

Day 2 Live Session

13:05 - 13:16

Shasti: Hello, everyone. Welcome back. A very, very warm welcome to Day 2 of your AI Generalist Agalator program. How are you guys doing? Let me know in the chat.

13:17 - 13:20

Shasti: Zahir says, excited. Are you guys excited?

13:21 - 13:27

Shasti: Awesome. Good morning, good afternoon, good evening, whichever part of the world you guys are joining from.

13:28 - 13:32

Shasti: I am doing good, thank you so much. I hope you guys are doing well, as well.

13:34 - 13:37

Shasti: Great, excited, focused.

13:39 - 13:48

Shasti: Perfect. Quick check, is my audio and video fine? Is everybody able to hear me properly? Because I saw a couple of you saying that I'm not audible enough.

13:49 - 14:14

Shasti: Okay, I see all those reactions, and I see all those messages in the chat, so thank you so much for all those confirmations, and with that said, again, welcome back to Day 2 of our AI Digitalist Ads Letter program. Before we get into today's agenda and who's gonna be the mentor, and what we are going to do today, just wanted to understand how many of you actually attended yesterday's session and did the hands-on in the breakout room yesterday?

14:15 - 14:16

Shasti: Drop a me in the chat.

14:21 - 14:27

Shasti: Okay, I see a lot of me's in the chat, and a couple of not me as well.

14:28 - 14:29

Shasti: Great.

14:29 - 14:54

Shasti: For those of you who are saying that, you did attend our session and, you know, you participated in our breakout room activity, glad that you all were able to make it live, and for a couple of them who are saying that you were not able to join the session, no worries at all, you have the recording on your LMS, go ahead and watch it. And yes, I did see the question about, can we provide, breakout room recordings? Unfortunately, folks, breakout rooms are not recorded.

14:54 - 15:12

Shasti: Not from our end. Zoom itself will not allow us to record the breakout rooms. That's why, after a certain part of the recording, if you see, you will just see a blank screen, because that is where we all are doing hands-on in the breakout room, which is not being recorded. So, if you missed solving the workbook, and if you would want to solve it later.

15:12 - 15:20

Shasti: What you can do is go ahead and solve it on your own. Any questions that you have, put it on the Ask Doubt channel, and the mentor will be able to help you.

15:22 - 15:30

Shasti: The workbooks will be made available 24 hours before to the session on your LMS, so whenever you have time, please do go check out.

15:32 - 15:42

Shasti: Great. With that, let me quickly share my screen, and we will get into today's agenda. Let me know once you guys can see my screen.

15:47 - 15:50

Shasti: I don't think my screen is being shared, just a second.

16:06 - 16:11

Shasti: Okay, I think my screen should be visible now. Folks, could you let me know in the chat if my screen is visible?

16:13 - 16:14

Shasti: Yes. Perfect.

16:15 - 16:33

Shasti: So, with that said, again, welcome back for our day two of the program. I hope you guys are excited. All the questions, if you're dropping it in the chat, please do drop it in the Q&A box. Team will be able to look into it, because the chat is legit on fire. I might not be able to look into all the questions, but we'll definitely get back to you if you post it on the Q&A box.

16:34 - 16:35

Shasti: Great.

16:35 - 16:53

Shasti: Now, what are we going to learn today? Today is where we are going to get introduced to the world of image and video manipulation using AI, right? Team, we can check if the Q&A is turned off. Couple of them are saying that the Q&A is turned off. Do not worry about it. Team is getting it turned on right now.

16:58 - 17:08

Shasti: Yes, that should be sorted in another minute, right? Yeah, there you go. Q&A is on, so any questions that you have that you're posting it on the chat, please do drop it there, and team will be looking into it.

17:08 - 17:32

Shasti: Perfect. So with that said, today's session is about image and video manipulation and clone generation using AI. So today, you are going to learn about how you can make a clone of yourself, right? And yesterday, I shared two important links, which is our founder, Vaibh Suinti's Instagram and YouTube. Team, we can drop it again in the chat. For those of you who have missed it yesterday to go through, maybe you can just

17:32 - 17:35

Shasti: Scan it once, or save it, and watch it later.

17:35 - 17:45

Shasti: Why I'm talking about this is because 99% of the content that you see out there in Vibe of Sicinity's Instagram and socials.

17:45 - 17:56

Shasti: Everything is generated by AI, using AI, right? And that is the exact workflow you are going to learn today in our 3-hour session.

17:56 - 18:20

Shasti: And this is something that we have built internally. If you're gonna ask that, this might be available on YouTube out there. Completely, no, because this is an internal playbook, and we are going to reveal it today and teach it to all of you, so that you can go ahead and explore it if you are somebody who's interested in doing it for yourself as well. And team will drop the Instagram and YouTube link very soon on the chat, so do not worry about it.

18:21 - 18:22

Shasti: Right?

18:22 - 18:25

Shasti: Great. With that said.

18:25 - 18:35

Shasti: we are going to learn the exact playbook today, but I have 3 important things that I want all of you to pay attention to, because then you might,

18:35 - 18:46

Shasti: feel a bit intense in the middle if you do not pay attention to the following three things that I'm trying to tell. There you go, you have the social links in the chat as well, you can go ahead and explore it, or save it for later.

18:46 - 18:59

Shasti: Right? So, first thing that I would want to address is image and video generation in general is expensive process, folks. Most of the tools that we are going to teach today, for the first 2.5 yards.

18:59 - 19:14

Shasti: is going to be the paid version of the tools that we use to create content, to edit, and also to see the final outcome on how it looks on our socials, right? So if you do not have access, most of you might not have access to all of these paid tools, but it is completely fine.

19:14 - 19:36

Shasti: Because once we learn the teaching process, we are going to get into workbook, where we will make use of the free tools that are available out there, and you are going to create a commercial ad for a brand, Aura Beans, which we created. There is no brand that exists, but we created a brand called Aura Beans, and for that coffee brand, you will be creating a commercial video using all the free tools that are available out there.

19:36 - 19:47

Shasti: So, objective is for you to know the possibilities of the tools that are available out there to learn the playbook, and also to implement Image and video generation using free tools that are available out there.

19:47 - 19:57

Shasti: So, whenever you think that we are, hopping between multiple tools, do not get worried, because you will have the recording, you will have the transcript, and you will have the workbook as well.

19:57 - 20:04

Shasti: Right? And the second thing, as I said, this is an internal playbook, and we generally take

20:04 - 20:18

Shasti: one entire day to get to the outcome that you see on Vaibhuv's Instagram or YouTube video, right? And we are trying to teach this particular workbook in a 3-hour session. So sometimes you might feel that

20:18 - 20:37

Shasti: we are a bit intense, or you know, we are going... hopping between multiple tools, etc. So, I just wanted to give you a heads up. If you anytime feel like that, make use of the AI companion that is available out there, or drop your questions in the Q&A box. The commenters will be looking into all of those, and again, you will have the recording to go back and watch later.

20:37 - 20:43

Shasti: So do not get overwhelmed if you anytime feel like, you know, we are trying to showcase multiple things.

20:43 - 20:48

Shasti: Are we clear? Are we clear so far, folks? Let me know in the chat, or if you want me to repeat anything.

20:49 - 20:50

Shasti: Clear?

20:52 - 21:04

Shasti: The copy-paste feature is disabled by Zoom itself, folks, so any link that we're dropping on the chat, please do open it, and then copy from your Chrome profile or your browser profile, right? You cannot copy from the chat.

21:05 - 21:12

Shasti: The workbook links are not shared. First 2.5 to 3 hours is for us to focus on the learning.

21:12 - 21:30

Shasti: Right? The objective for you to just pay attention to what we are... what the mentor is trying to teach, and any questions you have, put it in the Q&A box. Workbook, we will come to it later, once the teaching part is done. This is going to be the same flow for the next 12 days as well. So I hope we are clear with the flow on how our sessions work, right?

21:31 - 21:32

Shasti: Great.

21:32 - 21:45

Shasti: Now, as I said, we will get to the workbook, and in the breakout rooms, mentors will help you to create your first ever commercial video, so any questions that you have, put it on the Q&A box, or we will take it up in the breakout rooms.

21:45 - 22:07

Shasti: And also, one more important thing that I would want to cover before we get into the mentor of the day is that I did tell you yesterday that we are going to make an announcement today that most of you might like it, and if you are keen on making the most out of these 14 days and enhance your learning journey, you will be happy with the announcement that we are gonna make.

22:08 - 22:22

Shasti: Not gonna reveal much detail, so stay back. Once the teaching part is done, I'll come back again, and I'll let you guys know on what we have planned for you starting from tomorrow. Right? Are we excited, folks? Are we excited for today's session? Drop a boom in the chat if you are excited.

22:26 - 22:27

Shasti: Okay.

22:27 - 22:29

Shasti: Now I see the energy back.

22:30 - 22:40

Shasti: Great. So, with that said, grab your coffee, tea, dinner, breakfast, or lunch, anything that would make you feel comfortable for the next couple of hours, and we will get started.

22:40 - 22:41

Shasti: Nuff.

22:41 - 23:06

Shasti: the important question, who's the mentor for the day, right? So, we have Uttam Gupta with us today to teach us on how we at Outskill do this playbook of ours, and Uttam is the founder of Build a Brand, and he's also an AI consultant who has worked with Outskill for several years as an Associate Director of Global Growth. So, he has built this workbook, playbook for himself and is executing out there in the

23:06 - 23:17

Shasti: the real world, right? So if not him, who else gonna be there for you to come and teach today? So with that said, very, very warm welcome, Uttam, and I'll leave the session to you for the next couple of hours.

23:17 - 23:27

Uttam Gupta: All right, thank you so much for setting up the stage and briefing them about the session and how this structure is going to be. I'll take it forward from here. Thank you so much.

23:28 - 23:38

Uttam Gupta: All right, all right. All right, folks, how are you guys doing? How are you guys doing? I was going through the chat, as it was starting, and I was...

23:38 - 23:45

Uttam Gupta: Very, very happy to see the excitement and the energy that you already have for the session. And, my promise is...

23:45 - 24:10

Uttam Gupta: You could have been anywhere in the world doing anything today at this time, but you chose to be here, right? And I'm sure it might not have been easy to show up live. That's why some people still couldn't, right? But you still did, right? You might have a busy day, you might have a other commitment, but you still showed up, right? And I really value it, I really appreciate it, right? Why don't you tell me in the chat what other plans you had, what you still showed

24:10 - 24:20

Uttam Gupta: up, I would love to know, right? But I already know that you might have sacrificed something to be here, and I'll make sure that every minute that you spend, it is worth your time.

24:20 - 24:37

Uttam Gupta: I have... this session, is actually very demo-led, right? Where I will show you a lot of workflows, a lot of, tutorials, a lot of tools. And when we do such sessions, sometimes it gets slightly overwhelming for you to

24:37 - 24:40

Uttam Gupta: follow along, right?

24:40 - 24:48

Uttam Gupta: what I want to tell you is that, first of all, you are learning something new, so don't put a lot of pressure that you have to remember the steps. You don't have to.

24:48 - 25:02

Uttam Gupta: Second is, I have tried to make it extremely easy for you by putting together a very well-structured and very well-detailed presentation, so that you just are not looking at the screen and wondering what's happening between multiple tools. You are able to

25:02 - 25:13

Uttam Gupta: look at the slides as I'm speaking, and it is... you are able to absorb it slightly better, right? So, first, I told you, don't put a lot of pressure that you have to remember the steps, because

25:13 - 25:18

Uttam Gupta: You will only be able to do it, these kind of sessions, only,

25:18 - 25:42

Uttam Gupta: You know, you are able to do it when you watch the recording, right? Right now, your only job is to sit back and relax and absorb. Just see the possibility, just see how things are happening, and understand the concepts, what is happening, right? You don't have to remember the steps. So I want to take away that pressure from you, that's one thing. And second is, only after, like, later on, when you will have the recordings, then you do the execution. Right now, you don't have to do the execution.

25:42 - 25:54

Uttam Gupta: Third is, I have tried my best to make it extremely easy for you to understand and follow along. Alright, is that clear? Is that clear? I hope you won't be too hard on yourself. Drop yes in the chat if you are not going to be too hard on yourself.

25:54 - 25:55

Uttam Gupta: Yes?

25:57 - 26:00

Uttam Gupta: Perfect, perfect, right?

26:03 - 26:05

Uttam Gupta: Alright, amazing, perfect.

26:07 - 26:07

Uttam Gupta: Yes.

26:09 - 26:26

Uttam Gupta: All right, folks, so without any further ado, I just wanted to make you comfortable so that you are relaxed and you are able to make the most out of the session, and I'll start sharing my screen and start giving you a lot of value, alright? And if at any point you think, you know, you realize me looking on the left side.

26:26 - 26:31

Uttam Gupta: Just to tell you, I have multiple screens set up, so this is where I'll keep looking at your chats.

26:31 - 26:51

Uttam Gupta: Right? And so keep engaging, keep asking things, keep sharing your responses. Questions will be answered in the end, so keep taking a note of your questions, they will be answered in the end. I'll not take the questions in between, so that the flow doesn't break, right? And it doesn't waste anyone else's time. I've also planned a break at the right time, so don't ask breaks

26:51 - 27:15

Uttam Gupta: By your end, I've already, you know, allotted a time for a 5-minute break, so we'll come to that also. I just want your patience, alright? So, when I look on the left side, just realize that I'm looking at your chats and your faces, so... And also, if you can turn on your cameras, that will be amazing, that will be brilliant. I always enjoy seeing people when I teach. It just feels a lot better than looking at the screen, alright?

27:15 - 27:17

Uttam Gupta: Cool! So...

27:17 - 27:27

Uttam Gupta: I'll just start sharing my screen. Do let me know once you are able to, see everything, right? You are able to hear me, see me, and look at the presentation. Also.

27:29 - 27:31

Uttam Gupta: Yes, can you?

27:31 - 27:33

Uttam Gupta: Can you just tell me in the chat?

27:40 - 27:47

Uttam Gupta: Perfect, perfect. So, the technical setup is done, so you can see me, hear me, and everything is possible.

27:48 - 28:11

Uttam Gupta: Perfect, so let's go. So, I welcome you to this session, where we are going to learn about how you can create content with AI, how you can create images, how you can create videos, and this is one of the very powerful skills that you will learn, as an AI generalist, right? And what I'm going to share you is extremely practical, right? Now, before I start sharing, I hope I have your permission to take a minute

28:11 - 28:34

Uttam Gupta: And tell a bit about myself, so that you know why you should even listen to me for the next 2 hours, right? So, hi guys, this is Uttam Gupta. I am the founder of AgentValley.ai. It's an AI transformation company. We work with businesses and help them grow with AI. I am also the ex-director of growth at Outskill, and I implement AI processes for businesses to help them save

28:34 - 28:40

Uttam Gupta: time, make more money, and grow with AI automations, content, marketing, and sales.

28:40 - 29:05

Uttam Gupta: Right? And along with that, I'm also a content creator, so what I'm going to share is something that I myself follow and implement. I really enjoy teaching, that's why I'm here, and that's why I create content. I have over 170,000 followers across social media, where I talk about AI. I have over 82,000 on LinkedIn, and 95,000 approximately on Instagram, so you can do connect there as well. In the past, I have trained and

29:05 - 29:17

Uttam Gupta: spoken on stages and addressed an audience of over 100,000 people in the last couple of years, and I've been in the big rooms to discuss about AI with people of Google, Meta, and likes of those.

29:17 - 29:37

Uttam Gupta: Right? And I have also been... I have collaborated, partnered, and I have been trusted by leading global brands. You can, you know, name it, it's on the screen, right? And I've trained over 100,000 people to work with AI in corporates like Reliance, Upgrad, Viacom, and multiple colleges and institutions as well.

29:37 - 29:49

Uttam Gupta: And my work has been featured in LinkedIn news multiple times. I was chosen as LinkedIn Top Creator, Top Marketing Creator for the work that I've done, right? And in the last couple of years,

29:49 - 30:07

Uttam Gupta: I've built Outskill and Grow School with Vaibhua from day one. I hope you recognize the person on the screen. I'm sure you do. And, from day one, together, we ended up

raising \$5 million in venture capital. I scaled the team from zero member to 250 member plus.
I led the growth

30:07 - 30:21

Uttam Gupta: to build the biggest AI community of the world of over 10 million people from 100 different countries, which you are already part of. And I've set up the AI content and marketing processes for WebHub, which grew to millions of subscribers and followers.

30:21 - 30:23

Uttam Gupta: Right? And now...

30:23 - 30:32

Uttam Gupta: Almost a year back, I left Outskill and I started AgentPalli.ai. It's an AI transformation partner for businesses. We rebuild businesses with AI.

30:32 - 30:44

Uttam Gupta: Now, I hope I have your trust and attention for the next two hours. Do I have? Drop promise in the chat if you are going to be attentive and with me, and you have... you are just giving your trust

30:44 - 30:54

Uttam Gupta: to me that, you are going to have patience, and I'll do justice to your time, right? And the reason was not to brag about my credentials, but to gain your trust.

30:54 - 30:56

Uttam Gupta: And attention, so that you feel it.

30:56 - 31:12

Uttam Gupta: worthy enough to give here next to us. Thank you so much, right? Now, we are just getting started, and I want you to focus on the screen, and I'm going to show you two videos, and first is A, second is B, and then I would want you to later on tell

31:12 - 31:19

Uttam Gupta: which one is AI, right? A or B, which is AI? So, watch the videos carefully.

31:19 - 31:43

Audio shared by Uttam Gupta: Did you know a family-run salon transformed into a 1300 crore perfume brand in just 6 years? The story behind this brand is nothing short of incredible. Ashma and Anju Anand created skincare formulas in their kitchen while running salons in

Gurugram. These formulas were a hit. In 2018, Akash Anand joined them, launching Bella Vita Organic to bring their homemade formulas to the masses. But the game changer was affordable luxury.

31:43 - 31:46

Uttam Gupta: Alright, this was one video. The second is this.

31:46 - 32:04

Audio shared by Uttam Gupta: See this tiny device on my neck? It's reading my thoughts right now. And crazy part is, it costs less than 8000 rupees. It's called Omi. Not your typical smart device. This thing is basically Iron Man's Jarvis around your neck. Here's what's crazy. It can read your thoughts. This company has developed a way to interpret your brain waves. No more typing or tapping.

32:04 - 32:11

Uttam Gupta: Alright, tell me, A or B. People are saying, someone is saying A, someone is saying B,

32:11 - 32:19

Uttam Gupta: You know, someone is saying neither, right? A few people are saying both, right?

32:20 - 32:37

Uttam Gupta: Brilliant. You... you... the room is divided. The room is divided, right? There's no single 90% answer that is coming in. A lot of people are saying B, right? I'm sure it might be because, you know, there was a patch on my head, right? Nothing is AI, someone is saying absolutely B, right?

32:38 - 32:42

Uttam Gupta: Now, let me tell you which one is AI. A lot of people are saying neither as well.

32:42 - 32:47

Uttam Gupta: Both are AI generated. Neither is short...

32:47 - 33:07

Uttam Gupta: on camera, both are AI-generated completely, and they have generated millions and millions of views, right? If you go on Vahav's channel, he gains, like, millions of views, and if you go to my channel as well, I've grown from, like, 10,000 to 95,000 followers. All videos are AI. You look at this video, this has got, like.

33:07 - 33:09

Uttam Gupta: 2-3 million views, right?

33:10 - 33:13

Audio shared by Uttam Gupta: Cured in 7 days by UCLA scientists.

33:13 - 33:14

Uttam Gupta: This is AI.

33:15 - 33:17

Uttam Gupta: This is also AI, this has gone.

33:17 - 33:17

Audio shared by Uttam Gupta: 76...

33:17 - 33:18

Uttam Gupta: 800.

33:18 - 33:19

Audio shared by Uttam Gupta: My IP.

33:19 - 33:21

Uttam Gupta: Right? So...

33:21 - 33:40

Uttam Gupta: we realized, when we built this process, that audience cares less about, you know, if it is AI or real. Like, kind of both were getting similar results, or sometimes the real one was getting even lesser results. What people care about is the value and what you are talking about, right? And that's why this process works. Now, before I tell you anything,

33:40 - 33:55

Uttam Gupta: You know, else, I want to ask you four questions I would love to, love you to answer in the chat. How many of you are not creating content because you think you don't have time? Because you think you don't have time? How many of you are not creating content? Drop me in the chat, right? I want to know.

33:55 - 34:02

Uttam Gupta: Oh my god, so many people are saying me in the chat. I didn't... I didn't realize that you want to create content, but you have not been creating content.

34:03 - 34:12

Uttam Gupta: Crazy, right? Next is, how many of you are not creating content because you feel you cannot write well, or you cannot put your thoughts into words, right?

34:12 - 34:14

Uttam Gupta: Drop me in the chat.

34:15 - 34:28

Uttam Gupta: I was one of those people years back, right? I used to struggle. I would, you know, paralyze if someone would tell me to write a page, and I really overcome, came that by spending a lot of time practicing it.

34:29 - 34:43

Uttam Gupta: How many of you are not creating content because you never have ideas, right? You feel like, hey, I can manage time, but I just don't know on what topic to create on, right? So many people are saying me, right? Now, a final question.

34:43 - 34:52

Uttam Gupta: How many of you are not creating content because you are afraid what people think? You're afraid what people think, or you have an imposter syndrome?

34:52 - 34:58

Uttam Gupta: Right? Or you can mention all as well if you relate to all of it, right? How many of you...

34:58 - 35:06

Uttam Gupta: Right? All of Meet people are saying... so many people are saying that. You can't see the chat, I can see it, but there's so many people are saying it.

35:06 - 35:07

Uttam Gupta: No.

35:07 - 35:25

Uttam Gupta: These four things are the only reason most talented people stay invisible. Some of you, or most of you, since you are in the room, are so talented, but you are invisible in the world. People don't know about your talent, right? Because you have never, taken the courage

35:25 - 35:40

Uttam Gupta: To, you know, come out of your comfort zone, right? Now, by the end of the session, my promise is all four of these problems will be gone. If you say you don't have time, you will have a whole system to generate video in just a couple of minutes.

35:40 - 35:57

Uttam Gupta: If you think you cannot write, you will leave with a writing system, not just a blank page. If you think you don't have ideas, you will get a repeatable process, how we actually find real ideas, and not just, you know, random ideas. And if you think you are afraid of what people think about what you are going to create.

35:57 - 36:05

Uttam Gupta: and you have a fear of judgment, you will post something, you'll learn to post something that you are actually proud of, and that you actually enjoy doing, right?

36:06 - 36:22

Uttam Gupta: And I know in this room, there is a mixed crowd, right? I know in this room there are entrepreneurs, founders, why don't you tell me in the chat if you are entrepreneurs, founders? How many of you are working professionals in the room? How many of you are students or early,

36:22 - 36:40

Uttam Gupta: career, right? I know there's a very mixed crowd, right? And some of you might have 5 years, 2 years, 10, 20, 30, 40 years of experience, and you might be coming from very, very different industries, IT, real estate, healthcare, you know, fintech, and so on and so forth, right?

36:40 - 36:43

Uttam Gupta: Now, the interesting thing is, this session I've built

36:43 - 37:01

Uttam Gupta: By remembering all of you, right? So this session is for everyone. You should not feel, excluded, you should not feel left out that, hey, this might not be relevant for me. I come from such a, you know, traditional industry, or where this is not even needed, right?

37:01 - 37:08

Uttam Gupta: Don't... you don't have to think, I have built it in a way that it is relevant for everyone, alright?

37:08 - 37:09

Uttam Gupta: No!

37:09 - 37:22

Uttam Gupta: I have a very interesting question. Have you come across someone who has less experience than you, but has ended up getting more opportunities and has ended up making more money? Have you come across

37:22 - 37:36

Uttam Gupta: like, you have come across in your career, in your business, that someone who has less experience than you, less talent than you, but they have ended up getting more opportunities and made more money. So many people are saying, you know,

37:37 - 37:44

Uttam Gupta: All the time, all the time, right? Someone's like, how do they do it? You know? And some of you can relate, resonate.

37:45 - 38:09

Uttam Gupta: so much with it, right? The answer is, it is not because they know more than you, right? You know that you are more talented, and you have studied more, you have worked on yourself more. It is because more people know what they know, whether they have a better network, or where they go... they put themselves out there, they communicate what they... the kind of work they do, they know how to present their work, they know how to talk about their work in such some

38:09 - 38:20

Uttam Gupta: cases, and not just online, but in the offline setup as well, they are able to just talk about their work, right? Without feeling imposed, without feeling icky about their work, right?

38:21 - 38:28

Uttam Gupta: It is because more people know what they know, right? So being good at your work used to be enough.

38:28 - 38:36

Uttam Gupta: But today, you have to really realize, no matter which industry you come from, no matter what age you are, right.

38:36 - 38:44

Uttam Gupta: you have to be known for what you know, and that is the real differentiator, that is the real multiplier. If you really want to grow fast.

38:44 - 39:00

Uttam Gupta: Right? This session is the answer. And I'm telling you, this is the most life-changing session you are going to attend out of all the sessions, because all the sessions are teaching you the skills, AI skills. This session is not only teaching you the AI skills, but it is also teaching you how to talk about it.

39:00 - 39:07

Uttam Gupta: Right? When you talk about what you know, that is when people get to know your value, and you get opportunities that you can't think of.

39:07 - 39:16

Uttam Gupta: Right? And I'm promising, if you really understand the value of this session, this can be the most life-changing session of your life, right? So.

39:16 - 39:32

Uttam Gupta: you know, I really wanted to establish... I really wanted to... want you to believe in it, because some of you, I know, might have a second thought that, oh my god, I am attending, but I don't know if I'm going to ever use it or not. Trust me, this is... this can... if you really execute it, this can change your life.

39:32 - 39:40

Uttam Gupta: Right? And here's the part people get wrong. When I say content creation, people think that you have to become a content creator to win, right?

39:40 - 40:05

Uttam Gupta: But, I'm being honest, you don't have to become a content creator. Not everyone wants to become a content creator, not everyone wants to do it for the sake of lure falling. Some people just want to share. Some people just want to share their experience and the knowledge that they have, and the experience that they have. And that's what, you have to think about. You don't have to... if you feel icky about becoming a content creator, and you feel cringe about it, and you feel like that's not you.

40:05 - 40:17

Uttam Gupta: That's completely fine. It's not that. It's about just learning a skill how to talk about. You can feel yourself as a teacher, you can feel yourself someone who just wants to share the experience that you have.

40:17 - 40:34

Uttam Gupta: Right? I hope that is very, very clear, right? In the room, there are two kinds of people. Some people are saying great intro and context setting and reasons. Some people are saying, it's a bit too long, right? I would say that, please have patience, I got you covered, I'll take care of you, right? Now, what...

40:34 - 40:59

Uttam Gupta: happens when people will see your work. Please understand, and it has happened for me, when you will start talking about your work, what you do, what knowledge you have, experience you have, you'll start getting opportunities that you will never apply for. You'll get into the rooms, and you'll get projects that you never thought of. It has happened with me. I got into the room that I once dreamed about, and it happened with so many people. You'll get clients or people

40:59 - 41:00

Uttam Gupta: People to work with.

41:00 - 41:06

Uttam Gupta: Who will already trust you, because they'll see some knowledge and some credibility, about you.

41:06 - 41:20

Uttam Gupta: Right? And what it also happens is, you will not realize, but it builds your reputation, right? It is not something that you will be able to measure in number, but it builds your reputation. You will have to... you will...

41:20 - 41:36

Uttam Gupta: not need to introduce yourself, your work will talk about you, right? Today, if you would not have interacted with me right now, and I would not have introduced, and you would have come across me on LinkedIn or Instagram, you would have already, you know, I would have already, you know, gotten some trust.

41:36 - 41:38

Uttam Gupta: For me.

41:38 - 41:47

Uttam Gupta: basis of what I'm talking about, right? Yes, no, maybe, right? Why don't you tell me? Right? You see so many people who are talking about something knowledgeable, and you feel like you trust them, right?

41:48 - 42:04

Uttam Gupta: And the fourth thing that happens is it builds leverage, right? You are talking about content, it's like real estate, it's like you are creating asset. While you are sleeping, while you are not doing things, it is, you know, building your credibility, attracting opportunities for you while you are sleeping.

42:05 - 42:19

Uttam Gupta: That's the real power most people don't realize, so it's not about gaining followers, it's not about only reach, it's about getting opportunities, it's about getting projects, clients, reputation, and leverage. That's what you will gain when you will really take it seriously, no matter where you come from, what you do.

42:19 - 42:41

Uttam Gupta: Okay? And none of this, what I'm talking about, is theory. So far, what I spoke about was important, but it's because it was about right mindset, and accepting what you need to do and why you need to do, right? But what I'm going to share from now, it is the exact process that I'm running for myself, I built for Vahub, and for so many clients.

42:41 - 42:50

Uttam Gupta: Right? And with this exact process, I've generated over 600 million views, thousands of leads, and thousands of dollars of business for myself and my clients, and it will happen for you.

42:50 - 43:11

Uttam Gupta: This process worked for me, this process worked for Vellaf, right? Grew from, like, 100K to 3 million plus people, one of the biggest AI creators on planet Earth, right? So this process works for everyone. And if you don't believe, if you think that, hey Uttam, like, it just worked for you guys, right? Then, I actually... and if you think that you...

43:11 - 43:22

Uttam Gupta: don't want to do it for yourself? Honestly, this session, if you are someone who wants to start side hustle, this whole process, you can sell to people as a service. I do it, right? And I have sold this process

43:22 - 43:32

Uttam Gupta: for over \$3,000 per month to people, and I'll show you an example. Even I use this process to pitch people to convince. There's a YouTuber who has over 300,000 followers, I built.

43:32 - 43:38

Audio shared by Uttam Gupta: CNN just published the receipts. Over the past year, the president bought stock in more than 20 companies, then praised those same companies.

43:38 - 43:45

Uttam Gupta: This video was generated with just an image and few minutes of video, right? And same for this.

43:46 - 43:50

Uttam Gupta: It has over 1 million followers, and their video was generated with just a Kanga image.

43:50 - 43:52

Audio shared by Uttam Gupta: Then praise those same companies.

43:52 - 43:56

Uttam Gupta: It's insane what is possible right now. Now, you might be saying, Uttam!

43:56 - 44:01

Uttam Gupta: Sure, this process works, but they are already big. How many of you feel that, Uttam?

44:01 - 44:23

Uttam Gupta: I'm not sure this is going to work, because I have only 50 people, 100 people, 200 people that, you know, know me, and I'm completely invisible on the internet right now. So many people are saying I feel the same, right? You don't have to feel alone, right? And that's why I'm showing you these case studies, so that you can feel confident that you can do it. But right now, you are feeling that

44:23 - 44:30

Uttam Gupta: it worked for Uttam, it worked for Vahav, it worked for these creators who already had an audience, who already had Build the Trust, but it won't work for me.

44:30 - 44:50

Uttam Gupta: So let me tell you someone who was just like you, and who started from zero. Here is someone who's based out of Turkey, her name is Definay, right? And I'll show you her page, right? This is how her page is. Right now, she has 53,000 followers, right? And if you go through her page, she...

44:51 - 44:56

Uttam Gupta: she only has content which is AI-generated. You see, this has, got to, like, half.

44:56 - 44:56

Audio shared by Uttam Gupta: Oh, cool.

44:56 - 45:08

Uttam Gupta: views, right? Something has got 100,000, 20,000, 30,000, all of that, and she... she's not on camera, right? Now, I'll tell you two interesting facts. This person...

45:08 - 45:32

Uttam Gupta: was an Outskilled student, and she was 800 followers, right? And after doing the course, she came to me, she said, I don't have time, Utam, can you do it for me? And we built the process, and we ran the process, and she didn't have any time. She wanted to monetize her AI skills as well, she wanted to become a trainer, and she didn't have any opportunities. We started creating content, and now she's an AI trainer, AI coach, you can see, she has given, after starting content, she has given

45:32 - 45:57

Uttam Gupta: TEDx. She has gone to, you know, such trainings where people are listening her. All of that was not possible. It only became possible because she started creating content, and with the process, she could do it without even having time, right? I hope now, now, it is motivating enough when you see someone who started with just 800, 500 followers, and they have got to, like, 50,000 followers.

45:57 - 46:04

Uttam Gupta: in 6 months. And it is not about 50,000 followers. It is about what she was able to do for herself. She has generated over 200,000

46:04 - 46:28

Uttam Gupta: dollars in income, and she has, you know, gone to so many... got opportunities that she never thought of, right? So please, please believe in this process, and please take a chance once. Give yourself a shot, and it can change your life. I wanted to say that, do that, because I think, really, it is really important, right? Now, the system doesn't care where you are starting from, you can start with zero followers, and it will still work. We have built multiple pages

46:28 - 46:49

Uttam Gupta: inside Outskill, which have just started from zero, and they are completely built using AI, right? So, you can start from zero, it will still work, right? Now, I repeat, from here, I will show a lot of tools, I will show a lot of demos. Please don't feel overwhelmed, don't feel confused, just watch and stay with me, right? And I'll make it very, very easy, right? Now.

46:49 - 47:09

Uttam Gupta: I have... apart from this presentation, what I have done is, I've also made a cheat sheet for you, which I'll show you. Here's a cheat sheet that I have made, so that whatever I'm teaching, whatever frameworks I'm talking, I've already put it into a document, which I'm going to share in the chat already, right, so that you don't even have to take notes.

47:09 - 47:12

Uttam Gupta: You don't even have to take notes, you have to just sit back and relax.

47:12 - 47:13

Uttam Gupta: Bate?

47:13 - 47:38

Uttam Gupta: All right, is that clear? I hope this is helpful. Drop clear in the chat and drop helpful in the chat, that it is... it is very detailed, it has everything, like the hook frameworks that I'm going to talk about, the writing frameworks I'm going to talk about, the image generation, video generation frameworks I'm going to talk about, it has everything, right? So I want you to come out of the anxiety and the pressure that you have to follow along and you have to take note of everything. I just want you to

47:38 - 47:47

Uttam Gupta: watch, because you are learning something absolutely new, right? Cool! Let's go!
Let's start the work, let's start, you know, doing things, alright?

47:47 - 47:48

Uttam Gupta: Let's go.

47:48 - 47:56

Uttam Gupta: So, here's the process. Before going into each step of the process, let me give you an overview so that you know, like, how it looks like.

47:57 - 48:05

Uttam Gupta: Alright? And if you are not able to open the sheet right now, don't worry, don't worry, the team might open it up, right? The team will send it to you, don't worry, the team will do that.

48:05 - 48:21

Uttam Gupta: Right? Just relax, relax, you'll have that, right? The team will share after the session also, and the team, you can look at the document if it is working for everyone or not, and you can send it again, right? Just play attention right now on the screen, you'll get the document, right?

48:23 - 48:32

Uttam Gupta: Let me see on my end... you know, it is opening. There are, like, 60 people already here. So, let me see...

48:32 - 48:39

Uttam Gupta: Anyone with the link can view, so you should be able to. If you are not able to, you can refresh it later, right? Cool.

48:41 - 48:59

Uttam Gupta: Now, understand, in this process, there are five steps, right? And this is the whole process. The step one is getting the right ideas which are worth creating. Second is scripting, writing and converting that idea into a format that people actually listen, right? And the third step is

48:59 - 49:05

Uttam Gupta: Production of that content. We are talking about video content. Text content is pretty easy on LinkedIn, on Twitter.

49:05 - 49:07

Uttam Gupta: We are talking about video content.

49:08 - 49:33

Uttam Gupta: Video content requires you to shoot, requires you to record. So, how do you do that without recording, right? How do you build your avatar? How do you build a version of yourself which looks like you, sounds like you, and can create content like you, right? That's step number three, converting that script, those words, into produced video. And step number four is making that video even more engaging by adding some AI footages.

49:33 - 49:36

Uttam Gupta: AI cliffs, right? AI assets.

49:36 - 49:47

Uttam Gupta: And then, fifth step is bringing everything together, the video, the audio, the assets, and everything, and making, like, a final video. The team has shared the link again.

49:47 - 49:52

Uttam Gupta: Don't worry, don't lose patience. Your only job is to listen to me and pay attention to the slides.

49:52 - 50:17

Uttam Gupta: The document, you can have it, I just shared, but you will also get it at the, you know, after the session. The team has also shared in the PDF form, so you don't even have to click on the link, right? So don't worry, you... only thing you should do is, right now, focus on the presentation. You are not losing anything, alright? So this is how the process looks like. The process is very simple, but the thing is, it's not easy.

50:17 - 50:22

Uttam Gupta: Right? Don't feel overwhelmed. It's not... it's simple, but it's not easy.

50:22 - 50:40

Uttam Gupta: Now, in this process, is it 100% AI-generated? No. The 80% of the work will be AI-generated, 20% of the process is still human, and that is what makes this process even more powerful, that it is not 100% AI-generated. There is originality, there is creativity, there is human element in this.

50:40 - 51:05

Uttam Gupta: Right? And when we generate ideas, 80% will use AI, 20% will be our decision, right? When we generate a script, 80% will be AI's work, 20% will be our judgment, right? Our decision, our feedback. When we generate videos and production, 100% will be AI, so you don't have to come on camera always, right? I have not shot a single video in the last 12 months, I'm not kidding, but my account

51:05 - 51:30

Uttam Gupta: is growing. When it comes to AI footages, it is 100% AI, you don't have to do anything, right? When it comes to editing, it's only 20% AI, 80% is still manual work, right? That's something that we will still have to do, alright? That's how the overall process looks like. The process is not fully automated, and it should not be, right? Because you still... you are still the creator, you are still the producer, you are still the

51:30 - 51:37

Uttam Gupta: Right? Who needs to have a judgment? Who needs to have a perspective, and who needs to have a choice and a taste?

51:37 - 51:49

Uttam Gupta: That is what makes this process human as well, right? So let me give you a live example of what this process actually looks like, right? I'll give you live demos of each of these steps, right?

51:49 - 52:07

Uttam Gupta: And also this process, even Vahav has become so big, and he has, like, a team and a process, still he's involved by giving feedback on different ideas, so that there is still people who follow Vehub, who listen to Vaibhu, who want to learn from Vahav, there is a VaHub element in the content. It's not only AI, right?

52:07 - 52:16

Uttam Gupta: And what this process will do, it will build personal brand on autopilot. Autopilot means it is automated, and you are not spending so much time.

52:16 - 52:40

Uttam Gupta: Right? And what will happen is when you build personal brand, it will build trust. Personal branding is nothing building trust at scale. The more people who trust you, the more opportunities you have. Like, simply, right? Forget the jargons. The more people who trust you,

the more opportunities you will have, right? And this process will allow you to build trust at scale, right? And that's what it will allow. And if you're running a business, the same process

52:40 - 52:59

Uttam Gupta: will also be applicable to build a distribution and a marketing engine for yourself. So, if you are a personal brand, personal individual, then the same process applies if you want to use it for your business as well. The same process applies, nothing changes, right? So, let's start with the action and take the first step.

52:59 - 53:16

Uttam Gupta: Right? And the first question is, Uttam, alright, I am convinced. I am going to start right after this session, right? And I will just start sharing what I'm learning in this session as well, right? But the biggest thing is, Utam, where do I get ideas from? Which is the first step. Where do I get ideas from?

53:16 - 53:23

Uttam Gupta: Right? So, the step one is ideation. Finding something that you actually want to create, finding something that people want to listen.

53:23 - 53:36

Uttam Gupta: And I'm... what I'm going to share is something that... the process that we use. Are there other ways? Absolutely, yes. But what I'm going to share you is what we do for Vahav, what I do for me, what I do for clients, right?

53:36 - 53:59

Uttam Gupta: Now, here are six methods that we use to find ideas, resources, and topics to talk about. The first is perplexity, right? You know perplexity already, right? Perplexity is a great way to stay updated. This is the browser that I use, perplexity browser. You can come, you can, you know, you can read news here, you can

53:59 - 54:04

Uttam Gupta: do a lot of cool things, right? You can do a lot of cool things. So this is a great research tool, we use it.

54:05 - 54:14

Uttam Gupta: But even more than perplexity, I will be honest, what I use is Twitter. I use Twitter. Especially when you are creating content in niches like AI.

54:14 - 54:33

Uttam Gupta: Right? Twitter is a great place to keep learning, right? Whatever comes on LinkedIn, YouTube, or Instagram later comes first on Twitter, that this is where the most decision maker hang out. You see? Like, I see Webhouse post 18 hours before, right? He has shared something, right? Someone has shared some resources.

54:33 - 54:41

Uttam Gupta: So, if you're not on Twitter, if you don't consume from Twitter, start doing that, because it's one of the most powerful platforms to keep learning.

54:41 - 54:44

Uttam Gupta: Right? And this is also where we find news and research.

54:44 - 55:03

Uttam Gupta: prom, right? So Twitter is there. You have to doom scroll, you can find ideas that people are right now talking about. You can look at the hashtag also that people are talking about, and use that to understand what people are talking about, right? The third is Reddit. You know Reddit as a platform. What Reddit has is

55:04 - 55:07

Uttam Gupta: Reddit has a lot of private communities.

55:07 - 55:32

Uttam Gupta: if you go to Reddit, right, you can go to that, and whatever niche industry you are in, say, for example, you are in real estate, you just type the keyword real estate, and you will see a lot of, you know, posts that will come up. If you click on communities, you will find communities that are of that industry, and you can join that, and you can understand what people are talking about, what questions people are asking, right? So the first thing I told her about

55:32 - 55:35

Uttam Gupta: Perplexity, second is Twitter, and the third is Reddit.

55:35 - 55:48

Uttam Gupta: And the fourth, which is absolutely no-brainer and Claw, you know, no-brainer, which is Claude, right? My favorite, Mr. Claude, right? You can use it to deep research, you can also find news, you can also find it to write content, which you'll see.

55:48 - 56:07

Uttam Gupta: And the fifth, which is extremely powerful, which is looking at the competitors. See what people are already... your competitors are already creating, and don't just recreate what they are creating, look at what is working for them. So you learn from someone else's, efforts and mistakes and, you know, everything, processes.

56:08 - 56:20

Uttam Gupta: that's competitors. You list down 4 or 5 competitors that you have, and you follow along. For example, for me, it is AI creators, and if you go and check my following, I follow so many AI creators to see

56:20 - 56:22

Uttam Gupta: You know, what they are doing, what they are up to.

56:22 - 56:40

Uttam Gupta: And the sixth one is trends, right? Trends. How do you find trends? You find trends by doom scrolling. When you come on Instagram and you go to your real field section, you see what is coming out again and again, what people are sharing and talking about. When you go to Luminum, you...

56:40 - 57:00

Uttam Gupta: when you go to LinkedIn, see about what people are continuously talking about, and that's something, you know, you should also leverage, right? And trend, is that what you see on the feed repeatedly? But trend is also what's in the news, right? What's hot right now? What's the topic of discussion right now, right?

57:00 - 57:18

Uttam Gupta: If you talk about that, the power of it is that since people are already talking about it, that is one of the easiest and the fastest way to get viral. Because there is already a demand of that topic that is there, and when you serve that demand, you have higher probability of,

57:18 - 57:36

Uttam Gupta: going viral, right? So these are the six places we find ideas from for my page, right? Let's take an example and do something with you so that you also see, it happening. I told you trends is just being observant, just being... knowing what's happening in the news.

57:36 - 57:46

Uttam Gupta: Right? Reddit is, you have to join communities. Tutor is, you have to doom Sprawl. Perplexity is if you want to, research on a specific topic. Competitors, you list down.

57:46 - 57:53

Uttam Gupta: Right? Today, right now, for example, I'll use Claude to find ideas. So let's go to Mr. Claude.

57:53 - 58:00

Uttam Gupta: Right, let's go to Mr. Claude, my favorite, and... Let's ask here.

58:01 - 58:18

Uttam Gupta: Can you tell me, what has happened in the last 48 hours in the AI world? What are the hot news? What are the, you know, because I create content for people who are technical, non-technical, people who are knowledge workers.

58:18 - 58:36

Uttam Gupta: entrepreneurs, working professionals, so help me find news, in the AI space. And preferably, I want to know news related to top AI companies, like OpenAI, Claude, Gemini, Microsoft, Grok, and top AI companies, you know? And...

58:36 - 58:40

Uttam Gupta: which involves top AI founders and, people.

58:41 - 58:57

Uttam Gupta: So, I've just dictated, and I will simply... you see, I'm not doing anything complicated, I'm just asking that, hey, how can you, you know, can you tell me the news? Now, obviously, you can... what you can do is you can schedule this task.

58:57 - 59:14

Uttam Gupta: every day on Claude, if you don't know, there's something called scheduled as well, and you can schedule repetitive prompts and tasks, and every day at 9am it can do it. Now, you don't even need NA10 for such simple automations, you can just schedule it, and every day it will do it, and you can get an email as well.

59:14 - 59:32

Uttam Gupta: Right? So it is finding certain news. You know, I'll get couple of ideas. For example, when I do this, I'll get, like, 10, 20 ideas, but then I have to pick one, right? Then I

have to pick one, and how do you pick one? Right? You see what is the impact of that topic, right?

59:32 - 59:42

Uttam Gupta: right now, what people are watching right, you know? Second is timing, right? Is it the right time and the hot time to talk about it? And the third is.

59:42 - 59:59

Uttam Gupta: Can you talk about it? Do you have relevant idea, knowledge, perspective to talk about it? That's how you nail down, right? You see, at this point, it has given me 7 ideas. The first one is, Dhal's essay started it all.

59:59 - [01:00:22]

Uttam Gupta: Anthropic Claude. The essay went up. If you are not aware about this news, let me tell you, what happened was Claude founder, Dario, said that AI is moving too fast and it's too dangerous, and he requested everyone that, can we please slow down the development in the AI space, because it's dangerous. And Sam Artemen agreed, retweeted, Elon Musk.

[01:00:22] - [01:00:31]

Uttam Gupta: agreed and retweeted, right? All of these people who are competitors, they agreed that it's dangerous, let's slow down.

[01:00:31] - [01:00:41]

Uttam Gupta: And then, Donald Trump comes into the picture and he says, no, we are not going to... U.S. is not going to slow down in AI because China is going to get ahead, and AI is...

[01:00:41] - [01:00:58]

Uttam Gupta: bigger than weapons, right? Ai... the people who are in AI power are going to decide, the control of the world and, you know, the power of the world. So he said, we are not going to slow down. And that was one of... that is one of the hottest news. If you are not aware, you should... I just...

[01:00:58] - [01:01:14]

Uttam Gupta: briefly told you about. See, it has given me, like, this is the news that has happened in, two, two, three days back, like, it started from Saturday, right, this conversation. And then, Dario also wrote an essay where he spoke about how it can happen.

[01:01:14] - [01:01:39]

Uttam Gupta: And in fact, this got interesting, because then China next day also gave a response that, hey, we are not going to stop the progression, because you guys are just doing fearmongering to, you know, to win in the AI race. So, you know, it's crazy, right? Some of you are already aware, and you are able to write comments around that. So, you see, it has given very interesting news. I can obviously follow up, it is telling Sam Altman agrees and shells

[01:01:39] - [01:01:49]

Uttam Gupta: OpenAI IPO2 2027, and it is also giving me angles, it is giving me multiple Elon Musk, Microsoft, Trump calls AI Riska hawks.

[01:01:49] - [01:01:53]

Uttam Gupta: Right? Market reacted. Also, what happened was that

[01:01:53] - [01:02:08]

Uttam Gupta: AI chips market went down, the stock market went down, China pushes back. All of these news have happened. Obviously, I can follow up and say, can you tell me a bit more about news number one, and more details, and the sequence of those events? I want to understand more.

[01:02:08] - [01:02:28]

Uttam Gupta: Right? I can follow up and get to know about this. So, for today's example, let's take this hot topic itself, which you are already aware of, and which I have kind of already explained. That is the topic that we have come across together in research, so let's take that topic and build a video on that. Does that sound good? Yes?

[01:02:28] - [01:02:41]

Uttam Gupta: Yes, no, maybe in the chat. Let's take that example, and throughout the session, which usually takes, like, 24 hours, you know, for the team to do edit and everything, we are trying to fast track, and we are trying to,

[01:02:42] - [01:03:04]

Uttam Gupta: make an attempt that can we achieve even, like, you know, 80% in 2 hours? Like, let's do that together. So, now we have... we can read more about this overall, news it is giving me, so that I also have knowledge about it, and I can share my perspective around it. So, I can definitely, look at the news. So, my news is clear. Now, what I can say is, I can say, hey.

[01:03:06] - [01:03:19]

Uttam Gupta: this news is great, can you just convert this whole news into, like, two lines of topic, right? Give me two, three options so that, you know, I have the clarity of the topic on which I'm creating video on.

[01:03:19] - [01:03:44]

Uttam Gupta: So what I'm now saying, that this is the news that I've finalized, this is the topic, can you just give me, like, convert it into two lines of topic, because it's just too much to read, and it is going to do that. We know that, like, we are going to talk about, and we are going to build a video on this issue, where, you know, Dario, Elon Musk, and Sam Aldman said that we should slow down. Donald Trump, in response said, we won't. China said, this is all, you know, fear-mongering.

[01:03:44] - [01:03:59]

Uttam Gupta: I'm not going to slow down. This is the, you know, I hope I have given you overall idea about that topic. This is the topic we are going to work on. I can also ask that, can you give me 10 more news, 10 more ideas, yadda yadda. You know how to chain prompt it, right?

[01:04:01] - [01:04:17]

Uttam Gupta: Did I write 23 options? Yeah, I... 2, 3 I was asking, it has given me 23 options about the topic, right? Angles I can take. But let's move ahead. I've already given the context of the overall topic and the idea, so let's build on top of that. Let's go.

[01:04:17] - [01:04:25]

Uttam Gupta: Now, one news we have, we have finalized the idea as well, right? So we have the idea, which is the easier part, okay?

[01:04:25] - [01:04:38]

Uttam Gupta: Now, the harder part of this process is scripting, right? Once you have the idea, you have to convert into a format that people would want to listen about, right? Everything has a format to write, like.

[01:04:38] - [01:04:57]

Uttam Gupta: when you have a message to send to someone, right? There's a format in which, in a way, you write on WhatsApp. There's a format in which you write on email, right? Similarly, when you are expressing and sharing about a certain topic on Instagram, there is a certain way you do that. When you do it on LinkedIn, there's a different way to do that.

[01:04:57] - [01:05:05]

Uttam Gupta: And that's what we are going to talk about. When you create videos, what is the right way to talk about? What is the right way to convert that idea into words?

[01:05:05] - [01:05:14]

Uttam Gupta: Right? Now, before we use AI to do that and help us, first understand what a reel consists of, right?

[01:05:14] - [01:05:19]

Uttam Gupta: Rail has 3 parts. The first is the hook, right? Which is the first 5 seconds?

[01:05:20] - [01:05:28]

Uttam Gupta: And the job of the hook is to just stop this crawl, right? It is one or two punchy lines to grab your attention.

[01:05:28] - [01:05:44]

Uttam Gupta: Right? That's the first part of writing the script. The second part of the writing the script is the body, which is where you deliver the value, which is where you explain the topic. You have 3-4 points, you have your text, you have perspective, that's body.

[01:05:44] - [01:06:05]

Uttam Gupta: And the last is CTA. How many of you know the full form of CTA? It's a slightly marketing term. It's called call to action, which is what action you want your viewer to take at the end of the video. After they watch, do you want them to follow, share, drop a comment, and, you know, what you want them to do? So you nudge them doing that.

[01:06:05] - [01:06:11]

Uttam Gupta: So, Ariel has 3 parts. Hook, body, CTA. Type in the chat so that you remember. Can you please do that?

[01:06:11] - [01:06:28]

Uttam Gupta: This is something that you need to understand and remember, because whenever you want to convert an idea into a script, whether you write on your phone or you use AI's help, you have to remember you have to generate a hook, you have to generate a body, and you have to generate a CT. I hope that is very, very clear.

[01:06:29] - [01:06:32]

Uttam Gupta: Yes, brilliant, thank you so much for participating like that.

[01:06:33] - [01:06:35]

Uttam Gupta: Great, right? Let's go ahead.

[01:06:35] - [01:06:58]

Uttam Gupta: Now, what we are doing is, we are creating a 60 second real maximum, you should do it 90 seconds, but 60 seconds is a great sweet spot, because people don't have, you know, a great attention span. If they want to create, consume longer form, they usually go to YouTube. On Instagram and TikTok, if you use, right, if you are outside India, 60 seconds is great, which is roughly 150 words, that's it, right?

[01:06:58] - [01:07:12]

Uttam Gupta: And it's a big task to grab someone's attention and deliver value in 150 seconds. And since you already consume content, everyone consumes content, you know some people are able to do that job, some people are not. And people who are not able to do the job, what happens to them? You scroll.

[01:07:12] - [01:07:18]

Uttam Gupta: you scroll past, right? You are so, so, you know,

[01:07:18] - [01:07:28]

Uttam Gupta: hard, right? If someone is not able to hold our attention, we just strong, right? And that's what will happen to our idea if we don't present it right.

[01:07:28] - [01:07:41]

Uttam Gupta: Now, this is a very, very interesting part. You might assume that either in all three parts, we will assume 30-30-30% of the time, or, you know, some split like that, but interestingly.

[01:07:41] - [01:07:55]

Uttam Gupta: I'm telling you what we are going to do, and what you should do is you should spend 80% of your time on the hook, which is just the first 5 seconds, which is just the first two lines, and we'll spend only 20% of the time in the body and the CTA.

[01:07:55] - [01:08:10]

Uttam Gupta: Right? Yes, it is true, right? Drop 80-20 in the chat to remember that 80% of our time on writing hook, on Perfecting Hook, and only 20% of the time in writing Body on CT. And this might have come out as a surprise.

[01:08:10] - [01:08:29]

Uttam Gupta: Now, I'll tell you why, why I'm saying that. The reason is, the hardest thing in the world right now is to grab attention. Do you believe, do you agree with me or not, that the hardest thing is to grab attention, right? And if you can't do that, everything else is a waste. If you...

[01:08:29] - [01:08:42]

Uttam Gupta: Right? If you're not able to grab someone's attention, no matter how good you have shot, no matter how well you have explained in the body, and how great call to action you had, if you couldn't grab that attention, then no one heard the rest of the part, right?

[01:08:42] - [01:08:52]

Uttam Gupta: If someone doesn't stop you, right, when you are consuming content, then it doesn't matter what else is in the rest of the video. Yes, no, maybe? Can you understand what I mean?

[01:08:52] - [01:08:54]

Uttam Gupta: If you couldn't stop someone.

[01:08:55] - [01:09:00]

Uttam Gupta: That doesn't matter what else is in the video, right? What else is in the content?

[01:09:00] - [01:09:08]

Uttam Gupta: And you can absorb your behavior, that's how you behave. If the first 5 seconds were not interesting, you don't care, right?

[01:09:08] - [01:09:25]

Uttam Gupta: So that's why I'm saying that we spend a lot of conscious time in the hook, 80% of the time, and rest of the 20%, does it mean we don't put efforts or don't deliver value? No, that is not. We do that. But once we do the first job, other things become easy, we already have the person who is going to listen no matter what.

[01:09:25] - [01:09:38]

Uttam Gupta: Right? That's why, that's the reason. Now, in the first 3 seconds, people decide, right, before you finish the first sentence, psychologically, you observe your behavior.

[01:09:38] - [01:09:47]

Uttam Gupta: In the first sentence itself, you already decide whether you want to stay or you want to scroll, right? This is where you unconsciously already make a decision.

[01:09:47] - [01:09:51]

Uttam Gupta: Right? And that happens with word, what you hear, and visually as well.

[01:09:51] - [01:10:08]

Uttam Gupta: Second is the algorithm also decides similarly. If people... if the content which is able to grab attention, the algorithm pushes it more, right? That has higher probability of going viral, right? And the third thing is, as I repeated, nothing else matters, right? The best body in the world

[01:10:09] - [01:10:20]

Uttam Gupta: will not work if you cannot grab attention, right? I hope you really understand this is very important. I spent so much time in writing multiple versions of the hook, and editing the hooks.

[01:10:20] - [01:10:34]

Uttam Gupta: than the body, right? And that is what I mean. So, now let me give you certain frameworks, since I've already established, and I've already told you that, you know, hook is important, and we'll spend a lot of time in writing hooks. So, you might ask, Uttam.

[01:10:34] - [01:10:43]

Uttam Gupta: Are there some tricks? Are there some concepts or frameworks with which we can learn to write better hooks? With which we can easily write hooks?

[01:10:43] - [01:10:54]

Uttam Gupta: Right? So I'm going to give you certain frameworks and some certain tricks which you can use to write hooks faster and better, which have higher probability of working, and they are psychological.

[01:10:54] - [01:11:00]

Uttam Gupta: You know, they are backed by psychology that they actually work, right? Human psychology, human brain.

[01:11:01] - [01:11:20]

Uttam Gupta: The first framework is a three-step hook formula, which is, first is you establish the topic and get the viewer interested. Second is your job, you can use words like, but,

however, here's the interesting part, basically a contrasting word, which is your stun gun, right?
Where you just

[01:11:20] - [01:11:27]

Uttam Gupta: Hold them, right? By saying, but, however, yet, right? Here's the interesting part.
That kind of holds it.

[01:11:27] - [01:11:32]

Uttam Gupta: And the third is, you have a continual snapback, which is a sentence that goes
opposite

[01:11:32] - [01:11:47]

Uttam Gupta: way to the initial link, right? What you said in the beginning, and then you had a
word, which is to grab attention, and then you say something opposite. That is one way to write
hook. Let me make it easier and easier. The second frameworks that we have are six types of
hooks that you can write.

[01:11:48] - [01:12:03]

Uttam Gupta: And I'll give you examples. First is fortune teller, then is experimenter, then is a
teacher, then it is a magician, then is a... it is an investigator, and then the contrarian. And what
do I mean by that? They are like personas, they are like categories, is how you can write hooks.

[01:12:04] - [01:12:22]

Uttam Gupta: The first one, the fortune teller, for example, let's take the example that we have
already taken. And don't worry, like, all of this, what I'm talking about, the cheat sheet which
will be delivered to you, it already has, it already has the overall framework that I spoke about,
it already has these hook frameworks.

[01:12:22] - [01:12:39]

Uttam Gupta: Right? All this... what I'm talking about, it already has, so don't worry, you don't
have to take a screenshot or anything, just listen me. I'm giving examples also for better
understanding. So, there are 6 hook archetypes. I told you. Let's take an example. Today, we
have taken an idea where,

[01:12:39] - [01:12:46]

Uttam Gupta: Dario, Elon, and Sam said, you know, we should slow down AI, and Trump and
China said we won't.

[01:12:47] - [01:12:52]

Uttam Gupta: So, in the fortune teller concept, instead of just saying that, Dario

[01:12:53] - [01:12:58]

Uttam Gupta: Elon Musk... Sam Altman proposed us to slow down the AI development.

[01:12:58] - [01:13:16]

Uttam Gupta: Trump said, we won't do that, and China also said that you are just fair mounting. That is a very basic way to talk about this topic. But if we are using these frameworks, we'll talk differently, and that will be much more persuasive, right? As a fortune teller, you can say, this is going to change X forever.

[01:13:17] - [01:13:22]

Uttam Gupta: Today's what Trump Said is going to change AI

[01:13:22] - [01:13:33]

Uttam Gupta: forever. AI industry for forever, right? This is going to change everything forever, right? You can use that. That's really powerful, and people stop to listen, right? Experimentator.

[01:13:33] - [01:13:42]

Uttam Gupta: Is a... is another category which can be applied in couple of ideas. You can say, I tried XYZ for 30 days, here is what happened. I tried...

[01:13:43] - [01:14:05]

Uttam Gupta: taking cold shower for 30 days, here is what happened. I tried taking, multivitamin for 30 days, and here is what happened. I tried to do cold calling for 30 days, here is what happened. I tried to use Claude for 30 days, here is what happened, right? You see, right, how it is fitting in different topics, and it makes the hook really interesting. The teacher is, here is how X solved Y, let me explain.

[01:14:05] - [01:14:12]

Uttam Gupta: Here is how AI solved aging, let me explain. Here is how real estate solved

[01:14:12] - [01:14:25]

Uttam Gupta: existential problem, let me explain. Here is how AI healthcare solved, longevity problem. Let me explain. You see? Are you able to understand with the example? I'm just thinking out loud and trying to...

[01:14:25] - [01:14:45]

Uttam Gupta: speak a couple of examples so that it can get engraved. I hope you are able to follow along and it makes sense. Let me know, yeah, by saying yes in the chat so that I know you are with me, right? The magician, right, category, what it says, you can have a striking visual or a sound that forces attention. How, apart from the word, the other ways to grab attention is visual hooks.

[01:14:45] - [01:15:03]

Uttam Gupta: Right? Visual attention grabbing. Sometimes people, you know, use a prop, or they use a very catchy visual to stop people. How do you prepare? I will talk about that when we go into preparing visuals. The investigator, where we say, I found something most people don't know about.

[01:15:03] - [01:15:05]

Uttam Gupta: Right? And XYZ.

[01:15:05] - [01:15:15]

Uttam Gupta: Say, for example, I found something most people don't even know about longevity. I found something most people don't know about what's happening between US and China in the AI space, right?

[01:15:16] - [01:15:19]

Uttam Gupta: The contrarian is, you are doing X wrong, here is Y.

[01:15:19] - [01:15:39]

Uttam Gupta: Right? Contrarian means you are doing X wrong, here is Y. For example, you are using AI wrong, here is Y. Or you can make it even more specific. You are creating content with AI, wrong, here is why. Right? You are using AI in real estate, wrong, here is why. You are using...

[01:15:41] - [01:15:44]

Uttam Gupta: Sales framework.

[01:15:44] - [01:15:54]

Uttam Gupta: in your business wrong. Here is why, right? You can... you get the idea, right? Did you understand all the examples? Did it make sense? Are you able to understand how

[01:15:54] - [01:16:00]

Uttam Gupta: Very simple ideas. We are starting with slightly more engaging start.

[01:16:00] - [01:16:01]

Uttam Gupta: Mae?

[01:16:03] - [01:16:11]

Uttam Gupta: Thank you, some really kind comments are coming that you are really good at explaining your process. Great, thank you so much. Hold patience, there's a lot more value for it.

[01:16:12] - [01:16:30]

Uttam Gupta: Someone is like, these are all warehouse dialogue, because this is actually what works, this is what... how you grab attention, and when I gave you a promise that we are sharing what we actually use, we are actually telling you, right? And if you go on to look at my content, Warehouse content, this is how we grab attention, and it actually works.

[01:16:30] - [01:16:49]

Uttam Gupta: Right? Apart from this, there are a few more hook styles that you can use. You can use a pattern interrupt, which is delete your content strategy, here is why. Delete your Microsoft Copilot, here is why. Delete your Claude, here is why. Delete your ChatGPT, here is why. Right?

[01:16:50] - [01:16:57]

Uttam Gupta: just, you know, shut your real estate business, here is why, right? So powerful, right?

[01:16:58] - [01:17:04]

Uttam Gupta: So powerful! Bold claim, this one AI tool replaces your entire video team.

[01:17:04] - [01:17:18]

Uttam Gupta: This one real estate hack will replace your entire sales team. This one sales hack will replace your entire sales team. Bold claim, right? Curiosity gap. Google just did something that changes everything.

[01:17:18] - [01:17:26]

Uttam Gupta: Trump and China just did something that changes everything for entrepreneurs in the AI space, or in the real estate space.

[01:17:26] - [01:17:39]

Uttam Gupta: Right? Direct challenge, you can say, you are creating AI videos, wrong, here is a proof. You are doing real estate business, wrong, here's a proof. You are doing healthcare business, wrong, here's the proof.

[01:17:39] - [01:17:43]

Uttam Gupta: Right? You are starting your day wrong. Here's the proof.

[01:17:43] - [01:17:58]

Uttam Gupta: Right? You are living your life wrong, here's the proof. Right? Such powerful statements. Someone is like, you have the same energy as Vahav, which is infectious and attention-grabbing, thank you so much, I worked with him for 6 years, we're together. We ended up sounding like...

[01:17:58] - [01:18:12]

Uttam Gupta: like, alike, right? That just happened. A lot of people say that. You can have a future shock, you can say that in 6 months, every brand will use this. Most are not ready for it. In 6 months, every...

[01:18:12] - [01:18:19]

Uttam Gupta: D2C business, e-commerce businesses use... is going to use this AI hack. Most people are not ready for it, right?

[01:18:19] - [01:18:24]

Uttam Gupta: You realize how powerful way of writing it is, right? Isn't it?

[01:18:25] - [01:18:34]

Uttam Gupta: Right? Someone's like, you are a clone of each other. That is true, I should take a screenshot and send it to him. He will laugh at it.

[01:18:34] - [01:18:45]

Uttam Gupta: Right? You understood how powerful it is. Now, I want to personally suggest you something. What I right now, just gave you example, it's a great, great skill. Apart from content, apart from what you are going to do.

[01:18:45] - [01:18:47]

Uttam Gupta: Right? Please hear me out.

[01:18:47] - [01:18:53]

Uttam Gupta: If you learn this, right, the art of putting a normal topic in a way that people listen you.

[01:18:53] - [01:19:11]

Uttam Gupta: It's a great skill, and it goes beyond content. You know how you can use it and how I use it? When I start the sessions, I use it, if you now pay attention, right? When I go for trainings, I use it. When I start a presentation, I use it, right? So if you take a presentation, if you interact with people, you can use the psychological

[01:19:11] - [01:19:20]

Uttam Gupta: tricks to be more interesting, so that people take interest in what you are going to talk about, right? When you're writing emails, tell me what is the hook.

[01:19:21] - [01:19:24]

Uttam Gupta: Tell me, how do you grab attention? Let me see in the chat.

[01:19:25] - [01:19:27]

Uttam Gupta: Let me see if you can guess it.

[01:19:27] - [01:19:41]

Uttam Gupta: How do you grab someone's attention when you write email? Subject line, absolutely, because before they go on to read your email, they read the subject line and decide whether they want to, open or not, right? So that's like your hook line. So this...

[01:19:41] - [01:19:44]

Uttam Gupta: Thinking and way of writing and explaining

[01:19:45] - [01:19:56]

Uttam Gupta: kind of works in all the places, because you are trying to grab attention, and it applies everywhere. Isn't it? Does it make sense? Are you able to relate the learning? Because I want you to have the skill

[01:19:56] - [01:20:00]

Uttam Gupta: Forever. I want you to have the skill what you are learning in other places as well.

[01:20:01] - [01:20:03]

Uttam Gupta: Right? Make sense? Brilliant, brilliant.

[01:20:04] - [01:20:16]

Uttam Gupta: Cool. Now, there's a quality control when you write the hook, because after this, you are going to write the hook, and I want you to give a list so that you can check it yourself.

[01:20:17] - [01:20:32]

Uttam Gupta: And those are the things that you can check in your rope. Does it create urgency, or does it arose curiosity in under 5 seconds or not? Does it speak directly to the viewer or not? Does it imply some transformation or reveal or not? Right?

[01:20:33] - [01:20:49]

Uttam Gupta: Is there a visual hook or not? And these are the few things. And you will get all of this. The best part is you will get all of this hook checklist and everything here itself. So, things are easy for you, and you all have to do is just listen to me like you're listening to a podcast or watching a movie, right?

[01:20:49] - [01:21:04]

Uttam Gupta: Alright, so the hook is done. Now we write the rest of the part. We have done the major work, which is 80% of the work, right? Now we have to write the body, and I'll show you how I do that as well. But before that, since we have spent almost, like, 45 minutes talking.

[01:21:04] - [01:21:19]

Uttam Gupta: I want to do a quick check. Is the pace fine? Are you able to understand? Is it too fast, too slow, or absolutely good? You can write fast, slow, or good, so that I know that you are with me, right? And you are able to get what I'm trying to...

[01:21:19] - [01:21:20]

Uttam Gupta: To you.

[01:21:20] - [01:21:21]

Uttam Gupta: Perfect, perfect!

[01:21:21] - [01:21:38]

Uttam Gupta: It's like, you know, I've got 100%, score from you, because no one has complained until now. Thank you so much. Cool. Let's go to the next step. Now the hook is ready. Now we have to write the rest of the script, which is... which is actually 80% of the part, but we are going to spend only 20%.

[01:21:38] - [01:21:53]

Uttam Gupta: Now, there are two ways to write a script. You might be great at writing, you might not be great at writing. Even if you are great at writing, you are not great at writing the reels, right? So, there are two ways to do it, right? One is, you can write the way you talk, you can write the way you write.

[01:21:54] - [01:22:02]

Uttam Gupta: Or, you can write, In someone else's voice, from someone who... from whom you are inspired from.

[01:22:02] - [01:22:07]

Uttam Gupta: Right? What do I mean by that? It's not copying someone else's voice. See,

[01:22:08] - [01:22:20]

Uttam Gupta: when you are beginning, when you are starting to create content or write, you might not have a writing style of reels. You might not have a voice of how you talk in the reels. You... you don't have, because you have not done it.

[01:22:20] - [01:22:28]

Uttam Gupta: So, you can start by learning from someone else, you can take inspiration, right? And some of you might comment that, Uttam, I feel it's...

[01:22:28] - [01:22:35]

Uttam Gupta: copying and stealing, and I don't want to do that. Let me remind you something. How did you learn walking?

[01:22:35] - [01:22:47]

Uttam Gupta: By copying someone? How did you learn writing? By copying someone's writing style and by copying what was written by your teacher? You learned by, like, that only, right? You... how did you learn driving by copying someone else?

[01:22:47] - [01:23:03]

Uttam Gupta: So you can learn writing also by copying someone else, and that's not copying, and that's not stealing. That's taking... taking, you know, inspiration, and learning. And as you take someone else's voice and inspiration, you build your own voice, gradually. That's the goal.

[01:23:03] - [01:23:06]

Uttam Gupta: Right? I hope you get that analogy, and you come out of that with

[01:23:06] - [01:23:24]

Uttam Gupta: block off, hey, I can't take someone else's voice or inspiration. For example, you might like how Wagner talks, and you might want to start creating content like that. In your industry, in your niche. You might like my way of speaking in the reels, and you can take that. Or you might like someone else's, right? Way of speaking, and you can take that.

[01:23:25] - [01:23:32]

Uttam Gupta: Right? So, why don't you tell me in the chat who's your favorite creator, right? Like, whom you would like to talk on the internet.

[01:23:32] - [01:23:36]

Uttam Gupta: That's not copyright, that's just taking inspiration, guys.

[01:23:38] - [01:23:56]

Uttam Gupta: Sons like, Rash Shamani, Obama, MrBeast, David, Vahav, Simon Sinek, Tony Robbins, Hamosi, you, Pulki Sharma, Uttam, that's so sweet, James Barun, Simon Sinek, right? Simon Sinek is such a, such an impactful speaker, like.

[01:23:56] - [01:23:58]

Uttam Gupta: He leaves an impact when he speaks.

[01:23:59] - [01:24:07]

Uttam Gupta: Right? Even when he takes a pause, he leaves an impact. Right? Absolutely, I love him. Amita Bhat, Ganesh Prasad things kulpya Modi!

[01:24:07] - [01:24:26]

Uttam Gupta: Right? Someone's like, would that be okay or legal? Absolutely, right? So far, whatever you have learned, you have learned by imitating, you have learned by taking inspiration from your parents, from your teacher, everyone you have met, they have inspired, they have influenced, and you have taken some part of them, you just don't realize it.

[01:24:26] - [01:24:35]

Uttam Gupta: Right? So it's completely legal, all right? So, yeah, you have written down all your inspirational creator, Nawal Ravi Khan, so you can take their voice.

[01:24:35] - [01:24:39]

Uttam Gupta: And... Start writing the way they do.

[01:24:39] - [01:24:51]

Uttam Gupta: Right? In your industry, right? And gradually, you will be able to build your own voice, right? Like, how you started writing by copying someone else's writing style, which you had a...

[01:24:51] - [01:24:53]

Uttam Gupta: Copy to fill.

[01:24:54] - [01:25:07]

Uttam Gupta: And then gradually, you build your own writing style, right? You gradually build your own writing style, and now you have your writing style, but it started with taking inspiration, right? So please, please, please take it in the right spirit, don't get confused.

[01:25:07] - [01:25:27]

Uttam Gupta: Now, for this example, since you are starting out, so you might not have your own previous scripts to continue writing on, and you don't have the style which will work also, so I'll suggest that you can take someone else's inspiration. Now, what's the process? It is a multi-step process, and I'm going to make it easy by following the presentation.

[01:25:27] - [01:25:50]

Uttam Gupta: Right? As I said, you borrow right now, and then you grow out of it. And this is not copying. This is how every writer, comedian, and musician started, and this is how every writer, comedian, musician improve also, right? And create also, right? There's a book also, right? This is slightly out of context, but when I'm talking to you, I feel really personal, so I... sharing. Still like an artist. There's a book also.

[01:25:50] - [01:26:00]

Uttam Gupta: Which, which is very famous, and which just talks about this. How do you take inspiration and see what is in the world and create some better version of it? I would suggest you can read it.

[01:26:00] - [01:26:05]

Uttam Gupta: Right? It's not loading, but yeah, that's just out of context. Some of you might know.

[01:26:05] - [01:26:22]

Uttam Gupta: Cool. Now, how do you take inspiration from someone else's voice and build it? It's a method, it is a process. For example, first pick creators that you like, one or two. You have

already done that in the chat, I made you do that. Then what you do is you go on their Instagram and find their top 10 performing Reels.

[01:26:23] - [01:26:36]

Uttam Gupta: Third is, you transcribe it, right? Write it, so that you can understand. Fourth step is understanding, learning. How do they write, right? How do they start their video? How do they end their video? How do they describe complex topics?

[01:26:37] - [01:26:54]

Uttam Gupta: That is the fourth step. And fifth is converting it into a repeatable prompt or a skill so that you can use it every time. These are the five steps. Alright, is that clear? Is that clear? Yes. Do you want me to show these steps so that you can see also visually?

[01:26:54] - [01:26:55]

Uttam Gupta: Yes?

[01:26:56] - [01:27:07]

Uttam Gupta: Let me show that to you. I've told you these 5 steps, let me show you one by one. Let's take an example for today, Vahub, okay? Vahub is my favorite creator, step number one is done.

[01:27:07] - [01:27:18]

Uttam Gupta: Step number 2 is I need to find top 10 leads from him and transcribe it. So, for that, I'm going to, share certain tools which can help you do that, okay?

[01:27:20] - [01:27:35]

Uttam Gupta: First step, as it's told, we have already picked Vahav. You can pick on the basis of whose writing style you like, whose expression fits you, and he doesn't need to be the biggest, just that he needs to be great at expressing.

[01:27:35] - [01:27:46]

Uttam Gupta: Second step is finding the top voice, and for that, I'm going to introduce a very simple and a free tool called ViewRankAI.com, right? You go to View, Rank.

[01:27:46] - [01:28:00]

Uttam Gupta: AI.com. You go to ViewRankAI.com. You can do it with Appify, but it is slightly complex for the stars. This is great. It is free. Download the extension, click on Download Free Extension, and you can download it.

[01:28:00] - [01:28:15]

Uttam Gupta: It is so simple, powerful tool that you see at the... here, at the top of the browser, this Chrome extension has got added for free. Now, I can go on any, any, Instagram Reel, say, let me search for Vehuff.

[01:28:16] - [01:28:26]

Uttam Gupta: You'll see how cool it is, right? You'll see. I am on this profile, right? He has 4,200 posts. He has been doing this since years, like, it's insane.

[01:28:26] - [01:28:49]

Uttam Gupta: Right? I can click on this Chrome extension at the top of it, View Rank, and you... I hope you're able to see. Let me... if I can zoom in... no, it can't be zoomed in. It allows me to scrape the data of top 50, latest 50, 100, 200, 300, 500 reels. For this example, let me just do 50, right? You can do normal posts or videos. Let's click on Rank now.

[01:28:49] - [01:28:55]

Uttam Gupta: Let's go to the Real tab. Okay, it's going... asking me to go to the Real tab. So, Vav's profile, I come to the Real tab, click on this.

[01:28:55] - [01:29:14]

Uttam Gupta: select 50 videos, rank now, and you'll see it will automatically start to scroll, it will automatically start to scroll Vahav's profile, and it will scrape 50 videos just with a click of a button. See how powerful and simple tool it is. I'm going to share only simple tools so that you can actually use it.

[01:29:14] - [01:29:33]

Uttam Gupta: And this is free also. Now you see, it is scraped, and it has given me a new screen, which is of view rank, and this screen has 50 webhubs videos which are scraped, and I can rank them on the basis of the views, right? Or I can rank them on the basis of likes, comments.

[01:29:33] - [01:29:48]

Uttam Gupta: newest and everything, right? And I can also, you know, export the data. This is so simple, right? Let me do that for you. I can just click on, say, copy for Sheets, and I can copy it. Let me just make a Sheets

[01:29:50] - [01:29:51]

Uttam Gupta: Let me make a new sheet.

[01:29:53] - [01:29:56]

Uttam Gupta: And I just copy-paste the data here, and you see...

[01:29:57] - [01:30:02]

Uttam Gupta: For 50 videos, data of Verma's profile, link of those videos have

[01:30:02] - [01:30:12]

Uttam Gupta: You know, it's free, guys, it's free, just hear me, or just trust me, there is obviously a paid feature, but right now, I'm using a free version of it, and it does the job.

[01:30:12] - [01:30:29]

Uttam Gupta: Right? Sipra, just trust me, right? When I'm saying, obviously, it has a paid version, but you don't need the paid version, okay? I'll repeat this step again. You go to this tool called ViewRankAI.com, okay? Step 1. You go to this tool, and then you go to the creator that

[01:30:29] - [01:30:38]

Uttam Gupta: from whom you are inspired by. For me, it was Vahav, right? And, say, when I go to his, profile, let me just go to his profile...

[01:30:39] - [01:30:40]

Uttam Gupta: Edmund.

[01:30:40] - [01:30:40]

Audio shared by Uttam Gupta: IIT.

[01:30:41] - [01:30:46]

Uttam Gupta: Once you go to his profile, any creator's profile.

[01:30:46] - [01:30:50]

Uttam Gupta: When you go to any creator's profile... see, folks, as I told you.

[01:30:50] - [01:31:10]

Uttam Gupta: you don't need to remember where I'm clicking. That's a later part. Right now, you understand what is the name of the tool and what it is doing. So, it is not really important for me to repeat this step, but I'm still doing, because I have a lot to cover, okay? When I... once I come on this screen, I go to the Ruse tab, and I just click on this tool at the top of the bar, right?

[01:31:10] - [01:31:29]

Uttam Gupta: Right? If you're not able to, you will have to just click on this extensions icon, you will have to just click on this extensions icon, and you will be able to see all the Chrome extensions. View rank it is, you click on it, and then you will see a pop-up like this on your screen, where you can just select 50, 100, 200, 300, 500, whatever data you want to scrape. Click on rank.

[01:31:29] - [01:31:39]

Uttam Gupta: And it will automatically scroll through all the 50 videos, collect the data, and give you on a new page where you will have the data of all the videos.

[01:31:41] - [01:31:43]

Uttam Gupta: Right? Just with a click of a button.

[01:31:45] - [01:31:53]

Uttam Gupta: It is so simple, right? Now I have this. What I can do is I can sort it by views, likes, ranks, comments, everything.

[01:31:53] - [01:32:13]

Uttam Gupta: Right? Guys, don't ask me to repeat, because, you can watch it in the recording. Right now, just hear me out, just remember the tool and hear me out. Because, like this, all the steps are going to be like this only, right? And you will ask me to keep repeating, because you would want to know where I clicked and everything. You don't need to follow. As I told you, please have patience, just watch it.

[01:32:14] - [01:32:15]

Uttam Gupta: Just watch it.

[01:32:15] - [01:32:18]

Uttam Gupta: Right? It works on, Instagram and TikTok.

[01:32:21] - [01:32:34]

Uttam Gupta: ViewRank AI... yes, ViewRankAI.com. Please don't worry, you'll get all the documents, you will get the presentation, you'll get the recording, so obviously you can pause, you can look at this screen, you can pause, you can look at multiple times.

[01:32:35] - [01:32:38]

Uttam Gupta: You get all of this data, and you click on just copy.

[01:32:38] - [01:32:47]

Uttam Gupta: How did I transpose that into a sheet? You see this copy button? Can you see this copy button? Tell me yes in the chat so that I know you can see it. Tell me yes, I want to know.

[01:32:47] - [01:32:49]

Uttam Gupta: Yes, you can see this copy button.

[01:32:50] - [01:33:02]

Uttam Gupta: what it has done is, it has given me all this data, I can just click on copy, and I can select Sheets, right? I can just select sheets, and I can copy. And then I go on Sheet, and I can just...

[01:33:03] - [01:33:06]

Uttam Gupta: Command-V, and the data has got posted.

[01:33:08] - [01:33:09]

Uttam Gupta: Right?

[01:33:10] - [01:33:29]

Uttam Gupta: Guys, right now, don't go beyond the scope, which is, like, don't go to YouTube right now, you can do it with Appify. First, learn the principles, then you can discover new tools to replicate the same process also. First, learn the principles, right? Learn the process, okay? Now you have all the data, I can put a filter here.

[01:33:29] - [01:33:34]

Uttam Gupta: And it is already ranked by top, right? So what I can do is I can select the top 10.

[01:33:35] - [01:33:38]

Uttam Gupta: These are the top 10, these are my favorite. From this, say.

[01:33:39] - [01:33:46]

Uttam Gupta: What I told you. When you have to learn from someone, you'll want to learn from their best work, yes, no.

[01:33:47] - [01:33:50]

Uttam Gupta: Would you want to learn from someone's average work?

[01:33:51] - [01:33:53]

Uttam Gupta: Or the best work.

[01:33:54] - [01:33:59]

Uttam Gupta: the best work, right? You would want to learn from someone's best work. That is why we took their reads.

[01:33:59] - [01:34:07]

Uttam Gupta: And now this tool has given me the best raise from the top, right? The 5 million, 3 million, the 2 million, the 1.8 million, 1.4 million.

[01:34:08] - [01:34:20]

Uttam Gupta: Now, I would want to know what was good in these reels, how did we have a ride in these reels, and I would want to do that for myself, so that I learn from the best, correct? So, I've got these top 10

[01:34:21] - [01:34:26]

Uttam Gupta: links of the post, right? You got it here from the tool itself. Now, I want to

[01:34:26] - [01:34:29]

Uttam Gupta: Get the written version of these scripts.

[01:34:29] - [01:34:38]

Uttam Gupta: For that, I will use a tool called Happyscribe.com. Happyscribe.com.

[01:34:38] - [01:34:56]

Uttam Gupta: Right? Can you listen to me? Happyscribe, don't ask me to repeat the tool Happyscribe.com. Can you hear me? Yes in the chat. I would want a lot of yeses, so that I know you are able to listen, and you don't ask me to repeat, right? Because I have a lot to cover, I hope you understand that as well. Yes, you understood Happyscribe.

[01:34:56] - [01:35:03]

Uttam Gupta: So let's go to Happyscribe, and how can we just get the transcription of these videos,

[01:35:04] - [01:35:06]

Uttam Gupta: In easy manner, go to Happyscribe.

[01:35:07] - [01:35:09]

Uttam Gupta: And I'll just log in in front of you.

[01:35:10] - [01:35:16]

Uttam Gupta: And let me just log in, if,

[01:35:17] - [01:35:24]

Uttam Gupta: I will log in, and I will copy, say, all the 10 links you can copy at once, or you can just copy one link, okay?

[01:35:24] - [01:35:30]

Uttam Gupta: And you come on this tool, and you... you... you will know how to use it. You can just click on New.

[01:35:31] - [01:35:47]

Uttam Gupta: You can click on Transcribe Files. In the recording, you can follow the steps. And here it says you can drag and drop the video if you have the downloaded version, and you can paste the links. What you have to do? It's obvious, you guys are literate enough. Click on paste links, and just click on...

[01:35:47] - [01:35:50]

Uttam Gupta: Paste the link. And once you click on Add.

[01:35:50] - [01:36:00]

Uttam Gupta: it will give you multiple options, right? What are these options? What is the language of this reel? The language of this reel is English.

[01:36:01] - [01:36:04]

Uttam Gupta: Right? So I select English U.S,

[01:36:04] - [01:36:22]

Uttam Gupta: translate into, I don't want to translate, and I'll click on create transcript. And what will happen now? Can someone guess? Right? It's very simple. What it will do is, it will start to transcribe the video, and it will give me a transcription of that reel, one I've already done, like this.

[01:36:23] - [01:36:40]

Uttam Gupta: So you have transcription like this, you do one by one, each video, and you start putting them in a document, right? Like, I have already put it, say, writing inspiration document viruses in this style. So I've already put a couple of scripts by transcribing it.

[01:36:40] - [01:36:42]

Uttam Gupta: Right?

[01:36:43] - [01:37:00]

Uttam Gupta: You can watch the recording to follow the steps, it's pretty simple. Happyscribe is the name of the tool, where you can put the link or upload the video. Happyscribe is free up to 10 minutes, which means you can transcribe 8 to 10 videos easily without paying anything. There is one more tool.

[01:37:01] - [01:37:02]

Uttam Gupta: B.

[01:37:02] - [01:37:06]

Uttam Gupta: Which is called weighin.ai, weighin.ai.

[01:37:08] - [01:37:09]

Uttam Gupta: Okay?

[01:37:09] - [01:37:11]

Uttam Gupta: It's WeeIn.ai.

[01:37:11] - [01:37:18]

Uttam Gupta: It's completely free. For example, here you can come to Video Transcript Generator. It gives you about...

[01:37:18] - [01:37:29]

Uttam Gupta: 300, 400, minutes of free transcription, right? It gives you 400 minutes of transcription. So, you can paste the, say, Instagram link, YouTube link.

[01:37:29] - [01:37:30]

Uttam Gupta: Right?

[01:37:31] - [01:37:38]

Uttam Gupta: Instagram link, YouTube link, any of these things.

[01:37:39] - [01:37:42]

Uttam Gupta: And you can put the link here, and it will give the transcription.

[01:37:42] - [01:37:43]

Uttam Gupta: Fake.

[01:37:43] - [01:37:44]

Uttam Gupta: Folks!

[01:37:44] - [01:37:47]

Uttam Gupta: Now, this is where the real...

[01:37:47] - [01:38:06]

Uttam Gupta: demos have started, and I already told you, demo-based learning, you don't have to follow the steps at that moment. You have to just hear. Some people are saying, hey, I'm not able to follow, it's too... it's fast, and, you know, I want to know the each... where you are clicking, and can you slow down?

[01:38:06] - [01:38:07]

Uttam Gupta: I can't.

[01:38:07] - [01:38:11]

Uttam Gupta: Because I have so much to... more value to give you.

[01:38:13] - [01:38:22]

Uttam Gupta: And no matter how slow I go, you will still feel that you are not able to understand. I'm not kidding, happens with me also, when I'm learning demo-based work.

[01:38:22] - [01:38:32]

Uttam Gupta: No matter how slow someone goes, you will still not learn. You'll only learn... you will only be able to do it when you watch it at your own pace by pausing it.

[01:38:33] - [01:38:35]

Uttam Gupta: Okay? So please...

[01:38:35] - [01:38:44]

Uttam Gupta: Don't ask me to repeat, and please don't get impatient that you are not able to follow. Please don't get impatient. The job of, right now, the...

[01:38:45] - [01:38:50]

Uttam Gupta: tutorial or the demo is not for you to follow. The job is to get aware.

[01:38:51] - [01:38:54]

Uttam Gupta: Get aware, I'm requesting you don't lose your patience.

[01:38:55] - [01:38:58]

Uttam Gupta: Just follow, just relax, just watch it.

[01:38:59] - [01:39:00]

Uttam Gupta: OK?

[01:39:00] - [01:39:01]

Uttam Gupta: Please!

[01:39:01] - [01:39:09]

Uttam Gupta: Right? I genuinely want to convey, because I see some people losing patience. They're like, hey, when did you open that sheet? When did you go to that tool?

[01:39:10] - [01:39:13]

Uttam Gupta: It's all fine. Watch it in the recording and repeat it, okay?

[01:39:15] - [01:39:16]

Uttam Gupta: Pulk.

[01:39:17] - [01:39:22]

Uttam Gupta: Let's go. So, what did I tell you? First, I used

[01:39:22] - [01:39:27]

Uttam Gupta: I'll show the slides. Slides have the steps, and you'll get the slides. Go to View rank.

[01:39:28] - [01:39:32]

Uttam Gupta: Get the data, put it on sheet. You have the data.

[01:39:32] - [01:39:44]

Uttam Gupta: From that sheet, you will have the link of the videos. Now, link of the videos needs to be in words, so I told you two tools, Happyscribe, which is 10 minutes free, but here you can put 10 links and it will do it.

[01:39:44] - [01:39:55]

Uttam Gupta: The second is WeeIn.ai. This gives you 400 minutes of transcription for free, so you can put, like, a 30-minute YouTube video also, it can do that, right? So it can do that.

[01:39:55] - [01:40:00]

Uttam Gupta: or you have, like, some, you know, Zoom recording or anything, you can put that also.

[01:40:01] - [01:40:16]

Uttam Gupta: You have that transcription, then what do you do with that transcription? You make a document where you paste all your inspiration. Whosoever is your creator, favorite creator. Like, web... like, you know, for this example, I've already put, like, a couple of 8, 10 videos of WebHub.

[01:40:16] - [01:40:26]

Uttam Gupta: to learn from it, and to show you as an example, I've put that as a document, okay? As I said, step four is to put that into one document.

[01:40:26] - [01:40:36]

Uttam Gupta: And this is the raw material that you need to analyze to learn, okay? Now, there are two ways to analyze. You can read each of these scripts and learn manually.

[01:40:36] - [01:40:47]

Uttam Gupta: Or you can ask AI to do that, and we will use AI to do that, right? Are you clear till the point of V creating a document of scripts?

[01:40:47] - [01:40:52]

Uttam Gupta: From our inspiration, are you clear of creating a Word document

[01:40:52] - [01:41:04]

Uttam Gupta: I hope you are realizing how patient I am here, and I'm trying to be slow as much as I can, and I'm trying to take your participation so I know you are with me.

[01:41:04] - [01:41:06]

Uttam Gupta: You're clear up to the point that

[01:41:06] - [01:41:15]

Uttam Gupta: we have created the document. Some people are laughing because they know, right? The document is ready, now we need to analyze. Now, for that.

[01:41:15] - [01:41:24]

Uttam Gupta: Which is, how do we extract the writing DNA? How do we learn what was the great part in these viralous scripts? We are going to build a writing DNA.

[01:41:24] - [01:41:35]

Uttam Gupta: Right? For that, I'm going to use this prompt, right? Which we'll get later, right? So let me show that to you directly on Claude itself, right? I'll open Claude.

[01:41:36] - [01:41:42]

Uttam Gupta: I will download this, writing inspiration document. Let me just download this.

[01:41:42] - [01:41:45]

Uttam Gupta: Doc, sorry, tab, export.

[01:41:46] - [01:41:48]

Uttam Gupta: Right? You can put in the PDF or any form.

[01:41:49] - [01:41:52]

Uttam Gupta: I am going to say... G.

[01:41:53] - [01:41:55]

Uttam Gupta: I want you to...

[01:41:55] - [01:42:08]

Uttam Gupta: do the writing analysis of these scripts. These scripts are the viral reefs from my favorite creator, Vahavi. I want you to analyze these scripts, build a writing DNA,

[01:42:08] - [01:42:15]

Uttam Gupta: And understand what is the pacing, what is the wording, how they are writing it, how they are ending it, how they are writing the hooks.

[01:42:15] - [01:42:20]

Uttam Gupta: Right? How they are framing it, what kind of words they are using,

[01:42:20] - [01:42:34]

Uttam Gupta: and how they are retention, how do they are retaining people, how they are grabbing attention. Basically, everything about their scripts, I want to know what is that they are doing, which is making these scripts go viral, right? So, can you give me a writing DNA?

[01:42:36] - [01:42:48]

Uttam Gupta: DNA is just a word that I'm using. You can say that, can you give me a writing analysis, how I've told you, right? It's just a keyword that I'm using, and I will ask it to do that job for me.

[01:42:48] - [01:43:07]

Uttam Gupta: Now you know Claude is very smart, smarter than us. Instead of we going each of these scripts and trying to learn, it is trying to learn on our behalf, and it is going to present me the learnings from Vehub's viral script. And you can repeat this process for any creator, viral creator, and repeat that for, you know.

[01:43:07] - [01:43:09]

Uttam Gupta: Try to extract learning how they're writing.

[01:43:09] - [01:43:17]

Uttam Gupta: Right? This is how we learn, right? And you can apply this process for anything. Someone, if you like someone's presentation style.

[01:43:17] - [01:43:22]

Uttam Gupta: Download their presentation, give it to it, and say, can you do a presentation analysis how they are doing it?

[01:43:23] - [01:43:26]

Uttam Gupta: Are you understanding the principle and how I'm doing it?

[01:43:27] - [01:43:34]

Uttam Gupta: It is not important you, like, follow the each step, because you might end up doing slightly different, but are you understanding the principle?

[01:43:40] - [01:43:41]

Uttam Gupta: S?

[01:43:47] - [01:43:53]

Uttam Gupta: Okay? So, see, it has already started to give me, and you will see that, you know,

[01:43:53] - [01:44:09]

Uttam Gupta: It is telling hooks how he stops the scroll, right? The important prize number, the villain move, show and tell strategy, you can now do it, it affects you, the disbelief opener, the hook defense. These are the strategies he uses to stop.

[01:44:09] - [01:44:10]

Uttam Gupta: Okay?

[01:44:10] - [01:44:25]

Uttam Gupta: And then this is how he writes it, this is the structure that he uses, which is shock hook, doubt killer, quick context, you know, everything. Like, this we would not have been able to do, how AI is doing. How he's doing retention, how he's keeping people till the end.

[01:44:26] - [01:44:44]

Uttam Gupta: Right? How is pacing? How is... how's the rhythm? What is the vocab? Right? Crazy, insane, wild, genius, evil genius, mind-blowing. You see, like, these are the words we use, Vahou uses, I use. Master stroke, massive, right? literally, actually.

[01:44:44] - [01:44:55]

Uttam Gupta: Right? Think about it, pretty cool, insane, right? So it has caught all of that. How we are ending everything, right? So it has given the great analysis.

[01:44:55] - [01:44:56]

Uttam Gupta: Perfect.

[01:44:57] - [01:45:02]

Uttam Gupta: Yes, we have learned. Now what we want to do, what we want to do.

[01:45:02] - [01:45:05]

Uttam Gupta: We want to convert this into

[01:45:05] - [01:45:17]

Uttam Gupta: a powerful prompt, right? So what I'll say is, because I don't want to do this analysis every time, right? You don't want to do this. You do it once for one creator, and your job is done. So let's say...

[01:45:18] - [01:45:23]

Uttam Gupta: Can you convert this, all of this learning into, like, a big mega prompt?

[01:45:24] - [01:45:34]

Uttam Gupta: Which... is built on this writing analysis and writing DNA. Can you write?

[01:45:34] - [01:45:36]

Uttam Gupta: Maybe in the CoStar framework.

[01:45:39] - [01:45:50]

Uttam Gupta: So, what it is doing is, now it is going to write a big mega prompt, and then I will ask it to convert. Yes, some people are extremely smart, we can convert it into a skill.

[01:45:51] - [01:45:53]

Uttam Gupta: Okay? So once it does it.

[01:45:53] - [01:46:12]

Uttam Gupta: What is the CoStar framework? It is one of the prompting techniques. Even if you don't tell it, it's completely fine. If you know it, you can use any of the prompting techniques you might be aware of. You might be aware of Ryzen framework, or etc, etc. So now it has done a... it is doing a decent job. Then I will convert it.

[01:46:13] - [01:46:14]

Uttam Gupta: It is doing.

[01:46:14] - [01:46:19]

Uttam Gupta: Can you convert it into a repeatable skill so that

[01:46:20] - [01:46:31]

Uttam Gupta: whenever I'm writing scripts, right, it uses this knowledge, it uses this learning, and helps me write the scripts, bases of this learning, so that I am always creating

[01:46:32] - [01:46:41]

Uttam Gupta: viral videos. So I want you to convert it into a powerful, Vahav, viral, writing DNA skill.

[01:46:42] - [01:46:45]

Uttam Gupta: That's what I'm naming it. You can,

[01:46:46] - [01:46:55]

Uttam Gupta: name it of the creator you are making it. So it has written a very, very powerful detail prompt, right? So let me just say it, and it will start to do that.

[01:46:55] - [01:47:08]

Uttam Gupta: Yes, if you have multiple people you have inspiration from, do this process for multiple people. Say, for example, I did it for Vahav, I might also do it, say, for Naval Ravikant, I might also do it for Alex Hamosi, right?

[01:47:09] - [01:47:15]

Uttam Gupta: Shivanka, you are not able to follow, and you are saying to repeat what I have already told.

[01:47:15] - [01:47:18]

Uttam Gupta: You don't need to follow, you just need to listen.

[01:47:19] - [01:47:34]

Uttam Gupta: When you will have to follow, when you watch the recording. So just relax, don't worry. Don't put so much pressure on your brain, right? Don't put so much pressure, right? Can we mix DNA of two or more? You can do that. You can do that. You can try doing that.

[01:47:35] - [01:47:39]

Uttam Gupta: It is making the skill, right? It is obviously using the skill creator.

[01:47:42] - [01:47:53]

Uttam Gupta: in Claude, which prompt you put, when you'll watch the recording, you can pause what I actually spoke, and you can just copy-paste it also, right? In the recording. Right now, just watch it.

[01:47:54] - [01:47:56]

Uttam Gupta: Don't care about specific prompts, right?

[01:47:57] - [01:48:03]

Uttam Gupta: Like, everyone asks what prompt you have written, no one ends up using the prompt that they ask on the internet.

[01:48:03] - [01:48:20]

Uttam Gupta: Yes, you can do the same on, ChatGPT also. So it is creating a real DNA skill, okay? So let it... let it cook for now, okay? So, first, we gathered the style, and then we learned by making a writing analysis, and then

[01:48:20] - [01:48:29]

Uttam Gupta: We wanted it to convert into a reusable skill or prompt, so I asked it to make a very strong prompt and convert it into a skill.

[01:48:30] - [01:48:34]

Uttam Gupta: Right? So now we have the right recipe.

[01:48:34] - [01:48:48]

Uttam Gupta: Now we have the right recipe to write the script, isn't it yes, no, maybe? Did you understand? Before writing the scripts, what we have done is we have prepared a recipe, which is our skill, which is trained on what? Which is trained on what? Tell me.

[01:48:48] - [01:48:49]

Uttam Gupta: Which is trained on what?

[01:48:52] - [01:48:53]

Uttam Gupta: Which is trained on what?

[01:48:55] - [01:49:04]

Uttam Gupta: Fast, fast. Viral videos, right? The best videos, favorite creators, best videos. Favorite creator, best videos, best combo, right?

[01:49:04] - [01:49:12]

Uttam Gupta: viral videos of our favorite creator. We took that, and we analyzed it, and we have converted into a repeatable process.

[01:49:17] - [01:49:31]

Uttam Gupta: You see now what crazy it has created a VHub viral writing DNA skills, so, so powerful. It has created these reference documents also, right? Audit checklist also, writing DNA also, right?

[01:49:32] - [01:49:33]

Uttam Gupta: Do you want this?

[01:49:33] - [01:49:41]

Uttam Gupta: Would you want this? If you... if you will have patience, and if you will, stick till the end? With patience.

[01:49:42] - [01:49:55]

Uttam Gupta: without asking me to repeat, I will give this, right? I will just download it, and I will give it to you. Do you... you promise me that you will have patience and, you know, be kind and gentle and have patience?

[01:49:55] - [01:49:57]

Uttam Gupta: If you do that, I'll get... Yes?

[01:49:58] - [01:50:01]

Uttam Gupta: Good hook, right?

[01:50:02] - [01:50:05]

Uttam Gupta: Good trade, right? Cool, let's go. Now...

[01:50:05] - [01:50:23]

Uttam Gupta: Now, what we have to do is, we have... I've taught you the process of writing the script. Now, you remember we were following an idea that we need to convert into a script? Let's do that. Now, in the same chat, I can do that. What I'll do is, I, did some research, right? Let me just...

[01:50:24] - [01:50:27]

Uttam Gupta: We did some research about the news related to...

[01:50:28] - [01:50:32]

Uttam Gupta: our topic. So let me give that research, and say...

[01:50:39] - [01:50:42]

Uttam Gupta: Let me just... I've just written this...

[01:50:43] - [01:50:49]

Uttam Gupta: I've written this news, which I copy-pasted from plot only, I had put it into a document, this is the news.

[01:50:50] - [01:51:06]

Uttam Gupta: Here is the news on which I want to create a viral reel. Please use the above skill and give me a viral reel on this topic. You can feel free to research a bit more also, beyond this, but use the above skill to write a viral reel.

[01:51:07] - [01:51:12]

Uttam Gupta: And, you know, I can also automatically trigger, by writing slash

[01:51:13] - [01:51:26]

Uttam Gupta: I have to save the skill, let me just save it. Now it should be visible, Vaibhua writing DNA, and now it will do the magic, and it will follow the recipe that we have built, and it will work on this topic

[01:51:27] - [01:51:30]

Uttam Gupta: So it will give the script. Let it cook the script.

[01:51:30] - [01:51:41]

Uttam Gupta: What I really want to tell you, that, guys, now what you will get is completely AI, right? 100% AI. But I would suggest you to not just leave on that.

[01:51:42] - [01:51:44]

Uttam Gupta: Right? Not leave on that.

[01:51:44] - [01:51:49]

Uttam Gupta: Your... this is only your first draft. Do not stop here.

[01:51:50] - [01:51:53]

Uttam Gupta: What you have right now is 100% AI script.

[01:51:53] - [01:52:00]

Uttam Gupta: 100% AI script sounds like nobody, sounds like everybody. So how do you make it

[01:52:01] - [01:52:10]

Uttam Gupta: you know, personal. How do you add your human element? How do you, bring the creator in you, in that topic? How do you do that?

[01:52:10] - [01:52:16]

Uttam Gupta: By adding your perspective, simplifying it, or giving it feedback.

[01:52:16] - [01:52:25]

Uttam Gupta: Right? So you give it feedback by chain-prompting it, you add perspective to it, right? So that it becomes closer to a version of you.

[01:52:27] - [01:52:32]

Uttam Gupta: Did you get it? This is a very important step, we still do that in every, every topic.

[01:52:34] - [01:52:39]

Uttam Gupta: Yes? So, let's do that together, right? Let's make it more real.

[01:52:39] - [01:52:54]

Uttam Gupta: You see? Here we have got a script which has Sam Altman, Elon Musk, Dario, Amode finally agreed on something, slow down AI. No, this is not a joke. On Saturday, Anthropic CEO Dario, Yadad, you see?

[01:52:54] - [01:52:59]

Uttam Gupta: It has given multiple hooks, etc. It has done fact check. I can give feedback.

[01:52:59] - [01:53:19]

Uttam Gupta: hey, I want to make it 60 seconds, so can you just keep it maximum up to 150 words? Also, I want you to give me 5 variations of the hook, and I also want you to make it even more controversial, spicy, so that more people want to listen about it and share about it.

[01:53:21] - [01:53:31]

Uttam Gupta: So I've given a very basic feedback. You know, I can also... I would have... I could have also said that here is what I think about this topic. I think...

[01:53:31] - [01:53:38]

Uttam Gupta: You can't stop, like, I can... let me just do that. Whatever script we'll get, let me add my element.

[01:53:38] - [01:53:45]

Uttam Gupta: So here is a perspective I want you to add, which I think. I think there is no way right now to stop

[01:53:46] - [01:53:51]

Uttam Gupta: AI, because once the weapon is out, it's very difficult to take back in.

[01:53:54] - [01:54:08]

Uttam Gupta: what we can do is teach people, conscious users of that. We can teach people how to use it in the right way, and we can build certain policies which can protect it. We can't stop AI from

[01:54:08] - [01:54:18]

Uttam Gupta: you know, developing, but we can build policies, we can build infrastructure, we can build, committees which can protect the usage of it. That's what I think.

[01:54:18] - [01:54:21]

Uttam Gupta: So now you think, if I add this in the script.

[01:54:22] - [01:54:28]

Uttam Gupta: Can you add this also in the script, so that, you know, we have my perspective as well?

[01:54:30] - [01:54:37]

Uttam Gupta: Now you see, guys, with 2-3 prompts, that script is coming out slightly different. It has my element as well.

[01:54:39] - [01:54:58]

Uttam Gupta: And that is the final script I'm going to use. Is that clear? Did you realize, after making the recipe, how we use the research to build the script, but not only AI script, we added 20% of our human element as well. We spent 15 minutes, right? And you know what? In reality, I spent even more minutes. I actually, edit the scripts.

[01:54:58] - [01:55:05]

Uttam Gupta: Manually, because I want them to sound a bit more like me, right? You see now, this script is...

[01:55:05] - [01:55:19]

Uttam Gupta: taught, it has my personal element as well, right? So with that, our script is ready with your experience inside it. Are you clear so far? Guys, I have almost

[01:55:19] - [01:55:21]

Uttam Gupta: You know,

[01:55:22] - [01:55:33]

Uttam Gupta: only one hour, but we are only done with first two steps. We have three steps which are even more time-taking and crucial, because you'd want to learn how to build your clone, which is the most important part, right?

[01:55:33] - [01:55:49]

Uttam Gupta: So, image and video will come to that. But are you clear so far? I have a break coming up, but after a while, right? I have a break coming up after a while. Till that time, please have patience, and keep bearing me, and keep listening to me, okay? Please.

[01:55:50] - [01:55:56]

Uttam Gupta: So, so far what we have done, we found the idea, we made the script. Now, what do we need?

[01:55:57] - [01:56:02]

Uttam Gupta: We need a video, and we need a video, we need an audio, right? We need that.

[01:56:03] - [01:56:23]

Uttam Gupta: For that, we'll build an AI clone, which will sound like you, which will look like you. So we'll create a video without you ever picking up a camera, ever again. I've not picked up a camera, since last 12 months, right? Now, the clone has two elements. There is an audio, which is your voice, it needs to sound like you.

[01:56:23] - [01:56:26]

Uttam Gupta: How you pause, how you speak, how you pronounce.

[01:56:26] - [01:56:32]

Uttam Gupta: And the video, which looks like you, which has the right lip sync and, you know, hand gestures.

[01:56:33] - [01:56:34]

Uttam Gupta: Now.

[01:56:34] - [01:56:55]

Uttam Gupta: audio and video, the more important thing is the audio. The audio matters a lot more than the video. Video can have slightly, it can be 90% accurate, that's also fine, but audio has to be 95%, 99%, 100% accurate, because, you know, people will forget

[01:56:55] - [01:57:00]

Uttam Gupta: Or forgive an imperfect visual or a video, but they will not forgive, or they will not be able to

[01:57:00] - [01:57:01]

Uttam Gupta: forget.

[01:57:01] - [01:57:03]

Uttam Gupta: A robotic voice, okay?

[01:57:03] - [01:57:14]

Uttam Gupta: Visuals, we are able to cover up with better editing also, but voice will stay throughout the audio. So first, I will, you know, also cover and focus more on voice also. Now.

[01:57:14] - [01:57:17]

Uttam Gupta: To build an AI clone, there are two parts, okay?

[01:57:17] - [01:57:35]

Uttam Gupta: There is a beginner path, and there is an advanced path. What is the beginner path? In the beginner path, you can use Heijon as a tool for making the AI video, as well as the AI audio. That's the beginner path. You can use one tool so that you don't need to take multiple subscriptions. The advanced path is.

[01:57:35] - [01:57:39]

Uttam Gupta: We use Hazen for video, and Eleven Labs for audio.

[01:57:42] - [01:57:48]

Uttam Gupta: Right? Someone's like, hey Jin, doesn't get my gestures. I'll talk about how do you handle that.

[01:57:48] - [01:58:00]

Uttam Gupta: Right? I'll talk about the best practices that can increase the quality of your output. See, everyone has access to Eleven Labs agent, but why not everyone has been able to build pages like me?

[01:58:00] - [01:58:01]

Uttam Gupta: Hardevo.

[01:58:02] - [01:58:05]

Uttam Gupta: Because there is certain nuance, there are certain tricks.

[01:58:05] - [01:58:21]

Uttam Gupta: Which we have learned by failing multiple times when we build initial bad clones two years, two and a half years back. We learned what to improve, what to focus on, what not to, to get a very identical output. And I'm going to share those tips and tricks.

[01:58:21] - [01:58:29]

Uttam Gupta: Okay? So I hope... are you clear? There are two parts, which is beginner, only uses Hyeen for voice and video, and there's advanced, which uses

[01:58:29] - [01:58:31]

Uttam Gupta: 11 labs in Hazen. Clear?

[01:58:32] - [01:58:34]

Uttam Gupta: Yes, yes.

[01:58:35] - [01:58:47]

Uttam Gupta: I want your yeses, because then I don't want to be, said that, please repeat, and you are moving fast, so please, tell me. Clear, right? Beginner and advanced.

[01:58:47] - [01:58:55]

Uttam Gupta: So first, let's go to the Hagen tool, and let me give you a tour of that tool, so that you are familiar of this tool.

[01:58:55] - [01:58:58]

Uttam Gupta: Okay? Let's go to Hyjin.

[01:58:58] - [01:59:07]

Uttam Gupta: When you go to Heijin.com. Before I even go to Hyeen, I can... obviously, it's a paid tool, right? But it is absolutely worth it.

[01:59:07] - [01:59:22]

Uttam Gupta: Right? I think it costs around \$29, right? Yes, this plan. In the free plan, you can start to do the practice, you can do that, right? You can start with a free plan to practice, but you will get 3 videos to produce per month.

[01:59:23] - [01:59:24]

Uttam Gupta: Right?

[01:59:24] - [01:59:27]

Uttam Gupta: And in the \$29 plan.

[01:59:30] - [01:59:49]

Uttam Gupta: you can get unlimited videos to produce, so this is absolutely worth it, right? Asian is not like Hicksfield or Runway. Asian is built for, you know, asian is built for, doing the cloning and this kind of work, creating ads and everything.

[01:59:50] - [01:59:57]

Uttam Gupta: Or if you have got some code, then you can also use that as well. Brilliant! That's brilliant.

[01:59:57] - [02:00:10]

Uttam Gupta: So, let's go to Hyjin and look at it. When you sign in, how it will look like. Let's... let's... let me take it to... take you to a working account, and let me give you a demo or the walkthrough of how this platform looks like.

[02:00:11] - [02:00:12]

Uttam Gupta: Okay?

[02:00:12] - [02:00:25]

Uttam Gupta: So, when you come, you will... it will look like this. This tool can do a lot of things. It can produce ads for you, it can produce video presentation, it can create, tips videos, it can produce video podcast as well.

[02:00:25] - [02:00:42]

Uttam Gupta: Right? You can do a lot of things, but we are not going to focus on all of these things. Today, our focus is to learn how we can build our clone. You see, there are 4 steps at the top, it is already visible. You can... it says, create your digital twin, polish your voice, create a look, make your first video.

[02:00:42] - [02:00:43]

Uttam Gupta: Right?

[02:00:43] - [02:01:00]

Uttam Gupta: So, when you create on Digital Twin, when you click there, you will come to a screen where you can build avatars. You see, I have built multiple avatars. When you go on my avatar, there are multiple versions, multiple kind of videos there are, right?

[02:01:00] - [02:01:08]

Uttam Gupta: I've built avatars of my clients also, and some... for some ads also. How do you build an avatar? You just click on New Avatar.

[02:01:10] - [02:01:19]

Uttam Gupta: You click on New Avatar, and then you will see these two options, Real Cloning or virtual character. Obviously,

[02:01:19] - [02:01:21]

Uttam Gupta: you have to choose real clone.

[02:01:21] - [02:01:37]

Uttam Gupta: For this example. And then, what you will have to do is, right now it is taking from webcam the video. Instead of that, you go to that import footage, and you can upload a video of yours, which is, you know,

[02:01:38] - [02:01:48]

Uttam Gupta: They say that you can upload up to... from 15 seconds of video also, that is enough, but I would suggest you record a video of 1 to 2 minutes, right, and upload that.

[02:01:48] - [02:01:55]

Uttam Gupta: And then... click on Training, right? Click on, Training, and it will start doing the training.

[02:01:55] - [02:02:06]

Uttam Gupta: Now, when you are on your new account, when you are creating the first avatar, yes, you can create long-form videos as well. YouTube is built on long-form, videos.

[02:02:06] - [02:02:10]

Uttam Gupta: No, Nana... guys, don't ask questions.

[02:02:10] - [02:02:11]

Uttam Gupta: With half knowledge.

[02:02:11] - [02:02:22]

Uttam Gupta: Right? And I'm not trying to, reduce, you know, or stop you from asking questions. Like, someone is asking that Nano Banana is better for AI clone.

[02:02:23] - [02:02:39]

Uttam Gupta: Why have you jumped to that when I've not finished the session? Some of your questions will get answered by the time I will finish the session. I've already put a lot of effort to cover everything, right? So, most likely, I will finish, you know, answer your questions already, right?

[02:02:40] - [02:02:46]

Uttam Gupta: And just, trust me, when I'm saying Hygen is best for AIClone, use Hajin, right? Don't get confused.

[02:02:46] - [02:02:50]

Uttam Gupta: Upload a video. Now, here is what will happen, that...

[02:02:50] - [02:02:58]

Uttam Gupta: When you upload your first video, it will ask you to give an approval, a consent, for training.

[02:02:58] - [02:03:07]

Uttam Gupta: And it is nothing, but you have to open the camera, and you have to speak something, and you have to finish the approval process, so that your clone can be created for the first time.

[02:03:07] - [02:03:15]

Uttam Gupta: That's how your clone gets created. That's how you build your clone, okay? You upload a video, and you click on training, and it will happen.

[02:03:15] - [02:03:17]

Uttam Gupta: That's yours?

[02:03:17] - [02:03:18]

Uttam Gupta: video.

[02:03:18] - [02:03:26]

Uttam Gupta: Then again, you can come on home, and you will see the next step, which is polish your voice, right? So here, you can,

[02:03:27] - [02:03:37]

Uttam Gupta: build your voice clone. How do you do that? You click on... I have already done it, so that's why it is taking up Uttam Gupta. I'll click on re-record, for example.

[02:03:37] - [02:03:44]

Uttam Gupta: And I will see that I can immediately record right now, and it will take that 10-20 seconds of input.

[02:03:44] - [02:03:51]

Uttam Gupta: But I would suggest that... Upload here 10 to 20 minutes of your audio.

[02:03:51] - [02:03:52]

Uttam Gupta: Right?

[02:03:53] - [02:03:56]

Uttam Gupta: And train with that material.

[02:03:56] - [02:03:58]

Uttam Gupta: Train with that material.

[02:03:58] - [02:04:06]

Uttam Gupta: Why I'm saying 10 to 20 minutes of audio? Because the more data you give to AI, the better it

[02:04:06] - [02:04:09]

Uttam Gupta: gives you an output. You know that, right? When you prompt

[02:04:09] - [02:04:27]

Uttam Gupta: You give more detailed context, you get better output. Garbage in, garbage out. So if you give, like, 1 minute, 2 minutes of your audio, then the quality, or it will not sound like you, because there is very less data for AI to understand your tonality, pronunciation, and everything. The more data you give, the better it is, okay?

[02:04:27] - [02:04:32]

Uttam Gupta: Yes, you can extract from YouTube videos as well, if you have already created.

[02:04:32] - [02:04:42]

Uttam Gupta: How to record audio samples? Yes, you can ask that question. You can just use your iPhone's, you can use your iPhone's voice recorder itself. Just keep it like this and record it. That's it.

[02:04:43] - [02:04:45]

Uttam Gupta: You don't need a fancy mic, also.

[02:04:45] - [02:05:04]

Uttam Gupta: Right? So, first, understand the process, that this is how it... the tool works. I will tell you certain best practices when you have to record a video. Best practices to record the audio also, which is actually... will be very valuable. Just have patience and hear mute. So, I told you it's very simple that,

[02:05:04] - [02:05:11]

Uttam Gupta: You click on Digital Twin and create a clone. You click on voice, and you upload a voice, and that will happen.

[02:05:11] - [02:05:24]

Uttam Gupta: Now, here is the powerful part, that earlier, if I show you what used to happen is, me and Veho, what we used to do is, that every, few months, we will record

[02:05:24] - [02:05:30]

Uttam Gupta: Certain, videos in different, different outfits, so that we keep updating our clone.

[02:05:30] - [02:05:31]

Uttam Gupta: Okay?

[02:05:31] - [02:05:38]

Uttam Gupta: we would do that. But now, Hey Jen has given a feature, which is... Add a look.

[02:05:39] - [02:05:43]

Uttam Gupta: Right? And you click on add a look, say, of Uttam Gupta.

[02:05:43] - [02:05:51]

Uttam Gupta: And I can design it with AI, click on design it with AI, and then I will see so many looks already there.

[02:05:51] - [02:05:59]

Uttam Gupta: Say, for example, I can choose a podcasting look, right? I can choose a podcasting look here.

[02:05:59] - [02:06:04]

Uttam Gupta: this, say, for example, this podcasting look, right? This template.

[02:06:06] - [02:06:08]

Uttam Gupta: I can click on Use Template.

[02:06:13] - [02:06:17]

Uttam Gupta: And then, I can just... it is already creating

[02:06:18] - [02:06:28]

Uttam Gupta: For me, let me now show you that without me recording a video, it is building podcast setup versions for me. You see, it has built this version.

[02:06:31] - [02:06:32]

Uttam Gupta: Great.

[02:06:32] - [02:06:47]

Uttam Gupta: Without me shooting. Don't you think this is insane? Drop insane in the chat, folks, because some of you have never created content because, you thought you needed a better camera, you needed a better podcasting setup, you needed a mic.

[02:06:47] - [02:06:57]

Uttam Gupta: now you don't need it. You see how perfect it is looking, how real it is looking, right? I've gotten a lot of versions here, you see? I've gotten this version.

[02:06:57] - [02:07:10]

Uttam Gupta: Where I'm in a different outfit, but I'm looking just like how I look, right? I've got it this version. This looks so cool, so real, there's a laptop also. It's absolutely insane, right? And I can just start using it as a clone.

[02:07:12] - [02:07:13]

Uttam Gupta: Bait?

[02:07:13] - [02:07:22]

Uttam Gupta: It's so, so powerful. That's why I'm saying that first, become aware about the possibilities, and then get into the nuances of, hey, this is where I'm stuck.

[02:07:22] - [02:07:27]

Uttam Gupta: Right? So, first, become aware that this is even possible, right?

[02:07:28] - [02:07:34]

Uttam Gupta: Now someone's saying... now I'm realizing why mine was not working, because I was only giving 10 to 15 seconds of input.

[02:07:36] - [02:07:53]

Uttam Gupta: Okay? So, what did I tell you? Very easily, I told you, just from Heyjin itself, how do you build a digital twin, how do you upload your voice, and how do you create a look, and then how do you create your video? I'll talk about that also, right? Let's wait for a second.

[02:07:54] - [02:08:03]

Uttam Gupta: Right? Now, here are certain tips I want to give you when you record your video, 1-2 minutes of video, to train your avatar.

[02:08:04] - [02:08:13]

Uttam Gupta: Okay? To train your avatar. The first thing is, you can use your phone camera itself, you don't need a fancy camera, you can use your phone quality, right?

[02:08:14] - [02:08:33]

Uttam Gupta: Use a phone camera quality. Second is use a good lighting. Now, you don't need a fancy light. You can buy, probably, like, this is very cheap, right? You can buy this sort of light, which you can place on the top of your phone, right? You can paste it on the top of your phone.

[02:08:34] - [02:08:41]

Uttam Gupta: like this, right? Or I can put it in front of my laptop also, and then you can use it in front of the sessions.

[02:08:42] - [02:08:52]

Uttam Gupta: Or you can, you know, even if you don't want to do it, the best is use the natural lighting. During a day, in front of a window, you shoot it, that is great.

[02:08:52] - [02:09:03]

Uttam Gupta: And the third thing is, which is very important, a lot of you also said that, you know, when it... when I'm producing a video clone, is it important what I see?

[02:09:03] - [02:09:12]

Uttam Gupta: Right? No, right? For that 1-2 minute, whatever topic you want to speak, you can talk about that. See, when we are recording the video.

[02:09:12] - [02:09:13]

Uttam Gupta: Why do we need that?

[02:09:13] - [02:09:22]

Uttam Gupta: The AI will learn our hand gestures, our facial expression, our eye movement, our lip movement. Now, hear me. Please pay attention what I'm telling you.

[02:09:23] - [02:09:34]

Uttam Gupta: this will decide if your avatar will look like, behave like you or not, right? Few things. When you are recording that video, make sure your hand gestures are

[02:09:34] - [02:09:52]

Uttam Gupta: below your face, and are generic hand gestures. What do I mean by that? Generic hand gestures mean they sound like this, they look like this. I'm not saying that, one, first point,

second point, third point, you don't do that, because that's not relevant to the next of the videos. You use

[02:09:52] - [02:09:59]

Uttam Gupta: generic, right, hand gestures, right? Facial expressions don't have too expressive

[02:09:59] - [02:10:13]

Uttam Gupta: facial expressions. Don't be too happy, or too sad, or too depressed. Just have a neutral. How do you do a presentation? Have neutral facial expressions, have neutral hand gestures, and don't let it come in front of your face.

[02:10:14] - [02:10:18]

Uttam Gupta: So that your lip Sync doesn't get interrupted, okay?

[02:10:19] - [02:10:22]

Uttam Gupta: These are important things, right?

[02:10:23] - [02:10:34]

Uttam Gupta: Okay? And don't have a background which is moving. Don't try to record it in, like, a public place where people are moving in the background. These are some golden tips which will,

[02:10:34] - [02:10:40]

Uttam Gupta: decide how your avatar will look. Will your... will your hand gestures look abrupt or not?

[02:10:40] - [02:10:59]

Uttam Gupta: Will your facial expression look abrupt or not? What if you train the AI with a lot of happy gestures, and you use the clone to make a serious topic? It won't be that great, right? Obviously, Ajin has slightly learned to adapt to the topic, but I would tell you not to give the wrong data itself.

[02:10:59] - [02:11:16]

Uttam Gupta: Right? And the background, you can use just a white background, or right now, I'm, like, in a home background, right? You can use this also. Start with this. That's completely fine. Okay? These are certain tips that I am telling you. Please remember it, and please use it.

[02:11:17] - [02:11:35]

Uttam Gupta: Okay? Can you build multiple avatars from one account? See, you can build multiple looks, multiple outfits, but video avatar can be built in one agent paid account, only one. The other avatars that I've built are not trained on video, they are only trained on pictures.

[02:11:37] - [02:11:38]

Uttam Gupta: Okay.

[02:11:38] - [02:11:53]

Uttam Gupta: You can start with hand, standing recording, sitting recording, whatever. You can shoot one in standing, one in, you know, sitting, anything is fine, okay? But these principles are very important, okay? I already showed you how to create an avatar.

[02:11:54] - [02:12:00]

Uttam Gupta: I already showed you how to create an audio in the agent, right? This was a beginner path.

[02:12:00] - [02:12:02]

Uttam Gupta: Right?

[02:12:03] - [02:12:16]

Uttam Gupta: Now, let me tell you certain best practices for recording audio also. Please listen to me. Please, please listen to me. Some of you might end up coming back saying your audio is not sounding like you, and I can tell you why.

[02:12:16] - [02:12:17]

Uttam Gupta: Great.

[02:12:18] - [02:12:27]

Uttam Gupta: Can you retrain your avatar? Absolutely multiple times, right? Let me just first answer these important questions. When you come on the left side, if you click on avatar, you will be able to see it.

[02:12:27] - [02:12:46]

Uttam Gupta: Right? If I go on my avatar... see, other... my clients' avatars are built just on image. They are not even built on video, but they are very good. My avatars are built on videos, right? Honestly, I don't use these looks, I use the ones that I've already recorded, like, on videos.

[02:12:46] - [02:12:54]

Uttam Gupta: I can upload multiple videos and retrain, and you can make, like, 10, 20, 30, 40 versions.

[02:12:55] - [02:12:58]

Uttam Gupta: Of, yore. There's no end to it.

[02:12:58] - [02:13:04]

Uttam Gupta: Right? So you can upload, you can just click on add a look, and you can upload a video, or you can design with it.

[02:13:05] - [02:13:07]

Uttam Gupta: Right? Or you can use a webcam also.

[02:13:07] - [02:13:18]

Uttam Gupta: So that's... that possibility is there. On one phase, you can create multiple nodes, so that's not a problem, so there's no problem of making a mistake. Just, keep doing it, right? And you will keep improving.

[02:13:18] - [02:13:26]

Uttam Gupta: Let me tell you something very important, which is how do you create a very accurate AI voice when you are training it, even on Hygen.

[02:13:27] - [02:13:28]

Uttam Gupta: So, first is...

[02:13:29] - [02:13:39]

Uttam Gupta: which most people will do. How many of you thought that to make a AI voice, you will read a book? How many of you thought that you will read a book for 10-20 minutes?

[02:13:41] - [02:13:45]

Uttam Gupta: I'm telling you, 50% of the people will say me and I.

[02:13:46] - [02:13:51]

Uttam Gupta: Yeah, a lot of people are saying, that is something that you don't have to do.

[02:13:51] - [02:13:53]

Uttam Gupta: You don't have to do that.

[02:13:53] - [02:13:54]

Uttam Gupta: Right?

[02:13:55] - [02:14:00]

Uttam Gupta: You don't have to do that. Why? When it comes to AI audio.

[02:14:00] - [02:14:02]

Uttam Gupta: Don't read a book because...

[02:14:03] - [02:14:17]

Uttam Gupta: when you read a book, how do you read a book? You read very calmly, and you just read, like, without any expression. But when you are doing an Instagram Reel, how do you speak? You speak fast, you have a lot of expression, right? You talk like that, you talk with that energy.

[02:14:17] - [02:14:25]

Uttam Gupta: Right? When you take a session, you talk in a different tone. When you do a podcast, you... some... how many of you thought that you will just upload your podcast audio?

[02:14:25] - [02:14:34]

Uttam Gupta: Don't do that. That is how me and Vaibhu started, and that audio was pathetic. It used to sound so slow, it used to sound so boring, because in podcasts, we, like, speak slow.

[02:14:34] - [02:14:46]

Uttam Gupta: Right? Yes, you can ask Claude to give you a 10-minute, 20-minute YouTube script, or you can ask it to give you 20 sample Instagram scripts, and read it with expression.

[02:14:46] - [02:14:51]

Uttam Gupta: Read it with the kind of expressions that you want, the pace that you want.

[02:14:51] - [02:15:05]

Uttam Gupta: So that the kind of input you do is the kind of output you can expect. Does it make sense? Guys, it is extremely important, because most people make this mistake, and then they say that their clone is not looking good, right? So...

[02:15:05] - [02:15:09]

Uttam Gupta: Do that, and also,

[02:15:09] - [02:15:16]

Uttam Gupta: You don't have to do that in one go, you can record in parts and combine it and upload it, okay? So that's also fine.

[02:15:16] - [02:15:22]

Uttam Gupta: Does it make sense? Yes, no, maybe? Does it make sense? Are you with me? These are some things that are...

[02:15:22] - [02:15:37]

Uttam Gupta: Not even on the slides, but I want to tell you so that you don't make the mistakes that can cost you more time, and you are not satisfied with the output. You know, these are things which are even more important than me giving you a demo of the tool. You know why? Because

[02:15:37] - [02:15:44]

Uttam Gupta: Everyone knows the tool, but people don't know these nuances, and that is what decides how good

[02:15:44] - [02:15:46]

Uttam Gupta: Their output would be.

[02:15:46] - [02:15:47]

Uttam Gupta: Okay?

[02:15:47] - [02:15:56]

Uttam Gupta: Someone is like, please explain, didn't understand. Please watch the recording, you will understand, and watch it twice or thrice, take note of it, and you will understand. Don't worry, okay? It's very simple.

[02:15:57] - [02:16:04]

Uttam Gupta: Now, you understood the basic setup, let me tell you the upgraded, the real setup that we use for Vaib and for me.

[02:16:05] - [02:16:12]

Uttam Gupta: Okay? In that, we use the agent to build the video avatar, like I showed you, but we use 11 labs

[02:16:12] - [02:16:17]

Uttam Gupta: for voice cloning. Let me give you a demo of 11 Labs as well.

[02:16:17] - [02:16:30]

Uttam Gupta: When you log into Eleven Labs, this is how it will look like. Let me see... yes, this is how it will look like. Let me give you a quick demo. On the left side, you see Home, Voice, Studio Flow Templates.

[02:16:31] - [02:16:38]

Uttam Gupta: Right? At the bottom, you see developers option, at the top, you see Setting, right? This is how very simple you look, look at.

[02:16:38] - [02:16:44]

Uttam Gupta: Now, I'm not going to tell you all the features. Only on the left side come to voices.

[02:16:46] - [02:16:48]

Uttam Gupta: And you click on plus.

[02:16:48] - [02:17:08]

Uttam Gupta: And you see, there are multiple types of voices you can create. The first is voice design. You can create any kind of voice just by giving a prompt. For example, you can say, I need a voice of a 25-year male guy talking in a social media kind of content, voice and energy, and...

[02:17:08] - [02:17:19]

Uttam Gupta: he's Asian, he has this accent, and he's speaking fast. You can just give a prompt, and it will design the voice. You can use this feature if you want to build, like, audiobooks, you want to do some

[02:17:19] - [02:17:21]

Uttam Gupta: cool things, right? You can do that.

[02:17:21] - [02:17:39]

Uttam Gupta: You can build an instant voice clone. Instant voice clone, you can build a replica of your voice just by giving 10 to 30 seconds of your audio. Let me show that to you as well. And then we have the professional voice clone. Professional voice clone demands you giving 30 minutes of clean audio.

[02:17:39] - [02:17:43]

Uttam Gupta: And for one paid account, you only get one slot.

[02:17:44] - [02:17:46]

Uttam Gupta: of professional voice clone. What it means?

[02:17:47] - [02:17:49]

Uttam Gupta: Professional voice clone in one account.

[02:17:49] - [02:17:53]

Uttam Gupta: If that account has Vaibhuv's professional voice.

[02:17:54] - [02:17:58]

Uttam Gupta: I cannot use the same account to train my voice.

[02:18:02] - [02:18:03]

Uttam Gupta: Great.

[02:18:03] - [02:18:06]

Uttam Gupta: I cannot use the same account.

[02:18:06] - [02:18:07]

Uttam Gupta: What?

[02:18:07] - [02:18:09]

Uttam Gupta: My voice as well.

[02:18:09] - [02:18:19]

Uttam Gupta: So, it means one account, one voice. Professional voice. But voice design, instant voice, you can create as many as possible. Okay? I hope that is clear.

[02:18:19] - [02:18:37]

Uttam Gupta: Now, since I've already used the slot for professional voice, I won't be able to show you how to do it, but I'll show you instant voice clone. The process is pretty similar, right? But the output is way different, right? The instant voice clone, we give 10 to 30 seconds of the input.

[02:18:37] - [02:18:48]

Uttam Gupta: What do you think that IVC, which is Instant Voice Clone, will be better, or PVC, where we are given 30 minutes? What do you think will actually sound real? Tell me in the chat.

[02:18:49] - [02:19:08]

Uttam Gupta: Please, like, you know the basics of AI. Obviously the PVC, where we are giving a lot more data, we are training it a lot more. Instant voice clone sounds pathetic, and you can't use it... you can use it for random things like narration and stuff, but for personal branding content, which is going on your face, you would not want to use that.

[02:19:09] - [02:19:22]

Uttam Gupta: Right, absolutely. The more info you get, the better it is. The... so, instant voice clone, you click on it, you can drag and drop an audio, or you can record it. Say, for example, 10 seconds, I can record it.

[02:19:23] - [02:19:24]

Uttam Gupta: Let me just stop.

[02:19:28] - [02:19:43]

Uttam Gupta: Hey, thank you so much for listening me. This is Uttam Gupta, and I'm recording an instant voice clone sample to show it to my audience and teach them how they can do it. In this sample, you only have to upload, like, 30 seconds of the audio, and at this point, I'm just...

[02:19:43] - [02:20:03]

Uttam Gupta: doing gibberish, because I have to speak for 30 seconds and you can realize it. You can speak anything, it doesn't matter, but you have to speak it with expression. You have to speak it with pauses, and, you know, it will understand, it will learn that, and that's what you will have to do in PVC as well, you know? You saw what I did, I just did something, and that's what you will have to do.

[02:20:03] - [02:20:10]

Uttam Gupta: And you'll click on Next, And, you click on Next.

[02:20:11] - [02:20:16]

Uttam Gupta: And... it is frain, right? And let's see how it sounds, like, it will sound pathetic.

[02:20:16] - [02:20:20]

Audio shared by Uttam Gupta: Just like the endless waves of the ocean, keep riding each challenge to unlock.

[02:20:20] - [02:20:21]

Uttam Gupta: Can you hear the voice?

[02:20:21] - [02:20:22]

Audio shared by Uttam Gupta: potential.

[02:20:24] - [02:20:27]

Uttam Gupta: Can you hear the voice? It doesn't sound like me, it has an accent.

[02:20:27] - [02:20:32]

Audio shared by Uttam Gupta: Just like the endless waves of the ocean, keep riding each challenge to unlock your productivity potential.

[02:20:33] - [02:20:43]

Uttam Gupta: Right, so I don't like the instant voice clone, but I wanted to just... not bad for 30 seconds, actually, but can I use it on my personal brand? No. Right?

[02:20:43] - [02:20:49]

Uttam Gupta: I would prefer to use. It kind of sounds like me, because... but it is not 100%.

[02:20:50] - [02:20:52]

Uttam Gupta: Right? 50, 60, 50%, right?

[02:20:53] - [02:20:58]

Uttam Gupta: But for my social media, for my brand, would I want to use that? No.

[02:20:59] - [02:21:00]

Uttam Gupta: Right. Is it...

[02:21:00] - [02:21:08]

Uttam Gupta: something extremely bad, it is not bad, but I don't want to use it for PVC, right? So...

[02:21:08] - [02:21:12]

Uttam Gupta: You can use... you can name it a Uttam Instinct.

[02:21:12] - [02:21:14]

Uttam Gupta: What is clone?

[02:21:14] - [02:21:26]

Uttam Gupta: And you can save it. Now, similar is the, similar is the professional voice clone, where you upload the voice, instead of recording on the Lenin Labs for 30 minutes, you record, say, 55 minutes, 10-10 minutes.

[02:21:27] - [02:21:36]

Uttam Gupta: And you can upload that, and you will be able to come on Voices, and you will be able to see all your instant voice clone, or professional voice clone here.

[02:21:36] - [02:21:37]

Uttam Gupta: Okay?

[02:21:38] - [02:21:47]

Uttam Gupta: Now, let me be honest with you, let me be honest with you, very, very honest, right? This is a Teams account that I have.

[02:21:47] - [02:21:59]

Uttam Gupta: And I used to use, 11 Labs. I used to use 11 Labs, but right now, just a month back, I have switched to a different tool, which is called Pish Audio.

[02:21:59] - [02:22:00]

Uttam Gupta: at 8.

[02:22:01] - [02:22:04]

Uttam Gupta: Vahav still uses 11 Labs.

[02:22:04] - [02:22:05]

Uttam Gupta: Great.

[02:22:06] - [02:22:08]

Uttam Gupta: I have switched to fish.

[02:22:08] - [02:22:15]

Uttam Gupta: Audio. Why fish audio? Phish audio is honestly, like, one fifth

[02:22:16] - [02:22:23]

Uttam Gupta: cheaper than 11 laps, that's the reason, right? 11 laps, I guess, is,

[02:22:23] - [02:22:31]

Uttam Gupta: \$22... \$22 for... per month for 100,000 credits. This is \$15 for 250...

[02:22:32] - [02:22:48]

Uttam Gupta: 250,000 credits, so I use this, right? And in this, I can obviously show a couple of voices. It also has the same look and feel, and here also you can click on voice, and you can build an instant voice, voice design, professional voice. It's same, just that it's slightly cheaper, so I use this.

[02:22:48] - [02:22:56]

Uttam Gupta: I can click on something that I've already generated. Yeah. I already generated the example that I wanted to show you.

[02:22:56] - [02:22:59]

Uttam Gupta: Can I, yes, let me...

[02:22:59] - [02:23:05]

Audio shared by Uttam Gupta: Trump just told Sam Altman and Elon Musk to forget about slowing down AI. And the reason why is wild.

[02:23:05] - [02:23:09]

Uttam Gupta: Do you think the professional voice clone sounds like me? Did you hear?

[02:23:09] - [02:23:15]

Uttam Gupta: Did you think the professional voice? Yes, it does, it just exactly sounds like me.

[02:23:15] - [02:23:24]

Audio shared by Uttam Gupta: This weekend, the three biggest names in AI did something they never do. They agreed. Dario Amore said AI is getting too powerful too fast.

[02:23:24] - [02:23:29]

Uttam Gupta: So, like, this sounded like, well, there's no fault that we speak very similar, right?

[02:23:29] - [02:23:33]

Audio shared by Uttam Gupta: Altman said he agrees. Elon Musk said Dario is right.

[02:23:33] - [02:23:43]

Uttam Gupta: Right? So, that is the difference, the kind of difference. Let me, like, make you hear, if I can make you hear the instant voice again, right?

[02:23:47] - [02:23:49]

Uttam Gupta: Instant voice.

[02:23:49] - [02:23:54]

Audio shared by Uttam Gupta: Just like the endless waves of the ocean, keep riding each challenge to unlock your productivity potential.

[02:23:55] - [02:23:57]

Uttam Gupta: Hey, this... versus...

[02:23:57] - [02:24:02]

Audio shared by Uttam Gupta: I was on the same side within a day. Then Trump fired back.

[02:24:02] - [02:24:13]

Uttam Gupta: this is so much drastic difference, this is, like, so accurate, right? The professional voice, clear difference is visible, right? It had, like, instant voice clone had an accent, which I don't have.

[02:24:14] - [02:24:22]

Uttam Gupta: So, you can use 11 Labs, it is great, state-of-the-art, like, best in the market, slightly expensive.

[02:24:22] - [02:24:29]

Uttam Gupta: You know, 11 Labs is probably, like, 99.9% accurate or 100% accurate.

[02:24:29] - [02:24:44]

Uttam Gupta: could be 97, 98%, but it does the job, and I'm okay. And the volume at which I am doing it, I produce over 30, 40, 50 videos, so 11 loves was costing a lot more, so I switched to fish, okay?

[02:24:45] - [02:24:49]

Uttam Gupta: So, I'm being honest, I'm telling you the real, difference also.

[02:24:50] - [02:24:53]

Uttam Gupta: Fish is, like, one-third, one-fourth of the cost.

[02:24:53] - [02:25:04]

Uttam Gupta: Yeah. I was spending, like, you know, I was spending, like, 15... \$50, I think almost \$50 to \$80 per month on 11 Labs. On fish, I spent, like.

[02:25:05] - [02:25:09]

Uttam Gupta: \$15, that's it, right? So, 1 fourth, one-fifth.

[02:25:11] - [02:25:20]

Uttam Gupta: All right? So that's the difference. So, I showed you 11 Labs, VISHA Generation. Now...

[02:25:21] - [02:25:28]

Uttam Gupta: Now you learned how do you build a video clone, you learned how do you build a... Audio clone.

[02:25:29] - [02:25:34]

Uttam Gupta: Now, are you ready to build the raw video, which has the video also, which has the audio also?

[02:25:34] - [02:25:53]

Uttam Gupta: Do you want to see that? And after that, we'll take a break, okay? After that, we'll take a 5-minute break. Yes? Let's do that. Now, folks, if we are using Hygen, and we are using

the audio of HeyGen also, it's pretty simple. But if you are using 11 Labs and Phish Audio, instead of connecting it with the API, what I do is,

[02:25:53] - [02:26:03]

Uttam Gupta: I generate audio here, and then I download this. I'll click on download, I'll download this, and then I'll click... go to Hyeen, I'll go to my avatars.

[02:26:03] - [02:26:04]

Uttam Gupta: Right?

[02:26:04] - [02:26:13]

Uttam Gupta: I'll select, for example... which avatar I want to say. Let's select this one, right? I'll use this.

[02:26:13] - [02:26:15]

Uttam Gupta: Build scene by scene.

[02:26:15] - [02:26:19]

Uttam Gupta: And let me show you how the interface of Hygen will look like.

[02:26:21] - [02:26:34]

Uttam Gupta: This is how your Hagen production setup will look like. Please pay attention. On the left side, you have to write the script or upload the audio, right? Write the script or upload the audio. I will upload the audio, you can write the script, copy-paste from Claude.

[02:26:35] - [02:26:41]

Uttam Gupta: In the center, you see the video, you can play it after writing the script, and you can hear, okay?

[02:26:41] - [02:26:48]

Uttam Gupta: On the right side, you see this option, which is... just a second... my...

[02:26:49] - [02:26:51]

Uttam Gupta: This is getting out of power.

[02:26:51] - [02:26:53]

Uttam Gupta: Let me see... okay.

[02:26:54] - [02:27:07]

Uttam Gupta: Okay. On the right side, you see I can change the avatar. If you have multiple avatars, you can just change it from here. You can change audio, also voice. So if you're using Hyjin's model.

[02:27:07] - [02:27:14]

Uttam Gupta: then you can just come here, and you will be able to switch voice and find the voice that you have created from here, right? You can choose that.

[02:27:14] - [02:27:16]

Uttam Gupta: And it can do the job.

[02:27:18] - [02:27:24]

Uttam Gupta: Since I'm not using Hyjin's voice, and then it has a couple of other features also. Like, one feature I'll tell.

[02:27:24] - [02:27:39]

Uttam Gupta: Guys, just like how, say, Claude has multiple models, like Opus, Fable, multiple versions, like ChatGPT has, you know, 5, 5.6, 6, like that, it has

[02:27:40] - [02:27:46]

Uttam Gupta: Similarly, Hyeen also has multiple video models. It has Avatar 3, Avatar 4, Avatar 5.

[02:27:46] - [02:27:47]

Uttam Gupta: Now, tell me...

[02:27:48] - [02:27:58]

Uttam Gupta: which will be the best model? Obviously, Avatar 5, right? The latest model. But which will be the most expensive model? Obviously, the latest model, right? Just like Fable.

[02:27:58] - [02:28:10]

Uttam Gupta: So, in the paid plan of Hyeen, you get limited credits for... to produce with Avatar 5 or 4, but you get unlimited videos to produce with Avatar 3. Is it clear?

[02:28:10] - [02:28:26]

Uttam Gupta: The reason why it is important, how I use it, when I'm recording, when I'm producing very important videos, where I want, like, 100% accuracy in my gestures, I want the clone to adapt the emotion of the video also, I use Avatar 5.

[02:28:26] - [02:28:29]

Uttam Gupta: Because I get 600 credits per month.

[02:28:30] - [02:28:34]

Uttam Gupta: But for rest of the videos, what I do is, I use Avatar 3.

[02:28:35] - [02:28:48]

Uttam Gupta: Are you clear? Did you understand this interface of Hagen? Did you understand the interface of Hagen? And did you understand this overall? For this example, I'm not going to waste my credits, I'll use Avatar 3.

[02:28:48] - [02:28:58]

Uttam Gupta: And then you have other features also, which are useless. You don't need to see that, right? You don't need to overwhelm. You can obviously, go through these features also at your own pace.

[02:28:59] - [02:29:09]

Uttam Gupta: Here, I will upload the audio from Phish or Eleven Labs that you will download. I'll just drag and drop here, it will get uploaded, I'll select it.

[02:29:10] - [02:29:14]

Uttam Gupta: I'll add voice, and it is getting added.

[02:29:15] - [02:29:19]

Uttam Gupta: And then I'll click on play, and when I click on play, you listen.

[02:29:19] - [02:29:24]

Audio shared by Uttam Gupta: Trump just told Sam Altman and Elon Musk to forget about...

[02:29:24] - [02:29:39]

Uttam Gupta: So, when you play, it shows me the hand gestures, facial expression, but it doesn't show the lip movement. Why? The lip movement will only be visible when you click on generate, okay? And you only click on generate. So, I can just name, say, you know...

[02:29:40] - [02:29:43]

Uttam Gupta: AI... Attack!

[02:29:44] - [02:30:03]

Uttam Gupta: prompt, etc, whatever, and click on generate. When I click on generate, I can choose the setting resolution, whatever is available, and I'll click on Submit. And then it will

take few moments to produce, it will take 5-6 minutes, and then your video will look like you, sound like you.

[02:30:03] - [02:30:04]

Uttam Gupta: Right?

[02:30:05] - [02:30:08]

Uttam Gupta: Are you ready to see it? Are you ready to see it?

[02:30:09] - [02:30:13]

Uttam Gupta: Before that, till the time it is taking time to produce it.

[02:30:13] - [02:30:26]

Uttam Gupta: let's take a 5-minute break, right? After that, we have a lot of crazy things coming. Please have patience, and please stick around. Right? So, let's take a 5-minute break, team, till the time video is producing.

[02:30:32] - [02:30:34]

Shasti: Yeah, Tom, we'll take a quick 5-minute break.

[02:30:35] - [02:30:37]

Uttam Gupta: It's... okay.

[02:35:53] - [02:35:57]

Uttam Gupta: Alright, I'll be back. Drop back in the chat if you guys are back.

[02:35:58] - [02:36:18]

Uttam Gupta: And I can't wait to show you, what output we have got of building a clone. We did it extremely fast in front of you. It is the kind of output we have got. And how do we make it 10x better also from there? How do we take it to the superior quality, which can actually go viral, drop.

[02:36:18] - [02:36:25]

Uttam Gupta: back in the chat if I have got your attention back on screen for the next 30 minutes.

[02:36:25] - [02:36:30]

Uttam Gupta: Yes, yes, yes, you are back. Let me share my screen and show you.

[02:36:33] - [02:36:44]

Uttam Gupta: Okay, so I'll show you the version that has got generated, right? And I'll give you a quick heads up that you might feel a lack, or lack of lip sync.

[02:36:45] - [02:36:50]

Uttam Gupta: on Zoom, because of the internet, because of the lag of the Zoom.

[02:36:50] - [02:37:09]

Uttam Gupta: But, Hyjin gives perfectly accurate lip-sync videos, because that's what you see on my Instagram and Vella's Instagram. So I'm just giving you a heads up, that, because of Zoom, you might feel a little bit of joke, but, you know, that's fine. Like, the output is...

[02:37:09] - [02:37:11]

Uttam Gupta: Here is what it is.

[02:37:11] - [02:37:16]

Audio shared by Uttam Gupta: Trump just told Sam Altman and Elon Musk to forget about slowing down AI.

[02:37:16] - [02:37:33]

Audio shared by Uttam Gupta: And the reason why is wild. This weekend, the three biggest names in AI did something they never do. They agreed. Dario Amudez said AI is getting too powerful too fast. Sam Altman said he agrees. Elon Musk said Dario is right. Rivals on the same side.

[02:37:33] - [02:37:35]

Uttam Gupta: Drop Boom in the chat if you...

[02:37:36] - [02:38:00]

Uttam Gupta: are amazed by the possibility of me sitting in front of you, but me being able to create a video on topic that has just happened sometime back, but I was all with you, but I could create a video, you know? There have been times where I was traveling, I was on the airport, and there was a news that had come, and I had to make it. I would not have been able to go to my studio or, like, shoot, like, a proper video.

[02:38:00] - [02:38:02]

Uttam Gupta: I just use my avatar and be able to do that.

[02:38:02] - [02:38:03]

Uttam Gupta: Okay?

[02:38:04] - [02:38:11]

Uttam Gupta: It's so cool. But, you know, how do we take this quality to this... to...

[02:38:11] - [02:38:15]

Uttam Gupta: To a quality like this.

[02:38:16] - [02:38:22]

Audio shared by Uttam Gupta: AI for your Instagram. So, you can figure why you are losing to your competitors, and somehow, that's only number...

[02:38:23] - [02:38:32]

Uttam Gupta: How do you, you know, have... Something like... this...

[02:38:32] - [02:38:36]

Audio shared by Uttam Gupta: Elon's new voice AI model is super fast, while this free tool clones your voice from.

[02:38:36] - [02:38:49]

Uttam Gupta: Right? How do we do that? The difference is the raw video and the visuals that we are adding, the footages that we are adding. You see, this is such a attention-driving clip.

[02:38:50] - [02:38:56]

Uttam Gupta: Now... I taught you how do you build a clone, voice clone, video clone, and you already are...

[02:38:59] - [02:39:00]

Uttam Gupta: already are...

[02:39:00] - [02:39:12]

Uttam Gupta: amazed by it, you know, your final output becomes even more interesting to watch when you have interesting, engaging visuals and assets. And you know.

[02:39:12] - [02:39:20]

Uttam Gupta: Then, even if the clone is not perfect, Vahav's clone is not also 100% perfect, not even mine. But...

[02:39:20] - [02:39:27]

Uttam Gupta: the attention doesn't go to that. Why? Because there are a lot of visual and supporting assets that are coming.

[02:39:27] - [02:39:41]

Uttam Gupta: Which are making it interesting. So, you are not being over-critical. See, you need to understand that right now we are learning, and you know that I'm doing this process. So, you can be over-critical, you can overanalyze, and you can see here is the hand gesture which went here and there.

[02:39:41] - [02:39:49]

Uttam Gupta: But when the audience sees, they don't realize it. Why? Because they don't know behind the scenes of the process, and they are seeing it with the visuals, right?

[02:39:49] - [02:40:07]

Uttam Gupta: So you need to understand that, like, what you see, how you are analyzing, you know the secrets, so you can be over-critical, but the audience is not. 95%, 98% of the people won't even realize the difference between a real person or a clone, right? You go to the Vao's videos, even when he's shooting sometimes real.

[02:40:08] - [02:40:19]

Uttam Gupta: people say, is that your AI clone? So, like, the line has gone, blurred, okay? Now, we move to the step four, which is how do we generate AI footages and visuals that

[02:40:19] - [02:40:32]

Uttam Gupta: keep people watching to the end. And in this section, I'll teach you how to generate AI images and AI videos, right? Which will not be... not only be useful when you create your complete video, but these...

[02:40:32] - [02:40:44]

Uttam Gupta: Principles and learnings will also be useful when you create any ad, right, which you will do in your breakout room, right? Any kind of images, videos, ads, concepts that you want to create.

[02:40:44] - [02:40:46]

Uttam Gupta: This will help you, okay?

[02:40:46] - [02:40:59]

Uttam Gupta: So, first thing you need to understand when you have to create a video, there are two types of clips. There is an A clip, which is A-roll, there is a B clip, which is B-roll. What is an A clip? What is a B clip?

[02:40:59] - [02:41:19]

Uttam Gupta: A-roll is the main video, like, what we have produced. This is, like, A-roll, main video, right? What is a B-roll? B-roll are the supporting images, clips that come in between to support that story, right? Support that video. So those are the B-rolls, and right now, I'm going to teach you how to generate those assets, which are called B-rolls, okay?

[02:41:19] - [02:41:24]

Uttam Gupta: B-roll is what stops the video feel like a talking head and, like, boring video, okay?

[02:41:24] - [02:41:25]

Uttam Gupta: So...

[02:41:25] - [02:41:39]

Uttam Gupta: I'm going to show you how to generate that. Now, the tool that I'm going to use to show that to you, one tool, one stop tool, it is called Hicksfield AI. Hixfield AI here, you can generate images, videos, ads.

[02:41:39] - [02:41:51]

Uttam Gupta: and, do so many cool things just with one subscription, and it has... you must have heard about Seed Dance, Nano Banana Pro, GPT Image, Kling.

[02:41:51] - [02:42:10]

Uttam Gupta: VO3, all of those models are here. So it's like a marketplace of all the models. So you take one subscription, and you get access to all image and video models in one place. So instead of paying to 10 image or video tools, you can use this tool. So this is our favorite, and this is worth over, like.

[02:42:10] - [02:42:20]

Uttam Gupta: 3, 4, 5 billion dollars, so they are big, really big. They have gone from, like, \$20 million in revenue to now \$700 million in revenue in one year, so it's crazy. They are growing really fast. So they are favorite.

[02:42:20] - [02:42:30]

Uttam Gupta: Now, before I show you how to generate images, videos, since there are multiple models in the market, there are a few recommendations I will do... give you so that you are not confused.

[02:42:30] - [02:42:38]

Uttam Gupta: When you are generating images, the best in the market that you can just go without thinking much is Nano Banana Pro or GPT Image. They are great.

[02:42:38] - [02:42:50]

Uttam Gupta: Right? When you are making from Image to a video, you can use Clink 3.0, you can use Seed Dance 2.5 now, right? And if you want to generate a video which has your dialogues also, you can use VO3, you can use Clink 3.0.

[02:42:50] - [02:42:59]

Uttam Gupta: Right? These are just give... I'm giving you... you can always experiment, but these are giving... I'm giving you, like, thumb rules so that you can start from there.

[02:42:59] - [02:43:04]

Uttam Gupta: Right? Now, you might say, Utsa, I'm not a creative person, so I might not need this.

[02:43:04] - [02:43:17]

Uttam Gupta: Or I might not be able to do this. The good news is, you don't need to be creative, you just need a formula and a framework to be able to do that, right? So, just like you have a formula to write better prompts.

[02:43:18] - [02:43:20]

Uttam Gupta: Right? Just like you have a formula.

[02:43:22] - [02:43:37]

Uttam Gupta: to write better prompts in text version to get better output. I have built a formula to write, prompts in a way that you get better image output or video output. And that formula, prompt framework is called Master Director

[02:43:37] - [02:43:38]

Uttam Gupta: framework.

[02:43:38] - [02:43:57]

Uttam Gupta: master director prompt formula. And what it has, it has 7 elements. It has subject, it has action, it has environment, it has camera, it has lens, it has lighting, it has a style reference. Now, some of the jargons you might not understand, or you might not know, and you don't need to. You need to just understand what they mean.

[02:43:57] - [02:44:11]

Uttam Gupta: And then I will make it easy for you. So just hear me out. Seven elements. Subject means who is in that image, what you want in that image, right? Their clothing, their features, how they look. Action, what are they doing in that image? You want them to just sit.

[02:44:11] - [02:44:26]

Uttam Gupta: Be relaxed, smile, be happy, or what it is. What is the environment, what is the surrounding? You should describe that as well, right? If you want a very specific output, these are the parameters you should describe. When you would have not got the kind of image that you always wanted.

[02:44:27] - [02:44:31]

Uttam Gupta: I'm sure you would not have described any of these elements.

[02:44:31] - [02:44:56]

Uttam Gupta: Right? The fourth is the camera. What kind of camera with which you want to get an output from. Like, the image shot from iPhone will look different, an Image that is shot from, like, you know, Hollywood-level camera will look different, right? So if you can describe that, you will get that level of output, right? Lens, right? You know when you change the lenses, you get different kind of images.

[02:44:56] - [02:45:00]

Uttam Gupta: Lighting, what kind of lighting? Do you want a daylight? Do you want a...

[02:45:00] - [02:45:24]

Uttam Gupta: dark light you want, or intense light, what kind of lighting you want. Style references, what kind of style references you want, right? Let me tell you a bit about each of these things before I show you, right? Now, don't worry, in the cheat sheet, in the cheat sheet, what I've done is, there is a master director prompt framework, but what I've done is, for each of these levels, each of these layers, I've given you examples.

[02:45:25] - [02:45:39]

Uttam Gupta: Right? So that you don't have to understand the jargons of, say, photography, cinematography, you don't have to understand the jargons. For example, camera. You don't know what kind of cameras are there, right? So, camera angles are there, camera movements are there, right?

[02:45:40] - [02:45:50]

Uttam Gupta: So, you can have a low angle, you can have a high angle, you can have an eye level, you can have a bird's eye view, which is from the top. You can have camera movements like dolly in, which is zoom in. You can have zoom out.

[02:45:50] - [02:46:03]

Uttam Gupta: Right? You can have rack focus, you can have wake up. Now, you might not know what they look like, I've written the description of them, but you can always try them and see what it looks like, and that will become part of your memory.

[02:46:03] - [02:46:09]

Uttam Gupta: You can use these lens, right, 24mm, 35mm, 50mm, 85mm, and see how it looks like, right?

[02:46:10] - [02:46:17]

Uttam Gupta: You can use these kind of lighting, which is golden or blue, or, you know, edge light, practical light, right?

[02:46:17] - [02:46:27]

Uttam Gupta: film stock, which means there are a certain kind of camera, they shoot in a certain way. So you can use Kodak, Fuji Pro, you can use Kodak Etter.

[02:46:27] - [02:46:48]

Uttam Gupta: Right? You can test it out. So, these are multiple permutation combinations which you can play with to get different kind of images. Do you think this is really helpful for you? That even if you're not creative, even if you don't understand, I myself don't understand all these jargons, so I built it for myself, so that every time I'm generating an image, I can refer back what are the options that I have.

[02:46:48] - [02:46:52]

Uttam Gupta: I can take it from the menu, I can use it, and that's what I'm giving it to you.

[02:46:53] - [02:47:02]

Uttam Gupta: Yes, certainly, it will help. Alright, so I told you that just listen to me, I will try to make it as easy as possible, and later on you can execute, right?

[02:47:03] - [02:47:13]

Uttam Gupta: Cool. So, these are all the 7 elements. I've given you the cheat sheet, which have a breakdown of that, so that you can use it as a menu, and you can just use it, okay?

[02:47:13] - [02:47:21]

Uttam Gupta: Now, let me just... you'll understand better when I'll do it, do things in front of you. So, let... just go to Higgs field and start doing it.

[02:47:21] - [02:47:39]

Uttam Gupta: Right? So, let's go to Higgs field, and this is how it will look like. It has a lot of things, but don't get confused. It's just very interesting tool. Go at the top of it and go to the image. When you go to the image, it has multiple options also. Just go to Create Image.

[02:47:40] - [02:47:42]

Uttam Gupta: Okay? Go to Create Image.

[02:47:43] - [02:47:46]

Uttam Gupta: And here, first I will show you a basic prompt.

[02:47:47] - [02:47:53]

Uttam Gupta: how most people do when they're not aware about this prompting framework. So, let's put...

[02:47:55] - [02:47:57]

Uttam Gupta: Of women in a cafe.

[02:47:58] - [02:48:16]

Uttam Gupta: women in a cafe, and I can use, GPT Image 2.0, and I can select the size here, so I don't have to describe, I can select, like, say, YouTube size, I can select the resolution, and I can select the batch size. Batch size means how many, with one prompt, how many output you got.

[02:48:16] - [02:48:17]

Uttam Gupta: Because?

[02:48:17] - [02:48:35]

Uttam Gupta: if you would have learned about AI, is that with the same prompt also, they get every time different kind of output, right? Because it's a permutation combination, right? So, same prompt can give different kind of output, and that's why you can select four variations, one variation. So, let's click

[02:48:36] - [02:48:53]

Uttam Gupta: it will cost me 14 credits, right? For some \$9, \$8, you get 100, 150 credits, right? For... or you can take a higher plan, right? So, I click on generate, and it will generate 4 versions. So, you see at the top, it is generating 4 versions.

[02:48:53] - [02:49:04]

Uttam Gupta: Right? So, at that time, at the same time, with one prompt, it will give me four variations. Now, this was a basic prompting. Now, do you want to see how...

[02:49:04] - [02:49:09]

Uttam Gupta: we should be writing, or how you will end up writing if you use the Master Director Framework.

[02:49:10] - [02:49:22]

Uttam Gupta: Yes? Do you want to see it? Let me show that to you. Now you understand what will be the difference of the first prompt. First prompt is, we have not given enough information, so it will not match our expectation.

[02:49:22] - [02:49:34]

Uttam Gupta: So, in the second prompt, using the Master Director Framework, what we have to describe, we have to describe what's in our mind, what is our idea, so that it can come closest to our imagination.

[02:49:34] - [02:49:35]

Uttam Gupta: Do you realize?

[02:49:35] - [02:49:44]

Uttam Gupta: The Master Director Framework is used to bring the idea closest to your imagination, which is you write a detail prompt. So, what I'll write is.

[02:49:45] - [02:49:53]

Uttam Gupta: I've already... what I've done is, these images and videos take time to produce, so I've already produced it in advance for you, so that I can show them faster.

[02:49:54] - [02:49:58]

Uttam Gupta: So, the other prompt I will write is.

[02:49:58] - [02:50:00]

Uttam Gupta: I will write a young Indian woman.

[02:50:01] - [02:50:04]

Uttam Gupta: In a cream linen blazer, let me zoom in, right?

[02:50:05] - [02:50:20]

Uttam Gupta: Sipping from a ceramic espresso cup, seated at a marble table in a sunlit corner, cafe morning golden hour, light streamed through the roof to ceiling. Short on 85mm, shallow depth of field, low angle, slight Dutch tilt, Poddk.

[02:50:20] - [02:50:34]

Uttam Gupta: Portra 400, Phil Grain, Style Reference, etc, etc, right? Now you can use help of AI also to write this. You see? These versions, they have generated something, but each version is very different.

[02:50:34] - [02:50:37]

Uttam Gupta: And I wanted something, and it is something else.

[02:50:37] - [02:50:40]

Uttam Gupta: Right? So these are good. Do you think these are good outputs?

[02:50:41] - [02:50:44]

Uttam Gupta: These are absolutely good, these are not bad outputs.

[02:50:44] - [02:50:55]

Uttam Gupta: But they are not close to my expectation. That's not how I wanted it to be. Now, for me to create something that how I want it, I need to be descriptive, so let's generate something here.

[02:50:56] - [02:51:01]

Uttam Gupta: Right? With a more detailed. Now, I've already generated... let me show you the difference.

[02:51:04] - [02:51:21]

Uttam Gupta: See, this is... this is what I had got from first output, and this is what I got from second output. A young Indian woman sitting like this, the light I want like this. Don't you think this is a lot more better, a lot more closer to my imagination, how I described. Do you think? Yes.

[02:51:22] - [02:51:26]

Uttam Gupta: The first one was also good, but it was not close to my imagination.

[02:51:27] - [02:51:36]

Uttam Gupta: This is so much real, this is another version, right? This is so real, right? The lighting, the texture, like, how I wanted.

[02:51:37] - [02:51:45]

Uttam Gupta: Right? I like this. I like... this is how I wanted my character to be, right? I wanted to describe it, and I wanted an emotion.

[02:51:46] - [02:51:52]

Uttam Gupta: yeah, first didn't have the same outfit I wanted, emotion, the person I wanted to look like Anil, right?

[02:51:53] - [02:52:10]

Uttam Gupta: So this is a lot better. You saw the difference of the prompt. When I prompted just a women drinking in a cafe, I got something. But the same idea as a master director prompt, I got something else, right? Same tool, same model, completely different output, right?

[02:52:10] - [02:52:15]

Uttam Gupta: So those words in the prompts are not just for decoration. They are to...

[02:52:15] - [02:52:18]

Uttam Gupta: Bring your imagination into life, right?

[02:52:18] - [02:52:29]

Uttam Gupta: I told you, right? This is... these are... this is what you will see the difference when you will, choose a different, settings that I've told you, okay?

[02:52:31] - [02:52:34]

Uttam Gupta: Now you understood, you know.

[02:52:34] - [02:52:44]

Uttam Gupta: how to generate an image. Image generation is just a matter of you using the prompt. Now, I will take it to the next step, that how do you convert an image into a clip?

[02:52:44] - [02:52:48]

Uttam Gupta: Right? And then when you create multiple clips, you can create an ad.

[02:52:48] - [02:52:55]

Uttam Gupta: Right? So, for that to generate video, you can go to... You know, video.

[02:52:55] - [02:52:56]

Uttam Gupta: And click on Create Video.

[02:52:57] - [02:52:59]

Uttam Gupta: And here, what you will have to do is...

[02:53:01] - [02:53:08]

Uttam Gupta: you can just upload an image. At the top, you can select the model, so I will select, say, I can select...

[02:53:09] - [02:53:13]

Uttam Gupta: At the top, I can select Clink 3.0, General.

[02:53:13] - [02:53:22]

Uttam Gupta: And I can select an image. I can select the image that I have already created. It allows me to just select. So, for example, I can select

[02:53:22] - [02:53:28]

Uttam Gupta: The image that I showed you, this image.

[02:53:28] - [02:53:36]

Uttam Gupta: right, this image, and I can select multi-shot, it will change the angle, and I can describe how I want the video to be.

[02:53:36] - [02:53:50]

Uttam Gupta: And that, prompts, you can improve your prompts with AI, you know that, right? So I'm just showing you that I want a video where there is a slight zoom in, and there's a background of the cafe, I want a gentle atmosphere, and everything, right?

[02:53:50] - [02:54:10]

Uttam Gupta: And in these settings, when you create videos, you can select the model, and you can select the duration. Certain models are able to give up to 8 seconds, some give up to 20 seconds, or 15 seconds. So this can go... give up to 15 seconds, but I'll select 7 seconds. I can select the quality. The higher the quality, the more the duration, the more credit it will cost.

[02:54:10] - [02:54:11]

Uttam Gupta: More seconds?

[02:54:11] - [02:54:24]

Uttam Gupta: Higher quality, more credits, okay? So, lesser seconds, lesser quality, lesser credits. So, this is costing me \$14. If I increase 15 seconds, it will cost me \$30. So, let's 7 seconds, let's click on generate.

[02:54:24] - [02:54:32]

Uttam Gupta: And it will generate a video. It will take... it takes a lot more time to generate a video. So let me show you how a video will look like if I prompt the same.

[02:54:33] - [02:54:35]

Uttam Gupta: It will look like this.

[02:54:39] - [02:54:39]

Audio shared by Uttam Gupta: Don't you.

[02:54:39] - [02:54:43]

Uttam Gupta: I think this is so cool. Like, 7 seconds!

[02:54:43] - [02:54:52]

Uttam Gupta: There's a slight zoom in, there's a, you know, very much zoom in, there are different angles. 14 credits, not \$14, it's just 14 credits.

[02:54:53] - [02:54:57]

Uttam Gupta: Do you think this is such a cool video from... generated just from an image?

[02:54:58] - [02:54:59]

Uttam Gupta: Do you think this is good?

[02:54:59] - [02:55:00]

Audio shared by Uttam Gupta: And then...

[02:55:00] - [02:55:10]

Uttam Gupta: It is so simple, it is simpler than you thought. It is so unbelievable. Now, how do you build ads, right? If you want to build a story, right? Describes different, different scenes.

[02:55:10] - [02:55:11]

Audio shared by Uttam Gupta: Oh my god.

[02:55:11] - [02:55:15]

Uttam Gupta: Generate different clips, and combine it, and you can add a voiceover.

[02:55:16] - [02:55:18]

Uttam Gupta: story to that.

[02:55:18] - [02:55:24]

Uttam Gupta: Right? Which we'll do in the breakout room. So, I told you how you can generate from an image to a video.

[02:55:26] - [02:55:28]

Uttam Gupta: Right? I showed you how do you generate an image.

[02:55:29] - [02:55:31]

Audio shared by Uttam Gupta: Bromet?

[02:55:31] - [02:55:50]

Uttam Gupta: Image to a video. Now I want to show you something interesting, right? Something a little more, which is not part of the assets, part of the deck, but I'll still show you a little more. What if you want to generate a video, which has some dialogue, right? So let's generate a...

[02:55:51] - [02:56:07]

Uttam Gupta: 5 to 7 seconds of clip, which is talking about how AI can take away someone's job. So here, I will give this a prompt. I have actually written this prompt, from AI only. That script is, I might lose my AI job, character I have defined, and everything. I've used AI.

[02:56:08] - [02:56:14]

Uttam Gupta: Here, I will use... I will not use this model. I will use a different model, let's say I can use VO3.

[02:56:15] - [02:56:17]

Uttam Gupta: I can use VO3.

[02:56:17] - [02:56:18]

Uttam Gupta: And...

[02:56:18] - [02:56:18]

Audio shared by Uttam Gupta: Alright.

[02:56:18] - [02:56:22]

Uttam Gupta: I can use multi-shot, I can use, and I can generate.

[02:56:22] - [02:56:27]

Uttam Gupta: For 22 graduates. So, it will take some time. I've already generated... let me show that to you.

[02:56:30] - [02:56:33]

Uttam Gupta: Where is it?

[02:56:36] - [02:56:37]

Uttam Gupta: Yes, here it is.

[02:56:39] - [02:56:41]

Uttam Gupta: Listen, it has a dialogue also.

[02:56:43] - [02:56:47]

Audio shared by Uttam Gupta: I think... I might lose my job. Not today, maybe not tomorrow.

[02:56:48] - [02:56:51]

Audio shared by Uttam Gupta: But because of AI, it feels possible.

[02:56:51] - [02:56:53]

Audio shared by Uttam Gupta: I think... Might lose much.

[02:56:53] - [02:56:57]

Uttam Gupta: Do you think this is crazy? Drop crazy in the chat if you think this is crazy.

[02:56:57] - [02:56:59]

Uttam Gupta: This is amazing, right?

[02:57:00] - [02:57:11]

Uttam Gupta: this is so realistic, it has audio, it has dialogue, I can combine multiple clips, and I will have a short ad, right, which I can use for my business and everything, right?

[02:57:11] - [02:57:26]

Uttam Gupta: And in the... in... here, I had not described the frame. I can upload my image also here, or I can use any versus image, like Elon Musk or anything. I can put my image and generate the same output, and then it will look like this.

[02:57:27] - [02:57:30]

Uttam Gupta: Let me show that to you. This is so cool!

[02:57:33] - [02:57:35]

Audio shared by Uttam Gupta: I think I might lose my job.

[02:57:35] - [02:57:41]

Audio shared by Uttam Gupta: Not today, maybe not tomorrow, but because of AI, it feels possible. And honestly.

[02:57:42] - [02:57:44]

Audio shared by Uttam Gupta: That's scary. But I also know one thing.

[02:57:45] - [02:57:46]

Audio shared by Uttam Gupta: I can't ignore it anymore.

[02:57:47] - [02:57:59]

Uttam Gupta: It's so good, right? Obviously, the voice is, like, the accent is different, but you get the idea, right? You get the idea. This is so good, this looks like me, this sounds like me, and this is good, this is crazy, right?

[02:58:00] - [02:58:09]

Uttam Gupta: So this is how you can generate, you can use VO3, you can use Clink, you can give the dialogue, you can give the script, and you can get it, right? I just gave my one picture and it was able to do it.

[02:58:10] - [02:58:10]

Uttam Gupta: Bait?

[02:58:11] - [02:58:18]

Uttam Gupta: So this is how you can generate image. You can convert image to video, and you can generate videos with dialogs as well.

[02:58:18] - [02:58:19]

Uttam Gupta: Alright?

[02:58:19] - [02:58:21]

Uttam Gupta: Now you have the assets.

[02:58:21] - [02:58:35]

Uttam Gupta: Now, I want to teach you something additional, which is not there. Now it moves to the edit, but I'll show you something crazy, which I've already prepared. See, if you remember, our script was around Dario, around Trump.

[02:58:35] - [02:58:45]

Uttam Gupta: So, I would want my video to have similar clips, which are relevant to my video. So, what I did was, in Claude only, I'll show you, what I did was...

[02:58:45] - [02:58:48]

Uttam Gupta: I will show you something that...

[02:58:49] - [02:58:51]

Uttam Gupta: you know, what I did was...

[02:58:52] - [02:59:06]

Uttam Gupta: We have lesser time, and I'm not supposed to show this, but I want to show this to you. Yes. So, I have already done it so that I can still show it to you. So, what I did was, you see, I, wrote the AI, the script.

[02:59:06] - [02:59:23]

Uttam Gupta: Then what I did was that what can be the visual I can generate from Hicksfield for this video, especially hook, tell me what will make people stop, right? So then it gave me prompts of the images that I can use for my video related to my

[02:59:23] - [02:59:32]

Uttam Gupta: video. And let me show you what I did. I created, with the same process that I showed you, what I did was, I created certain images.

[02:59:32] - [02:59:37]

Uttam Gupta: what I did was... I... generated...

[02:59:37] - [02:59:54]

Uttam Gupta: First, I generated this, right? Where there is, on one side, there is Trump and this. Do you think this is great? Drop great in the chat if you think. But I wanted to try something more creative, so then what I did was, I gave Trump's image, and I said, this guy, make him look angry, and make him point at someone.

[02:59:54] - [03:00:01]

Uttam Gupta: Right? I generated one image. Then I gave another prompt where I gave the images of all these three people.

[03:00:01] - [03:00:20]

Uttam Gupta: Oldman, Dario, Elon Musk, and I said, can you make them stand together, hold each other's hands, right? Like this, right? So that they are together, for the first time, competitors are together. And then what I did was, I gave a prompt where I combined both the images, where I said, can you combine these images where

[03:00:20] - [03:00:35]

Uttam Gupta: Donald Trump is pointing finger and shouting at all of them, saying that we will not slow down in AI, right? Can you give that? Right? So that's how I generated images, by using better prompting. Then I came on video, and I made a clip out of it.

[03:00:35] - [03:00:45]

Uttam Gupta: Right? Let me show that, how cool that it is. And that is what I mean, when you have right clips, your video will be very cool. And it is being creative, right? Let me show that, this is so good.

[03:00:47] - [03:00:48]

Audio shared by Uttam Gupta: I shouldn't have Ow!

[03:00:53] - [03:01:08]

Uttam Gupta: Basically, my prompt was, he's shouting, they're getting afraid, and then in the background, there is US and China, and the world is falling apart. That's what I wanted to show. So I got this video also, right? Which is what I'm going to use in the edit.

[03:01:08] - [03:01:14]

Uttam Gupta: So you realize the same process, just the creativity. I created an image, and then I created a video also.

[03:01:14] - [03:01:15]

Uttam Gupta: Okay?

[03:01:16] - [03:01:20]

Uttam Gupta: Understood? Did you realize the creativity of it? Yes?

[03:01:23] - [03:01:37]

Uttam Gupta: Also, before I move to the edit part, edit part is where we combine the raw video, these assets, and the music and everything, which I'll show you in a couple of minutes.

[03:01:37] - [03:01:45]

Uttam Gupta: I want to show you that what I ended up doing was that for the whole video, I asked AI to give me prompts so that I can generate images.

[03:01:45] - [03:01:47]

Uttam Gupta: And then what I did was.

[03:01:47] - [03:01:56]

Uttam Gupta: I gave, for our video itself, right? I generated this image where, you know, AI only gave this prompt. You see, it gave this prompt.

[03:01:56] - [03:02:14]

Uttam Gupta: Three giant chess kings on a dark marble chessboard, one black obsidian, one white ivory. It gave me all of that, I generated this. It gave me another prompt that close up to a futuristic speedometer, right? I gave that, and I got this, right?

[03:02:15] - [03:02:35]

Uttam Gupta: That we are running at a higher speed. I gave another prompt, and I got this, that emergency alarm, right? And I got this China versus US, and I got these. And these are all the assets that I've got for the same video. Now, don't you think our video will become much more engaging when these assets are coming? Yes, no, maybe in the chat?

[03:02:35] - [03:02:39]

Uttam Gupta: And how easy it is? Yes, no, maybe in the chat? Yes?

[03:02:40] - [03:02:44]

Uttam Gupta: That's how I did it, and that's how I'll show you how do I assemble everything.

[03:02:44] - [03:02:52]

Uttam Gupta: So, this is all how do you generate an image? How do you convert an image into a clip, and use your creativity. That's it. That's how simple it is.

[03:02:52] - [03:02:56]

Uttam Gupta: But it requires a lot of iteration and creative thinking.

[03:02:56] - [03:03:03]

Uttam Gupta: Now, before we move on to the edit, do you want to see something very, very cool, like, when it comes to video?

[03:03:03] - [03:03:20]

Uttam Gupta: You... see, in fact, I have generated a background of a video also on Hicksfield by saying that, hey, can you give me a good background of a room with dark and warm light, which looks like a YouTube video background, and I'm going to use that, right? This is so good.

[03:03:21] - [03:03:32]

Uttam Gupta: Now, do you want... have you seen some meme sort of videos where the kids are dancing, or animals are dancing? Have you seen those videos on Instagram or YouTube?

[03:03:32] - [03:03:47]

Uttam Gupta: Do you want to see such cool things how they are made? Just for fun, I want to show you. That's not part of the thing, right? And that is why we'll get 5 minutes late. Don't complain, right? I hope that's fine. Do I have your permission to show it to you? You will enjoy it.

[03:03:48] - [03:03:49]

Uttam Gupta: Yes?

[03:03:50] - [03:04:02]

Uttam Gupta: Let me show that to you, right? So you come to Video, and in the, at the top, you see Create Video, Edit Video. You go to Motion Control, okay? You go to Motion Control.

[03:04:03] - [03:04:05]

Uttam Gupta: And here.

[03:04:05] - [03:04:13]

Uttam Gupta: In the first video, you upload whatever video you want, right? You can download a dancing video you want, a dialogue video you want, an angry video.

[03:04:13] - [03:04:26]

Uttam Gupta: And then, you have to add what you want to replace it with, right? I want to replace it with a kid's picture, which is this, right? Such a cute picture I generated from experience, it's not real.

[03:04:26] - [03:04:33]

Uttam Gupta: And I use Clink 3.0 Motion Control, 720, Scene Control, and it is asking...

[03:04:35] - [03:04:41]

Uttam Gupta: Who you want to make the main character, I told Image, which is the second image, and I'll click on Generate.

[03:04:41] - [03:04:42]

Uttam Gupta: Vaid?

[03:04:43] - [03:04:54]

Uttam Gupta: One is that, and I want to, for example, change it. I want to create an animated version of the kid, and I can take a Pixar kid, right, and I can do that.

[03:04:54] - [03:04:58]

Uttam Gupta: Let me show the output, and tell me, if you like it, tell me in the chat, okay?

[03:05:02] - [03:05:03]

Audio shared by Uttam Gupta: Oh, you don't have to

[03:05:07] - [03:05:11]

Audio shared by Uttam Gupta: I can see the water.

[03:05:14] - [03:05:16]

Uttam Gupta: This is... So cute!

[03:05:16] - [03:05:18]

Uttam Gupta: This is so cute.

[03:05:19] - [03:05:21]

Uttam Gupta: Just look at this one.

[03:05:21] - [03:05:30]

Audio shared by Uttam Gupta: I could be the one fun.

[03:05:32] - [03:05:40]

Uttam Gupta: Now, this is so cute, right? Do... try it, you can try it with your own face, your kid's face, you would definitely enjoy it.

[03:05:40] - [03:06:02]

Uttam Gupta: And the possibilities are endless. For example, you record a video of you talking about something, but you want to replace it with a better picture of you, right? You can do that. You want to replace it with someone else narrating it, you can do that, right? It's so fun! I wanted to give you something fun so that it's re-energizing, and it's something that you would want to try right after the session. I hope you enjoyed. Did you enjoy it?

[03:06:02] - [03:06:03]

Uttam Gupta: Yes?

[03:06:05] - [03:06:07]

Uttam Gupta: Guys, I went overboard.

[03:06:07] - [03:06:27]

Uttam Gupta: in the Image and video session, beyond what I was supposed to teach you, something that was part of the session, I went beyond that, right? Now let's come back, let's come back and bring... make our final video, and edit it. Editing is bringing everything together,

right? Let's do that in 5 minutes, stitching everything together, and then we'll end the session in 5 minutes, okay?

[03:06:27] - [03:06:31]

Uttam Gupta: Remember the split where I told you that

[03:06:31] - [03:06:37]

Uttam Gupta: Editing is a lot of manual work. Now, for that, I'm going to use a tool called Weed.io.

[03:06:38] - [03:06:46]

Uttam Gupta: WeedWither.io, okay? I hope that is clear. WeedWither.io. It's a tool to edit your videos, and we'll go there.

[03:06:47] - [03:06:53]

Uttam Gupta: And, this is how it looks like, and, I'm going to show you that

[03:06:53] - [03:06:56]

Uttam Gupta: how you first download this video from Hijin?

[03:06:57] - [03:07:07]

Uttam Gupta: You can just download this video from Hyjin. I've already downloaded. You come here, and you click on... on the left side, you click on Edit Video, okay? You click on Edit Video.

[03:07:11] - [03:07:19]

Uttam Gupta: And then you upload the video, right? I have already uploaded the video. I can upload the video that I have already downloaded.

[03:07:19] - [03:07:35]

Uttam Gupta: Right? Right now, I generated, I am uploading, it has got uploaded, okay? That is step number one. Now, to edit a video, there are five elements, folks. You have to add a hook with the clip that we have generated, you have to add a music, you have to add B-rolls, you have to add subtitles, okay?

[03:07:35] - [03:07:53]

Uttam Gupta: Hook, music, subtitles, and background and B-rolls, okay? These four elements. Let me do that quickly with you. And this tool has a lot of AI features. It has a lot of AI features which allows you to do that. For example, this video, first of all, I'll change the dimension. I'll click here.

[03:07:54] - [03:07:58]

Uttam Gupta: And at the bottom, I can change the dimension, and I can make it real.

[03:07:59] - [03:08:01]

Uttam Gupta: Now it has become vertical, one step done.

[03:08:02] - [03:08:05]

Uttam Gupta: I can click on Remove Background, and it will remove the background.

[03:08:06] - [03:08:07]

Uttam Gupta: Right?

[03:08:07] - [03:08:12]

Uttam Gupta: On the left side, I can click on audio, and I can add the music. Just click the button.

[03:08:12] - [03:08:14]

Audio shared by Uttam Gupta: and I can add the music.

[03:08:16] - [03:08:21]

Uttam Gupta: And here is the timeline where I can see this, right? The music can...

[03:08:21] - [03:08:26]

Uttam Gupta: I can click on plus, and it can get added here. It is just taking time.

[03:08:26] - [03:08:30]

Uttam Gupta: So, music got added, right here. Music has got added.

[03:08:30] - [03:08:31]

Audio shared by Uttam Gupta: Two exam oil.

[03:08:31] - [03:08:32]

Audio shared by Uttam Gupta: and Elon Musk...

[03:08:33] - [03:08:35]

Uttam Gupta: I can reduce the audio of this.

[03:08:36] - [03:08:41]

Uttam Gupta: I can click on Create Bureaus, and this tool can also

[03:08:41] - [03:08:53]

Uttam Gupta: generate B-rolls, right? And it will ask me what kind of B-rolls I want. I can say select, I want realistic B-rolls, and I can click on generate Image. And it will start to generate image for me.

[03:08:54] - [03:09:03]

Uttam Gupta: Right? B-rolls, someone is asking what is B-roll, I already told. The supporting clips and Visual. So, you see music, background music I've added, it is adding the B-rolls also.

[03:09:03] - [03:09:16]

Uttam Gupta: And the third most important part which makes a video engaging, I can change the size of this also, by the way. I can make it smaller, like on the left side, like how those videos come, right? You see? It will start to look very much similar.

[03:09:16] - [03:09:23]

Uttam Gupta: I can add a background now, right? I have already added a background, I'll show you.

[03:09:23] - [03:09:26]

Uttam Gupta: the background that I generated from Higgs field itself.

[03:09:27] - [03:09:30]

Uttam Gupta: Which is... which looks like this.

[03:09:31] - [03:09:40]

Uttam Gupta: You see, this is the background, right? Which I wanted to make it look like a studio. I can just do that, and here...

[03:09:43] - [03:09:46]

Uttam Gupta: I want to just take it... Below...

[03:09:47] - [03:09:51]

Uttam Gupta: I can right-click and bring it backward.

[03:09:52] - [03:10:01]

Uttam Gupta: Bring it backward, and you see it looks like this. Now it looks a lot better. So we have added a music, we have added a background, right?

[03:10:01] - [03:10:10]

Uttam Gupta: In our video, we have added these bureaus that AI has added. You see, these are... it has added these, but we can add additional also.

[03:10:10] - [03:10:23]

Uttam Gupta: And now we need to add the most important part, which is the subtitles, right? The subtitles. And this is the most valuable part of this, that it has multiple viral subtitle features, which is, you click on subtitles.

[03:10:24] - [03:10:36]

Uttam Gupta: And you click on auto-generate, so it will just, transcribe your clip, and it will auto-generate, auto-place subtitles. Click on Auto Subtitle in English, so it will start to auto-populate.

[03:10:36] - [03:10:44]

Uttam Gupta: Pail to initiate transcription. Okay, subtitle already exists, so it already, I'll show you, it already has something.

[03:10:45] - [03:11:01]

Uttam Gupta: Let me show you that I already... So, when you do that, you will see a lot... yeah, it works a lot like CapCut, absolutely, it works a lot like CapCut. You can use... I'm showing you Weed.io, you can use CapCut, you can use SubMagic, you can use Edits also, okay?

[03:11:02] - [03:11:22]

Uttam Gupta: Now, one thing I want to show you is the subtitles, which is where you click on styles, and you will see a lot of viral styles. You can see red color version, you can see these versions, you can see these versions, right, which are viral, which looks very captivating and interesting. I have chosen the third one, you can try any of these.

[03:11:22] - [03:11:28]

Uttam Gupta: Right, whichever feels, right for the feeling of that script and video.

[03:11:29] - [03:11:32]

Uttam Gupta: Right? And you can just change the placements and everything.

[03:11:32] - [03:11:35]

Uttam Gupta: Now you see, what I've added is...

[03:11:36] - [03:11:46]

Uttam Gupta: I've added a background music, I've added these... this clip that I've generated, right? B-roll. I've added, the background, and I've added the subtitles.

[03:11:46] - [03:11:48]

Uttam Gupta: Are you ready to see the...

[03:11:49] - [03:12:00]

Uttam Gupta: Final output. Obviously, folks, quick disclaimer, I'm not a professional editor, so I can only show you the basics of it. You can watch a few more YouTube tutorials to learn editing.

[03:12:00] - [03:12:17]

Uttam Gupta: And you can use up different tools. My job was to show you how to assemble things, how things come together. Now, if you spend more time, and I also spend only 5 minutes. If you spend 30 minutes, you can improve the quality of it. But are you ready to see the final output where we are putting together everything?

[03:12:18] - [03:12:18]

Uttam Gupta: Yes?

[03:12:19] - [03:12:26]

Uttam Gupta: Are you ready? Yes, if I would get a lot of yeses, I would... I will be more happy to show it to you guys.

[03:12:27] - [03:12:32]

Uttam Gupta: Yes, we have together put a lot of first, like, last 2 hours, 40 minutes.

[03:12:33] - [03:12:41]

Uttam Gupta: And let's see it, okay? I'm very excited, and especially, like, the hook part, right? Hook will look so crazy, and it will make the video more interesting.

[03:12:42] - [03:12:56]

Audio shared by Uttam Gupta: Trump just told Sam Altman and Elon Musk to forget about slowing down AI. And the reason why is wild. This weekend, the three biggest names in AI did something they never do. They agreed. Dario Amodei said AI is getting too powerful too fast.

[03:12:56] - [03:13:08]

Audio shared by Uttam Gupta: Sam Altman said he agrees. Elon Musk said Dario is right. Rivals on the same side. Within a day. Then Trump fired back. The only guardrail AI needs? A strong president. Whoever wins AI wins.

[03:13:08] - [03:13:20]

Audio shared by Uttam Gupta: But wait, it gets worse. China called the whole thing fearmongering, a Cold War trap to keep America ahead. And even Dario admits China is the one problem he can't solve. Monday morning, chip stocks crashed.

[03:13:20] - [03:13:31]

Audio shared by Uttam Gupta: So here's what nobody is telling you. The people building AI are scared. The people controlling it are not, and your job is stuck right in the middle. Who's right? Comment below. Follow before the next move drops.

[03:13:32] - [03:13:52]

Uttam Gupta: Do you think that was called cool? It is not right now. Having the more visuals that I have generated, then it will look even better, because I don't... didn't have time. But this is what we have achieved in 2 hours, right? This is what we have achieved in 2 hours. The more time you get, the more finishing you have, but you... I hope you got the principles, I hope you got the process.

[03:13:52] - [03:14:00]

Uttam Gupta: Right? So this is how end-to-end the process looks like of creating content and everything around it, right?

[03:14:01] - [03:14:10]

Uttam Gupta: final assembly, I have already told you, and here's a recap of idea to script to cloning AI footage and editing, right? Now...

[03:14:10] - [03:14:35]

Uttam Gupta: you have to just start, and here is a challenge for you, and before this week ends, I would want you to make something, right? Right now, in the breakout room itself, you'll make something, but before the week ends, I would want you to probably make your first clone, put it on Instagram, LinkedIn, or send it to me, right? How many of you are accepting this challenge? How many of you are going to create one version of Vido? Maybe your clone version, or some

[03:14:35] - [03:14:43]

Uttam Gupta: clip, maybe the fun version that I showed it to you, and you are going to produce it. How many of you are going to take action?

[03:14:43] - [03:14:44]

Uttam Gupta: Yes?

[03:14:44] - [03:14:46]

Uttam Gupta: Brilliant!

[03:14:46] - [03:14:49]

Uttam Gupta: Challenge accepted in the chat. Brilliant.

[03:14:49] - [03:14:50]

Uttam Gupta: Cool!

[03:14:50] - [03:15:04]

Uttam Gupta: Remember the four reasons I told you that is why you are not posting, not having time, cannot write, no idea, fear of judgment? Now you see you have answered and achieved all of them. The only thing is that you have to publish now.

[03:15:04] - [03:15:13]

Uttam Gupta: And that brings me to the end of the session. Thank you so much for being a lovely audience. You can connect with me by scanning, by, like, connecting on Instagram, LinkedIn, or emailing me.

[03:15:13] - [03:15:25]

Uttam Gupta: And that was all from me. Thank you so much, folks, for being a lovely audience, and yeah, I hand over the stage, to the team to take it forward from here.

[03:15:26] - [03:15:41]

Shasti: Thank you so much, Uttam. I think that was a wonderful last three hours we had. How was it, people? Let us know in the chat, and we'll also launch a poll very quickly, and go ahead and let us know how this wonderful session...

[03:15:41] - [03:15:53]

Uttam Gupta: Yes, please, folks, please rate the poll. That really helps us to get feedback and understand what you liked and what we can do better. Your feedback is really important, so please answer that.

[03:15:54] - [03:16:13]

Uttam Gupta: And stick around, like, the next, part of the session is the breakout, which is where you immediately execute. And I highly recommend that even if you are getting late, please stick around, because if you can immediately execute something, you will have a lot

more fresh. By the folks, you have someone special meeting you. See someone who has come to meet you?

[03:16:13] - [03:16:25]

Uttam Gupta: Her name is Hope. She has come to meet you. She was holding for 3 hours, but she came to meet you guys, right? So, yeah, she's just waiting for me to end the session. Yeah, she's beautiful.

[03:16:27] - [03:16:31]

Uttam Gupta: Yes, her name is so cute baby. Okay, yes.

[03:16:32] - [03:16:48]

Uttam Gupta: Okay, I'll leave that, here, and I'll say bye. Bye, folks, you can connect with me, please answer the poll, and please, please participate in the breakout room, alright? We have very cool mentors supporting you, so you will feel really confident, okay? Over to you, Shasti, and I'll take Leith. Bye!

[03:16:48] - [03:16:51]

Shasti: Thank you so much, Uttam. We'll see you soon, again.

[03:16:51] - [03:16:52]

Uttam Gupta: Yeah, yeah.

[03:16:53] - [03:17:10]

Shasti: Perfect. With that, we are done with the learning part of our Day 2 session, and how many of you now clearly got the understanding of what playbook that we use here at Outskill? On a scale of 1 to 10, where do we stand currently?

[03:17:12] - [03:17:16]

Shasti: Okay? I see a lot of 10s, 20s...

[03:17:18] - [03:17:32]

Shasti: Very complex. Yes, folks, as I mentioned, this is something that we take an entire day. The kind of outcome that you saw, we take entire day to get to that particular outcome, and we tried our best, Uttam tried his best to, you know, make it

[03:17:32] - [03:17:51]

Shasti: as easy and simple as possible for you all to get an understanding, just in 3 hours. I think all of us were glued to our screens for the last 3 hours, so I'm so glad that you guys are

here, and we will get into the breakout rooms very soon. But a quick check, as I said, we have an announcement to make, and then I will be,

[03:17:51] - [03:18:00]

Shasti: Giving you guys a walkthrough of what we'll be doing inside the breakout rooms, and then we will get into the breakout rooms. But before that, do we need a break, or shall I continue?

[03:18:00] - [03:18:01]

Shasti: Let me know in the chat.

[03:18:05] - [03:18:06]

Shasti: Okay.

[03:18:06] - [03:18:12]

Shasti: I see majority of you are saying break, and a couple of you are saying continue.

[03:18:12] - [03:18:17]

Shasti: I'll just wait for others also to respond so that we can go with majority.

[03:18:19] - [03:18:20]

Shasti: Okay, folks.

[03:18:20] - [03:18:45]

Shasti: 90% of you are asking for a break, so this is what we do. We will quickly take a 5 minutes break, right? So everyone who wanted a break, just move around, go grab your coffee, tea, anything that you'd want to do, and for those of you who said you do not need a break, what we will do is the team will drop the breakout room, the webinar ID, the workbook link, and also the reflection link. So go ahead, generate your reflection batches, and also

[03:18:45] - [03:18:53]

Shasti: use the AI companion option to get a quick summary of everything that we have done so far, and by that, I think the 5 minutes will be done as well.

[03:18:54] - [03:19:01]

Shasti: With that said, our team, we can drop the reflection link, workbook link, and the webinar ID, and then we can quickly take a 5-minute break and come back.

[03:24:11] - [03:24:18]

Shasti: Okay, everyone, are we guys back from the break? Drop a quick back in the chat if you guys are back from the break.

[03:24:21] - [03:24:22]

Shasti: Okay.

[03:24:22] - [03:24:23]

Shasti: Great, great.

[03:24:24] - [03:24:42]

Shasti: Perfect. I see most of us are back from the break, so we will not, waste any more time. We will quickly get started, right? And, so this is what we are going to do. I'm gonna do my announcement part, and then I'm gonna explain on the workbook that we are going to do inside the breakout rooms, and then we get into the breakout rooms, right?

[03:24:43] - [03:24:57]

Shasti: Are we clear? So I'm gonna pause the chat for some time, because I do not want myself to get distracted, and all of you also to get distracted by posting on the chat. So I'm gonna pause the chat for some time. Before that, quickly let me know if you guys can see my screen.

[03:25:04] - [03:25:16]

Shasti: We will get into the questions about how we can go into breakout rooms, just allow me a couple of seconds to let you guys know what we want to announce, and then we will take all the questions about the breakout room.

[03:25:23] - [03:25:25]

Shasti: I hope my screen is visible.

[03:25:29] - [03:25:30]

Shasti: Yes.

[03:25:30] - [03:25:31]

Shasti: Perfect.

[03:25:31] - [03:25:44]

Shasti: So, as I've been talking about it from yesterday, I'm gonna pause the chat for a minute here. As I've been talking about it from yesterday, that we do have a, announcement to make, right? And...

[03:25:44] - [03:26:01]

Shasti: at Outskill, we have always believed in over-delivering, especially when we see the kind of commitment that you guys showcased just in the last two days, right? And just yesterday, I was going through the LMS, and then I saw somebody, I'm not sure if I'm getting the name right, it was

[03:26:01] - [03:26:05]

Shasti: call, or... I'm not... I'm sorry if I'm pronouncing it wrong again.

[03:26:05] - [03:26:17]

Shasti: Right? He went ahead and created an entire document of an FAQ, which is based upon all the questions that were put into the chat, and all the questions that were asked in the Q&A box. He made an entire brief

[03:26:17] - [03:26:25]

Shasti: briefly, document, and he posted it on the Reflection channel as well, to help the community. So if this is the kind of,

[03:26:26] - [03:26:37]

Shasti: commitment that we are getting from you guys, we also thought that let us also do something for the learners to improve their... and also help their learning journey, starting from tomorrow. So, you completed

[03:26:37] - [03:26:54]

Shasti: two days of your accelerator program. We already seen the strong curiosity that you guys have, and the kind of questions you were posting it on the chat and also on the Q&A box, right? So that's why what we did was, we thought, instead of just answering your questions about

[03:26:54] - [03:27:10]

Shasti: sorry, content in the session, or on the chat, we thought that let's have a dedicated session just to cater to all the questions that you have about the questions, or maybe the sessions, the content, and anything in general about AI.

[03:27:10] - [03:27:18]

Shasti: So that's why we have planned something called Bonus Office Hours, which will be starting from tomorrow. Now.

[03:27:18] - [03:27:36]

Shasti: I know most of you might have questions about, what is this, what time is it? I will get to that, but try to process what I'm trying to tell, right? Take a moment, if you want a screenshot, go ahead and take it. Of course, you're gonna get the recordings, but let me explain on what these bonus office hours are, for.

[03:27:36] - [03:27:52]

Shasti: Right? Starting from tomorrow, we will be introducing you to bonus officers. When I say officers, it's a session, it's a one-hour session, where you will be joining that, and we will have a dedicated mentor who will be answering all the questions that you have.

[03:27:52] - [03:28:14]

Shasti: about what you learned in Day 1, what you learned in Day 2, or anything about a workbook that you're trying to solve when you're stuck somewhere, you can post your question, and the mentor will be able to answer, right? And not just sticking to Day 1 content and day 2 content. Anything about AI in general that you have a doubt, you can come to these office hours and ask the mentor, and he will be able to answer it live.

[03:28:14] - [03:28:21]

Shasti: Are we clear? Are we clear on what office hours are meant to be? Let me know in the chat. Drop a quick yes if you guys are clear.

[03:28:24] - [03:28:25]

Shasti: Okay.

[03:28:25] - [03:28:26]

Shasti: Great.

[03:28:26] - [03:28:42]

Shasti: I see a lot of yeses, so I am assuming that most of you are clear. Now we will get to the part about, what timings do we start, where do we find the links, etc, etc. I'll get to all those questions, but folks, before that, a quick disclaimer.

[03:28:42] - [03:29:07]

Shasti: These office hours are optional, not mandatory, right? Because this is not part of your schedule, this is not part of your 14-day program that you have signed up for. So, the timings might not be part of the schedule that you already have, so this is completely optional, not

mandatory at all. So, if you have time to attend it, you can go ahead and attend. And we understand that all of us are working professionals, and you might have other priorities

[03:29:07] - [03:29:08]

Shasti: statements.

[03:29:08] - [03:29:19]

Shasti: In these timings that we are conducting the office hours. So, for that, we will also be providing the recordings. If you are not able to make it live to the session, you will get the recordings on LMS to watch later.

[03:29:19] - [03:29:21]

Shasti: I hope you are clear with that.

[03:29:21] - [03:29:22]

Shasti: Right?

[03:29:23] - [03:29:39]

Shasti: Yeah, perfect. Now, this is how office hours are going to be conducted. So, our office hours will start from 6pm to 7pm IST. This will be a 1-hour slot, where all of you can come, ask your questions, and mentor will be able to answer it.

[03:29:39] - [03:29:45]

Shasti: Right? The links will be posted on LMS. Same like how you join your DALI sessions.

[03:29:45] - [03:30:03]

Shasti: From your live session tab on LMS, we will have a dedicated live session called Office Hours. You will be seeing it maybe post the session today or before tomorrow, 6pm IST. You can go there, click on it, and join the session. The process remains the same on how you can join the session. All you need to do is go check your LMS. That's it.

[03:30:04] - [03:30:17]

Shasti: And how is the office hours going to be conducted? One, you will not have an option to unmute. We will be using something called Slido. You would have gotten introduced to it in your breakout rooms yesterday if you have attended the breakout rooms, right?

[03:30:17] - [03:30:30]

Shasti: So, we will be using Slido platform. We will share a link in the office hours, and you can post all the questions that you have, and mentors will be seeing all the questions that are coming in Slido, and they will be answering them live.

[03:30:30] - [03:30:37]

Shasti: This is how we are going to conduct the officer, and it is strictly for all your doubt-solving purpose, but we are not restricting

[03:30:38] - [03:30:53]

Shasti: for you to ask questions only about day one and day 2, you can go ahead and ask questions about anything that you would want to know about AI, right? This is what office hours are for you guys. Drop a yes or no in the chat if you guys are clear.

[03:30:53] - [03:31:06]

Shasti: It is 6pm to 7pm IST, so I'll let you guys convert it in your own time zones, because I do not want to mess with that. So, it is from 6pm to 7pm IST, and you guys can convert it into your time zones.

[03:31:07] - [03:31:16]

Shasti: This is not going to be on Saturday and Sunday, because Saturday and Sunday, we have a full day session, right? So this is going to be from tomorrow till Friday.

[03:31:17] - [03:31:36]

Shasti: Yes, all of you will be on mute. You can post your questions on Slido, and the mentor will be answering it live. The reminders on WhatsApp will be sent, the links will be uploaded on LMS, recordings will also be made available on LMS. This is from starting from tomorrow to Friday, day 3 to day 5 of your program.

[03:31:38] - [03:31:41]

Shasti: I hope... All of us are here.

[03:31:42] - [03:31:43]

Shasti: Great.

[03:31:44] - [03:31:47]

Shasti: Perfect. Now that most of us are clear.

[03:31:47] - [03:32:06]

Shasti: This is how the format or our session flow is gonna look like starting from tomorrow. 6pm to 7pm, we will have bonus office hours, and 7pm to 7.30, we will have break. Because again, at 7.30pm, our main session, which is part of your schedule, will start accordingly.

[03:32:06] - [03:32:17]

Shasti: So, we will take a break from 7 to 7.30. We will not have any session over there. You folks, whoever is joining the office hours, can go ahead and rest up, and then join back again at 7.30 for our main session.

[03:32:19] - [03:32:25]

Shasti: It will be the same link, the links will be available on the LMS, so you do not have to worry about the links.

[03:32:26] - [03:32:43]

Shasti: No timings will be changed. This is the, timings that we are going to conduct because we are communicating about it. Office hours from 6pm to 7pm, and session timings 7.30pm to 11.30 or 12, depending on how our, breakout room activities goes.

[03:32:45] - [03:32:51]

Shasti: You will not get the session link on WhatsApp, but you will get the reminder messages on WhatsApp group that you are part of.

[03:32:51] - [03:32:59]

Shasti: Yes, folks, you will be getting the recordings. I hope I'm making it clear. Any questions about it, yes, you will be getting the recordings.

[03:33:00] - [03:33:01]

Shasti: Yes.

[03:33:01] - [03:33:18]

Shasti: I am assuming that all of us are clear about this, and I do not have to repeat about what are office hours, or why do we need to join. It is completely optional. If you do have prior commitments, we completely understand and respect it. So, if you're not able to make it, do not worry about it, you will have the recordings on LMS.

[03:33:19] - [03:33:30]

Shasti: How to log into Slido? Do not worry about any of such things. Tomorrow, when we start the Office Arch, just join it, and we will just share a link. All you need to do is open the link, and you'll be able to drop the questions.

[03:33:34] - [03:33:35]

Shasti: Great.

[03:33:36] - [03:33:48]

Shasti: Perfect. With that, we will get into, today's breakout room activity. Before that, let me quickly showcase on what we are going to build in today's breakout room.

[03:33:51] - [03:33:58]

Shasti: Great. I'm assuming that you guys can still see my screen, right? A quick thumbs up or yes in the chat?

[03:33:59] - [03:34:13]

Shasti: Okay, perfect. So this is the workbook that we are going to do in today's breakout room activity. If you're talking about the workflow, this is not same as what Uttam did in the 3-hour session, because as I said.

[03:34:13] - [03:34:20]

Shasti: The workflow that we thought in last 3 hours is something that would take for us an entire day to get to that outcome.

[03:34:20] - [03:34:38]

Shasti: And most of the tools that Uttam used are paid tools, and also, we will not be able to cover the entire workflow in a span of 1.522 hours in our breakout room activity, right? Assuming that most of you will not even have access to the paid versions of the tool. So that's why what we'll be doing is, instead of that workflow.

[03:34:39] - [03:35:03]

Shasti: We will be building an AI commercial with all the free tools that are available out there. You will be providing... you will be producing a video for a brand called Aura Beans, which is a coffee brand, which we have generated, and you will use all the free models and tools that are available out there, like Nano Banana, you will be using Google Flow, and then we'll use Canva to combine all these assets that you're creating and the animations that you're creating, and we will give it a life.

[03:35:04] - [03:35:06]

Shasti: This is what we are going to do.

[03:35:08] - [03:35:22]

Shasti: The 30-minute AI challenge? No, you are not going to, produce a 30-minute video. What we meant as 30-minute AI commercial challenges, to produce this entire AI commercial of maybe 5 seconds or 10 seconds, 30 minutes is what you would require.

[03:35:22] - [03:35:24]

Shasti: That's what we meant.

[03:35:24] - [03:35:25]

Shasti: Right?

[03:35:25] - [03:35:29]

Shasti: Are you guys clear on what we are going to do in the breakout rooms?

[03:35:32] - [03:35:33]

Shasti: Yes.

[03:35:33] - [03:35:51]

Shasti: Now, one issue that we might face in the breakout rooms is credit issues of Google Flow, because Google Flow generally gives 50 credits on a free account per day, right? If you have already used it, or if you're facing some issues with the given prompts, folks, the objective of the breakout room is not

[03:35:52] - [03:36:04]

Shasti: to getting to that perfectionist mode, right? For us to learn on how these tools work, on how to create such videos. So if you're sticking to the prompts that we have given in the workbook, you should be able to generate the assets

[03:36:04] - [03:36:07]

Shasti: And animate it within 50 credits.

[03:36:07] - [03:36:28]

Shasti: But if you are facing any credit issues, again, that is not something that I can solve for you guys, but what I can recommend is try using two different accounts, right? When you're logging into Google Flow, if you created two videos, and then if you're out of credits, sign in again with another email if you have an alternate email, and use that to create a video, right?

[03:36:28] - [03:36:30]

Shasti: I hope that is clear.

[03:36:34] - [03:36:52]

Shasti: Great. Now, a few of you might also have questions about what if we want to go ahead and explore what Uttam thought, or the playbook of Vaib, right? So, for that, we have got it covered. If you go to LMS and click on Resources and Recordings, right?

[03:36:54] - [03:36:59]

Shasti: Breakout rooms are not yet created, just give me another 5 minutes, and we will be getting into breakout rooms.

[03:36:59] - [03:37:16]

Shasti: The workbook link is already shared in the chat. So this is the post I was talking about. Colm, if you want to share this brief document that you have made in the chat for everybody, maybe you can drop it. If not, maybe after the session, we will be able to drop it in the chat as well, right?

[03:37:16] - [03:37:17]

Shasti: Yeah.

[03:37:18] - [03:37:30]

Shasti: Coming back to the workbook that I was talking about. So, doesn't matter if you're C14 IST or C14EST, just scroll all the way down to Day 2, right, and then click on Resources.

[03:37:31] - [03:37:48]

Shasti: Once you do that, you will see something called Additional Workbook, and also the cheat sheet that we shared on the chat, and also Hutam Shade is also available here. If somebody have missed it taking it from the chat, just go ahead on your LMS, and you can get it from there. Now, if you click on this additional workbook that is there on the LMS,

[03:37:49] - [03:37:54]

Shasti: you will be directed to something like this. Instagram AI Workflow.

[03:37:54] - [03:38:09]

Shasti: This is the complete playbook that Uttam has taught in the last 3 hours, and we have converted that into a workbook. For those of you who are interested and want to explore this, post-session, you can go ahead and do this workbook as well.

[03:38:10] - [03:38:16]

Shasti: But in session today, in the breakout room, we will be building the AI commercial video. I hope that is clear.

[03:38:17] - [03:38:36]

Shasti: So, if you have any questions about why are we not doing this in the breakout room, again, I'm answering it for the one last time, because I do not want all of you to come back from the breakout rooms and say the same thing that I wanted to address, which is, one, this is time-consuming, we will not be able to do it just in 1 to 1.5 hours in the breakout rooms.

[03:38:36] - [03:38:38]

Shasti: Two, most of these tools required paid account.

[03:38:39] - [03:38:54]

Shasti: Which most of you might not have access to, so it is your personal choice. If you want to explore this playbook and build it for yourself, go ahead and explore it. We have given you a workbook which we can do it with all the free versions that are available out there, which is building the commercial video.

[03:38:56] - [03:39:14]

Shasti: Again, I'm not gonna share the workbook link on the chat that is already available on LMS, because we are in Day 2 of the program, and we should be starting, getting used to exploring LMS, because that would help you guys in the future sessions as well. So go to LMS, click on Day 2, Resources, you will find the additional workbook.

[03:39:16] - [03:39:24]

Shasti: I hope that is clear. Guys, one last check if you are clear about what we are going to do, and then we'll introduce the commenters for the day, and then get into the breakout rooms.

[03:39:25] - [03:39:35]

Shasti: Yes, very clear. If somebody is not clear, please do use AI Companion, or stay back. Once we get into the breakout rooms, I'll be here to answer your questions.

[03:39:38] - [03:39:39]

Shasti: Perfect. Enough.

[03:39:43] - [03:39:59]

Shasti: coming to our wonderful, co-mentors for the day. You have already met Samrdi, Vishwas, Cameron, Arshad, Sai, and Sandeshesh yesterday, so today we have Jay, who's the founder of Jay Prince. Jay, if you can quickly say hi, that would be good.

[03:40:00] - [03:40:04]

Jay Outskill: Hi everyone, excited to be here, and excited to get going with the breakout rooms.

[03:40:05] - [03:40:10]

Shasti: Great. And then we have Jordan, who's a co-founder. Hey, Jordan, welcome back to our session.

[03:40:11] - [03:40:13]

Jordan Outskill: Hey guys, great to be here.

[03:40:13] - [03:40:28]

Shasti: Perfect. So, we have all the wonderful co-mentors here to help you guys in the breakout rooms. With that said, team, we can quickly share workbook link, reflection link, and the webinar ID for one last time in the chat, and then we'll get into the breakout rooms.

[03:40:35] - [03:40:43]

Shasti: There you go. Sumedha has already dropped everything that you would want in the chat, and we will get started in the breakout rooms in another second.

[03:40:45] - [03:40:58]

Shasti: Webinar ID is for if somebody is trying to join the Zoom app, but facing issues joining from the LMS. You can just open the Zoom app, enter this webinar ID, and you will be joining the session without having to go into LMS.

[03:41:10] - [03:41:10]

Shasti: Yep.

[03:41:11] - [03:41:18]

Shasti: Breakout rooms will be open in another minute. You guys can go ahead and join your breakout rooms and get started with the activity.

[03:41:33] - [03:41:34]

Shasti: Okay.

[03:41:34] - [03:41:38]

Shasti: Where do you click for breakout rooms in LMS? No.

[03:41:38] - [03:41:58]

Shasti: Again, you will not, have to click on LMS to go to your breakout rooms. That happens on Zoom. So if you have joined from Zoom app, as soon as we have created the breakout rooms, you would have got a pop-up saying that join so-and-so breakout room. If you have missed it, just click on the more option on your screen, and you will be seeing an option to join the breakout room.

[03:41:58] - [03:42:06]

Shasti: If you have joined from Zoom web, unfortunately, you will not be able to join the breakout room, so please do drop off and join from web... sorry, join from app and not web.

[03:42:06] - [03:42:10]

Shasti: I hope that clears your question about how to join the breakout rooms.

[03:42:21] - [03:42:25]

Shasti: Munesh, yes, that is a Zoom's,

[03:42:26] - [03:42:48]

Shasti: SOP, I would say, because that is not something that we are doing, and we do not have control over there. If you're dropping off and joining again, it takes it as a new user, so you will be allotted a different room. But if you would want us to help you in that, what you can do is, once you're joined back from a different device, and if you want to go back to the same room that you were before, just drop it in the chat, team will be here, or I'll be here, and I'll be able to help you.

[03:42:49] - [03:42:50]

Shasti: Hope that helps.

[03:44:41] - [03:44:52]

Shasti: Hey folks, I still see a couple of you here in the main room. Let me know if you guys have already joined breakout room with another device. If you're facing any issues, please do drop it in the chat, I'll be able to help you guys.

[03:45:06] - [03:45:09]

Shasti: Naresh, if you have joined from the Zoom app.

[03:45:09] - [03:45:16]

Shasti: That should not be an issue. I'm sending you invite again to join a breakout room. You'll get a pop-up. Please do join.

[03:45:26] - [03:45:36]

Shasti: Salonee, I'm sorry if I'm pronouncing your name wrong, but I cannot allot you a breakout room because you have joined from Zoom web and not Zoom app, so please do join from Zoom app.

[03:45:36] - [03:45:39]

Shasti: Then you'll be getting a pop-up to join the breakout room.

[04:21:05] - [04:21:08]

Shasti: Hey folks, if you're done with the...

[04:21:08] - [04:21:19]

Shasti: workbook, please do drop your feedback. I'm gonna share the feedback form link here in the chat, and go ahead and generate your reflection of day two as well.

[04:21:19] - [04:21:33]

Shasti: Once you do that, feel free to drop off. We will be connecting again tomorrow at 7.30pm IST for our main session, and if you're planning to join the bonus office hours, we will be connecting at 6pm IST tomorrow.

[04:30:50] - [04:31:04]

Shasti: Hey folks, if you're done with the workbook, fill the feedback form and generated your reflection batch. We are done for the day, you guys can go ahead and drop off, just make sure you have given the feedback on how the breakout room activity was.

[04:31:04] - [04:31:17]

Shasti: And, then you can drop off. If you are planning to join the bonus office hours, we will be connecting again at 6pm tomorrow. If not, we will be connecting at 7.30pm ISD. Thank you so much for making it live to today's session.

[04:31:19] - [04:31:22]

Shasti: Yep, see you tomorrow, guys, whoever is dropping off.

[04:34:40] - [04:34:57]

Shasti: Folks, whoever is, back in the main room, if you guys are done with the workbook, just go ahead, post it on the reflection channel and the gratitude channel, let us see what kind of

videos did you get generated, and, you can drop off. If you have filled the feedback form, perfect, go ahead and drop off.

[04:34:57] - [04:35:03]

Shasti: We will see you guys again tomorrow at 6pm for our bonus officers. If not, 7.30pm for our main session.

[04:35:04] - [04:35:07]

Shasti: I'll also drop the reflection link.

[04:35:07] - [04:35:09]

Shasti: And the breakout room feedback link.

[04:35:10] - [04:35:11]

Shasti: Excuse me.

[04:35:17] - [04:35:24]

Shasti: Yeah, you have your reflection link and the breakout room, feedback form. Go ahead and, make use of it.

[04:45:12] - [04:45:22]

Shasti: For those of you who are back in the main room, if you guys are done with the breakout room and, generated your reflection badge, and also given the feedback form.

[04:45:22] - [04:45:34]

Shasti: I mean, feedback. You guys are good to drop off from the session. We will be connecting with you again tomorrow at 6pm IST, if you're attending the bonus session. If not, 7.30pm IST.

[04:45:35] - [04:45:37]

Shasti: Thank you for joining, you can drop off.

[04:45:39] - [04:45:41]

Shasti: Yep, see you tomorrow.

[04:45:43] - [04:45:47]

Shasti: Gilbert, I am sending you invite

[04:45:47] - [04:45:53]

Shasti: to Room 1 again, so you should be able to join it from the other device as well.

[04:46:01] - [04:46:05]

Shasti: Yeah, I have sent you an invite to the room that you would request.

[04:46:05] - [04:46:06]

Shasti: Please do accept the invite.

[05:00:15] - [05:00:30]

Shasti: Hey folks, Huar is done with the breakout rooms and are back in the main session. If you have generated your reflection for the day and submitted the feedback form, you guys can drop off. We'll be connecting tomorrow at,

[05:00:30] - [05:00:48]

Shasti: 6pm IST if you are planning to join the bonus office hours. If not, 7.30pm IST for our main session. Thank you so much for joining. Don't forget to post the videos that you created on Reflection Channel. Also, show gratitude to the mentors who helped you in the breakout rooms on the Gratitude channel as well. Thank you so much.

[05:00:55] - [05:01:14]

Shasti: Mercy, if you are very particular on what you would want to learn, and if you need help, from the mentors, office hours is where you can make use of it, because you can just join and ask questions about anything that you're trying to learn in the field of AI. Drop your questions there, and mentors will be able to answer live.

[05:01:19] - [05:01:22]

Shasti: Whoever is dropping off, thank you so much, we will see you tomorrow.

[05:10:41] - [05:10:59]

Shasti: For those of you who have, joined back the main room from your breakout rooms, yes, we are done with the breakout room activity. I'm just waiting for the other folks to finish and come back to the main room. If you are done with the breakout room, I'll quickly drop the reflection link and the feedback form link in the chat.

[05:10:59] - [05:11:05]

Shasti: Go ahead, generate your badges, and also do give us the feedback on how your breakout room was.

[05:11:06] - [05:11:09]

Shasti: Then you are good to drop off from the session.

[05:11:09] - [05:11:13]

Shasti: Perfect. I see most of you have already given the feedback. Go ahead and drop off.

[05:11:13] - [05:11:24]

Shasti: If you are planning to attend the bonus office hours, we will be connecting tomorrow at 6pm IST. If not, we'll be connecting at 7.30pm IST.

[05:11:24] - [05:11:32]

Shasti: Apart from the reflection and feedback, we do not have anything else for today's session. Go ahead and drop off. Meeting link for,

[05:11:32] - [05:11:36]

Shasti: Okay, I think all of us are back in the main room.

[05:11:38] - [05:11:45]

Shasti: How was it, everyone? How many of you were able to build your first-ever AI commercial video? Let me know in the chat.

[05:11:45] - [05:11:55]

Shasti: Also, please do go ahead and drop the links and videos on the Reflection channel, so that we'll be able to take a look, because definitely I'll not be able to take a look if you post it in the chat.

[05:11:56] - [05:11:57]

Shasti: Okay.

[05:11:57] - [05:12:11]

Shasti: most of you are saying that you were able to create the video, and I see a few of them saying that couldn't do it. What was the issue for you guys that it did not work? I'm assuming that the credit issues with the tools

[05:12:15] - [05:12:16]

Shasti: Okay.

[05:12:19] - [05:12:41]

Shasti: No worries, whoever is facing any issues, creating the workflow, try it post-session, and if you have any questions, drop it on the AskDav channel, and the mentor will be able to look into all the questions. With that, thank you so much, all the amazing commenters, for helping our learners. We'll be seeing you guys again tomorrow. With that, I'll let you go and get some good amount of rest. I'll take it up from here.

[05:12:42] - [05:12:49]

Shasti: Let's drop all our gratitude to our amazing Komentor folks here in the chat, also on our LMS as well.

[05:12:53] - [05:13:09]

Shasti: Okay, where to upload the file in LMS. So, if you're talking about the video that you generated, go ahead and upload it on the reflection channel. If you're talking about the gratitude I'm talking about, there is a separate section called Gratitude on LMS. Try exploring that, and then you can post it over there.

[05:13:12] - [05:13:28]

Shasti: Okay, with that, team, we can quickly drop the reflection link and the feedback form, for one last time in the chat. I'll just wait for everyone to drop in the feedback, if you have not yet done, and if you have not yet generated your Day 2 reflection, go ahead and generate it.

[05:13:30] - [05:13:48]

Shasti: And to quickly, give you guys a heads up, tomorrow we will have our bonus hour, office hours starting at 6pm IST, and if you're not gonna make it live to that session, we'll be connecting again at 7.30pm IST, where we are going to get introduced to the world of automations, and if you have not yet

[05:13:48] - [05:14:01]

Shasti: explored the tool in it, and go ahead and explore it, and do check out your pre-reads, because that would help you to get context on what we are covering with the session, and that is everything that you would have to do for tomorrow's session.

[05:14:06] - [05:14:23]

Shasti: Sunil, if you're talking about the bonus tools that are part of the course, you already have access to it, which is available on LMS, which is under Welcome and Next Steps. Go ahead and try redeeming it. If you need any help redeeming those tools, please do try to support at the ritoutskill.com. I hope that answers your question.

[05:14:25] - [05:14:31]

Shasti: I'll just wait for another minute for the rest of you to fill in the feedback form, and then we will be closing the session.

[05:14:35] - [05:14:45]

Shasti: whoever is dropping off, thank you so much for making it live today. I hope you guys had a good time. Go ahead, take good amount of rest, and

[05:14:45] - [05:14:47]

Shasti: We'll see you guys tomorrow.

[05:14:51] - [05:14:52]

Shasti: Yeah.

[05:14:59] - [05:15:04]

Shasti: Also, need to check how to join the WhatsApp group. Soni looks like you have...

[05:15:04] - [05:15:17]

Shasti: Not yet explored the LMS. On your LMS, under Welcome and Next Steps, if you scroll down, you will see the WhatsApp Community Group link over there, so please do go ahead and join from there. No links will be shared on the chat.

[05:15:18] - [05:15:24]

Shasti: If you're talking about the video you guys generated, it is... you guys can post it on the reflection channel.

[05:15:27] - [05:15:38]

Shasti: Perfect. With that, we will be closing for the day. Thank you so much, everyone, again, for joining today's session. Make sure you're joining tomorrow's main session, even if you're not able to make it to the

[05:15:38] - [05:15:55]

Shasti: officers, because we are going to get introduced to the world of automation. It's a very fun topic if you are not familiar with automations, and it is important for you to attend tomorrow to get started with workflows, AI agents, and automation, so make sure you're showing up. And yeah, with that, thank you so much, have a great night.
