:05

Jitesh Dugar: But now, it is a full-blown agent.

58:06 - 58:09

Jitesh Dugar: Because it can remember stuff, and it can execute stuff as well.

58:10 - 58:11

Jitesh Dugar: No.

58:11 - 58:14

Jitesh Dugar: What is an... LLM then.

58:14 - 58:15

Jitesh Dugar: Okay?

58:15 - 58:19

Jitesh Dugar: And I think some of you already identified it correctly.

58:19 - 58:26

Jitesh Dugar: all the models that we see inside ChatGPT or Gemini, or I will open ChatGPT to show it to all of you.

58:29 - 58:33

Jitesh Dugar: By the way, ChatGPT already has an automatic model switching, so if I go to Gemini, let's say.

58:35 - 58:38

Jitesh Dugar: On Gemini, you can switch between these models, okay?

58:39 - 58:49

Jitesh Dugar: And these models are those LLMs. 3.6 Flash is a LLM. 3.6 thinking is an LLM. 3.1 Pro is an LLM.

58:49 - 59:01

Jitesh Dugar: Same thing applies to a Claude also. Okay, if you come into Claude, all of these are LLMs. Fable 5.1 is an LLM. Opus 5, Sonnet 5, HICO 5, all of these are LLMs.

59:02 - 59:12

Jitesh Dugar: But the product Claude, or ChatGPT, or Gemini, they are an agent. Because they include a mix of LLMs, they have a built-in memory.

59:12 - 59:15

Jitesh Dugar: And they have connectors.

59:15 - 59:18

Jitesh Dugar: They have these connectors, and these connectors are those tools.

59:18 - 59:36

Jitesh Dugar: Now, if I tell it... if I tell Claude, hey, can you go to my email and do something, it will do it for you. Can you go to this tool to do something? Can you go to Netlify and deploy my app? It will do it. Can you go to Slack, read all my messages? It'll do. It'll go to my CRM, read all my lead information.

59:36 - 59:42

Jitesh Dugar: Okay? Which means Claude, as an agent, can talk to external systems.

59:43 - 59:49

Jitesh Dugar: Is everyone clear with this? The concept of LLMs versus AI agents?

59:54 - [01:00:01]

Jitesh Dugar: Okay, so every time you hear a new model coming in, that is an LLM. But ChatGPT as a product is an agent.

[01:00:01] - [01:00:02]

Jitesh Dugar: Okay, perfect.

[01:00:05] - [01:00:06]

Jitesh Dugar: No.

[01:00:08] - [01:00:10]

Jitesh Dugar: The next thing, right?

[01:00:12] - [01:00:16]

Jitesh Dugar: The next thing that I want to talk about is...

[01:00:20] - [01:00:31]

Jitesh Dugar: By the way, before that, I want to give you one more example or a reference of what all happens, right? So, quick differentiation, or possibly a recap between LLMs and agents.

[01:00:32] - [01:00:35]

Jitesh Dugar: Let me talk about that. I will put LLM on one side.

[01:00:40] - [01:00:45]

Jitesh Dugar: I will put LLMs on one side, and I will put AI agent on the other side.

[01:00:47] - [01:00:51]

Jitesh Dugar: And I will put down a few differences between LLMs and AI agents.

[01:00:52] - [01:00:57]

Jitesh Dugar: LLMs typically act based on instructions.

[01:00:58] - [01:01:09]

Jitesh Dugar: Which means you tell it what you want, it'll... it will give you the answer. Okay, it'll predict the answer for you. It works on instructions. However, AI Agent works based on goals.

[01:01:10] - [01:01:12]

Jitesh Dugar: AI agents will work based on goals.

[01:01:15] - [01:01:23]

Jitesh Dugar: That is one of the important distinctions between it, and if I have to give you an example for it, an example can be something like...

[01:01:24] - [01:01:29]

Jitesh Dugar: Hmm... And my question could look something like this.

[01:01:30] - [01:01:34]

Jitesh Dugar: Can you draft a... Cancellation email for me.

[01:01:37] - [01:01:40]

Jitesh Dugar: Okay? This is an example of an instruction.

[01:01:40] - [01:01:47]

Jitesh Dugar: But for an AI agent, what I can do is I can give it a goal. I can just say.

[01:01:47] - [01:01:51]

Jitesh Dugar: free up my... Calendar.

[01:01:52] - [01:01:54]

Jitesh Dugar: meetings for Friday.

[01:01:55] - [01:02:02]

Jitesh Dugar: free up my calendar meetings for Friday. Now, what happens in this example?

Everyone, please pay attention, okay? So...

[01:02:02] - [01:02:07]

Jitesh Dugar: what the AI agent will do, it'll go step by step. Step one, what it'll do is.

[01:02:07] - [01:02:09]

Jitesh Dugar: It will first check.

[01:02:09] - [01:02:10]

Jitesh Dugar: What?

[01:02:12] - [01:02:16]

Jitesh Dugar: Meetings are on my calendar for Friday.

[01:02:18] - [01:02:19]

Jitesh Dugar: Next, what it'll do...

[01:02:20] - [01:02:26]

Jitesh Dugar: it is... it has possibly identified there are meetings with 3 people. Let's say there are meetings with Daniel.

[01:02:27] - [01:02:30]

Jitesh Dugar: Ranjith, right? And possibly James.

[01:02:31] - [01:02:38]

Jitesh Dugar: What it'll do is, it will send an email to these people, email asking to reschedule.

[01:02:39] - [01:02:41]

Jitesh Dugar: And it is doing all of this automatically, okay?

[01:02:42] - [01:02:53]

Jitesh Dugar: Because it knows it has to free up my calendar meetings for Friday, so it'll send an email to all those people who are on my calendar for that day, and it'll ask them, are you okay to reschedule the meeting?

[01:02:53] - [01:02:58]

Jitesh Dugar: And the next thing that'll do after this is... If they have accepted.

[01:02:58] - [01:03:03]

Jitesh Dugar: Or they say, yes, I'm okay to reschedule to a later date, maybe a Monday or a Friday.

[01:03:03] - [01:03:08]

Jitesh Dugar: And, what it'll do is he'll come back, As the result is back.

[01:03:09] - [01:03:16]

Jitesh Dugar: And then... if everyone agrees.

[01:03:16] - [01:03:18]

Jitesh Dugar: to reschedule.

[01:03:18] - [01:03:23]

Jitesh Dugar: It will... Reschedule the meetings.

[01:03:25] - [01:03:26]

Jitesh Dugar: Step 4.

[01:03:27] - [01:03:29]

Jitesh Dugar: It will again think again, right?

[01:03:35] - [01:03:36]

Jitesh Dugar: Is the goal achieved?

[01:03:37] - [01:03:42]

Jitesh Dugar: If the answer to that is yes, It will stop.

[01:03:42] - [01:03:45]

Jitesh Dugar: If the answer... answer to that is no.

[01:03:53] - [01:03:55]

Jitesh Dugar: Identify next steps.

[01:03:55] - [01:04:07]

Jitesh Dugar: It can keep going into that loop until the goal is met, and the goal looks like this. I'm just trying to give you an understanding of what an AI agent is capable of doing.

[01:04:08] - [01:04:19]

Jitesh Dugar: It is able to look at your calendar, it is able to send emails or do the communication with these people, it gets back the result, and it can also reschedule the meetings for you.

[01:04:19] - [01:04:32]

Jitesh Dugar: And this is all based on some kind of an instruction or details that you would have given them. Whatever I've given here is very simple, but in the back of it, you would have trained the AI agent with so much of information on how to do something.

[01:04:32] - [01:04:34]

Jitesh Dugar: And it gets into all of this loop.

[01:04:35] - [01:04:40]

Jitesh Dugar: So, all that we have seen so far, this is the loop that the AI agent gets into.

[01:04:42] - [01:04:43]

Jitesh Dugar: loop.

[01:04:43] - [01:04:45]

Jitesh Dugar: Until the goal is met.

[01:04:47] - [01:04:52]

Jitesh Dugar: Is everyone clear with a basic understanding of what an AI agent is capable of doing?

[01:04:52] - [01:04:55]

Jitesh Dugar: How it does and all of that, that is something that we will learn.

[01:04:56] - [01:05:01]

Jitesh Dugar: Okay? But AI Agent is able to go through all of this loop to do something.

[01:05:01] - [01:05:09]

Jitesh Dugar: And one important takeaway from this is, LLMs act based on instructions, AI agents act based on goals.

[01:05:12] - [01:05:21]

Jitesh Dugar: Okay? Now... That is one distinction between LLMs and an AI agent.

[01:05:23] - [01:05:24]

Jitesh Dugar: No.

[01:05:26] - [01:05:29]

Jitesh Dugar: Now, we'll see all of this in action now. Gradually.

[01:05:30] - [01:05:32]

Jitesh Dugar: But another thing that you should also be aware of.

[01:05:32] - [01:05:36]

Jitesh Dugar: LLMs are also very useful in a lot of ways.

[01:05:37] - [01:05:41]

Jitesh Dugar: LLMs are extremely useful to do a lot of stuff.

[01:05:41] - [01:05:45]

Jitesh Dugar: And those use cases where LLMs find a great use case.

[01:05:45] - [01:05:50]

Jitesh Dugar: R... Situations where you need AI to summarize something.

[01:05:53] - [01:05:58]

Jitesh Dugar: When you want AI to summarize a huge line of text, you can use an LLM, it does a great job.

[01:05:59] - [01:06:12]

Jitesh Dugar: Whenever you wanted to generate something, we have seen that example, generate a cancellation email, it does a great job. In situation where you wanted to translate something, translate from one language to another, LLMs are very good at it.

[01:06:13] - [01:06:14]

Jitesh Dugar: Another situation.

[01:06:16] - [01:06:17]

Jitesh Dugar: transform.

[01:06:17] - [01:06:22]

Jitesh Dugar: Transform is changing from one type to the other. LLMs are a great use case for it.

[01:06:23] - [01:06:25]

Jitesh Dugar: Another case is classifications.

[01:06:26] - [01:06:34]

Jitesh Dugar: Wherever you want LLM to identify whether it is a good feedback or a bad feedback, LLMs are able to classify it very well.

[01:06:35] - [01:06:41]

Jitesh Dugar: So, these are situations where Where LLMs find a great use case.

[01:06:42] - [01:06:43]

Jitesh Dugar: Okay?

[01:06:43] - [01:06:46]

Jitesh Dugar: But, in case of AI agents.

[01:06:46] - [01:06:48]

Jitesh Dugar: You go into this kind of a loop.

[01:06:48] - [01:06:55]

Jitesh Dugar: It helps you achieve a lot of stuff, but there are a few things that you should be aware of. Whether you should give it

[01:06:55] - [01:07:00]

Jitesh Dugar: Access to your emails or not, whether you should give it access to

[01:07:01] - [01:07:04]

Jitesh Dugar: Your calendar or not, all of these, you should be aware of.

[01:07:05] - [01:07:08]

Jitesh Dugar: So, the reason I'm giving you all of this information is.

[01:07:09] - [01:07:16]

Jitesh Dugar: When I get into the practical session, you have to tell me whether I should use an LLM or an AI agent.

[01:07:16] - [01:07:17]

Jitesh Dugar: Okay?

[01:07:19] - [01:07:27]

Jitesh Dugar: With that... With that... Let us talk about the next tough.

[01:07:28] - [01:07:31]

Jitesh Dugar: And things... the stuff that we have all gathered for.

[01:07:31] - [01:07:32]

Jitesh Dugar: Okay?

[01:07:32] - [01:07:35]

Jitesh Dugar: Do you know what that is? The next topic.

[01:07:40] - [01:07:43]

Jitesh Dugar: Okay? Workflow anything, okay? Automation.

[01:07:44] - [01:07:46]

Jitesh Dugar: Yes, we will talk about automation now.

[01:07:49] - [01:07:55]

Jitesh Dugar: And... Before I get into the world of automation, it is my duty to explain you some...

[01:07:56] - [01:08:02]

Jitesh Dugar: important building blocks of an automation, okay? And for that, I want to show you a very simple example.

[01:08:03] - [01:08:07]

Jitesh Dugar: When you walk into a coffee shop, everyone, when you walk into a coffee shop.

[01:08:08] - [01:08:10]

Jitesh Dugar: Okay? What are the things that you do?

[01:08:13] - [01:08:14]

Jitesh Dugar: Step by step.

[01:08:16] - [01:08:24]

Jitesh Dugar: Let's say you want to place an order. Yes, you guys are right. You place an order, you check the menu, and then you place an order. Yes, that's right. Yes, you guys are actually going...

[01:08:24] - [01:08:33]

Jitesh Dugar: A little too detailed, finding a seat, yes, that's right. Find a table, look at the menu card, and place an order. Let's talk about the order experience.

[01:08:35] - [01:08:40]

Jitesh Dugar: You place an order, you, let's say, place an order and pay, let's say.

[01:08:41] - [01:08:44]

Jitesh Dugar: Okay? I will not talk about all of the detailed steps.

[01:08:44] - [01:08:47]

Jitesh Dugar: Because I just want to explain a very simple concept first.

[01:08:48] - [01:08:57]

Jitesh Dugar: So... Then you place an order, the, the cashier Accepts the order.

[01:08:59] - [01:09:01]

Jitesh Dugar: That's what happens next.

[01:09:03] - [01:09:11]

Jitesh Dugar: Remember, I'm not getting into too much of details. A lot of you have kind of broken it down into extremely detailed steps, you guys are right, okay?

[01:09:11] - [01:09:15]

Jitesh Dugar: Now, next... Barrista?

[01:09:15] - [01:09:18]

Jitesh Dugar: Starts preparing coffee for you.

[01:09:24] - [01:09:25]

Jitesh Dugar: Yes?

[01:09:26] - [01:09:29]

Jitesh Dugar: Then, they call your name.

[01:09:33] - [01:09:36]

Jitesh Dugar: Once the coffee's prepared, they call your name.

[01:09:37] - [01:09:38]

Jitesh Dugar: And then?

[01:09:40] - [01:09:41]

Jitesh Dugar: You pick up your coffee.

[01:09:42] - [01:09:45]

Jitesh Dugar: And then finally, you enjoy your coffee.

[01:09:45] - [01:09:52]

Jitesh Dugar: That is a typical possible flow that happens. Of course, a lot of stuff may happen in between, okay? Now.

[01:09:53] - [01:09:56]

Jitesh Dugar: The reason for me talking about this example is.

[01:09:56] - [01:10:02]

Jitesh Dugar: I need all of you to look at this this flowchart, Okay? And tell me...

[01:10:03] - [01:10:07]

Jitesh Dugar: All of these steps were executed in possibly the same order.

[01:10:07] - [01:10:10]

Jitesh Dugar: And these are blocks connected using arrows.

[01:10:11] - [01:10:19]

Jitesh Dugar: Help me answer a question, everyone. What was that one step out of all of these five steps that triggered the entire process for us?

[01:10:20] - [01:10:23]

Jitesh Dugar: That triggered the entire process for us.

[01:10:29] - [01:10:32]

Jitesh Dugar: Oh, wow, I love it, yes. You guys are right.

[01:10:32] - [01:10:33]

Jitesh Dugar: Placing the order.

[01:10:34] - [01:10:36]

Jitesh Dugar: Placing the order and paying. Yes, you guys are right.

[01:10:37] - [01:10:42]

Jitesh Dugar: So, if you wouldn't have done or this step.

[01:10:44] - [01:10:48]

Jitesh Dugar: And people who are saying urging coffee bees are right as well, okay? That is correct.

[01:10:48] - [01:10:50]

Jitesh Dugar: But in this workflow.

[01:10:51] - [01:11:00]

Jitesh Dugar: This given step was the one that triggered all of the steps after this, which means if this step wouldn't have happened, all of the other steps wouldn't have executed.

[01:11:01] - [01:11:12]

Jitesh Dugar: cashier wouldn't have accepted the order, the barista wouldn't have prepared your coffee, they wouldn't have called your name, and you wouldn't pick up the coffee. So this step in the world of automation is called a trigger.

[01:11:14] - [01:11:17]

Jitesh Dugar: Any step that starts the automation.

[01:11:18] - [01:11:21]

Jitesh Dugar: Any steps that starts the automation is called a trigger.

[01:11:21] - [01:11:24]

Jitesh Dugar: So I will make some notes here.

[01:11:24] - [01:11:33]

Jitesh Dugar: The step that starts the automation It's called a... Trigger.

[01:11:36] - [01:11:40]

Jitesh Dugar: So that is one important terminology for an automation.

[01:11:41] - [01:11:42]

Jitesh Dugar: Next.

[01:11:42] - [01:11:44]

Jitesh Dugar: So this thing is a trigger, we've all seen it.

[01:11:45] - [01:11:48]

Jitesh Dugar: All the steps that happened after the trigger.

[01:11:50] - [01:11:52]

Jitesh Dugar: All the steps that happened after the trigger.

[01:11:53] - [01:11:56]

Jitesh Dugar: There is a terminology for that also. All of these steps.

[01:11:58] - [01:12:01]

Jitesh Dugar: The one that is highlighted in blue.

[01:12:03] - [01:12:07]

Jitesh Dugar: Wow, I can see some of you already answered it all.

[01:12:08] - [01:12:10]

Jitesh Dugar: And the term for that is called...

[01:12:12] - [01:12:15]

Jitesh Dugar: No, it's not automation, it is called actions.

[01:12:16] - [01:12:18]

Jitesh Dugar: So, this is a trigger.

[01:12:19] - [01:12:23]

Jitesh Dugar: And all the steps that followed after this are actions.

[01:12:24] - [01:12:31]

Jitesh Dugar: So, the steps... that follow... Our trigger are called.

[01:12:33] - [01:12:34]

Jitesh Dugar: Actions.

[01:12:35] - [01:12:39]

Jitesh Dugar: So these are two very important terminologies of any automation.

[01:12:39] - [01:12:42]

Jitesh Dugar: And... You guys are correct.

[01:12:42] - [01:12:45]

Jitesh Dugar: What is an automation? An automation?

[01:12:45] - [01:12:50]

Jitesh Dugar: includes... Trigger plus actions.

[01:12:50] - [01:12:53]

Jitesh Dugar: That's what automation is made of.

[01:12:53] - [01:12:56]

Jitesh Dugar: So, if you have to define what an automation is.

[01:12:56] - [01:12:58]

Jitesh Dugar: And Automation starts with a trigger.

[01:12:58] - [01:13:01]

Jitesh Dugar: And it is followed by a set of actions.

[01:13:01] - [01:13:03]

Jitesh Dugar: Exactly like how you've seen here.

[01:13:05] - [01:13:07]

Jitesh Dugar: Is it making sense, everyone?

[01:13:07] - [01:13:21]

Jitesh Dugar: The stuff that I'm talking about, this is not in specific. Whether you learn any automation tool, be it Zapier, Make, Power Automate, any of the automation tools, you will have to understand what is trigger, what are actions.

[01:13:22] - [01:13:22]

Jitesh Dugar: Okay?

[01:13:23] - [01:13:25]

Jitesh Dugar: I hope it is making sense. Now.

[01:13:28] - [01:13:29]

Jitesh Dugar: Next.

[01:13:30] - [01:13:37]

Jitesh Dugar: And of course, automations, whatever we see here, sometimes automations are also called

[01:13:41] - [01:13:51]

Jitesh Dugar: There are different names for automations. I'm telling you this because when you go out of this class, people might use different terms, but you have to understand that whatever they are talking about.

[01:13:51] - [01:13:57]

Jitesh Dugar: they actually mean the same thing. So sometimes people might use the term workflow, or they might use a term flow also.

[01:13:58] - [01:14:06]

Jitesh Dugar: So, workflows and flows are also automations in a lot of cases. No, Y porting is different. Y porting is not related to automations.

[01:14:06] - [01:14:08]

Jitesh Dugar: That's a different term.

[01:14:09] - [01:14:09]

Jitesh Dugar: No.

[01:14:11] - [01:14:15]

Jitesh Dugar: We know what a trigger is, you know what action is. Now.

[01:14:17] - [01:14:19]

Jitesh Dugar: I want to ask all of you a question.

[01:14:20] - [01:14:23]

Jitesh Dugar: Imagine I have drawn this thing.

[01:14:24] - [01:14:30]

Jitesh Dugar: as a flow chart. If you think about any other use case, imagine in your mind

[01:14:30] - [01:14:38]

Jitesh Dugar: Imagine in your mind what happens when you place an order on your e-commerce app. Let's say you place an order on an Amazon.

[01:14:39] - [01:14:46]

Jitesh Dugar: Do you agree that after you place an order on Amazon App, there are a set of things that happen at the back end.

[01:14:47] - [01:14:52]

Jitesh Dugar: At the back end, until the point where you get the order delivered at your doorstep.

[01:14:52] - [01:14:55]

Jitesh Dugar: There are so many systems working in the back.

[01:14:56] - [01:15:05]

Jitesh Dugar: Yes, everyone's saying yes, yes, a lot of stuff will happen. It'll go to the warehouse, and a lot of stuff will happen. That also is an automation.

[01:15:05] - [01:15:11]

Jitesh Dugar: And you can try to map it in this way, but don't do it right now. Now, why did I have to tell you this?

[01:15:12] - [01:15:15]

Jitesh Dugar: All of these systems All of these systems.

[01:15:16] - [01:15:20]

Jitesh Dugar: Require a lot of developers to build these systems.

[01:15:21] - [01:15:25]

Jitesh Dugar: Probably hundreds or thousands of developers would have built these systems, but...

[01:15:26] - [01:15:29]

Jitesh Dugar: There are certain tools using which

[01:15:29] - [01:15:33]

Jitesh Dugar: You can build these systems without writing a line of code.

[01:15:34] - [01:15:38]

Jitesh Dugar: Without writing a line of code, you can build these kind of automation systems.

[01:15:39] - [01:15:43]

Jitesh Dugar: Just by putting together these blocks one after the other.

[01:15:44] - [01:15:49]

Jitesh Dugar: You... you see this workflow that you... the flowchart in... on your screen, right?

[01:15:49] - [01:15:55]

Jitesh Dugar: This is literally a workflow that I've drawn using by placing one box after the other.

[01:15:55] - [01:15:58]

Jitesh Dugar: What if you could build these kind of systems.

[01:15:59] - [01:16:03]

Jitesh Dugar: What if you could build these kind of systems just by putting together these blocks?

[01:16:04] - [01:16:06]

Jitesh Dugar: by visual blocks.

[01:16:06] - [01:16:17]

Jitesh Dugar: So... There are certain tools or softwares, That let you build automations?

[01:16:17] - [01:16:30]

Jitesh Dugar: Visually, By putting together blocks, And those tools are called... Workflow Automation Tools.

[01:16:33] - [01:16:41]

Jitesh Dugar: I will repeat, all the tools that let you build automations using a visual builder without writing any line of code.

[01:16:42] - [01:16:44]

Jitesh Dugar: They are called workflow Automation Tools.

[01:16:45] - [01:16:53]

Jitesh Dugar: And those workflow automation tools will let you add a trigger, they will let you add an action also, or multiple actions, and you can build an automation.

[01:16:53] - [01:16:57]

Jitesh Dugar: Is everyone clear with what a workflow automation tool is?

[01:16:58] - [01:17:03]

Jitesh Dugar: By the way, give me a number on chat on a scale of 1 to 10 if you're clear until this point.

[01:17:05] - [01:17:06]

Jitesh Dugar: Okay, perfect.

[01:17:07] - [01:17:13]

Jitesh Dugar: Perfect. Thank you, everyone, for paying attention and being so patient throughout. Thank you, thank you. Okay, perfect.

[01:17:13] - [01:17:14]

Jitesh Dugar: No.

[01:17:14] - [01:17:19]

Jitesh Dugar: Let me give you examples of workflow automation tools that are in the market.

[01:17:20] - [01:17:26]

Jitesh Dugar: different workflow automation tools that are very popular in the market, and I think one of you already named it.

[01:17:27] - [01:17:33]

Jitesh Dugar: Thank you. Zapier is a very popular workflow automation tool. The next one is Make.com.

[01:17:34] - [01:17:36]

Jitesh Dugar: The next one is Anaten.

[01:17:37] - [01:17:40]

Jitesh Dugar: The next one is, Power Automate.

[01:17:46] - [01:17:52]

Jitesh Dugar: And there are a ton of other, workflow automation tools. There's another one called Pablo Connect.

[01:17:53] - [01:17:55]

Jitesh Dugar: There's another one called Integrately.

[01:17:56] - [01:18:01]

Jitesh Dugar: And let me tell you, there are so many other tools, I can keep naming them, the list is huge.

[01:18:02] - [01:18:08]

Jitesh Dugar: Okay? And there are a ton of tools that'll keep coming also. But these are the ones that I could think of right now.

[01:18:09] - [01:18:09]

Jitesh Dugar: No.

[01:18:10] - [01:18:23]

Jitesh Dugar: Now, and all of you know that the tool that we will talk about on today's session is N10. Now, before I directly get into NATEN, you might be wondering, why did you choose N80? Is Outskill trying to promote N80? No, that's not the case.

[01:18:24] - [01:18:32]

Jitesh Dugar: If you hear about all of these tools in the market, out of all of these tools, Ann does stand out in a lot of ways.

[01:18:33] - [01:18:41]

Jitesh Dugar: Okay? In a lot of ways. While Zapier and Make are fairly very popular, NA10 has gained popularity very recently.

[01:18:42] - [01:18:46]

Jitesh Dugar: Because of the kind of extra flexibility that it offers.

[01:18:47] - [01:18:49]

Jitesh Dugar: Okay, so why are we choosing N10?

[01:18:52] - [01:18:54]

Jitesh Dugar: It is extremely flexible.

[01:18:54] - [01:19:05]

Jitesh Dugar: And one thing why N80 definitely stands out in terms of the adoption is, out of all the tools that I've mentioned, N10 is the only tool that is open source.

[01:19:07] - [01:19:11]

Jitesh Dugar: If you're wondering what an open source is, I will explain that.

[01:19:12] - [01:19:17]

Jitesh Dugar: nyen is the only tool that is open source. Other tools are not open source.

[01:19:20] - [01:19:21]

Jitesh Dugar: No.

[01:19:23] - [01:19:24]

Jitesh Dugar: And by the way.

[01:19:24] - [01:19:32]

Jitesh Dugar: All the stuff that I've spoken about so far, triggers, actions, workflow, all of these are applicable for Zapier Make, all of the other tools also.

[01:19:32] - [01:19:35]

Jitesh Dugar: And, if you're curious outside of NATEN,

[01:19:36] - [01:19:49]

Jitesh Dugar: outside NAT, you're free to try out other tools as well. Whatever learnings you get from this session, you can go ahead and apply that for other tools also. The interface will change, but the logic or the knowledge remains the same.

[01:19:50] - [01:19:51]

Jitesh Dugar: Okay?

[01:19:52] - [01:19:52]

Jitesh Dugar: No.

[01:19:53] - [01:19:58]

Jitesh Dugar: With that, Because now we are talking about N8 and itself.

[01:19:58] - [01:20:01]

Jitesh Dugar: Before I get into Ann platform.

[01:20:02] - [01:20:06]

Jitesh Dugar: I want to tell you how did the term anthen come into practice?

[01:20:07] - [01:20:12]

Jitesh Dugar: Innate and everyone is a short form for A term called nodemation.

[01:20:15] - [01:20:18]

Jitesh Dugar: NA10 is a short form for a term called nodemation.

[01:20:18] - [01:20:25]

Jitesh Dugar: If you're wondering how come node mission became an if you count the number of letters.

[01:20:26] - [01:20:33]

Jitesh Dugar: If you count the number of letters between the first N and the last N, can you tell me how many letters are there?

[01:20:37] - [01:20:39]

Jitesh Dugar: 8 characters, yes.

[01:20:40] - [01:20:44]

Jitesh Dugar: There are exactly 8 characters between the first N and the last N.

[01:20:45] - [01:20:50]

Jitesh Dugar: And... Because of that, it became N8N.

[01:20:51] - [01:20:55]

Jitesh Dugar: And again, you might be wondering, what is an automation, okay?

[01:20:56] - [01:21:01]

Jitesh Dugar: NodeMation is, again, a short form for something called node-Based Automations.

[01:21:02] - [01:21:04]

Jitesh Dugar: Node-based automations.

[01:21:04] - [01:21:08]

Jitesh Dugar: And if people are wondering why am I telling you all of this, there's a reason for it.

[01:21:09] - [01:21:20]

Jitesh Dugar: We are using a term node here. And remember, this node is nothing to do with Node.js coding framework, or the software framework Node.js. That's not related. I use the term node here, okay?

[01:21:20] - [01:21:27]

Jitesh Dugar: It means NA10 allows you to build automations by putting together nodes.

[01:21:27] - [01:21:35]

Jitesh Dugar: If you're wondering what a node is, Node is... Each step of an automation.

[01:21:35] - [01:21:37]

Jitesh Dugar: on an A10.

[01:21:38] - [01:21:42]

Jitesh Dugar: And I had to tell you this, because in the world of any time.

[01:21:42] - [01:21:46]

Jitesh Dugar: Every step of the automation is called a node.

[01:21:46] - [01:21:52]

Jitesh Dugar: Okay? If you think of an automation that looks like this, let's say if this was your automation.

[01:21:52] - [01:21:56]

Jitesh Dugar: Where there are 5 blocks put one after the other.

[01:21:56] - [01:22:05]

Jitesh Dugar: Every single box is a node. So this will be one node, this will be another node, this will be another node, this will be another node, this will be another node.

[01:22:05] - [01:22:08]

Jitesh Dugar: So, trigger is a node, and action is also a node.

[01:22:11] - [01:22:12]

Jitesh Dugar: Everyone clear with this?

[01:22:13] - [01:22:17]

Jitesh Dugar: Each step of an automation on any 10 is... will be called a node.

[01:22:18] - [01:22:22]

Jitesh Dugar: Or every block on the automation will be called a node.

[01:22:24] - [01:22:27]

Jitesh Dugar: With that... Let me show you NA10.

[01:22:31] - [01:22:43]

Jitesh Dugar: Now, the website for NA10 here is this, it's NATEN.io, and before I dive into NA10 or show you around a few things, I have a request again. Do not try to do alongside.

[01:22:44] - [01:22:45]

Jitesh Dugar: I will be...

[01:22:45] - [01:22:50]

Jitesh Dugar: showing you a few things. If you try to do alongside, you will miss those things, okay?

[01:22:50] - [01:22:52]

Jitesh Dugar: Just absorb as much as you can.

[01:22:53] - [01:22:54]

Jitesh Dugar: So...

[01:22:54] - [01:23:10]

Jitesh Dugar: This is the website for NATEN, it's NA10.io, and as you can see here, using NA10, you can build AI agents, which you know what AI agents are. You can also build workflows, and you know workflows means automations. That includes a trigger and actions.

[01:23:10] - [01:23:20]

Jitesh Dugar: As we scroll down, you can build workflows around all of these, and you can see here there's an AI agent that has a chat model, which is the brain, it has a memory, it has tools also.

[01:23:20] - [01:23:27]

Jitesh Dugar: And you can see here, these are automations, and it... this icon, if you're familiar, it is for Slack.

[01:23:27] - [01:23:31]

Jitesh Dugar: Which means you can build automations to do something on Slack.

[01:23:31] - [01:23:36]

Jitesh Dugar: Okay? Let's take about... talk about another example. And if you look at this.

[01:23:36] - [01:23:39]

Jitesh Dugar: All of these automations are very similar to the

[01:23:39] - [01:23:46]

Jitesh Dugar: flowchart that I've drawn here, which means it is just one box after the other, connected using arrows.

[01:23:47] - [01:23:49]

Jitesh Dugar: Okay, that's exactly what it is.

[01:23:51] - [01:23:53]

Jitesh Dugar: And that is what an automation is.

[01:23:53] - [01:23:58]

Jitesh Dugar: When we build automations, your workflows or automations will look like this itself.

[01:24:05] - [01:24:06]

Jitesh Dugar: Yes.

[01:24:07] - [01:24:08]

Jitesh Dugar: Next, let's scroll down.

[01:24:09] - [01:24:15]

Jitesh Dugar: As you scroll down, yeah, I can see one of you asked a question, what is open source? I will answer that. I'm aware of that, I've not answered it.

[01:24:16] - [01:24:26]

Jitesh Dugar: Now, as you scroll down, it says you can connect any with 500 plus integrations, but let me tell you, this number is outdated. If you look at browse all integrations.

[01:24:26] - [01:24:32]

Jitesh Dugar: the number is close to more than 2100 integrations right now. So NATM can connect to

[01:24:32] - [01:24:43]

Jitesh Dugar: Possibly 2,000 plus apps right now. It can connect with Google Sheet, Gmail, Outlook, Microsoft Teams, Slack, OpenAI, Telegram, so many other tools.

[01:24:43] - [01:24:49]

Jitesh Dugar: look for your CRM tool or any software that you use, it can possibly already connect with those.

[01:24:52] - [01:24:55]

Jitesh Dugar: So it can integrate with 2,000 plus different softwares.

[01:24:59] - [01:25:00]

Jitesh Dugar: Let me go back.

[01:25:02] - [01:25:06]

Jitesh Dugar: As we scroll down, I just told you it can connect with 2,000 plus softwares right now.

[01:25:07] - [01:25:14]

Jitesh Dugar: And then, these are some use cases. You can write some code as well. There are some case studies. Again, this part I wanted to talk about.

[01:25:15] - [01:25:20]

Jitesh Dugar: When you build automations, you may have to give it access to your email.

[01:25:20] - [01:25:27]

Jitesh Dugar: You may have to give it access to your email, calendar, a lot of external softwares, and you might be concerned about the privacy and security aspects.

[01:25:27] - [01:25:31]

Jitesh Dugar: Okay? If you have those questions or doubts.

[01:25:31] - [01:25:36]

Jitesh Dugar: You can ensure, or you can go through, the documentation that Ann has.

[01:25:37] - [01:25:40]

Jitesh Dugar: Around the privacy and the security aspects.

[01:25:40] - [01:25:56]

Jitesh Dugar: It has all the standard, the top-of-the-world, privacy on the security compliances, SOC 2, GDPR, all of those. They have all of those compliances. There is a detailed documentation around this on their website itself. You can go through it.

[01:25:57] - [01:26:01]

Jitesh Dugar: But... Despite that, if you still have a doubt, I have a surprise for you.

[01:26:02] - [01:26:04]

Jitesh Dugar: Okay? And I will talk about that.

[01:26:05] - [01:26:07]

Jitesh Dugar: Let's talk about pricing.

[01:26:08] - [01:26:21]

Jitesh Dugar: Now, when you look at N10's pricing, of course, one of the options is you can go ahead and start a free trial. You have a 14-day free trial on N10. Let me make a note of stuff around pricing.

[01:26:23] - [01:26:25]

Jitesh Dugar: pricing for an A10.

[01:26:26] - [01:26:30]

Jitesh Dugar: And there are 3 ways for you to use NATAM.

[01:26:37] - [01:26:51]

Jitesh Dugar: There are 3 ways to use Ann. The first option is Cloud Plan, okay? Now, Cloud Plan, by default, whatever you see here, you have an option of starting a free trial on the Cloud Plan, and you get a 14-day free trial.

[01:26:51] - [01:26:54]

Jitesh Dugar: On the cloud plan, you get 14-day.

[01:26:55] - [01:27:02]

Jitesh Dugar: free trial. After that, you pay close to 24 euros a month.

[01:27:03] - [01:27:08]

Jitesh Dugar: Okay? That's what the pricing starts with. That's the default plan.

[01:27:09] - [01:27:13]

Jitesh Dugar: 20 or 24 euros, based on whether you choose the monthly or the annual plan.

[01:27:13] - [01:27:18]

Jitesh Dugar: As you scroll down, and you can see here it says, posted by NATN.

[01:27:18] - [01:27:19]

Jitesh Dugar: Which means?

[01:27:19] - [01:27:25]

Jitesh Dugar: This thing is managed by NAT itself, and you pay a fee for it. But as you scroll down.

[01:27:26] - [01:27:29]

Jitesh Dugar: There is a section here that says Community Edition.

[01:27:30] - [01:27:33]

Jitesh Dugar: Okay? And this is the part where I need all of your full attention.

[01:27:34] - [01:27:39]

Jitesh Dugar: It is saying Community Edition, and there's a link here.

[01:27:39] - [01:27:46]

Jitesh Dugar: That says... that gives... has a number around it. It is more than 200,000, and this number will keep changing every single day.

[01:27:46] - [01:27:49]

Jitesh Dugar: Let me click on this link. As you click on it.

[01:27:49] - [01:27:52]

Jitesh Dugar: You will go into a website called githubhub.com.

[01:27:53] - [01:28:05]

Jitesh Dugar: If you're not familiar with the website githubhub.com, let me tell you, it is a way for developers around the world to store their code, to store their software code.

[01:28:06] - [01:28:14]

Jitesh Dugar: So it is like a Google Drive, but not for media or your files. It is like a Google Drive for storing code, or taking a backup of your code.

[01:28:15] - [01:28:16]

Jitesh Dugar: Okay?

[01:28:17] - [01:28:17]

Jitesh Dugar: No.

[01:28:18] - [01:28:21]

Jitesh Dugar: And what you see on my screen right now.

[01:28:21] - [01:28:26]

Jitesh Dugar: is the entire code that is powering the software N10.

[01:28:27] - [01:28:30]

Jitesh Dugar: the entire code that is powering the software in Anton.

[01:28:31] - [01:28:34]

Jitesh Dugar: That code has been made public by NATEN.

[01:28:35] - [01:28:38]

Jitesh Dugar: And that is what I meant when I said open source.

[01:28:39] - [01:28:44]

Jitesh Dugar: NATN has made their entire software code public via GitHub.

[01:28:45] - [01:28:49]

Jitesh Dugar: And anyone can literally click here, download the entire code.

[01:28:50] - [01:28:52]

Jitesh Dugar: They can click on Download Zip.

[01:28:52] - [01:28:58]

Jitesh Dugar: And they can download the entire code on their local computer, and that is the code that powers the Ann system.

[01:29:00] - [01:29:06]

Jitesh Dugar: Everyone understands what an open source is, Open source means?

[01:29:08] - [01:29:12]

Jitesh Dugar: code is public, and I know some of you are asking.

[01:29:12] - [01:29:15]

Jitesh Dugar: If Ann has made their code public, is it safe?

[01:29:17] - [01:29:21]

Jitesh Dugar: It is 100% safe, because they've only made the code public.

[01:29:21] - [01:29:25]

Jitesh Dugar: All your data and everything is still secure on their servers.

[01:29:26] - [01:29:28]

Jitesh Dugar: Only the code or the framework is public.

[01:29:30] - [01:29:31]

Jitesh Dugar: Everything else?

[01:29:31] - [01:29:36]

Jitesh Dugar: is still secure on their servers, okay? So it is 100% secure.

[01:29:37] - [01:29:38]

Jitesh Dugar: Next.

[01:29:38] - [01:29:41]

Jitesh Dugar: And why did I want to show you all of this? Because...

[01:29:42] - [01:29:50]

Jitesh Dugar: The second way to use NATM is... You can self-host an ATM, Any 10?

[01:29:51] - [01:29:53]

Jitesh Dugar: on local computer.

[01:29:54] - [01:29:57]

Jitesh Dugar: Everyone... Please pay attention to this part.

[01:29:58] - [01:29:59]

Jitesh Dugar: What this means is.

[01:30:00] - [01:30:07]

Jitesh Dugar: Because NA10 is open source, where the code is public, you can download NA10's code and host it on your local computer.

[01:30:08] - [01:30:13]

Jitesh Dugar: You can host it on your local computer, and the advantage for that is.

[01:30:13] - [01:30:15]

Jitesh Dugar: You can run it for free.

[01:30:18] - [01:30:22]

Jitesh Dugar: you can use it for free. Let's mention free here.

[01:30:22] - [01:30:28]

Jitesh Dugar: without paying any cost to NATEN, at all. Because it is running on your computer itself.

[01:30:29] - [01:30:32]

Jitesh Dugar: Only it uses your computer's memory, space, and all of those things.

[01:30:35] - [01:30:40]

Jitesh Dugar: Next, While it is free, what is the catch to it, okay?

[01:30:40] - [01:30:45]

Jitesh Dugar: And the catch is, It does not run 24-7.

[01:30:46] - [01:30:52]

Jitesh Dugar: Because... because it is running on your local computer, the moment you switch off your computer.

[01:30:52] - [01:30:56]

Jitesh Dugar: The moment you switch off your computer, it stops running.

[01:30:57] - [01:31:02]

Jitesh Dugar: So, it depends on your computer to be switched on all the time.

[01:31:03] - [01:31:05]

Jitesh Dugar: So, what is the solution to this?

[01:31:05] - [01:31:15]

Jitesh Dugar: The solution is... You can self-host NATM on a... VPS.

[01:31:16] - [01:31:18]

Jitesh Dugar: VPS stands for Virtual.

[01:31:19] - [01:31:20]

Jitesh Dugar: private server.

[01:31:21] - [01:31:27]

Jitesh Dugar: What that means is, You can rent a server space from a lot of

[01:31:28] - [01:31:32]

Jitesh Dugar: server providers, and those VPS options, let me name some of them.

[01:31:32] - [01:31:36]

Jitesh Dugar: VPS options include, and you're free to choose any of those.

[01:31:36] - [01:31:41]

Jitesh Dugar: DigitalOcean Hosting Gore, right? You can use AWS, Google Cloud, all of these.

[01:31:42] - [01:31:44]

Jitesh Dugar: There are a ton of others. Railway.

[01:31:45] - [01:31:53]

Jitesh Dugar: All of these. You can use all of these VPS options to host NA10 on a server that you have rented.

[01:31:53] - [01:31:55]

Jitesh Dugar: And typical cost?

[01:31:56] - [01:31:59]

Jitesh Dugar: It ranges between \$6 to \$10.

[01:32:00] - [01:32:01]

Jitesh Dugar: a month.

[01:32:03] - [01:32:08]

Jitesh Dugar: And giving your cost range, the cost... actual cost may vary based on the VPS that you choose.

[01:32:09] - [01:32:11]

Jitesh Dugar: And it runs 24-7.

[01:32:13] - [01:32:17]

Jitesh Dugar: That's how it works. Okay? So these are 3 ways for you to use NATAM.

[01:32:18] - [01:32:32]

Jitesh Dugar: But my recommendation, everyone, is to start with the cloud plan for now. It offers a generous 14-day free trial. For all the sessions that we covered in... during this course, I recommend you to start a 14-day free trial.

[01:32:32] - [01:32:38]

Jitesh Dugar: And later, you can decide whether you want to use it for free, or pay some kind of a cost to a VPS, and then use anytime.

[01:32:40] - [01:32:47]

Jitesh Dugar: And the reason we are recommending this is because there is some technical work required to do the second and the third options.

[01:32:49] - [01:32:50]

Jitesh Dugar: No.

[01:32:52] - [01:32:55]

Jitesh Dugar: With that, we've spoken about NA10 already.

[01:32:55] - [01:33:04]

Jitesh Dugar: And now... We are about to get into building or solving an actual problem statement using Anaten.

[01:33:05] - [01:33:07]

Jitesh Dugar: Are you all ready, everyone?

[01:33:11] - [01:33:14]

Jitesh Dugar: Or should we take a quick 5-minute break?

[01:33:14] - [01:33:15]

Jitesh Dugar: And then we get started.

[01:33:16] - [01:33:17]

Jitesh Dugar: Do you need a break, everyone?

[01:33:18] - [01:33:21]

Jitesh Dugar: Yeah, okay. Okay, let us take a quick 5-minute break.

[01:33:21] - [01:33:23]

Jitesh Dugar: I will start a timer.

[01:33:25] - [01:33:27]

Jitesh Dugar: Yeah, but please be back very soon.

[01:33:31] - [01:33:31]

Jitesh Dugar: Silva.

[01:33:35] - [01:33:36]

Jitesh Dugar: Yeah, I've started the timer.

[01:38:34] - [01:38:38]

Jitesh Dugar: Alright, is everyone back, and can you hear me?

[01:38:40] - [01:38:41]

Jitesh Dugar: Perfect, okay.

[01:38:42] - [01:38:44]

Jitesh Dugar: Perfect. Thank you, everyone.

[01:38:44] - [01:38:47]

Jitesh Dugar: Let me know how the session is going so far. I know I've covered

[01:38:48] - [01:38:59]

Jitesh Dugar: possibly a lot of information. I'm not sure... I possibly missed checking with all of you if you're enjoying it. I'm absolutely having a full blast right now. I'm enjoying the session with all of you.

[01:38:59] - [01:39:01]

Jitesh Dugar: Thank you, okay, perfect.

[01:39:01] - [01:39:08]

Jitesh Dugar: Now, before we move on, we are about to go into actual build phase. I know some of you asked questions on

[01:39:08] - [01:39:26]

Jitesh Dugar: a few things, like how can you host an A10, how can you do all of that? I could see a few questions that I wasn't able to answer, because I had to focus on the session. I could show you all of that, but the thing that we are scarce on is time, right? So, because of that, I have to focus on the content that we are here to cover.

[01:39:26] - [01:39:41]

Jitesh Dugar: And I can get into a lot of stuff. I can talk about GitHub, I can talk about how to self-host in it and all of that, but I want to get into stuff that we are here for, okay? And I promise to you, there'll be so much of ways where you can get answers to all of these.

[01:39:41] - [01:39:47]

Jitesh Dugar: There is a Q&A section also. You can post all your questions on the Q&A session, and you will get answers to those.

[01:39:48] - [01:39:48]

Jitesh Dugar: Perfect.

[01:39:49] - [01:39:54]

Jitesh Dugar: Yes, with that... With that, let us go ahead and

[01:39:54] - [01:40:02]

Jitesh Dugar: start working on the problem statement for today. We'll build an actual automation on NATEN. And the problem statement for us is...

[01:40:08] - [01:40:12]

Jitesh Dugar: The problem statement is, on our website, assume we have a website.

[01:40:16] - [01:40:19]

Jitesh Dugar: Okay, and let's talk about the business that we are in right now.

[01:40:20] - [01:40:27]

Jitesh Dugar: So... the business... Let's say we are running a... Agency business.

[01:40:28] - [01:40:33]

Jitesh Dugar: Our problem statement is, Statement goes like this.

[01:40:34] - [01:40:46]

Jitesh Dugar: Let's say you're running an agency, that provides... websites, And, digital marketing services.

[01:40:47] - [01:40:53]

Jitesh Dugar: Okay, that's what you're doing. Assume everyone. You're running an agency that provides websites and digital marketing services.

[01:40:54] - [01:40:59]

Jitesh Dugar: you have... A form on your website.

[01:40:59] - [01:41:03]

Jitesh Dugar: to capture project inquiries.

[01:41:09] - [01:41:21]

Jitesh Dugar: So this is what you have, okay? And on your website, you have a form. Let's say all of you are running this agency that provides website and digital marketing services, and on your website, you have a form

[01:41:21] - [01:41:23]

Jitesh Dugar: That has a few fields.

[01:41:23] - [01:41:25]

Jitesh Dugar: Let's say it has a name.

[01:41:25] - [01:41:27]

Jitesh Dugar: It is asking for the name of the...

[01:41:28] - [01:41:30]

Jitesh Dugar: Person who came to the website.

[01:41:34] - [01:41:37]

Jitesh Dugar: Let's say you're also asking them for their...

[01:41:38] - [01:41:41]

Jitesh Dugar: Company, the name of their company that they are a part of.

[01:41:41] - [01:41:44]

Jitesh Dugar: Let's say you're also asking for the...

[01:41:44] - [01:41:48]

Jitesh Dugar: Email... their email address, so you can possibly contact them in the future.

[01:41:49] - [01:41:55]

Jitesh Dugar: And you then also ask them, to share the... Project brief.

[01:41:56] - [01:42:01]

Jitesh Dugar: And finally, on your website, You have a submit button.

[01:42:04] - [01:42:07]

Jitesh Dugar: You have a submit button on your website.

[01:42:10] - [01:42:12]

Jitesh Dugar: Okay? The problem statement is this.

[01:42:12] - [01:42:24]

Jitesh Dugar: Actually, this is a situation right now, we'll talk about the problem statement. Situation is, you're running an agency that provides these services, you have a form on your website that captures all of this information. Now.

[01:42:24] - [01:42:28]

Jitesh Dugar: The problem statement for us is, a lot of...

[01:42:28] - [01:42:37]

Jitesh Dugar: users are visiting your website, and they're filling up this form. They are filling up this form, But...

[01:42:37] - [01:42:48]

Jitesh Dugar: you are actually not able to focus on spam inquiries versus genuine inquiries. So there are a lot of people who send you random messages, okay, via this form.

[01:42:48] - [01:42:51]

Jitesh Dugar: And a lot of these messages you do not care about.

[01:42:51] - [01:42:59]

Jitesh Dugar: So, the problem statement for us is, You need... you need to... You need to filter.

[01:43:00] - [01:43:04]

Jitesh Dugar: spam inquiries, Versus genuine inquiries.

[01:43:05] - [01:43:18]

Jitesh Dugar: So that you or your sales team can focus on only the genuine inquiries. That's what we are supposed to do. And assuming the lead volume is so high, possibly you're getting thousands of leads every day, and this is what you're looking to cater to.

[01:43:19] - [01:43:21]

Jitesh Dugar: Everyone clear with the problem statement.

[01:43:22] - [01:43:24]

Jitesh Dugar: Our website is getting a ton of leads.

[01:43:25] - [01:43:36]

Jitesh Dugar: But we need a way to filter out what are the spam inquiries, what are the genuine inquiries. Put it into separate buckets. That's what we're looking to do. And we'll solve this simple problem statement using an automation.

[01:43:37] - [01:43:39]

Jitesh Dugar: Okay? And it can run at scale also.

[01:43:40] - [01:43:45]

Jitesh Dugar: That's what we're supposed to do. And how we achieve that, we'll do it through automation. So...

[01:43:45] - [01:43:52]

Jitesh Dugar: Everyone, help me answer these questions. I have explained enough. Now, I need you guys to become the problem solvers, okay?

[01:43:52] - [01:43:54]

Jitesh Dugar: Help me answer this question.

[01:43:55] - [01:44:01]

Jitesh Dugar: Now, whenever someone fills up this form and submits... clicks on the submit button.

[01:44:01] - [01:44:05]

Jitesh Dugar: Right? That is when we want to trigger the automation.

[01:44:05] - [01:44:09]

Jitesh Dugar: So... What will be the trigger step here?

[01:44:09] - [01:44:13]

Jitesh Dugar: What will be the trigger step on our automation?

[01:44:15] - [01:44:21]

Jitesh Dugar: Yes, you guys are all correct. Someone clicking on the submit button will be the trigger.

[01:44:22] - [01:44:25]

Jitesh Dugar: Someone clicking on the submit button, this is the trigger.

[01:44:25] - [01:44:30]

Jitesh Dugar: Or, you can also say someone filling up the form and clicking on the submit button will be the trigger for you.

[01:44:31] - [01:44:32]

Jitesh Dugar: And?

[01:44:33] - [01:44:34]

Jitesh Dugar: When?

[01:44:34] - [01:44:48]

Jitesh Dugar: someone triggers this form, what would we like to happen, okay? Now, everyone, whenever you're building any automation, the first step, right, everyone, it is always recommended that before you build it on NATEN, draw out a flow chart.

[01:44:48] - [01:44:52]

Jitesh Dugar: Draw out a flowchart of what your automation could possibly look like.

[01:44:53] - [01:44:59]

Jitesh Dugar: So, and this is what we're doing, we're trying to draw a diagram or a flowchart. Someone filling up a form.

[01:44:59] - [01:45:03]

Jitesh Dugar: You submit the form, and that will be the trigger. So...

[01:45:03] - [01:45:05]

Jitesh Dugar: What do we want to do next?

[01:45:09] - [01:45:12]

Jitesh Dugar: Email validation, verification, yes, that's correct.

[01:45:12] - [01:45:19]

Jitesh Dugar: check project brief, check spam or general inquiry, validate DATA. Let's... yeah, let's do some data validation.

[01:45:19] - [01:45:21]

Jitesh Dugar: validate data.

[01:45:22] - [01:45:24]

Jitesh Dugar: That's what we want to do next.

[01:45:27] - [01:45:28]

Jitesh Dugar: Next?

[01:45:29] - [01:45:41]

Jitesh Dugar: After we validate the data, Or that validate DAT can be something like... project... Inquiry... Should not be empty.

[01:45:42] - [01:46:02]

Jitesh Dugar: this is possible validation that I'm wanting to execute right now, and this thing can vary based on your needs also. You can just say, the project inquiry should not be empty,

and if it is not empty, that means our data is possibly valid already. Okay? That's one example that I'm taking, of course. Your use case might vary, and you can have multiple things also.

[01:46:02] - [01:46:07]

Jitesh Dugar: Once you have checked and ensured that your project inquiry is not empty.

[01:46:10] - [01:46:14]

Jitesh Dugar: What can happen next? Let us again draw one more arrow here.

[01:46:15] - [01:46:19]

Jitesh Dugar: We have to now get into a stage where

[01:46:20] - [01:46:28]

Jitesh Dugar: We want to make a decision that whoever filled up this form, everyone, I want you to take a pause here. This part is extremely important.

[01:46:28] - [01:46:37]

Jitesh Dugar: After you have validated, done some validation, you have to identify whether this inquiry is spam or not. Is it spam or genuine? How should we go about checking it?

[01:46:39] - [01:46:47]

Jitesh Dugar: How should we go about checking whether the inquiry is spam or genuine? Okay, I think some of you answered it correctly, wow.

[01:46:48] - [01:46:51]

Jitesh Dugar: Okay, I can say two kinds of answers right now.

[01:46:52] - [01:46:56]

Jitesh Dugar: Okay? Some of you are saying we can use keyword-based matching.

[01:46:57] - [01:47:02]

Jitesh Dugar: Or, some of you are saying we can check LLM, we can use an LLM to do the matching.

[01:47:04] - [01:47:08]

Jitesh Dugar: Which one do you think is correct? Or which one do you think is better?

[01:47:08] - [01:47:16]

Jitesh Dugar: If we do a keyword-based matching, if we do a keyword-based matching, assume we are doing a keyword-based matching, okay, what will end up happening?

[01:47:16] - [01:47:25]

Jitesh Dugar: Let's say we've added keywords saying, okay, if our inquiry includes keywords such as website, or maybe digital marketing.

[01:47:26] - [01:47:30]

Jitesh Dugar: all of these things, then I want to classify it as a genuine inquiry.

[01:47:30] - [01:47:31]

Jitesh Dugar: Okay?

[01:47:31] - [01:47:38]

Jitesh Dugar: But... What if your question looks something like... Do you sell umbrellas?

[01:47:39] - [01:47:40]

Jitesh Dugar: On your website.

[01:47:44] - [01:47:47]

Jitesh Dugar: Is this a spam inquiry or a genuine inquiry?

[01:47:49] - [01:47:52]

Jitesh Dugar: Yes, all of you agree this is a spam inquiry.

[01:47:52] - [01:47:56]

Jitesh Dugar: But if we used keyword-based matching, this would be classified as a genuine inquiry.

[01:47:56] - [01:48:14]

Jitesh Dugar: So, keyword will not be very reliable, you can use it, but it'll take you a lot of effort to manage keywords. So, I think LLMs can be a good one, and the reason for that is when we spoke about LLMs, we spoke about something called classifications. You said LLMs are great for classifications.

[01:48:15] - [01:48:16]

Jitesh Dugar: Okay?

[01:48:16] - [01:48:18]

Jitesh Dugar: LLMs are great for classifications.

[01:48:19] - [01:48:25]

Jitesh Dugar: So, what we are supposed to do here is we want to classify whether the inquiry is spam or genuine.

[01:48:26] - [01:48:29]

Jitesh Dugar: So, we will use... an LLM?

[01:48:31] - [01:48:35]

Jitesh Dugar: We will use it for classify, Into...

[01:48:37] - [01:48:45]

Jitesh Dugar: spam versus genuine. So, this LLM step, it will help us classify whether the inquiry is a spam or a genuine inquiry.

[01:48:46] - [01:48:47]

Jitesh Dugar: That's what we will do.

[01:48:49] - [01:48:50]

Jitesh Dugar: Next.

[01:48:51] - [01:49:01]

Jitesh Dugar: If the inquiry is spam, we want to do something. So if the inquiry is spam, we want to do something. If the inquiry is genuine, we want to do something else.

[01:49:07] - [01:49:08]

Jitesh Dugar: Okay.

[01:49:09] - [01:49:09]

Jitesh Dugar: And...

[01:49:10] - [01:49:20]

Jitesh Dugar: Over here, what do you want to happen? It depends on what you want to put here. Assume we want to, whenever the inquiry is spam, we want to have it go into a

[01:49:20] - [01:49:25]

Jitesh Dugar: store into a... spam sheet.

[01:49:25] - [01:49:31]

Jitesh Dugar: We have possibly a Google Sheet that we are using, and we want to store that information into a spam sheet.

[01:49:32] - [01:49:33]

Jitesh Dugar: Okay?

[01:49:34] - [01:49:38]

Jitesh Dugar: And if someone's saying, do nothing, you guys are right, we should possibly do nothing, but...

[01:49:38] - [01:49:46]

Jitesh Dugar: Do you all agree that LLMs will not be perfect? It is just a guessing algorithm, it is only predicting, which means it can make mistakes.

[01:49:47] - [01:49:51]

Jitesh Dugar: What if an actual inquiry went to a spam folder?

[01:49:51] - [01:49:53]

Jitesh Dugar: Or a spam sheet.

[01:49:54] - [01:49:58]

Jitesh Dugar: That is a huge issue for you. You could miss a very good potential lead.

[01:49:59] - [01:50:15]

Jitesh Dugar: So, it is better to store it on a spam sheet and review it every few weeks or every day, just to make sure no correct inquiry has been added to the spam sheet. That's the reason it's better to store it on a spam sheet for now. You can decide to change the behavior based on your preferences.

[01:50:16] - [01:50:18]

Jitesh Dugar: Now, again, another case.

[01:50:19] - [01:50:23]

Jitesh Dugar: If it is a genuine inquiry, you want to store it in another sheet, which would be a genuine sheet.

[01:50:24] - [01:50:25]

Jitesh Dugar: That is what we want to do here.

[01:50:26] - [01:50:29]

Jitesh Dugar: So this is the problem statement that we have.

[01:50:30] - [01:50:33]

Jitesh Dugar: And this is how we solve it, using our automation.

[01:50:35] - [01:50:37]

Jitesh Dugar: Everyone clear with the flowchart diagram?

[01:50:38] - [01:50:41]

Jitesh Dugar: Everyone clear with a flowchart diagram?

[01:50:41] - [01:50:53]

Jitesh Dugar: And you might be thinking this is a very simple problem statement. We wanted to intentionally start with a very simple one, just so that we are able to help you understand with the basic stuff first, and then gradually we will move into

[01:50:54] - [01:50:58]

Jitesh Dugar: Slightly advanced ones. Okay, I will explain it again. Everyone, please pay attention.

[01:50:59] - [01:51:03]

Jitesh Dugar: We have a website that has these forms.

[01:51:04] - [01:51:04]

Jitesh Dugar: Okay?

[01:51:05] - [01:51:13]

Jitesh Dugar: And whenever someone clicks on the submit button on the website, that is when we want our automation to be kicked off, and these are all the steps of our automation.

[01:51:14] - [01:51:19]

Jitesh Dugar: Inside our automation, the first step that we want to add is, we want to validate the data.

[01:51:19] - [01:51:30]

Jitesh Dugar: And the validation assumption that we're taking is the project brief should not be empty. We can just say, if the project brief should not be empty, then we want to go to the next step. That is the validation that we are doing.

[01:51:31] - [01:51:33]

Jitesh Dugar: Once we have validated that.

[01:51:33] - [01:51:42]

Jitesh Dugar: We want to classify whether the inquiry that we've gotten, is it spam or a genuine inquiry? Is it a good inquiry or a bad inquiry?

[01:51:42] - [01:51:49]

Jitesh Dugar: Okay? So for that, we are deciding to use an LLM where we will give LLM

[01:51:49] - [01:52:06]

Jitesh Dugar: a guideline on how it should classify. If you're not sure what an LLM is, just think of sending this inquiry to something like a ChartGPT, and telling ChartGPT in the middle of your

workflow that this is an inquiry that I've gotten, can you tell me it is a good inquiry or a bad inquiry for me?

[01:52:07] - [01:52:10]

Jitesh Dugar: So that bad inquiry means a spam.

[01:52:11] - [01:52:17]

Jitesh Dugar: And it will get stored into a spam sheet. If it's a good inquiry, it gets stored into a genuine sheet.

[01:52:18] - [01:52:21]

Jitesh Dugar: People who wanted me to repeat, are you good with the flow now?

[01:52:24] - [01:52:27]

Jitesh Dugar: What if the project brief is empty? We will stop right there.

[01:52:28] - [01:52:29]

Jitesh Dugar: Perfect.

[01:52:30] - [01:52:33]

Jitesh Dugar: Now, with that, Let us try to build this.

[01:52:35] - [01:52:38]

Jitesh Dugar: on N10. And for that, I will open my N10 account.

[01:52:41] - [01:52:43]

Jitesh Dugar: This is an Ann Cloud account.

[01:52:43] - [01:52:46]

Jitesh Dugar: And this is what your NA10 will look like.

[01:52:47] - [01:52:52]

Jitesh Dugar: So... on NATEN, the first time you want to build any automation.

[01:52:53] - [01:52:57]

Jitesh Dugar: you have to come here and click on the button that says Create Workflow.

[01:52:58] - [01:52:59]

Jitesh Dugar: Click on Create Workflow.

[01:53:01] - [01:53:12]

Jitesh Dugar: Now, everyone, I need your full attention from this point onwards. You've been so patient with me through... so far. I need your attention for the next few minutes, and I will ensure you understand the whole bit of it.

[01:53:12] - [01:53:13]

Jitesh Dugar: So...

[01:53:15] - [01:53:22]

Jitesh Dugar: Even on self-hosted, you get the same UI. So you click on Create Workflow, and you can first give it a name for the workflow, let's call it

[01:53:23] - [01:53:27]

Jitesh Dugar: Leigh, website spam checker.

[01:53:27] - [01:53:31]

Jitesh Dugar: We want to check spam inquiries on our website. That's what we're doing.

[01:53:33] - [01:53:36]

Jitesh Dugar: So this is what your workflow looks like.

[01:53:36] - [01:53:39]

Jitesh Dugar: And you have two options on your workflow.

[01:53:39] - [01:53:40]

Jitesh Dugar: So...

[01:53:41] - [01:53:52]

Jitesh Dugar: First one is adding your first step, the second one is build with AI. You can build it with AI, but it's a slightly newer feature, we'll start building it ourselves. You have an option of building with AI also.

[01:53:53] - [01:53:58]

Jitesh Dugar: So, when you click on the first step, everyone, when you click on the first step.

[01:53:59] - [01:54:01]

Jitesh Dugar: How do you reach this point? I'll show it again.

[01:54:03] - [01:54:08]

Jitesh Dugar: Click on... open your Ann account, sign up for an Ann10 account, click on Create Workflow.

[01:54:09] - [01:54:10]

Jitesh Dugar: That's how you reach here.

[01:54:11] - [01:54:16]

Jitesh Dugar: Okay, and let's give it a name here, we'll call it Website Spam Checker.

[01:54:17] - [01:54:20]

Jitesh Dugar: So, click on the plus button.

[01:54:21] - [01:54:21]

Jitesh Dugar: And?

[01:54:22] - [01:54:23]

Jitesh Dugar: It will show open.

[01:54:24] - [01:54:30]

Jitesh Dugar: A screen like this, or a pop-up like this, that says... What triggers this workflow?

[01:54:31] - [01:54:43]

Jitesh Dugar: what triggers this workflow? Do you remember I told you that trigger is the first step of the workflow that we will build? Trigger is what will trigger the automation for us. So it is asking, tell me what is the trigger for this workflow.

[01:54:44] - [01:54:45]

Jitesh Dugar: So?

[01:54:46] - [01:54:49]

Jitesh Dugar: Out of all of these triggers that you see here.

[01:54:49] - [01:54:54]

Jitesh Dugar: Okay? These are all the possible triggers. Now, let me tell you what these triggers are.

[01:54:54] - [01:54:58]

Jitesh Dugar: The first one, everyone, is a manual trigger.

[01:54:59] - [01:55:01]

Jitesh Dugar: So let me add all the types of triggers.

[01:55:02] - [01:55:05]

Jitesh Dugar: types of triggers on any 10, or rather, any automation.

[01:55:08] - [01:55:10]

Jitesh Dugar: You can have a manual trigger.

[01:55:13] - [01:55:14]

Jitesh Dugar: Manual trigger means?

[01:55:15] - [01:55:27]

Jitesh Dugar: someone has to manually click on a button for this trigger to happen. Let me add it. I added it, and if someone has to trigger any step after this, someone has to manually come here and click on this button.

[01:55:28] - [01:55:32]

Jitesh Dugar: And when you click on this button, that's when the trigger happens.

[01:55:32] - [01:55:36]

Jitesh Dugar: And all the steps after this will get executed in the sequence.

[01:55:37] - [01:55:39]

Jitesh Dugar: Okay? So that's a manual trigger.

[01:55:40] - [01:55:41]

Jitesh Dugar: Let's look at the second one.

[01:55:41] - [01:55:49]

Jitesh Dugar: The second one is among the most interesting and the useful ones, that says, on-app event. And if you look at on-app event.

[01:55:50] - [01:55:54]

Jitesh Dugar: You can see an arrow here also, and you click on it, it shows you

[01:55:54] - [01:55:58]

Jitesh Dugar: so many apps here. And if you keep scrolling down.

[01:55:59] - [01:56:04]

Jitesh Dugar: If you skip scrolling down, you'll see possibly more than 1,000 items in this list.

[01:56:05] - [01:56:13]

Jitesh Dugar: Okay? And the second type of trigger, which is... so manual trigger is... Someone clicks on a button.

[01:56:13] - [01:56:15]

Jitesh Dugar: to trigger.

[01:56:15] - [01:56:16]

Jitesh Dugar: Manually.

[01:56:17] - [01:56:23]

Jitesh Dugar: AppEvent means... App event trigger.

[01:56:23] - [01:56:24]

Jitesh Dugar: Means?

[01:56:24] - [01:56:28]

Jitesh Dugar: A trigger that happened on an external app.

[01:56:28] - [01:56:33]

Jitesh Dugar: A trigger that happened on an external app. Let me give you an example.

[01:56:33] - [01:56:37]

Jitesh Dugar: Let's say you got an email on your inbox.

[01:56:37] - [01:56:41]

Jitesh Dugar: And the moment you got an email on your inbox, you want to do a few things.

[01:56:42] - [01:56:48]

Jitesh Dugar: then your Gmail will possibly be a trigger. So let's search for Gmail.

[01:56:49] - [01:57:02]

Jitesh Dugar: There is Gmail over here, you select that, and you say... you see a trigger option that says, on message received. And this means the moment you receive an email on your inbox, it will trigger this event, or this workflow.

[01:57:03] - [01:57:09]

Jitesh Dugar: And it can be others also. In case you're not using Gmail, you're using Outlook, all of those options are also available.

[01:57:11] - [01:57:14]

Jitesh Dugar: Another example, let's search for Google Sheet.

[01:57:15] - [01:57:17]

Jitesh Dugar: Let's search for Google Sheet.

[01:57:17] - [01:57:22]

Jitesh Dugar: If you select Google Sheet, There are 3 triggers here.

[01:57:23] - [01:57:28]

Jitesh Dugar: on row added, OnRowUpdated, and onRowAdded or Updated.

[01:57:28] - [01:57:32]

Jitesh Dugar: Which means, the moment you add a new row on Google Sheet.

[01:57:33] - [01:57:38]

Jitesh Dugar: Everyone, this is not a do-along session. Please do not try to do alongside.

[01:57:39] - [01:57:41]

Jitesh Dugar: Okay, just try to look at the screen and observe.

[01:57:43] - [01:57:47]

Jitesh Dugar: You don't have to follow me. So... So...

[01:57:48] - [01:57:54]

Jitesh Dugar: on Google Sheet, you can have your workflow trigger whenever you add a new row on a Google Sheet.

[01:57:54] - [01:57:59]

Jitesh Dugar: or you update an existing row on a Google Sheet, those can trigger your workflow.

[01:58:01] - [01:58:09]

Jitesh Dugar: And this is, again, two examples that I've shown, but there can be so many other examples, but app-based

[01:58:09] - [01:58:11]

Jitesh Dugar: App event trigger means?

[01:58:11] - [01:58:15]

Jitesh Dugar: Trigger that comes from an external app.

[01:58:17] - [01:58:23]

Jitesh Dugar: That's what happens. And you can think of more examples. I said there are thousand plus apps here.

[01:58:23] - [01:58:30]

Jitesh Dugar: I cannot show you all examples, but there are thousand plus apps that you can use here. You getting a message on WhatsApp can be a trigger.

[01:58:31] - [01:58:31]

Jitesh Dugar: Okay?

[01:58:32] - [01:58:33]

Jitesh Dugar: All of these options are possible.

[01:58:35] - [01:58:39]

Jitesh Dugar: Someone booking a meeting on your calendar can be a trigger also for your workflow.

[01:58:40] - [01:58:46]

Jitesh Dugar: So that is on app event. The third type of trigger is Schedule Trigger.

[01:58:46] - [01:58:51]

Jitesh Dugar: And as the name suggests, it runs on a schedule.

[01:58:51] - [01:58:53]

Jitesh Dugar: Which means it runs by the clock.

[01:58:55] - [01:58:57]

Jitesh Dugar: So nobody triggers it, the clock triggers it.

[01:58:58] - [01:59:05]

Jitesh Dugar: You can give it an example. You can say, I want something to run at a schedule. What that means is.

[01:59:06] - [01:59:14]

Jitesh Dugar: You can say, I want the trigger, or the automation to trigger, every morning at possibly 8 AM.

[01:59:15] - [01:59:17]

Jitesh Dugar: Let me give you one scenario.

[01:59:18] - [01:59:20]

Jitesh Dugar: Let's say you want to build an automation.

[01:59:20] - [01:59:28]

Jitesh Dugar: That will check your email every morning at 8am. Look for all the unread emails from the last 24 hours.

[01:59:29] - [01:59:44]

Jitesh Dugar: And send you an AI-powered summary. It will send you a summary of all the emails that you have received in the last 24 hours. And it'll tell you exactly, okay, out of the 200 emails that you've received, these are the top 5 emails that are extremely important.

[01:59:46] - [01:59:49]

Jitesh Dugar: And this automation can run on a schedule.

[01:59:49] - [01:59:51]

Jitesh Dugar: Every single day.

[01:59:51] - [02:00:04]

Jitesh Dugar: So that is what you call a schedule trigger. You can have a schedule based on days, minutes, hours, weeks, months, whatever you like. Let's say you want our automation to run every hour. To do something, it can do that.

[02:00:04] - [02:00:10]

Jitesh Dugar: Every minute, it can do that also. Every two days, you can do that also. All of that flexibility is available.

[02:00:13] - [02:00:19]

Jitesh Dugar: I hope Schedule Trigger makes sense. You can do a lot of things using Schedule Trigger. It runs by the clock.

[02:00:21] - [02:00:22]

Jitesh Dugar: And?

[02:00:23] - [02:00:24]

Jitesh Dugar: The next one?

[02:00:25] - [02:00:29]

Jitesh Dugar: On Webhu call is a slightly complex one, I'll leave it for now.

[02:00:30] - [02:00:36]

Jitesh Dugar: And the next one that we care about is on form submission. Okay, let me repeat on-schedule Trigger one more time.

[02:00:36] - [02:00:40]

Jitesh Dugar: OnScheduleTrigger means it runs at a schedule.

[02:00:40] - [02:00:51]

Jitesh Dugar: And the best example for that is, let's say you want to build an automation that triggers every morning at 9am. It will check all your emails, give you a summary via WhatsApp.

[02:00:52] - [02:00:54]

Jitesh Dugar: That is a scheduled automation trigger.

[02:00:56] - [02:00:58]

Jitesh Dugar: Everyone clear with schedule triggers.

[02:00:58] - [02:01:01]

Jitesh Dugar: These are 3 very important triggers that we've discussed.

[02:01:05] - [02:01:14]

Jitesh Dugar: And the next one that we will talk about And is on-form submission. I'm...

[02:01:14] - [02:01:23]

Jitesh Dugar: I'm deliberately skipping on WebuCall because it's slightly complex for our first topic, first session, but I promise you we'll learn about OnWebuCall also.

[02:01:25] - [02:01:32]

Jitesh Dugar: So, on form submission is another type of trigger that allows us to create a form within NA10.

[02:01:33] - [02:01:39]

Jitesh Dugar: And... If you look at our problem statement, that's exactly what we need. We need a form

[02:01:40] - [02:01:42]

Jitesh Dugar: We need a form that has all of these fields.

[02:01:43] - [02:01:47]

Jitesh Dugar: So, we will select On Form Submission, and it will show a screen like this.

[02:01:48] - [02:01:52]

Jitesh Dugar: Remember, whenever you select any trigger or action.

[02:01:52] - [02:01:55]

Jitesh Dugar: Anytime will show a screen like this that you can configure.

[02:01:57] - [02:02:00]

Jitesh Dugar: Okay? And if you look at this.

[02:02:00] - [02:02:03]

Jitesh Dugar: The first option is form URLs.

[02:02:03] - [02:02:08]

Jitesh Dugar: Form URLs is how you access the form, the link for the form.

[02:02:09] - [02:02:12]

Jitesh Dugar: There is a test URL, production URL, I'll talk about it later.

[02:02:12] - [02:02:21]

Jitesh Dugar: Authentication is not as important, we want to keep the form public for now. If you would like the form to be a little secure, you can do that. For now, we're building a public form.

[02:02:21] - [02:02:28]

Jitesh Dugar: You can give a form title. So let us give it a title, we'll call it... Project Inquiry.

[02:02:29] - [02:02:31]

Jitesh Dugar: We'll call it Project Inquiry.

[02:02:31] - [02:02:33]

Jitesh Dugar: Let's give it a form description, we'll say...

[02:02:34] - [02:02:37]

Jitesh Dugar: Is it okay if I use a voice dictation tool, everyone?

[02:02:38] - [02:02:41]

Jitesh Dugar: Are you comfortable with me doing that? I'll be using a whisper flow.

[02:02:42] - [02:02:45]

Jitesh Dugar: Yeah, okay, I think all of you are familiar with it. Perfect, okay. I'll just say.

[02:02:46] - [02:02:49]

Jitesh Dugar: Use this form to submit a project inquiry.

[02:02:53] - [02:02:54]

Jitesh Dugar: There you go.

[02:02:54] - [02:02:56]

Jitesh Dugar: And that's a form description.

[02:02:56] - [02:03:02]

Jitesh Dugar: And now, it is asking us, what are the elements that you want to add within that form?

[02:03:03] - [02:03:05]

Jitesh Dugar: And let's click on the first element.

[02:03:05] - [02:03:09]

Jitesh Dugar: The first element, everyone, will be the name.

[02:03:10] - [02:03:17]

Jitesh Dugar: Name will be the first element, company will be the second one, email the third one, and project brief will be the fourth element.

[02:03:17] - [02:03:20]

Jitesh Dugar: And we will add all of them, one after the other.

[02:03:21] - [02:03:26]

Jitesh Dugar: Let me repeat what we are trying to do here. We are trying to build a form within NATEN.

[02:03:27] - [02:03:29]

Jitesh Dugar: And in this, we will add these four fields.

[02:03:30] - [02:03:34]

Jitesh Dugar: Yes, we are creating a trigger, and we are creating a form within Anytime.

[02:03:35] - [02:03:39]

Jitesh Dugar: So, our first form field should be called your name.

[02:03:42] - [02:03:44]

Jitesh Dugar: It's called Your Name.

[02:03:45] - [02:03:47]

Jitesh Dugar: And then the next option is...

[02:03:47] - [02:03:54]

Jitesh Dugar: What is the type of the element? It will be a text input, we do not have to change it. That's the default choice.

[02:03:55] - [02:03:59]

Jitesh Dugar: So we've added the first field on the form, The second field.

[02:03:59] - [02:04:01]

Jitesh Dugar: We have to click on the plus button.

[02:04:02] - [02:04:08]

Jitesh Dugar: And you can add another label for the form. The second field is the name of the company.

[02:04:08] - [02:04:12]

Jitesh Dugar: the name of the company. We'll ask it your company name.

[02:04:13] - [02:04:14]

Jitesh Dugar: That's what we will ask.

[02:04:15] - [02:04:17]

Jitesh Dugar: And that also will be a text input.

[02:04:19] - [02:04:20]

Jitesh Dugar: Next!

[02:04:20] - [02:04:24]

Jitesh Dugar: Click on Add Form Element, Click on Add Form Element.

[02:04:25] - [02:04:26]

Jitesh Dugar: And...

[02:04:31] - [02:04:35]

Jitesh Dugar: The third option for us is... the email address.

[02:04:36] - [02:04:41]

Jitesh Dugar: As you can see, we just added the name, the company, we are now adding the email address.

[02:04:41] - [02:04:45]

Jitesh Dugar: So, we'll now ask, what is your email address? Your email.

[02:04:46] - [02:04:53]

Jitesh Dugar: And under element type, we can just select email address. Right now, it was text input, we will just select email address.

[02:04:54] - [02:04:56]

Jitesh Dugar: We added the third field.

[02:04:56] - [02:05:03]

Jitesh Dugar: And now we will add the fourth field, click on the plus button, and we will say, Project Inquiry.

[02:05:03] - [02:05:04]

Jitesh Dugar: Or Project Brief.

[02:05:06] - [02:05:07]

Jitesh Dugar: What project are you looking at?

[02:05:08] - [02:05:20]

Jitesh Dugar: And while we can select element type as text input, it would be better if we allow them to add some kind of a paragraph, because project brief can be paragraphs.

[02:05:20] - [02:05:29]

Jitesh Dugar: So, under element type, there is an option that says text area. That means you can select a paragraph.

[02:05:29] - [02:05:34]

Jitesh Dugar: You can select a paragraph, Instead of just a text field.

[02:05:34] - [02:05:37]

Jitesh Dugar: So it is like a long text field itself.

[02:05:37] - [02:05:38]

Jitesh Dugar: Okay?

[02:05:39] - [02:05:39]

Jitesh Dugar: And...

[02:05:40] - [02:05:47]

Jitesh Dugar: We have just added these four fields, and if some of you are asking, why is there an option called Add Attributes?

[02:05:47] - [02:05:58]

Jitesh Dugar: Add attributes allows you to add extra fields also. If you would like to add some default value, add a required field, all of that, you can use Add Attribute, but that is optional.

[02:05:58] - [02:06:00]

Jitesh Dugar: For now, we will not add it.

[02:06:01] - [02:06:02]

Jitesh Dugar: Or maybe we will.

[02:06:03] - [02:06:08]

Jitesh Dugar: If you want to look at what your form looks like so far, Okay?

[02:06:09] - [02:06:11]

Jitesh Dugar: Click on Execute Step.

[02:06:12] - [02:06:14]

Jitesh Dugar: It will open up a form.

[02:06:14] - [02:06:18]

Jitesh Dugar: Like this. And this is the exact form that we have built just now.

[02:06:19] - [02:06:21]

Jitesh Dugar: By adding all of those fields.

[02:06:21] - [02:06:24]

Jitesh Dugar: How did we get here? I simply clicked on that button.

[02:06:25] - [02:06:33]

Jitesh Dugar: I clicked on this Execute step button after adding all of those fields, and it loaded the form for us. This is what the form looks like.

[02:06:33] - [02:06:38]

Jitesh Dugar: And you have seen, we added all of these fields, and it added those fields.

[02:06:41] - [02:06:41]

Jitesh Dugar: No.

[02:06:42] - [02:06:48]

Jitesh Dugar: Again, now I can go ahead and fill up this form, but I want to show you how the trigger works.

[02:06:48] - [02:06:51]

Jitesh Dugar: I want to show these two side by side.

[02:06:52] - [02:06:55]

Jitesh Dugar: So, I will split these two tabs.

[02:06:58] - [02:07:06]

Jitesh Dugar: So, I have just split my tabs, okay? On the right, you see the form that we created. On the left, we have the

[02:07:07] - [02:07:14]

Jitesh Dugar: NAT and workflow, and it is saying, I am waiting for the test form submission, which means your workflow is waiting for the trigger to happen.

[02:07:15] - [02:07:17]

Jitesh Dugar: And do you guys know what the trigger is?

[02:07:19] - [02:07:21]

Jitesh Dugar: Do you guys know what the trigger is?

[02:07:22] - [02:07:25]

Jitesh Dugar: Yes, the trigger is the submit button.

[02:07:25] - [02:07:31]

Jitesh Dugar: The trigger is that submit button. So the moment I click on the submit button, it will trigger the workflow.

[02:07:31] - [02:07:33]

Jitesh Dugar: Let me click on the Summit button.

[02:07:34] - [02:07:35]

Jitesh Dugar: As soon as I click on it.

[02:07:36] - [02:07:43]

Jitesh Dugar: this workflow has stopped. It has said, yes, I have completed executing, and you know what happened? I got

[02:07:43] - [02:07:44]

Jitesh Dugar: An output here.

[02:07:45] - [02:07:47]

Jitesh Dugar: I got an output here.

[02:07:47] - [02:07:49]

Jitesh Dugar: But, do you see a problem?

[02:07:50] - [02:07:54]

Jitesh Dugar: The name, the company name, email address, everything is empty.

[02:07:54] - [02:07:55]

Jitesh Dugar: That's not what we want.

[02:07:56] - [02:07:59]

Jitesh Dugar: Okay? We want to make some fields mandatory.

[02:08:00] - [02:08:01]

Jitesh Dugar: So?

[02:08:01] - [02:08:04]

Jitesh Dugar: Let's go ahead and do that. I will go ahead and unsplit this for now.

[02:08:08] - [02:08:13]

Jitesh Dugar: What we will do is, we will go ahead and add attributes. We'll go to Add Attributes, and we'll say.

[02:08:14] - [02:08:18]

Jitesh Dugar: We want to make it a required field, so we'll make name as a required field.

[02:08:19] - [02:08:22]

Jitesh Dugar: We'll again click on Add Attributes.

[02:08:22] - [02:08:29]

Jitesh Dugar: Make company name as a required field. Again, click on Add Attributes, make email address as a required field also.

[02:08:29] - [02:08:35]

Jitesh Dugar: These three are important, okay? Project brief, we are not intentionally making it a required field.

[02:08:36] - [02:08:42]

Jitesh Dugar: We're intentionally not making a required field, because I want to show you how you can add a logic node, and I'll tell you another reason for it.

[02:08:43] - [02:08:47]

Jitesh Dugar: We have made these 3 required fields, and now we will execute a step.

[02:08:47] - [02:08:50]

Jitesh Dugar: It, again, opened up a form here for us.

[02:08:51] - [02:08:54]

Jitesh Dugar: So... This time, I will put it on the left-hand side.

[02:08:56] - [02:08:58]

Jitesh Dugar: And I will again split this.

[02:08:58] - [02:09:02]

Jitesh Dugar: Again, you can see... On the right-hand side.

[02:09:02] - [02:09:09]

Jitesh Dugar: NA10 is waiting for the trigger, and you know the trigger is submit button. But if I click on the submit button, it is not letting me submit.

[02:09:10] - [02:09:14]

Jitesh Dugar: Okay? Because it's saying these fields are required. Let me submit these fields now.

[02:09:16] - [02:09:22]

Jitesh Dugar: I will add my name, company name, and project brief, and we'll say... Need a website?

[02:09:23] - [02:09:24]

Jitesh Dugar: for my business.

[02:09:26] - [02:09:27]

Jitesh Dugar: And I will submit it.

[02:09:28] - [02:09:29]

Jitesh Dugar: I will submit it.

[02:09:30] - [02:09:35]

Jitesh Dugar: the moment I submit it, On the Automation workflow, you can see here.

[02:09:35] - [02:09:45]

Jitesh Dugar: You have the trigger. The trigger has been executed, and you have all the fields that you filled up on your form coming here on the right-hand side, on the output tab.

[02:09:46] - [02:09:50]

Jitesh Dugar: Everyone clear with this? We built a form on Ann.

[02:09:51] - [02:09:54]

Jitesh Dugar: And we filled up that form. That's all we've done.

[02:09:56] - [02:09:58]

Jitesh Dugar: Let me now unsplit these two tabs.

[02:10:06] - [02:10:08]

Jitesh Dugar: So, we have these fields on the output.

[02:10:08] - [02:10:09]

Jitesh Dugar: No.

[02:10:13] - [02:10:16]

Jitesh Dugar: On the right-hand side, where you see the output, okay?

[02:10:17] - [02:10:21]

Jitesh Dugar: On the right-hand side, where you see the output, you have these three options. You have schema.

[02:10:22] - [02:10:24]

Jitesh Dugar: You have table, you have JSON.

[02:10:24] - [02:10:29]

Jitesh Dugar: Okay? Let me tell you, these are previews for the same piece of data.

[02:10:30] - [02:10:37]

Jitesh Dugar: You can choose to look at the schema view, you can choose to look at the table view, which includes the same information, but in a tabular format.

[02:10:37] - [02:10:41]

Jitesh Dugar: The third one is in a JSON format, but the data is the same.

[02:10:41] - [02:10:46]

Jitesh Dugar: So you can choose to be in any of these formats. I personally prefer using the schema View.

[02:10:48] - [02:10:49]

Jitesh Dugar: With that...

[02:10:49] - [02:10:57]

Jitesh Dugar: We have built up a form, and to build a form, we just used on form submission step, and went ahead and defined the form title.

[02:10:57] - [02:11:01]

Jitesh Dugar: And we added all of these form elements.

[02:11:02] - [02:11:03]

Jitesh Dugar: Okay?

[02:11:03] - [02:11:04]

Jitesh Dugar: No.

[02:11:04] - [02:11:06]

Jitesh Dugar: Next step, everyone.

[02:11:06] - [02:11:14]

Jitesh Dugar: Well, you build the workflow. It is a very important step for you to make sure whatever data that you've filled here

[02:11:14] - [02:11:20]

Jitesh Dugar: Whatever data that you filled here, that data will be saved for the future steps.

[02:11:21] - [02:11:26]

Jitesh Dugar: that data will be saved for the future steps. So, there is an option called Pin DATA.

[02:11:27] - [02:11:33]

Jitesh Dugar: PIN data allows you to save your data for this step for the future steps.

[02:11:33] - [02:11:34]

Jitesh Dugar: So?

[02:11:34] - [02:11:38]

Jitesh Dugar: Whenever you're executing a future step, it will use one of these fields.

[02:11:38] - [02:11:41]

Jitesh Dugar: To execute those steps, or execute those nodes.

[02:11:43] - [02:11:45]

Jitesh Dugar: So, we will pin the data.

[02:11:46] - [02:11:49]

Jitesh Dugar: And that will be used for test executions.

[02:11:53] - [02:11:54]

Jitesh Dugar: No.

[02:11:55] - [02:12:02]

Jitesh Dugar: Next step, everyone, let's come back to our whiteboard, where we had drawn the flowchart, we have built the form.

[02:12:03] - [02:12:11]

Jitesh Dugar: Over here... And... And the next step for us is validating the data.

[02:12:11] - [02:12:12]

Jitesh Dugar: No.

[02:12:12] - [02:12:18]

Jitesh Dugar: On the validation step, what we want to do is, We want to...

[02:12:18] - [02:12:21]

Jitesh Dugar: Check if our project brief is empty or not.

[02:12:22] - [02:12:23]

Jitesh Dugar: Okay? So...

[02:12:24] - [02:12:33]

Jitesh Dugar: Click on the plus button here, and it is asking what happens next. Which means, after the trigger has happened, what should happen in the next step?

[02:12:33] - [02:12:35]

Jitesh Dugar: That's what we are asking here, okay?

[02:12:36] - [02:12:42]

Jitesh Dugar: Over here, what we want to happen is, we want to check if the project brief is empty.

[02:12:42] - [02:12:45]

Jitesh Dugar: And there are a ton of options here.

[02:12:45] - [02:12:49]

Jitesh Dugar: What we want to do is, we want to execute a conditional check.

[02:12:50] - [02:12:54]

Jitesh Dugar: And one of the conditional checks on N10 is, if...

[02:12:56] - [02:13:04]

Jitesh Dugar: Because we want to check if the project brief is empty, then I want to do something. If it is not empty, I want to do something else.

[02:13:05] - [02:13:09]

Jitesh Dugar: Everyone good with it? Everyone good with me using an if step here?

[02:13:15] - [02:13:18]

Jitesh Dugar: To go to the action step, I clicked on the plus button after the form.

[02:13:19] - [02:13:21]

Jitesh Dugar: So, we'll select if here.

[02:13:21] - [02:13:23]

Jitesh Dugar: And we select if right here.

[02:13:24] - [02:13:25]

Jitesh Dugar: And?

[02:13:26] - [02:13:31]

Jitesh Dugar: Now, it is asking, tell me the condition for the if step.

[02:13:31] - [02:13:40]

Jitesh Dugar: And remember one very important thing. On NA10, input will be on the left-hand side, output will be on the right-hand side. You can see input right here, and you can see output right here.

[02:13:41] - [02:13:46]

Jitesh Dugar: With that... The condition that we want to add is, Project brief.

[02:13:47] - [02:13:51]

Jitesh Dugar: That is there, remember. Now, this is a very important step, everyone.

[02:13:52] - [02:14:00]

Jitesh Dugar: On the left-hand side, we have a project brief. We want to check if the value inside the project brief, is it empty or not.

[02:14:00] - [02:14:01]

Jitesh Dugar: Okay?

[02:14:01] - [02:14:08]

Jitesh Dugar: And... I could just check if this value This value should...

[02:14:08] - [02:14:11]

Jitesh Dugar: not be empty. This value is not empty.

[02:14:12] - [02:14:15]

Jitesh Dugar: Okay? And I will execute this step.

[02:14:15] - [02:14:17]

Jitesh Dugar: And it is saying, yes, it is not empty.

[02:14:19] - [02:14:20]

Jitesh Dugar: Everyone good with it?

[02:14:22] - [02:14:24]

Jitesh Dugar: Are you good with what I have done?

[02:14:26] - [02:14:29]

Jitesh Dugar: Okay, some of you are saying yes, and some of you are saying no.

[02:14:33] - [02:14:36]

Jitesh Dugar: Okay, by the way, I've made some mistake here.

[02:14:36] - [02:14:38]

Jitesh Dugar: I made some mistake.

[02:14:42] - [02:14:43]

Jitesh Dugar: I will... I will show it again.

[02:14:44] - [02:14:52]

Jitesh Dugar: Everyone, we have filled up a form, and what we want to check is, we want to check if the value in the project brief, is it empty or not.

[02:14:52] - [02:14:57]

Jitesh Dugar: Okay? So if we select IF is the condition that we need to add.

[02:14:58] - [02:15:03]

Jitesh Dugar: And the value that we want to check here is if the project brief value is empty or not.

[02:15:03] - [02:15:10]

Jitesh Dugar: So, whether this value that we have here, I copied it, I put it here in the condition, and I put a condition here.

[02:15:10] - [02:15:14]

Jitesh Dugar: Saying, if this value is Not empty.

[02:15:15] - [02:15:19]

Jitesh Dugar: If it is not empty, That is the condition that I want to check.

[02:15:20] - [02:15:25]

Jitesh Dugar: And it told me, yes, it is not empty, so it went to the true branch. If I close it.

[02:15:25] - [02:15:28]

Jitesh Dugar: You can see here, the two branches highlighted.

[02:15:31] - [02:15:32]

Jitesh Dugar: Okay.

[02:15:32] - [02:15:36]

Jitesh Dugar: Now, people who are guessing what mistake I've made.

[02:15:36] - [02:15:38]

Jitesh Dugar: Were you able to identify it?

[02:15:41] - [02:15:48]

Jitesh Dugar: Yes, everyone, stop for a second, you guys are right, okay? People who did not identify it, let me tell you what is the issue.

[02:15:48] - [02:15:52]

Jitesh Dugar: The issue here is... the value that I am checking against

[02:15:53] - [02:15:56]

Jitesh Dugar: The value that I'm checking against is a fixed value.

[02:15:57] - [02:15:59]

Jitesh Dugar: It is a fixed value, but

[02:15:59] - [02:16:08]

Jitesh Dugar: And it is checking for the value that I entered as a sample, not the actual value that the users would have submitted on the form.

[02:16:08] - [02:16:11]

Jitesh Dugar: So what I need to do is, I need to...

[02:16:12] - [02:16:19]

Jitesh Dugar: drag this field, the value that someone is filling up on this field, and that is the value that I want to check for.

[02:16:19] - [02:16:24]

Jitesh Dugar: I want to check if the value that I have in the project field, brief field, is empty or not.

[02:16:25] - [02:16:28]

Jitesh Dugar: And for that, what I'm doing, everyone, please pay attention.

[02:16:29] - [02:16:36]

Jitesh Dugar: Whenever I put it here in the project brief, it turns into a hand. Hand means I can drag it, and I can put it here.

[02:16:37] - [02:16:46]

Jitesh Dugar: I can drag it and put it here. And the difference that it makes now is, we are checking if the value that someone would have submitted in this form

[02:16:47] - [02:16:56]

Jitesh Dugar: is the one that we can check against. And now we can say, if this value is not empty, that is the condition that we want to check for, and we can execute this step.

[02:16:57] - [02:17:02]

Jitesh Dugar: When we execute this step, there is a true branch and there is a false branch.

[02:17:02] - [02:17:07]

Jitesh Dugar: It is saying this condition that you've put here, that is a true statement.

[02:17:07] - [02:17:09]

Jitesh Dugar: Because Project Brief is not empty.

[02:17:11] - [02:17:14]

Jitesh Dugar: Everyone clear with this step. This is possibly the most important step.

[02:17:15] - [02:17:19]

Jitesh Dugar: of our automation workflow. We have dynamically mapped

[02:17:19] - [02:17:24]

Jitesh Dugar: a value from one step to the other. On a scale of 1 to 10, how confident are you?

[02:17:25] - [02:17:27]

Jitesh Dugar: If you've understood, put 100 on chat, everyone.

[02:17:28] - [02:17:30]

Jitesh Dugar: Yes, that mistake was intentional, yes.

[02:17:32] - [02:17:33]

Jitesh Dugar: Okay, perfect, thank you.

[02:17:36] - [02:17:37]

Jitesh Dugar: Okay, great.

[02:17:38] - [02:17:41]

Jitesh Dugar: Yes, you can add multiple conditions also.

[02:17:43] - [02:17:44]

Jitesh Dugar: Sorry.

[02:17:48] - [02:17:49]

Jitesh Dugar: No.

[02:17:50] - [02:18:05]

Jitesh Dugar: By the way, someone asked a question, the difference between fixed and expression also, I remember. So, let me show you one magic here, not the magic, in fact. Let me show you one behavior. Everyone, please pay attention here. I am about to explain the difference between fixed and expression.

[02:18:05] - [02:18:08]

Jitesh Dugar: Fixed means it's a static field.

[02:18:08] - [02:18:11]

Jitesh Dugar: Expression means it's a dynamic field.

[02:18:11] - [02:18:22]

Jitesh Dugar: And notice, before I have dragged this field from here to there, it was a fixed field, right? As soon as I finish dragging it, it automatically converts that into an expression field.

[02:18:22] - [02:18:24]

Jitesh Dugar: Did you notice this change?

[02:18:24] - [02:18:26]

Jitesh Dugar: If you did not, I will show you again.

[02:18:26] - [02:18:29]

Jitesh Dugar: Okay, please notice these two boxes right here.

[02:18:29] - [02:18:34]

Jitesh Dugar: I drag the project brief, I put it right here, this fixed will turn to expression.

[02:18:35] - [02:18:39]

Jitesh Dugar: That means expression is the one that supports dynamic fields.

[02:18:39] - [02:18:42]

Jitesh Dugar: Fixed will not support dynamic fields, that's the difference.

[02:18:45] - [02:18:48]

Jitesh Dugar: So, we have the condition right here added.

[02:18:49] - [02:18:51]

Jitesh Dugar: And it went into the true branch.

[02:18:52] - [02:18:57]

Jitesh Dugar: So we have the true branch highlighted in green, which means it said that, yes, the project brief is not empty.

[02:18:57] - [02:19:06]

Jitesh Dugar: And we have successfully completed this step. We have completed this step, we have completed this step also. We validated if the project brief is not empty.

[02:19:06] - [02:19:11]

Jitesh Dugar: Okay? Dynamic field means it will change. For your workflow, it will change.

[02:19:14] - [02:19:18]

Jitesh Dugar: Next step, we have to now add an LLM.

[02:19:18] - [02:19:20]

Jitesh Dugar: we have to now add an LLM.

[02:19:20] - [02:19:31]

Jitesh Dugar: So far, we are doing automations only. Now it is time to make it an AI automation, where we'll add an LLM step. So, if the project brief is not empty, which means it went here.

[02:19:32] - [02:19:35]

Jitesh Dugar: What we want to do here is, everyone, please pay attention, okay?

[02:19:36] - [02:19:41]

Jitesh Dugar: Click on the plus button after the true statement, and we have to add an LLM step here.

[02:19:42] - [02:19:49]

Jitesh Dugar: we have to add an LLM step here. So, there are multiple ways of adding it, but I will search for LLM.

[02:19:50] - [02:19:56]

Jitesh Dugar: Okay, when I search for LLM, there are a ton of options here. The one that we have to use is basic LLM chain, but

[02:19:56] - [02:19:59]

Jitesh Dugar: You can also go to AI, and when you go to AI,

[02:19:59] - [02:20:01]

Jitesh Dugar: You have all of these options.

[02:20:02] - [02:20:08]

Jitesh Dugar: There are multiple ways of doing it. We need to add an LLM to do the classify part, whether it is spam or genuine, okay?

[02:20:09] - [02:20:13]

Jitesh Dugar: For LLM, you can choose to use any of the LLMs here.

[02:20:14] - [02:20:16]

Jitesh Dugar: I will use an OpenAI right now.

[02:20:17] - [02:20:27]

Jitesh Dugar: Okay? Now, OpenAI is the company that powers ChatGPT, which means technically you will be using, like, a ChatGPT, but you'll use a ChatGPT model, which is OpenAI.

[02:20:28] - [02:20:31]

Jitesh Dugar: I will use OpenAI, but you are free to use any other models here.

[02:20:31] - [02:20:35]

Jitesh Dugar: I will use OpenAI. The moment I select OpenAI,

[02:20:35] - [02:20:39]

Jitesh Dugar: The option that I... it is giving me, Is one of these.

[02:20:39] - [02:20:46]

Jitesh Dugar: Would you like to message a model? Would you like to classify text for violations?
Would you like to perform any of these image actions, like...

[02:20:46] - [02:20:56]

Jitesh Dugar: Analyze image, generate image, edit image, would you like to generate audio?
These are all the stuff that you can do using NA10, using OpenAI inside of an NA10 workflow.

[02:20:58] - [02:21:00]

Jitesh Dugar: These are all the things that you can do.

[02:21:00] - [02:21:03]

Jitesh Dugar: inside Anytime workflow, using OpenAI.

[02:21:04] - [02:21:08]

Jitesh Dugar: Can someone tell me which is the action that we are supposed to select here?

[02:21:09] - [02:21:11]

Jitesh Dugar: Which is the right action for this?

[02:21:17] - [02:21:26]

Jitesh Dugar: No, there is no violation, so there's no classified text for violation, that's different,
okay? Message model is the right action, because it is like a...

[02:21:26] - [02:21:39]

Jitesh Dugar: It is for us to talk to a model. We want to tell a model that, hey, hey model, I have
an inquiry from my website, and I need your help to classify whether it is spam or genuine, just
like how you talk to ChatGPT.

[02:21:40] - [02:21:43]

Jitesh Dugar: Everyone agrees that we should use messenger Model now.

[02:21:44] - [02:21:48]

Jitesh Dugar: we need to send a message to an LLM, which is a model.

[02:21:48] - [02:21:54]

Jitesh Dugar: And we will say, hey model, this is my inquiry, I need your help to classify whether it is spam or genuine.

[02:21:55] - [02:21:55]

Jitesh Dugar: Okay?

[02:21:56] - [02:21:57]

Jitesh Dugar: No.

[02:21:58] - [02:22:02]

Jitesh Dugar: The moment we select message a model, it is asking for credentials.

[02:22:03] - [02:22:05]

Jitesh Dugar: Now, remember, it is asking for credentials.

[02:22:06] - [02:22:08]

Jitesh Dugar: What are credentials?

[02:22:09] - [02:22:14]

Jitesh Dugar: Credentials give Anten an ability 2?

[02:22:14] - [02:22:18]

Jitesh Dugar: Talk to or communicate with external apps.

[02:22:22] - [02:22:34]

Jitesh Dugar: Communicate with external apps, and those apps can be anything. Those apps can be your OpenAI, those apps can be your Gmail, those apps can be your Google Sheets, any of those. And we'll use two of these over here.

[02:22:35] - [02:22:39]

Jitesh Dugar: You need to give OpenAI an ability to talk to

[02:22:39] - [02:22:43]

Jitesh Dugar: Sorry, you need to give Ann an ability to talk to your OpenAI account.

[02:22:44] - [02:22:53]

Jitesh Dugar: Okay? Now, you might be wondering, is it same as our ChatGPT subscription?

Okay? Let me tell you, OpenAI

[02:22:54] - [02:22:55]

Jitesh Dugar: OpenAI?

[02:22:56] - [02:22:59]

Jitesh Dugar: Works using credit systems.

[02:22:59] - [02:23:06]

Jitesh Dugar: It works using credit systems, while ChatGPT works on a subscription system.

[02:23:07] - [02:23:12]

Jitesh Dugar: OpenAI and CHD are two separate products of the same company, OpenAI.

[02:23:13] - [02:23:24]

Jitesh Dugar: So when you use ChatGPT, you're technically using OpenAI on the backend, but ChatGPT is the interface that all of us are using. And when you pay for ChatGPT, you pay a subscription fee.

[02:23:24] - [02:23:28]

Jitesh Dugar: Okay? Subscription fee could be something around \$20 a month.

[02:23:28] - [02:23:33]

Jitesh Dugar: That is for ChatGPT. In case of OpenAI, there is no subscription fee.

[02:23:34] - [02:23:38]

Jitesh Dugar: There is no subscription fee, you pay for token usage.

[02:23:38] - [02:23:42]

Jitesh Dugar: You pay for token usage. Every time you send a message, you are charged for it.

[02:23:43] - [02:23:45]

Jitesh Dugar: And there is usually a prepaid method.

[02:23:46] - [02:23:49]

Jitesh Dugar: That means you need to recharge with some credits.

[02:23:51] - [02:23:52]

Jitesh Dugar: That is what happens.

[02:23:53] - [02:23:57]

Jitesh Dugar: In case of OpenAI model versus ChatGPT. So...

[02:23:58] - [02:24:08]

Jitesh Dugar: When we connect your OpenAI account here, that means you are using this and not your Chart JPT subscription. You're using this and not your ChartGPT subscription.

[02:24:09] - [02:24:17]

Jitesh Dugar: And the same thing applies, same process applies to whether you're using Gemini or Claude also. They do not give you token usage.

[02:24:17] - [02:24:23]

Jitesh Dugar: within on their standard, subscription plan. Token you have to pay for separately.

[02:24:24] - [02:24:32]

Jitesh Dugar: And the same thing applies to any model, right? DeepSeek also, Claude also, Gemini also, okay? So... Over here.

[02:24:32] - [02:24:41]

Jitesh Dugar: I need to give N80 an ability to talk to our OpenAI account, my OpenAI account. Now, if you would have signed up for

[02:24:41] - [02:24:45]

Jitesh Dugar: An NAT and cloud account, you'll already have some free credits.

[02:24:46] - [02:24:51]

Jitesh Dugar: As a part of your 14-day trial, you can use that also, or you can connect your credentials.

[02:24:51] - [02:24:56]

Jitesh Dugar: Let me show you how you can connect your OpenAI credentials.

[02:24:56] - [02:25:01]

Jitesh Dugar: You have to go to a website called platform.openai.com.

[02:25:03] - [02:25:05]

Jitesh Dugar: When you go to that website.

[02:25:07] - [02:25:09]

Jitesh Dugar: You will come into a page like this.

[02:25:10] - [02:25:16]

Jitesh Dugar: On the left-hand side, I'm showing you how to get your API key for OpenAI that you can connect with NAT.

[02:25:16] - [02:25:20]

Jitesh Dugar: So, on the left-hand side, you'll see API keys.

[02:25:20] - [02:25:22]

Jitesh Dugar: You can come here.

[02:25:22] - [02:25:28]

Jitesh Dugar: And you can click on the Create New Secret V button on the top right corner here, okay? This button.

[02:25:30] - [02:25:32]

Jitesh Dugar: Click on Create New Secret Key.

[02:25:32] - [02:25:41]

Jitesh Dugar: It will ask you for the name for the key, that is optional. It'll ask you, after how long do you want it to expire? Let's say I say I want this key to be only valid for 30 days.

[02:25:42] - [02:25:44]

Jitesh Dugar: And click on Create Secret Key.

[02:25:45] - [02:25:52]

Jitesh Dugar: You can copy this secret key, and remember, this is like your password that gives Ann an ability to use your OpenAI account.

[02:25:53] - [02:25:59]

Jitesh Dugar: So copy this secret key, come back to NATN, Go to Credentials section.

[02:25:59] - [02:26:03]

Jitesh Dugar: Click on Create New Credential. If you already have a credential, it'll show up like this.

[02:26:03] - [02:26:06]

Jitesh Dugar: Click on Create New Credential, paste your API key right here.

[02:26:08] - [02:26:14]

Jitesh Dugar: And once you have pasted the API key that you just generated from OpenAI, you can save it.

[02:26:16] - [02:26:24]

Jitesh Dugar: And... with that, your OpenAI credentials are now connected with NATIN.

[02:26:24] - [02:26:26]

Jitesh Dugar: I will show this step again.

[02:26:27] - [02:26:33]

Jitesh Dugar: Go to platform.openai.com, Go to API Key section on the left-hand side.

[02:26:33] - [02:26:37]

Jitesh Dugar: Click on Create New Secret Key button here on the top right corner.

[02:26:39] - [02:26:42]

Jitesh Dugar: Generate a key. Click on this button, generate a key.

[02:26:43] - [02:26:44]

Jitesh Dugar: Create a secret key.

[02:26:45] - [02:26:51]

Jitesh Dugar: You can have the API key never expire also, that's up to you. Copy the key, and put it

[02:26:51] - [02:26:54]

Jitesh Dugar: on create a new credential, and paste that API key right here.

[02:26:54] - [02:26:59]

Jitesh Dugar: Okay? The process, whether you use OpenAI, Gemini, Claude, most of them remain the same.

[02:27:00] - [02:27:05]

Jitesh Dugar: Again, the question that a lot of you are asking, is it paid? Let me show you.

[02:27:06] - [02:27:09]

Jitesh Dugar: On the left-hand side, where you see Home, okay?

[02:27:10] - [02:27:17]

Jitesh Dugar: Home is where you can track your credit balance. It is... it works on a prepaid method, which means you'll have to add some credit balance to use it.

[02:27:18] - [02:27:21]

Jitesh Dugar: You can start with as low as \$5 and use it.

[02:27:22] - [02:27:27]

Jitesh Dugar: Okay? How does it charge for it? I will show you a little later.

[02:27:27] - [02:27:31]

Jitesh Dugar: Okay? Rather, I can show you just in some time. Remember.

[02:27:31] - [02:27:38]

Jitesh Dugar: We've just connected OpenAI's credential onto N10, which means NA10 can use our OpenAI account.

[02:27:38] - [02:27:44]

Jitesh Dugar: After that, everyone, please pay attention here. Under model, it is asking us.

[02:27:44] - [02:27:49]

Jitesh Dugar: Which model do you want me to use? These are all the LLMs that you can use.

[02:27:49] - [02:27:50]

Jitesh Dugar: Okay?

[02:27:50] - [02:27:55]

Jitesh Dugar: And... Choosing your LLM is very important.

[02:27:56] - [02:27:58]

Jitesh Dugar: Because... Because...

[02:28:03] - [02:28:05]

Jitesh Dugar: which LLM to use, okay?

[02:28:08] - [02:28:13]

Jitesh Dugar: Normally, with all the LLMs, there is a small brain to a big brain concept.

[02:28:13] - [02:28:15]

Jitesh Dugar: There is a concept of a small brain.

[02:28:16] - [02:28:18]

Jitesh Dugar: A brain that is slightly bigger than that?

[02:28:24] - [02:28:26]

Jitesh Dugar: A brain that is even bigger than that.

[02:28:28] - [02:28:30]

Jitesh Dugar: And then a brain that is even bigger than that.

[02:28:32] - [02:28:36]

Jitesh Dugar: And remember, these are brains, okay? These are chat models, or LLMs.

[02:28:36] - [02:28:40]

Jitesh Dugar: As the size of the brain increases from here to here.

[02:28:40] - [02:28:45]

Jitesh Dugar: Okay? And let me tell you, the smallest brain in the OpenAI world is called Nano.

[02:28:47] - [02:28:50]

Jitesh Dugar: The brain that is slightly bigger than that is called Mini.

[02:28:50] - [02:28:51]

Jitesh Dugar: The brain that is

[02:28:52] - [02:29:01]

Jitesh Dugar: Slightly even bigger than that, that is called general purpose, like this thing. So if it is GPT-5, GPT-5 would come under this. GPT-5 Mini would come under this.

[02:29:02] - [02:29:05]

Jitesh Dugar: And GPT-5 Nano would come here.

[02:29:06] - [02:29:09]

Jitesh Dugar: And GPT-5 Pro will come here. I'm just giving some examples.

[02:29:10] - [02:29:11]

Jitesh Dugar: So?

[02:29:11] - [02:29:19]

Jitesh Dugar: Nano is a small brain, pro is a big brain. Why am I having you to tell you this? The intelligence level.

[02:29:20] - [02:29:23]

Jitesh Dugar: Of a small brain is low, it has low intelligence.

[02:29:26] - [02:29:30]

Jitesh Dugar: While GPT-5 Pro is a high intelligence.

[02:29:32] - [02:29:41]

Jitesh Dugar: Now, if GPT-5 Pro is high intelligence, and GPT-5 Nano is low intelligence, do you all agree that everyone wants to use a highly intelligent brain?

[02:29:42] - [02:29:45]

Jitesh Dugar: We would all want to, right? Because we want our stuff to be very accurate.

[02:29:46] - [02:29:48]

Jitesh Dugar: Right? But there is a catch.

[02:29:48] - [02:29:53]

Jitesh Dugar: The catch is, as you move from left to right, Okay?

[02:29:53] - [02:29:57]

Jitesh Dugar: The cost also increases. This is also low cost.

[02:29:57] - [02:29:59]

Jitesh Dugar: And this is high cost.

[02:30:00] - [02:30:13]

Jitesh Dugar: And when I give... tell you high cost, the number is usually... it is too... usually about... it... I could be slightly different, it could slightly vary also. It is usually 200X of the cost of nano.

[02:30:13] - [02:30:20]

Jitesh Dugar: So, GPT-5 Pro can cost as much as 200 times compared to what a Nano would cost.

[02:30:20] - [02:30:23]

Jitesh Dugar: That's how... how high expensive it can be.

[02:30:24] - [02:30:25]

Jitesh Dugar: So that's how you decide it.

[02:30:26] - [02:30:33]

Jitesh Dugar: At the same time, because it is low intelligence, it does not involve a lot of thinking, it also works fast.

[02:30:33] - [02:30:35]

Jitesh Dugar: While pro models are slow.

[02:30:35] - [02:30:37]

Jitesh Dugar: That's another difference.

[02:30:37] - [02:30:39]

Jitesh Dugar: So, you have to take a call.

[02:30:40] - [02:30:42]

Jitesh Dugar: What model do you want to use.

[02:30:43] - [02:30:51]

Jitesh Dugar: Some of your models, I mean, if your task is so simple, right, don't use a pro model for it. Maybe a nano model will do... work very well.

[02:30:52] - [02:30:52]

Jitesh Dugar: Okay?

[02:30:53] - [02:30:57]

Jitesh Dugar: If your task is extremely complex, then it justifies the cost.

[02:30:57] - [02:31:05]

Jitesh Dugar: It justifies the cost. So, you have to take a call. The way I follow the process is, I usually start with a mini model.

[02:31:05] - [02:31:09]

Jitesh Dugar: I usually start with a minimal when I'm not sure, okay?

[02:31:09] - [02:31:13]

Jitesh Dugar: If it is not performing better, then I would go to the next step.

[02:31:13] - [02:31:18]

Jitesh Dugar: I would go to maybe a 5 model. If that also doesn't work well, I go to a Pro model.

[02:31:18] - [02:31:24]

Jitesh Dugar: And in case of the... Clawed world. The smallest brain is called Haiku.

[02:31:24] - [02:31:37]

Jitesh Dugar: In case of Cloud World, even Gemini might have their own, this thing, naming. Then the... after Haiku, it was the name from M, I forgot that name.

[02:31:38] - [02:31:40]

Jitesh Dugar: Yes, sorry, Sonnet, yes, my bad.

[02:31:40] - [02:31:42]

Jitesh Dugar: So, Haiku, then this is Sonnet.

[02:31:42] - [02:31:51]

Jitesh Dugar: This is Opus. Opus is the slightly bigger brain compared to Sonnet in the cloud world than there is Fable.

[02:31:52] - [02:31:53]

Jitesh Dugar: Okay, these are the ones.

[02:31:53] - [02:31:56]

Jitesh Dugar: Right now, of course, it could change later.

[02:31:58] - [02:32:02]

Jitesh Dugar: So, Fable is highly intelligent, but it comes with a high cost as well.

[02:32:03] - [02:32:08]

Jitesh Dugar: I hope you're clear on how to decide using an LLM. Now, question to all of you.

[02:32:08] - [02:32:15]

Jitesh Dugar: Our task is to classify whether the incoming inquiry is a spam or a genuine. Should we use a small brain or a big brain?

[02:32:17] - [02:32:33]

Jitesh Dugar: Okay, some of you are saying small brain, nano, okay, mini, small, okay? Yes, you guys are all correct. Let's use the small brain. Some of you are saying, let's use a medium brain. I think it's a very small routine task. Let's use a mini nano brain itself. We'll try with a nano. If it doesn't work well, we'll try a better one.

[02:32:34] - [02:32:42]

Jitesh Dugar: And in nano, we'll use a 5.4 nano. There's a very slight difference between using a 4.1 versus 5.4. We'll still use a latest nano model.

[02:32:43] - [02:32:46]

Jitesh Dugar: And now, we have a way to give a prompt to the AI.

[02:32:47] - [02:32:53]

Jitesh Dugar: We have a way to give a prompt to the AI, where we will now mention what is the prompt that we want to give here.

[02:32:53] - [02:32:54]

Jitesh Dugar: In the prompt.

[02:32:54] - [02:33:08]

Jitesh Dugar: We will just type out a few things, and to make this screen a little bigger, there is a small arrow button here that makes this text field a little bigger for us. So we'll click on this text field, and we will give it a prompt.

[02:33:09] - [02:33:17]

Jitesh Dugar: Okay? Now, to generate the prompt also, I will take ChartGPT's help, or I'll take Claude's help itself. I would say.

[02:33:18] - [02:33:36]

Jitesh Dugar: Hey, Claude, I need your help to write a prompt that I could give to Anaten to help me check if my incoming inquiry is spam or not for my digital marketing and website development business. Whenever you get an inquiry, you need to classify whether the inquiry is spam or not.

[02:33:36] - [02:33:42]

Jitesh Dugar: If the inquiry is spam, reply with a yes. If the inquiry is not spam, reply with a no.

[02:33:43] - [02:33:48]

Jitesh Dugar: So, I am telling ChatGPT that I need your help to write that prompt for me, and I'll just send it.

[02:33:52] - [02:33:56]

Jitesh Dugar: Let's select Quick Answer. It's a very simple task, we don't want to spend extra time on it.

[02:33:58] - [02:34:03]

Jitesh Dugar: There you go, okay? Because it already knew something about me, so it's saying you're a spam classifier for this company.

[02:34:04] - [02:34:10]

Jitesh Dugar: You'll receive an incoming website inquiry. Decide whether it is spam or not, okay? So I will copy this.

[02:34:11] - [02:34:12]

Jitesh Dugar: And I will put it here.

[02:34:14] - [02:34:16]

Jitesh Dugar: I will copy and put it here.

[02:34:16] - [02:34:21]

Jitesh Dugar: By the way, I use that claud only to generate the prompt. I will not use it for our actual workflow.

[02:34:22] - [02:34:24]

Jitesh Dugar: So my prompt looks like this.

[02:34:24] - [02:34:40]

Jitesh Dugar: You're a spam classifier for this company, you'll receive an incoming website inquiry, decide whether it is spam. Spam? Answer, yes. If it is SEO, backlink, guest post link, biddling, agencies, freelancers offering services to us. Crypto, loans, investment, all of these are spam, so it has given us some categories for spam.

[02:34:40] - [02:34:42]

Jitesh Dugar: And if it is not spam.

[02:34:42] - [02:34:51]

Jitesh Dugar: then we are saying, answer no. Someone asking for a website redesign, someone asking for SEO ads, pricing code, timeline, partnership referral.

[02:34:51] - [02:35:04]

Jitesh Dugar: And all of these. If unsure answer no, a mislead costs more than a spam message. Short or poorly written messages are not spam by themselves. Many genuine leads write briefly, so it has given us a prompt.

[02:35:04] - [02:35:07]

Jitesh Dugar: Okay? Then I will close it.

[02:35:08] - [02:35:11]

Jitesh Dugar: And I will go ahead and execute this step.

[02:35:12] - [02:35:20]

Jitesh Dugar: I will go ahead and execute this step with a nanomodel, and give it a... giving it a prompt. And it has replied with a no means it is not spam.

[02:35:20] - [02:35:24]

Jitesh Dugar: Have I done everything correctly, everyone? Did I make a mistake here?

[02:35:29] - [02:35:34]

Jitesh Dugar: Can we also include Ansure? Yeah, we can do that. Okay, you're saying I have not made a mistake.

[02:35:36] - [02:35:40]

Jitesh Dugar: Okay? Okay, someone's saying I've made a mistake. Okay, what mistake did I do?

[02:35:41] - [02:35:42]

Jitesh Dugar: What mistake did I make?

[02:35:43] - [02:35:45]

Jitesh Dugar: Okay, yes.

[02:35:46] - [02:35:49]

Jitesh Dugar: Yes, some of you have identified it correctly.

[02:35:49] - [02:35:53]

Jitesh Dugar: Some of you have identified it correctly. Yes, you guys are right, okay?

[02:35:53] - [02:35:55]

Jitesh Dugar: Let me show you the prompt again.

[02:35:55] - [02:36:02]

Jitesh Dugar: I gave it a prompt, but in the prompt, I haven't told which is the inquiry that it is supposed to classify.

[02:36:02] - [02:36:03]

Jitesh Dugar: Everyone agrees?

[02:36:04] - [02:36:08]

Jitesh Dugar: I haven't told it the prompt... the inquiry that it is supposed to classify.

[02:36:09] - [02:36:10]

Jitesh Dugar: I should provide that.

[02:36:11] - [02:36:23]

Jitesh Dugar: Okay? If I give a very simple message to ChatGPT without even telling it the prompt that it needs to classify, it's useless, right? So we need to add some dynamic fields from the left-hand side.

[02:36:24] - [02:36:25]

Jitesh Dugar: So?

[02:36:26] - [02:36:27]

Jitesh Dugar: To do that.

[02:36:27] - [02:36:34]

Jitesh Dugar: We should switch to an expression because we want to pass some dynamic fields. We convert to an expression from fixed.

[02:36:34] - [02:36:36]

Jitesh Dugar: And we click on these arrows to make this bigger.

[02:36:37] - [02:36:41]

Jitesh Dugar: And at the end of it, we will say, Project Inquiry.

[02:36:42] - [02:36:44]

Jitesh Dugar: Is this. Is below.

[02:36:45] - [02:36:51]

Jitesh Dugar: And we would say... whatever we want to pass, right? We would just say our project brief, Or just...

[02:36:52] - [02:36:54]

Jitesh Dugar: The project brief, you can drag it and put it here.

[02:36:54] - [02:36:57]

Jitesh Dugar: So now the project brief is going.

[02:36:57] - [02:37:03]

Jitesh Dugar: And it says, need a website for my business. That's a dynamic field that I'm passing.

[02:37:03] - [02:37:05]

Jitesh Dugar: to the AI step.

[02:37:06] - [02:37:10]

Jitesh Dugar: to this nanomodel, or to this LLM, and I would execute this step.

[02:37:12] - [02:37:14]

Jitesh Dugar: And after I execute this step.

[02:37:14] - [02:37:20]

Jitesh Dugar: The answer that I've gotten is no, which means it is not a spam inquiry.

[02:37:20] - [02:37:34]

Jitesh Dugar: And people who did not understand, I will explain it again, we are giving a prompt to OpenAI or an LLM, and we are telling that your duty is to classify whether an website inquiry is spam or genuine.

[02:37:34] - [02:37:40]

Jitesh Dugar: Okay? And at the end of it, we are telling it, this is the project inquiry that you're supposed to

[02:37:40] - [02:37:42]

Jitesh Dugar: Classify.

[02:37:42] - [02:37:51]

Jitesh Dugar: Remember, this is exactly like how you talk to ChartGPT, nothing different. The only difference is, you are having it done inside of a workflow.

[02:37:52] - [02:37:58]

Jitesh Dugar: And making this field dynamic. So whatever the user would have submitted, that will go here.

[02:37:58] - [02:38:02]

Jitesh Dugar: So if I'm getting 100 inquiries on my website.

[02:38:02] - [02:38:05]

Jitesh Dugar: Every single time, this brief will change.

[02:38:06] - [02:38:09]

Jitesh Dugar: And I could get a different response.

[02:38:09] - [02:38:11]

Jitesh Dugar: That's what I have done here.

[02:38:12] - [02:38:15]

Jitesh Dugar: And the response that I got from here is, no.

[02:38:16] - [02:38:20]

Jitesh Dugar: Okay? And we'll see a genuine inquiry also, no means...

[02:38:20] - [02:38:25]

Jitesh Dugar: No means it's a... it's a genuine inquiry, we'll try a spam inquiry also.

[02:38:25] - [02:38:26]

Jitesh Dugar: No.

[02:38:28] - [02:38:39]

Jitesh Dugar: After we have gotten a response from our spam checker, let us give it a name also. There is a way for you to rename a step on an ATN. You can come here and rename it, you can call it

[02:38:39] - [02:38:43]

Jitesh Dugar: Ai spam checker. Spam classified, let's say.

[02:38:45] - [02:38:48]

Jitesh Dugar: And the next step that we want to do here is...

[02:38:48] - [02:38:51]

Jitesh Dugar: We want to route it to two different

[02:38:52] - [02:38:55]

Jitesh Dugar: Steps, or two different branches here.

[02:38:55] - [02:39:01]

Jitesh Dugar: So we have completed this step, but now we have to route it into two different branches. From here.

[02:39:02] - [02:39:12]

Jitesh Dugar: Where we say, if the value of text is no, then I want it to go to the genuine sheet.
If the value of text is yes, I want to go... I want it to go to the spam sheet.

[02:39:14] - [02:39:14]

Jitesh Dugar: Okay?

[02:39:15] - [02:39:18]

Jitesh Dugar: So... Let's click on this button here. Now.

[02:39:19] - [02:39:30]

Jitesh Dugar: I could use an if node here, I could use an if step here. Everyone agrees I can add an if step here, and check if the value of this text is yes or no, and that'll help me generate those two branches.

[02:39:32] - [02:39:35]

Jitesh Dugar: Yes, you guys are right. I can use a if step.

[02:39:36] - [02:39:41]

Jitesh Dugar: But... But... I want to show you one more extra step, one more extra node.

[02:39:42] - [02:39:51]

Jitesh Dugar: You can use an if node, that's 100% correct, but I want to intentionally expose you to one more extra node here, and that node will be called switch.

[02:39:52] - [02:40:01]

Jitesh Dugar: Switch also lets you do the same thing by adding conditions, but you can have multiple outputs as a part of the switch node.

[02:40:01] - [02:40:08]

Jitesh Dugar: I will repeat, switch and if, in this case, both can be used. I just want to expose you to a new node here.

[02:40:08] - [02:40:11]

Jitesh Dugar: Because there are some cases where it will fail.

[02:40:12] - [02:40:16]

Jitesh Dugar: So switch is better... switch is the one that we will use here.

[02:40:16] - [02:40:19]

Jitesh Dugar: And as soon as we select switch, it is asking here.

[02:40:20] - [02:40:23]

Jitesh Dugar: What is the routing rule that you want to add here?

[02:40:24] - [02:40:37]

Jitesh Dugar: And routing rule that we want to add is, we want to first check if the value of this text that you see here, if this value that you see in the text, I will drag it here, and I want to check if this value is equal to

[02:40:38] - [02:40:39]

Jitesh Dugar: Yes.

[02:40:40] - [02:40:49]

Jitesh Dugar: I want to check if this value is equal to yes, and I want to add another routing rule. The second rule is, I want to check if this value that you see here

[02:40:50] - [02:40:53]

Jitesh Dugar: If it is equal to, no.

[02:40:54] - [02:41:03]

Jitesh Dugar: So, I just added two conditions. I am saying, if the value of this text is equal to yes, then I want you to consider rule one.

[02:41:03] - [02:41:08]

Jitesh Dugar: If the value of this text is equal to no, that is... that means rule 2 condition has been met.

[02:41:09] - [02:41:11]

Jitesh Dugar: That's all I've done on Switch, nothing else.

[02:41:12] - [02:41:14]

Jitesh Dugar: And I will execute this step.

[02:41:14] - [02:41:20]

Jitesh Dugar: As I execute this step, you can see it went into the output 1 branch, which is the routing rule 2.

[02:41:21] - [02:41:27]

Jitesh Dugar: And, one more extra thing that I will do here is, there is a way for me to rename the output.

[02:41:27] - [02:41:33]

Jitesh Dugar: Do you remember, if I set the value as yes, that means it was a spam.

[02:41:34] - [02:41:42]

Jitesh Dugar: Okay? If the value from AI was yes, it was a spam. If the value from AI was no, it was genuine.

[02:41:45] - [02:41:50]

Jitesh Dugar: Everyone remembers this, and as I did this, you can see now it went into the Genuine tab.

[02:41:54] - [02:41:58]

Jitesh Dugar: Okay? Let me tell you the difference between an if and switch.

[02:41:58] - [02:42:00]

Jitesh Dugar: If allows you to only have two outputs.

[02:42:01] - [02:42:03]

Jitesh Dugar: Yes, true or false?

[02:42:03] - [02:42:12]

Jitesh Dugar: With switch, you can have multiple outputs. I can have 10 different outputs also. That's an advantage. In our example, we need only 2 outputs, so we could have used if also.

[02:42:12] - [02:42:15]

Jitesh Dugar: But I just wanted to show you a possibility.

[02:42:16] - [02:42:21]

Jitesh Dugar: So, let's click on execute step, and it went into the... Genuine branch.

[02:42:21] - [02:42:28]

Jitesh Dugar: And as I click here, It went into the genuine branch because our inquiry was actually genuine.

[02:42:30] - [02:42:32]

Jitesh Dugar: Okay, our inquiry was actually genuine.

[02:42:33] - [02:42:34]

Jitesh Dugar: No.

[02:42:34] - [02:42:44]

Jitesh Dugar: Let's click on the plus button. What do we want to happen if it is a genuine inquiry? We want to store it on a Google Sheet. So let's prepare that Google Sheet for ourselves.

[02:42:45] - [02:42:48]

Jitesh Dugar: I will open a new Google Sheet, everyone, and I'll say.

[02:42:50] - [02:42:52]

Jitesh Dugar: my, I'll give it a name.

[02:42:52] - [02:42:53]

Jitesh Dugar: I'll call it.

[02:42:54] - [02:42:55]

Jitesh Dugar: It's wrong here, one minute.

[02:42:59] - [02:43:00]

Jitesh Dugar: Project.

[02:43:00] - [02:43:02]

Jitesh Dugar: inquiries.

[02:43:02] - [02:43:05]

Jitesh Dugar: all the inquiries that I'm getting for the project.

[02:43:05] - [02:43:10]

Jitesh Dugar: And I will add two tabs here. The first one will be Spam Inquiries.

[02:43:10] - [02:43:13]

Jitesh Dugar: The second one will be... Genuine inquiries.

[02:43:15] - [02:43:20]

Jitesh Dugar: And what do we want to store? We want to store all that we've captured on the website. The name.

[02:43:21] - [02:43:26]

Jitesh Dugar: the company, Then we want to capture the email address.

[02:43:27] - [02:43:28]

Jitesh Dugar: Then the project brief.

[02:43:31] - [02:43:32]

Jitesh Dugar: And?

[02:43:32] - [02:43:39]

Jitesh Dugar: Submitted at? What time was this lead submitted? And we want to capture the same information for the genuine sheet also.

[02:43:40] - [02:43:44]

Jitesh Dugar: Okay? Now... We will come back here.

[02:43:44] - [02:43:46]

Jitesh Dugar: And let me go ahead and...

[02:43:47] - [02:43:53]

Jitesh Dugar: format it a little better, we'll bold it, we'll add some color coding here. Same thing we'll do here also.

[02:43:55] - [02:43:55]

Jitesh Dugar: No.

[02:43:56] - [02:44:04]

Jitesh Dugar: Now, why did we create this Google Sheet? Because we want to store all the spam inquiries into this tab, and all the genuine inquiries into this tab.

[02:44:04] - [02:44:06]

Jitesh Dugar: That's what we want to do here.

[02:44:06] - [02:44:11]

Jitesh Dugar: So... Everyone, now we need to connect our Ann to a Google Sheet.

[02:44:11] - [02:44:18]

Jitesh Dugar: So, after the genuine step, click on the plus button, and let's search for Google Sheets.

[02:44:18] - [02:44:21]

Jitesh Dugar: Because we want to insert into that Google Sheet that we just created.

[02:44:22] - [02:44:27]

Jitesh Dugar: So we select Google Sheets, And the action within that Google Sheet.

[02:44:27] - [02:44:29]

Jitesh Dugar: Which one should we choose here, everyone?

[02:44:29] - [02:44:32]

Jitesh Dugar: Which action should we choose out of all of these?

[02:44:36] - [02:44:39]

Jitesh Dugar: Okay? Most of you are saying append row, yes.

[02:44:40] - [02:44:41]

Jitesh Dugar: Right?

[02:44:41] - [02:44:58]

Jitesh Dugar: Okay, we will use append row, that's correct. Update row is not correct, because we don't have an existing row. We want to add a new row. That means append a row. We want to add a new row inside this Google Sheet, so we'll select append row. Every time we get a new inquiry, keep adding a new row to that Google Sheet.

[02:44:58] - [02:44:59]

Jitesh Dugar: Okay?

[02:44:59] - [02:45:02]

Jitesh Dugar: And as I said, we have to connect credentials.

[02:45:02] - [02:45:18]

Jitesh Dugar: And credentials will give Ann an ability to communicate with external apps. So, we need to give Ann an ability to connect with our Google Sheet account, with my Google Sheet account. So we click on Credential, and we click on Create New Credential.

[02:45:19] - [02:45:26]

Jitesh Dugar: And the good thing about Google Apps is there is a quick sign-in with Google button, so I will click on Sign In with Google button.

[02:45:26] - [02:45:29]

Jitesh Dugar: It will ask me which Google account you want to use. I select that.

[02:45:30] - [02:45:36]

Jitesh Dugar: And literally just 2-3 button clicks, it'll ask for the permissions. You allow those permissions, And with that.

[02:45:37] - [02:45:42]

Jitesh Dugar: NA10 now has an ability to Use your Google Sheet account.

[02:45:42] - [02:45:50]

Jitesh Dugar: Which means it can create spreadsheets, it can record information into a spreadsheet, it can fetch information from spreadsheets, it can do all of that.

[02:45:51] - [02:45:57]

Jitesh Dugar: Okay? Now, we are about to do the adding to the right tab now.

[02:45:57] - [02:46:05]

Jitesh Dugar: So... Under option, under document, it is now asking which is the document

[02:46:05] - [02:46:08]

Jitesh Dugar: Where you want to insert a new row.

[02:46:09] - [02:46:11]

Jitesh Dugar: So, click on the document list.

[02:46:12] - [02:46:16]

Jitesh Dugar: And the document that we created was Project Inquiries.

[02:46:16] - [02:46:25]

Jitesh Dugar: Project Inquiries. There you go. This was the document that we created. It was called Project Inquiries, and it is showing up on NATEN, because Ann is now able to access all your sheets.

[02:46:26] - [02:46:27]

Jitesh Dugar: So we select that.

[02:46:27] - [02:46:37]

Jitesh Dugar: And the sheet within the document. This is for genuine, okay? So inside that, we have a spam sheet and a genuine sheet. These are the two sheets that we've added here.

[02:46:37] - [02:46:42]

Jitesh Dugar: Okay, I hope you can see this. These are the two sheets that we have on the Google Sheet.

[02:46:43] - [02:46:47]

Jitesh Dugar: So with that, we will select we want to insert that into a genuine sheet.

[02:46:47] - [02:46:56]

Jitesh Dugar: Then it is asking, what would you like to insert in the name column? What would you like to insert in the company column? It automatically fetched all the column names.

[02:46:57] - [02:47:02]

Jitesh Dugar: And it is asking, in each of these fields, or each of these columns, what would you like to insert?

[02:47:04] - [02:47:06]

Jitesh Dugar: And what do you think we should select here?

[02:47:06] - [02:47:09]

Jitesh Dugar: Everyone, I want your help to answer this.

[02:47:10] - [02:47:11]

Jitesh Dugar: What should we select here?

[02:47:13] - [02:47:16]

Jitesh Dugar: Dynamic fields. Where will those dynamic fields come from?

[02:47:19] - [02:47:20]

Jitesh Dugar: Yes.

[02:47:21] - [02:47:37]

Jitesh Dugar: Yes, it'll come from the form, okay? So, on the left-hand side where you see the inputs, we are only mapping the dynamic fields from the left-hand side inputs, so expand the on form submission, that is the name, so you drag the name, put that here.

[02:47:37] - [02:47:42]

Jitesh Dugar: Drag the company name, put that here. Drag the email address, put that here.

[02:47:43] - [02:47:48]

Jitesh Dugar: Drag the project brief, put that here, and submit it ad, drag it, and put it here.

[02:47:48] - [02:47:53]

Jitesh Dugar: With that, all of these fields that you've added here, they will land into this Google Sheet.

[02:47:54] - [02:47:59]

Jitesh Dugar: And should I go ahead and test it? To test it, you should click on Execute Step.

[02:48:00] - [02:48:06]

Jitesh Dugar: Click on Execute Step, and with that, Your Google Sheet is now... Having that new row.

[02:48:06] - [02:48:08]

Jitesh Dugar: That new row now got added to that Google Sheet.

[02:48:11] - [02:48:11]

Jitesh Dugar: Okay?

[02:48:12] - [02:48:25]

Jitesh Dugar: Now, Ann was able to talk to your Google Sheet, and it was able to insert that into a Google Sheet. Now, people are asking, do I have to click on this button every time to... for it to land it on Google Sheet? No. Okay? It will have... it will happen automatically.

[02:48:27] - [02:48:28]

Jitesh Dugar: No.

[02:48:28] - [02:48:32]

Jitesh Dugar: We just added the row inside Google Sheet using this step.

[02:48:32] - [02:48:36]

Jitesh Dugar: So... To add it into the spam sheet.

[02:48:37] - [02:48:40]

Jitesh Dugar: To add it into the spam sheet, what we want to happen is.

[02:48:41] - [02:48:43]

Jitesh Dugar: We want to do the exact same stuff.

[02:48:43] - [02:48:46]

Jitesh Dugar: The exact same stuff, the only difference is...

[02:48:46] - [02:48:50]

Jitesh Dugar: Only difference is, it should insert that into

[02:48:51] - [02:49:04]

Jitesh Dugar: The other tab, not the genuine tab, that's the only difference, but it should still append the row. So what I will do is, I will right-click on this, and I will duplicate this step. I will right-click on the Google Sheet Append Rows tab, and I will duplicate it.

[02:49:04] - [02:49:08]

Jitesh Dugar: And I will attach this to the spam one. I will drag it and attach it here.

[02:49:09] - [02:49:15]

Jitesh Dugar: And I have to change the configuration to a spam sheet tab. So I will double-click on it.

[02:49:16] - [02:49:18]

Jitesh Dugar: And under Sheet tab, I will select

[02:49:19] - [02:49:24]

Jitesh Dugar: It was selected as genuine for the other one. For this one, it is spam, so I select spam.

[02:49:25] - [02:49:27]

Jitesh Dugar: And I have to map the same fields again.

[02:49:28] - [02:49:31]

Jitesh Dugar: So you select the name here.

[02:49:31] - [02:49:36]

Jitesh Dugar: You select the company name here, You select the email here.

[02:49:36] - [02:49:46]

Jitesh Dugar: You select the project brief here, and you select the submitted ad here. We are simply mapping the fields, exact same stuff that we did for the genuine step.

[02:49:48] - [02:49:52]

Jitesh Dugar: And with that, all the fields are added, and you can close it.

[02:49:56] - [02:49:57]

Jitesh Dugar: No.

[02:49:57] - [02:50:04]

Jitesh Dugar: This was for genuine, and this was for spam. And you can, again, rename these steps. You can rename this to

[02:50:05] - [02:50:08]

Jitesh Dugar: Add to Genuine Sheet.

[02:50:11] - [02:50:12]

Jitesh Dugar: Oh, sorry.

[02:50:12] - [02:50:18]

Jitesh Dugar: Oh, sorry, my bad. I rename it, and I will call it Add to Genuine Sheet.

[02:50:19] - [02:50:21]

Jitesh Dugar: I will rename this, and I will rename this to...

[02:50:22] - [02:50:25]

Jitesh Dugar: Add to spam sheet. That's what we are doing right now.

[02:50:26] - [02:50:30]

Jitesh Dugar: And with that, Our automation is now completed.

[02:50:31] - [02:50:39]

Jitesh Dugar: Okay, our automation is now completed. Now, let me do a quick recap of all that we've done, and I will show it how you can launch it.

[02:50:39] - [02:50:44]

Jitesh Dugar: Okay? Now... Our automation starts with...

[02:50:44] - [02:50:46]

Jitesh Dugar: Some... someone filling up a form.

[02:50:48] - [02:50:53]

Jitesh Dugar: And then, we are checking if the project inquiry is empty or not, so we can rename this step also.

[02:50:53] - [02:50:57]

Jitesh Dugar: Check if project inquiry is not empty.

[02:51:00] - [02:51:03]

Jitesh Dugar: So we're checking if the project inquiry is not empty.

[02:51:04] - [02:51:14]

Jitesh Dugar: We are giving it to an AI, saying, hey, AI, this is my inquiry that I got from the website, can you tell me whether it is spam or not? If it is spam, reply with a

[02:51:14] - [02:51:19]

Jitesh Dugar: A reply with a yes. If it is not spam, a reply with a No.

[02:51:23] - [02:51:24]

Jitesh Dugar: Yes.

[02:51:26] - [02:51:28]

Jitesh Dugar: And... After that.

[02:51:29] - [02:51:35]

Jitesh Dugar: AI replied with either a yes or a no, that's what AI did, using all of its prediction capabilities.

[02:51:36] - [02:51:38]

Jitesh Dugar: Then... Over here.

[02:51:38] - [02:51:48]

Jitesh Dugar: we are adding a switch step, and in the switch step, we are saying if the AI has replied, if the AI has replied with a yes, then the output should be spam.

[02:51:48] - [02:51:51]

Jitesh Dugar: If the AI has replied with a no.

[02:51:51] - [02:51:54]

Jitesh Dugar: then the output should be genuine. That's all we've done here.

[02:51:54] - [02:51:55]

Jitesh Dugar: Okay?

[02:51:56] - [02:51:58]

Jitesh Dugar: The next step, everyone, is...

[02:51:59] - [02:52:04]

Jitesh Dugar: We added a Google Sheets step that would insert a new row inside that Google Sheet that we created.

[02:52:05] - [02:52:09]

Jitesh Dugar: Insert a URI inside the Google Sheet that we've created.

[02:52:09] - [02:52:11]

Jitesh Dugar: And in that, sheet.

[02:52:11] - [02:52:22]

Jitesh Dugar: We only connected our credentials first, we selected the sheet that we created, we selected a document first, and the sheet within that document, genuine in this case.

[02:52:22] - [02:52:28]

Jitesh Dugar: And... We mapped all of these fields that someone filled up on the form. That's what we did.

[02:52:29] - [02:52:36]

Jitesh Dugar: And... The other one is exactly the same. The other one, what it does is.

[02:52:36] - [02:52:40]

Jitesh Dugar: It only changes the sheet here. Instead of genuine, it is spam.

[02:52:41] - [02:52:48]

Jitesh Dugar: So, fields are exactly same, but it adds to this sheet. So, we know these are spam inquiries, and these are genuine inquiries.

[02:52:49] - [02:52:50]

Jitesh Dugar: No.

[02:52:51] - [02:52:53]

Jitesh Dugar: Once you have completed all of these.

[02:52:54] - [02:52:56]

Jitesh Dugar: You can now publish your workflow.

[02:52:57] - [02:53:06]

Jitesh Dugar: Now, you want this to run automatically, so far we've built everything manually, right? But you want it to run automatically, and for that, you should publish this workflow.

[02:53:07] - [02:53:14]

Jitesh Dugar: Let me publish this workflow. And what publishing workflow means is, Your form is now live.

[02:53:15] - [02:53:21]

Jitesh Dugar: You can now make calls to your production form URL. Anyone can go to your form and fill up that form for you.

[02:53:22] - [02:53:25]

Jitesh Dugar: Now, how do you get the form URL that anyone can fill?

[02:53:25] - [02:53:30]

Jitesh Dugar: Double-click on it, On the form step, you get the production URL.

[02:53:30] - [02:53:36]

Jitesh Dugar: Copy that production URL, open it on a new browser tab, and there you go. The form is right here.

[02:53:37] - [02:53:41]

Jitesh Dugar: Okay? I published it by clicking on the publish button on the top right corner.

[02:53:41] - [02:53:44]

Jitesh Dugar: And let me fill up some information, I would just say...

[02:53:48] - [02:53:51]

Jitesh Dugar: This time, I will enter a spam inquiry.

[02:53:56] - [02:54:07]

Jitesh Dugar: And I will just submit it, okay? As I submit it, I'm not doing anything, everyone. I'm not doing anything, I just filled up the form, and I'm hoping it should automatically land onto this sheet tab.

[02:54:11] - [02:54:17]

Jitesh Dugar: And by the way, if you would like to monitor what is happening, you can go to Execution tab here.

[02:54:17] - [02:54:19]

Jitesh Dugar: We can go to Execution tab here.

[02:54:20] - [02:54:22]

Jitesh Dugar: On the workflow, it has run successfully.

[02:54:22] - [02:54:28]

Jitesh Dugar: Nothing went here. Oh, by the way, by the way, there's a mistake here. It went to genuine.

[02:54:29] - [02:54:37]

Jitesh Dugar: Okay, which means possibly the nano model that we used was not good enough. We will switch to a mini model and see if it does a better job this time.

[02:54:39] - [02:54:47]

Jitesh Dugar: We'll switch to a 5.4 mini model, we'll publish it again, and we'll submit this project brief inquiry one more time.

[02:55:00] - [02:55:02]

Jitesh Dugar: I'm selling SEO services, let's submit this.

[02:55:03] - [02:55:06]

Jitesh Dugar: Let's see where it lands, whether it goes to spam or genuine.

[02:55:06] - [02:55:08]

Jitesh Dugar: Yeah, this time it went into spam.

[02:55:09] - [02:55:20]

Jitesh Dugar: Okay? I haven't executed the step, everything ran on its own. I just filled up the form, everything ran on its own. I went to execution tab, and I can track every time someone is filling up a form.

[02:55:21] - [02:55:27]

Jitesh Dugar: It is automatically Checking if it is spam or genuine, and it inserts to the right sheet.

[02:55:28] - [02:55:30]

Jitesh Dugar: It inserts through the write sheet.

[02:55:30] - [02:55:37]

Jitesh Dugar: If the query is empty, it does not do anything right now, but it is up to you to decide what you want to happen, what you want it to happen.

[02:55:38] - [02:55:40]

Jitesh Dugar: Right now, it'll not do anything.

[02:55:40] - [02:55:41]

Jitesh Dugar: Again?

[02:55:42] - [02:55:46]

Jitesh Dugar: How do you launch this on a website? There are multiple ways to do it.

[02:55:48] - [02:56:01]

Jitesh Dugar: You can either embed this form on your website itself, that's one option. You have a way to customize, remove all of these n form branding and all of that, all of that is possible. There is a way for you to customize everything here.

[02:56:01] - [02:56:03]

Jitesh Dugar: Those options are available.

[02:56:04] - [02:56:09]

Jitesh Dugar: And apart from that, you have a way to... One minute, yeah.

[02:56:12] - [02:56:17]

Jitesh Dugar: Yeah, you can, customize all of these forms. Yeah, you can remove the Ann branding from here.

[02:56:17] - [02:56:21]

Jitesh Dugar: So you can remove this branding, and let me publish it now, and show you.

[02:56:21] - [02:56:30]

Jitesh Dugar: As soon as I do that, this N10 branding that is there on this, you can remove it. You just refresh it, and the N10 branding is removed. You want to change colors and stuff?

[02:56:30] - [02:56:35]

Jitesh Dugar: You can switch to all of these custom form styling and do all of these things.

[02:56:36] - [02:56:38]

Jitesh Dugar: Okay? With that...

[02:56:38] - [02:56:49]

Jitesh Dugar: We have completed this workflow. Again, what do you want to do if the project brief is empty? Let's say you want to insert it into a Google Sheet again, it is up to you to do that. All that is possible. Now, with that.

[02:56:49] - [02:56:53]

Jitesh Dugar: I will send you all of this Workflow that we've built.

[02:56:54] - [02:56:55]

Jitesh Dugar: I will send it to you.

[02:56:57] - [02:57:00]

Jitesh Dugar: Wait, wait, wait, wait. I will export this workflow.

[02:57:02] - [02:57:05]

Jitesh Dugar: And I will put it on chat for everyone.

[02:57:07] - [02:57:11]

Jitesh Dugar: Now, before, before I close off, I wanted to check with all of you on a scale of 1 to 100.

[02:57:12] - [02:57:19]

Jitesh Dugar: how much of it did you understand, right? How confident are you with building automations on N80 now?

[02:57:19] - [02:57:20]

Jitesh Dugar: Okay?

[02:57:21] - [02:57:28]

Jitesh Dugar: 180, 85, 40, okay, 40, 50, 20 for some of you, okay, 90, 95, 80, 70, okay, perfect.

[02:57:28] - [02:57:44]

Jitesh Dugar: I want to tell you something very interesting. This was your first lesson on NN, okay? First lesson on NATEN, first lesson on automations. It's a very new tool, it is very natural to feel overwhelmed. So those of you saying possibly 50, 40, all of that.

[02:57:44] - [02:57:48]

Jitesh Dugar: Trust me, it is... it is very good on the first session.

[02:57:48] - [02:57:55]

Jitesh Dugar: It is very good on the first session. As you go about practicing it, the remaining 40-50% or 60% will come with that.

[02:57:55] - [02:58:10]

Jitesh Dugar: And I encourage all of you to go ahead and practice it, and you will have a workbook exercise after this lesson, and I wish you all the best, where you will be building it yourself, and with that, you'll gain more confidence building automations on your own.

[02:58:11] - [02:58:16]

Jitesh Dugar: With that, we are done with today's session. I thank everyone for being so patient throughout.

[02:58:19] - [02:58:25]

Sumedha: Thank you so much, Jitesh, for this amazing session. How was it, people?

[02:58:27] - [02:58:41]

Sumedha: Amazing. With that, there is also a poll launched. Do show your, like, share your feedback, share your gratitude in the poll as well, and, let us know how did you like the session.

[02:58:42] - [02:58:42]

Sumedha: Right?

[02:58:44] - [02:58:52]

Sumedha: Also, Jitesh, if you can also share your LinkedIn in the chat, that will be great, since a lot of them are asking about it.

[02:58:54] - [02:58:56]

Jitesh Dugar: Yes, I'm doing it right now.

[02:59:00] - [02:59:02]

Sumedha: Amazing.

[02:59:02] - [02:59:13]

Sumedha: Alright, so I can see that a lot of you have been saying that it was a great session. So, now, initially I asked you a question that,

[02:59:13] - [02:59:25]

Sumedha: what is that one task you would like to automate? So, are you confident that, like, on a scale of 1 to 10, how confident are you that you can go ahead and automate your... that task?

[02:59:27] - [02:59:30]

Sumedha: Okay, somebody said 100, amazing.

[02:59:31] - [02:59:37]

Sumedha: 5579... 10, okay, 103.

[02:59:38] - [02:59:54]

Sumedha: Okay, okay. Okay, some of you are rating yourself very high, some of you are rating yourself very low, okay? So there is a mix of people. So maybe, once you do it hands-on, that's when you will have that full confidence.

[02:59:54] - [03:00:08]

Sumedha: So, for that, we have a workbook. So, do we need a break before we get started with our workbook and breakout room? Okay, even before I finished, I see a lot of yeses.

[03:00:09] - [03:00:14]

Sumedha: Alright, so we will go ahead, take a quick 5 minutes break.

[03:00:14] - [03:00:33]

Sumedha: And we will be back, no, no, 15 minutes. We will go ahead, take a 5 minutes break, and then we will be coming back, understand a couple of resources that, you have for this particular session, what you will be doing in the breakout room session, and we will break apart for the breakout room.

[03:00:34] - [03:00:34]

Sumedha: Alright?

[03:00:35] - [03:00:45]

Sumedha: Alright, so in the meantime, team, can we share the workbook link, the downloadable version of the workbook, and the...

[03:00:45] - [03:00:54]

Sumedha: webinar ID as well. So guys, if you haven't joined from your Zoom app, please make sure you are joining from your Zoom app, okay?

[03:00:54] - [03:01:01]

Sumedha: Alright, with that, we will quickly go ahead and take a quick 5 minutes break.

[03:01:02] - [03:01:04]

Sumedha: Let me quickly share the timer.

[03:06:52] - [03:06:54]

Sumedha: Alright, are we back?

[03:06:57] - [03:07:00]

Sumedha: A quick yes, no in the chat.

[03:07:00] - [03:07:03]

Sumedha: Are we back from our breaks? Yes?

[03:07:05] - [03:07:06]

Sumedha: Perfect.

[03:07:06] - [03:07:26]

Sumedha: All right, so let's move on to our next section. So, before we break apart for our breakout rooms, so I saw somebody, asking that, what if I want to share, like, you know, host the Anneton locally? What is the process of that? Are you guys gonna cover it?

[03:07:26] - [03:07:38]

Sumedha: So, we have already shared you the resource for the same, so I'll just quickly walk you through how to find it, okay? Just give me a quick second, let me share my screen again.

[03:07:40] - [03:07:41]

Sumedha: And...

[03:07:55] - [03:07:59]

Sumedha: There you go. Green is visible.

[03:08:03] - [03:08:05]

Sumedha: Alright, so, so...

[03:08:06] - [03:08:19]

Sumedha: Irrespective of whichever cohort you are enrolled in, be it ISD or EST, you have to go to Resources and Recordings. So, once you click on Resources and Recordings.

[03:08:19] - [03:08:29]

Sumedha: you have to scroll all the way down to date 3, okay? Under Day 3, in the resources section, if you click.

[03:08:31] - [03:08:48]

Sumedha: you will be able to see a drive link. So, how to self-host your Aniton? This is the resource. It's an entire video, step-by-step guide, how you can do it. So, you can, at your own convenience, go through it and try it out. Okay?

[03:08:49] - [03:08:52]

Sumedha: So, are we clear that... where to find this resource?

[03:08:55] - [03:08:56]

Sumedha: Yes? No?

[03:08:56] - [03:08:59]

Sumedha: Do you want me to repeat, or are we clear?

[03:09:00] - [03:09:01]

Sumedha: Yes?

[03:09:02] - [03:09:18]

Sumedha: Okay, alright. So anyone who was asking the question about how to host it, you can, at your own convenient time. Go ahead, click on this link, and watch the video, and do it along. All right?

[03:09:21] - [03:09:22]

Sumedha: Alright.

[03:09:23] - [03:09:24]

Sumedha: Perfect.

[03:09:24] - [03:09:44]

Sumedha: With that, let's move ahead with our breakout room sections part, right? So today, so team, if we can quickly share the workbook link, the webinar ID, and the reflection link as well, since many of you are asking for the badge link. So, please also share the reflection link in the chat.

[03:09:44] - [03:09:48]

Sumedha: So, let me quickly share you the workbook as well.

[03:09:48] - [03:09:51]

Sumedha: Just give me a quick second...

[03:10:05] - [03:10:24]

Sumedha: Perfect. So, today we are building a spam filter for a website contact form. So, once somebody comes to your website, or your form, and they fill in their name, email, company, and what they need.

[03:10:24] - [03:10:41]

Sumedha: So if they leave the project part empty, the workflow stops right there, but if they're filling it in, so the AI goes ahead, reads the message, and decide if it's a real inquiry or a spam, or is it a junk, right?

[03:10:41] - [03:10:46]

Sumedha: So, the real ones will go to the Genuine tab in your Google Sheet.

[03:10:46] - [03:10:49]

Sumedha: And the junk one goes to the spam tab.

[03:10:49] - [03:10:54]

Sumedha: So, we will step-by-step build it in the antenn. So,

[03:10:54] - [03:11:02]

Sumedha: This is the entire, workflow screenshot, and this is the entire step-by-step guide.

[03:11:02] - [03:11:20]

Sumedha: So, for those who will not be able to attend the breakout room, or want to revisit it, since the breakout rooms are not recorded, we have attached a video as well, which is also a step-by-step guide. So, whenever you have time, you can go through it and, you know, do it along.

[03:11:20] - [03:11:35]

Sumedha: Beside that, we... you will be using, API keys over here in this workflow. So, for the purpose of doing this workbook, we have attached the API key right in your workbook.

[03:11:35] - [03:11:46]

Sumedha: over here, okay? So, you can use this API key. This will be... this is only for your workbook purpose, so this will be valid

[03:11:46] - [03:11:53]

Sumedha: till 6pm IST tomorrow, okay? So till then, you can use this API key, test your workflow.

[03:11:54] - [03:11:58]

Sumedha: Alright, so I hope this was clear.

[03:12:01] - [03:12:06]

Sumedha: The breakout rooms are yet to be enabled. We will enable it shortly.

[03:12:07] - [03:12:16]

Sumedha: Okay, so, repeat, okay? So, we have given you the API key in the workbook itself. You have to just copy

[03:12:16] - [03:12:35]

Sumedha: it exactly as it is, so that it works out for you. The API key is shared for just the workbook purpose, so please do not use it elsewhere. And this will be... the API key will be valid till 6pm IST tomorrow, so you can use it

[03:12:35] - [03:12:43]

Sumedha: and test your workflow till 6pm IST tomorrow. That is, right before we start our tomorrow's office hour session, okay?

[03:12:46] - [03:12:47]

Sumedha: Alright.

[03:12:48] - [03:12:55]

Sumedha: I think I have almost... Answered all the questions.

[03:12:57] - [03:13:09]

Sumedha: Cool, so let's get started with the breakout room. Team, whenever we are ready, we can get started with the breakout room, and share the workbook and the reflection link one last time in the chat.

[03:13:19] - [03:13:37]

Sumedha: For anyone who is asking that, what to do after 6pm tomorrow, you can, make free API keys of Gemini. OpenAI will cost you, \$5 a minimum recharge, so you can go ahead, recharge it, or you can use free Gemini API keys as well.

[03:13:40] - [03:13:42]

Sumedha: Alright, the breakout rooms are open.

[03:13:58] - [03:14:15]

Sumedha: To get your first two days' badges, if you have missed it, please drop a mail at support at the rateoutskill.com, and the team will be able to share it with you. Or you can also drop it in the tech support channel, and there also we can share it across with you.

[03:14:33] - [03:14:40]

Sumedha: A god of you might have already got a pop-up if you have joined from the app.

[03:14:40] - [03:14:43]

Sumedha: So, you just have to accept it.

[03:14:44] - [03:14:53]

Sumedha: Yeah, we have sent you an invite to join, breakout room number 6. If not, you can click on More and click on breakout room and join.

[03:14:55] - [03:14:57]

Sumedha: Let me share it one more time.

[03:15:32] - [03:15:52]

Sumedha: What issue are you facing while joining in the app? If you need the webinar ID, let me share it with you. You can directly... instead of, you know, going through the LMS, you can directly use this webinar ID to join the session. That way, it will be much easier for you to join in.

[03:17:05] - [03:17:08]

Prakarsh Gupta_Outskill: Joining the breakout room again.

[03:54:31] - [03:54:43]

Sumedha: Hey everyone, if you are done with your WorkVo reflection link and the feedback form, that will be it for today. So, you can drop off, call it a day, and we will see you again tomorrow.

[04:18:37] - [04:18:47]

Sumedha: For everyone who is done with the workbook, got their reflection link, and have felt the feedback form, it's good to end today's session.

[04:18:47] - [04:19:04]

Sumedha: And yeah, so you can call it a day, drop off, and we will see you again tomorrow. If you are joining in for the office hours, we will see you at 6pm IST. And if you are directly joining this session, we will see you again at 7.30pm IST.

[04:19:04] - [04:19:11]

Sumedha: We are still waiting for other rooms to finish up the workbook, and we will end post that.

[04:54:40] - [04:54:56]

Sumedha: Hey everyone, for everyone who just came back from their breakout rooms, and everyone who have completed their workbook, we are done for the day. There is nothing additional. If you have completed the workbook, you have,

[04:54:57] - [04:55:08]

Sumedha: generated your batch, and you are... have also filled your feedback form. That is all for today. We can call it a day, and I will see you again tomorrow.

[04:57:21] - [04:57:40]

Sumedha: Yes, we will have an office hour session tomorrow. So, the office hour session starts at 6pm IST, till 7pm ISD. Then we will go ahead, take a quick 30 minutes break, and we will connect again at 7.30pm IST for the main session.

[04:57:40] - [04:57:54]

Sumedha: So, that is all for today. There is no, additional announcements or anything as such. We are done. So, you can drop off if you're done with the workbook, and we will see you again tomorrow.

[05:12:05] - [05:12:21]

Sumedha: Hey everyone, if you are done with your workbook, got your reflection link, and filled the feedback form, we are done for today. There is no further announcement. We are just waiting for a couple of others to finish up the workbook.

[05:12:21] - [05:12:28]

Sumedha: So, if you are done, you can go ahead and drop off the session, and we will see you again tomorrow.

[05:12:32] - [05:12:33]

Shaswat Outskill: from file.

[05:12:38] - [05:12:41]

Sumedha: Alright, we are back in the main room.

[05:12:41] - [05:12:56]

Sumedha: So, I hope everybody got a chance to complete their workbook, and thank you so much, commenters, for staying back and taking this up. I'll let you go have some rest, and yeah, thank you so much.

[05:13:00] - [05:13:18]

Sumedha: Alright, so, without, we know it's already a little late today, so thank you everyone for staying back, completing your workbook. Love the dedication that you have shown. So, that is all for today. That was planned. There is no further announcement or anything.

[05:13:18] - [05:13:24]

Sumedha: Sharing the reflection link and the feedback form for your reference in the chat.

[05:13:25] - [05:13:32]

Sumedha: There you go. If you are yet to fill, fill the feedback form, please do take a minute

[05:13:32] - [05:13:50]

Sumedha: and fill the form. If you are yet to generate your batch, the link is shared by our team in the chat, the reflection link. Go ahead, generate your batch. We will stay for another minute for everyone to fill the feedback form, and we will be closing today's session.

[05:14:17] - [05:14:33]

Sumedha: Alright, I see most of you have filled the feedback form, got your reflection links. So, with that, thank you so much for joining in, staying back, and we will see you again tomorrow at 6pm ISD, if you are joining the officers.

[05:14:33] - [05:14:38]

Sumedha: And if you're joining the main session directly, we will see you again at 7.30pm IST.

[05:14:39] - [05:14:43]

Sumedha: So, thank you, everyone. Have a... Great day ahead.
